# INTERNATIONAL FUND SELECTION FROM GENERALI PANEUROPE

## Before you invest

- The client is responsible for the choice of Funds and any choice of Funds is entirely at the clients own risk.
- The value of each Fund is not guaranteed and can go up as well as down. Past performance of Funds are not a guarantee of future performance.
- The value of each Fund is subject to market, interest rate and exchange rate fluctuations.
- Partial Surrenders will reduce the value of your Generali PanEurope Plan.
- Before making any decision or taking any action that may affect your personal finances or business, you should consult with your Insurance Intermediary or professional adviser to ensure that the Funds meet your specific requirements.

## A wealth of global investments

As a client of Generali PanEurope dac (Generali PanEurope) you have the opportunity to access an extensive range of Funds. Most offer exciting potential for tax-efficient growth from a stable international location and each is managed by world class professional asset managers.

These Funds range from the low risk to those offering capital protection through to those aimed at the more adventurous client. In addition, each has been risk-rated to help you select the Funds that most closely match your attitude to risk.

## Important Fund information

The bid price of units in each Fund is used to determine the value of your units of the Fund. Bid prices are calculated by the relevant Fund manager by taking a market valuation of the investments in each Fund and dividing by the number of units in each Fund.

Funds deal monthly, fortnightly, weekly or daily. Please see the individual Fund Prospectus for further information.

Gearing of up to 15% is allowed on Generali Worldwide Funds. Please see the individual Fund Prospectus for the details on investment restrictions and borrowing power.

### Fund charges

The following charges apply to Funds:

- The initial charge (bid/offer spread);
- Annual Management Charges;
- Other charges as specified in the Fund documentation;
- Generali PanEurope charges as specified in the Terms and Conditions.

Different Funds will have different charges. You should read and understand the Fund Factsheets of the Funds you select to ensure that you understand the charges applicable to your Funds. If you have any queries, you should contact your Insurance Intermediary or Generali PanEurope.

As a guide the Annual Management Charge ranges from 0.5% to 3% p.a. of the net asset value. The maximum bid/offer spread or initial charge is 5.75% of the underlying Fund which, after applying discounts negotiated by Generali PanEurope, is substantially reduced to a maximum of 2% and a minimum of 0%.

Fund houses reserves the right to alter their charges. 3 months' notice, where possible, will be given on all changes.

---

### **Fund risks**

Each Fund is subject to market, interest rate and exchange rate fluctuations, as well as other risks. The value of Funds and their yields may go down as well as up. Different Funds will have different level of risks. Please see the SRRI rating explanation for a guide to the level of risk. For further details, please refer to the individual Fund prospectus.

Past performance is shown for indication only and is not a guide to future Fund performance.

Generali PanEurope reserve the right to exchange any of the units allocated to your plan for units in another Fund. If this happens, we will attempt to give you 3 months' notice.

### **Further information**

This guide provides details on the SRRI risk rating as well as a general list of the Funds offered by Generali PanEurope. Fund prospectus and factsheets are available on Morningstar which can be accessed via Generali PanEurope's Service Centre. You can also contact your Insurance Intermediary and Generali PanEurope if you require further information.

### **Important**

Please note that this guide is not intended as a recommendation that you select certain Funds. You should seek independent advice from your insurance intermediary or professional adviser before making any decisions. This document should be read in conjunction with the individual Fund factsheet and the relevant product literature.

This information is correct as at December 2016.

**Due to potential changes in market conditions, we cannot guarantee that Funds corresponding to your choices will continue to be available for investment or redemption. In the event of withdrawal of an investment option Generali PanEurope will propose an alternative for you.**

# INTERNATIONAL FUND SELECTION GUIDE

## SYNTHETIC RISK AND REWARD PROFILE

### Industry Standard

To help you select the funds that best fit with your approach to risk, Generali PanEurope use the Synthetic Risk and Reward Indicator (SRRI) <sup>^</sup>. The indicator is calculated based on the volatility of the fund for the past five years and the values obtained are translated into one of the seven risk categories available based on pre-defined volatility intervals (see below).

### Risk Classes

Low number = Low volatility. High number = High volatility

		Annualised Volatility Intervals	
		Equal or Above	Less than
Potentially lower reward	U*	-	-
	1	0.0%	0.5%
	2	0.5%	2%
	3	2%	5%
	4	5%	10%
Potentially higher reward	5	10%	15%
	6	15%	25%
	7	25%	-

\*Funds marked with the symbol 'U' indicate that there is currently insufficient data available to calculate an SRRI.

Not all funds on the Generali PanEurope unit-linked fund range can be assigned a synthetic risk and reward indicator. This may occur where not all of the relevant calculation information is available. For example, if the fund is less than 5 years old, the annualised volatility over 5 years cannot be calculated. These funds appear under the category 'Unclassified'.

Each fund on the unit-linked fund range has been assigned a risk category where possible. For example, funds with very low volatility will have a 1 or 2 rating on the risk scale. These funds generally have a more cautious approach with little or no exposure to equity markets and usually invest in cash or money market securities. You should be aware that for funds considered lower risk, the potential for reward will be lower as these funds are expected to yield lower returns than funds with a high equity exposure.

Please note that the fund's categorisation is not constant and may change over time.

Funds with high volatility will have a 6 or 7 rating on the risk scale. These funds tend to have a high exposure to less developed, emerging equity markets or use high risk alternative assets within their investment strategy. Over the long term, exposure to equity markets could provide the opportunity for higher investment returns however it also brings a higher degree of investment risk. Although investment gains could be made when markets are buoyant, losses can quickly occur when markets take a downturn. You must therefore be prepared not only for the potential for higher returns but also the potential for higher losses when investing in these types of funds.

# INTERNATIONAL FUND SELECTION GUIDE

## Risk Scale

You should note that investment involves risk. Past performance is not indicative of future performance. Investors and/or their investment advisers are responsible for their investment decisions and any choice of funds is entirely at their own risk. Please note that investment performance (as well as the income accruing to an investment) may go down as well as up.

## Important Notes

^The 'Synthetic Risk and Reward Indicator' (SRRI) was defined in 2009 by the Committee of European Securities Regulators (CESR) with the aim of providing investors with a method of assessing an underlying fund's risk. This SRRI calculation has been provided by Morningstar based on guidelines provided by the European Securities and Markets Authority (ESMA) and Morningstar's interpretation, methodology and implementation of said guidelines.

- 'Annualised Volatility Intervals' as defined in the grid above reflect the increasing level of risk borne by the fund and, therefore, its position in the risk scale. Volatility is a measure of variance of a financial instrument's price over a particular time period, which means the greater the movement in fund prices, the more volatile the fund's performance is. Funds with high volatility are generally associated with higher risk but potentially higher reward. Funds with low volatility are generally associated with lower risk but with lower potential reward.

**CF MITON CAUTIOUS MULTI ASSET FUND GBP****ES #**

**Aim:** This is a global balanced fund giving a high priority to attractive returns and low volatility through a top down, macro-economic approach. The manager's approach is based on a conviction led, flexible approach to portfolio construction, seeking to use skills in asset allocation and investment selection to deliver superior returns without taking undue risk. In addition to the use of open ended funds, the manager invests in closed-ended funds and an element of direct equities to enhance the range of opportunities open to the portfolio and in pursuit of additional returns. The fund has an exceptionally attractive long-term record in terms of both risk and return. Martin Gray has been the manager since inception. The consistency of returns through a range of market conditions and the fund's superior long-term track record make it an ideal core holding for long-term investors seeking smoother returns via a flexible, conviction based, balanced multi asset fund.

**INVESTEC MULTI-ASSET PROTECTOR A ACC NET****ES #**

**Aim:** The Fund aims to grow your investment over the long term and provide protection (the minimum amount you can expect to get back from your investment) at 80% of the Fund's highest ever share price. The Fund invests around the world in a wide range of investments. These include shares of companies (up to 85%); bonds (contracts to repay borrowed money which typically pay interest at fixed times issued by governments or companies); property; commodities; cash (up to 100%); and other eligible asset classes. Investment may be directly in the assets themselves (excluding property and commodities) or indirectly through other funds (up to 100%). The Fund may invest more than 35% of its assets in securities issued or guaranteed by an EEA state. The Fund may also use derivatives (financial contracts whose value is linked to the price of an underlying asset) for investment purposes and one of the ways the Fund seeks to provide the 80% protection is through investment in a derivative contract. The cost of this contract is between 0.15-0.5% and is charged to the Fund. This cost is in addition to the Fund's ongoing charge.

EQUITY GLOBAL						SRRI RATING – U
CARMIGNAC PORTFOLIO EMERGENTS F USD ACC HEDGED						ES #
<b>Aim:</b> This fund invests mainly in international equities directly or indirectly through the UCITS that it holds, bearing in mind that investment in UCITS is limited to 10% of the fund's net assets. The aim of the fund is to outperform its reference indicator: the MSCI EM NR (USD), with lower volatility, over a recommended investment period of at least five years. The reference indicator is calculated with net dividends reinvested. It is calculated by MSCI in dollars, then converted into euro for EUR shares and hedged shares, and into the relevant reference currency for unhedged shares (Bloomberg code NDUUEGF). The sub-fund is managed on a discretionary basis with an asset allocation bias towards emerging market equities. However, it does not rule out investment in emerging market debt.

FIDELITY FUNDS – GLOBAL DIVIDEND FUND A ACC – EURO (HEDGED)						ES #
<b>Aim:</b> The fund aims to achieve income and long-term capital growth principally through investments in income producing equity securities globally. The Investment Manager will target investments which it believes offer attractive dividend yields in addition to price appreciation.						
Launch Date	Base	Currency	DF	AMC	PF	ISIN Code
January 2012	Luxembourg	Euro	Daily	1.50%	0%	LU0605515377

FIDELITY FUNDS GLOBAL FOCUS FUND A ACC EUR (HEDGED)						ES #
<b>Aim:</b> The fund aims to achieve long-term capital growth from a portfolio primarily invested in stocks across the world's stock markets. The manager is free to select any company regardless of size, industry or location and will concentrate its investments in a more limited number of companies and therefore the resulting portfolio will be less diversified.

**PROPERTY****SRRI RATING – U****CORAL STUDENT PORTFOLIO CLASS D USD FUND**

**Aim:** The investment objective of the compartment is to achieve significant long-term capital growth by investing principally in underlying funds investing in student housing primarily located in various cities and regions of the G20 countries. A portion of the compartment may be kept in investments such as bank deposits or other high quality fixed income investments such as money market instruments (both short and long dated), bonds (both government and corporate) and investment vehicles (both onshore and offshore) which in turn invest in any of the above. The purpose of such investments is to earn interest and capital gains for the compartment whilst money is waiting to be invested in the underlying funds. Investment in the underlying fund offers the opportunity for long-term investment in property without the usual problems of individual property management and the worry of short-term property value volatility. It must be remembered, however, that past performance is no guarantee of future success. The investment is intended to be long term.
