## INTRODUCTION

This document contains selected important information to help you make an informed investment decision and understand your rights as an investor. In this simplified prospectus:

**we, us, our** and **AGF** refer to AGF Investments Inc.

**you** refers to the registered or beneficial owner of a security of a Fund.

**AGF Group of Funds** or **AGF Funds** refers to all of our AGF mutual funds offered to the public under this simplified prospectus and an annual information form.

**Board** refers to the board of directors of the Tax Advantage Group.

**Class** or **Classes** refers to a class or classes of the Tax Advantage Group.

**Classic Series** refers to the Classic Series securities of AGF Canadian Large Cap Dividend Fund offered in this simplified prospectus.

**CRA** refers to the Canada Revenue Agency.

**DPSP** refers to a deferred profit sharing plan.

**ETFs** refers to investment funds traded on a stock exchange (i.e. exchange traded funds).

**Focus Funds** refers to AGF Equity Income Focus Fund and AGF Income Focus Fund.

**Fund** or **Funds** means a fund or funds within the AGF Group of Funds or class or classes of the Tax Advantage Group, including Portfolios, Portfolio Classes and Unit Trusts.

**Gold Label** refers to, as applicable, Series Q and Series W securities of the Funds offered in this simplified prospectus.

**Household** refers to a single investor holding any series of securities (except Series D, Series I, Series O and Series S) of the Funds (excluding AGF Canadian Money Market Fund) within one or multiple accounts, plus accounts belonging to their spouse and family member(s) residing at the same address, as well as corporate, partnership or trust accounts for which the investor and other member(s) of the Household beneficially own more than 50% of the voting equity. Households may be established by AGF and/or after AGF receives authorization from the financial advisor representing any member(s) of the Household. The minimum investment requirements for Gold Label securities are based on the Household assets in aggregate instead of assets of each member of the Household. See *Buying Funds – Minimum Investment*.

**Group RESP** refers to a group registered education savings plan.

**Group RRSP** refers to a group registered retirement savings plan.

**Group TFSA** refers to a group tax-free savings account.

**IPU** refers to an index participation unit which is a security traded on a stock exchange in Canada or the U.S. and issued by an issuer the only purpose of which is to (a) hold the securities that are included in a specified widely quoted market index in substantially the same proportion as those securities are reflected in that index, or (b) invest in a manner that causes the issuer to replicate the performance of that index.

**LIF** refers to a life income fund.

**LIRA** refers to a locked-in retirement account.

**LRIF** refers to a locked-in retirement income fund.

**LRSP** refers to a locked-in retirement savings plan.

**MF Series** refers to the Mutual Fund Series securities of the Funds offered in this simplified prospectus.

**Portfolio Class** or **Portfolio Classes** refer to the AGF Elements portfolio classes offered under this simplified prospectus that are structured as classes of the Tax Advantage Group and issue shares.

**Portfolio or Portfolios** refer to the AGF Elements portfolio or portfolios offered under this simplified prospectus that are structured as mutual fund trusts and issue units.

**PRIF** refers to a prescribed retirement income fund in Saskatchewan and Manitoba.

**registered dealer** refers to the firm the registered representative works for.

**registered representative** refers to an individual who is registered to sell mutual funds.

**RDSP** refers to a registered disability savings plan.

**RESP** refers to a registered education savings plan.

**RLIF** refers to a restricted life income fund.

**RLSP** refers to a restricted locked-in savings plan.

**RRIF** refers to a registered retirement income fund.

**RRSP** refers to a registered retirement savings plan.

**securities** refer to units and/or shares, as applicable, of the Funds.

**securityholders** refer to unitholders and/or shareholders, as applicable, of the Funds.

**Series D** refers to the Series D securities of the Funds offered in this simplified prospectus.

**Series F** refers to the Series F securities of the Funds offered in this simplified prospectus.

**Series FV** refers to the Series FV securities of the Funds offered in this simplified prospectus.

**Series I** refers to the Series I securities of the Funds offered in this simplified prospectus

**Series O** refers to the Series O securities of the Funds offered in this simplified prospectus.

**Series Q** refers to the Series Q securities of the Funds offered in this simplified prospectus.

**Series S** refers to the Series S securities of the Funds offered in this simplified prospectus.

**Series T** refers to the Series T securities of the Funds offered in this simplified prospectus.

**Series V** refers to the Series V securities of the Funds offered in this simplified prospectus.

**Series W** refers to the Series W securities of the Funds offered in this simplified prospectus.

**Tax Act** refers to the *Income Tax Act* (Canada).

**Tax Advantage Group** refers to AGF All World Tax Advantage Group Limited, a mutual fund corporation that currently offers 20 different classes of securities and may

offer more classes in the future. Each class is like a separate mutual fund with its own investment objective.

**TFSA** refers to a tax-free savings account.

**Trust Funds** refers to the AGF Funds that are structured as trusts and issue units.

**underlying fund** refers to an investment fund (including an AGF Fund, an ETF, Underlying Non-IPU ETF, U.S. Underlying Non-IPU ETF or otherwise) in which a Fund invests.

**Underlying Non-IPU ETF** means an ETF that is a mutual fund domiciled in Canada or the U.S., the securities of which are not IPU.

**Unit Trusts** collectively refers to AGF American Growth Fund up to the time when it becomes a “mutual fund trust” for the purposes of the Tax Act following the proposed merger of Harmony U.S. Equity Pool into AGF American Growth Fund, AGF Asian Growth Fund, AGF European Equity Fund and AGF Tactical Fund.

**U.S. Underlying Non-IPU ETF** means an ETF that is a mutual fund, domiciled in Canada or the U.S., the securities of which are listed for trading on a stock exchange in the U.S. and are not IPU.

In addition, AGF Canadian Large Cap Dividend Fund offers Classic Series securities under this simplified prospectus.

Series D securities are available only to investors who hold Series D securities at the time of an additional purchase.

Additional information about these securities can be found in the Funds' annual information form.

This simplified prospectus is divided into two parts. The first part, from pages 1 to 56 contains general information that applies to the Funds. The second part, from pages 57 to 220 contains specific information about each Fund.

This simplified prospectus contains information about the Funds and the risks of investing in mutual funds generally, as well as the name of the firm responsible for the management of the Funds.

Additional information about each Fund is available in the following documents:

- the annual information form
- the most recently filed Fund Facts
- the most recently filed annual financial statements
- any interim financial statements filed after those annual financial statements
- the most recently filed annual management report of fund performance
- any interim management report of fund performance filed after the annual management report of fund performance.

These documents are incorporated by reference into this document, which means they legally form part of this document just as if they were printed in it.

You can get a copy of these documents at no charge by contacting your registered representative, calling us toll free at 1-800-268-8583, e-mailing us at [tiger@AGF.com](mailto:tiger@AGF.com), or writing us at:

## WHAT IS A MUTUAL FUND AND WHAT ARE THE RISKS OF INVESTING IN A MUTUAL FUND?

Mutual funds offer a simple and affordable way for investors seeking to meet financial goals, such as saving for retirement or a child's education. But what exactly is a mutual fund and what are the risks of investing in a mutual fund?

### What is a mutual fund?

A mutual fund is an investment that allows people with similar investment goals to pool their money in a diversified portfolio. A professional portfolio manager uses that money to buy securities, such as stocks, bonds, cash or a combination of these, depending on the mutual fund's investment objectives. The portfolio manager makes all the decisions about which securities to buy and when to buy and sell them. Sometimes, the portfolio manager receives advice from a sub-advisor as well.

You invest in a mutual fund by buying securities of the fund. Each security represents a portion of the value of the investments of the fund. Mutual fund investors share in the fund's income and expenses, as well as in any gains or losses, in proportion to the number of securities they own, after taking into account any special dividends or distributions.

There are a number of advantages to investing in mutual funds over investing in securities on your own:

- **Professional money management.** Professional portfolio managers devote their time and expertise to research potential investments and to make the investment decisions. They have access to up-to-the-minute information on trends in the financial markets and other in-depth data that may not be readily available to individual investors.
- **Diversification.** Investment values can change at different times and for different reasons. Owning a variety of investments can help reduce the effect that a poorly performing investment may have on your portfolio and increase the potential for better returns over time.
- **Accessibility.** Mutual funds tend to have low investment minimums, making them accessible to most investors. It's easy to buy, switch and sell mutual funds through your registered representative.

## What are the Portfolios and Portfolio Classes?

Portfolios and Portfolio Classes are mutual funds that are designed to offer asset allocation and diversification by investing their assets in other mutual funds. The other mutual funds are referred to as underlying funds. Underlying funds of Portfolios and Portfolio Classes may, subject to limitations set out under *How mutual funds are structured*, be trusts, corporations or classes of corporations. The Portfolios are mutual fund trusts but the Portfolios may invest in mutual funds, which are trusts or corporations. The Portfolio Classes are classes of the Tax Advantage Group, a mutual fund corporation. The Portfolio Classes can invest in mutual funds which are trusts or corporations; however, the Portfolio Classes cannot invest in other classes of the Tax Advantage Group as a matter of corporate law. As a result, Portfolios and Portfolio Classes do not invest in all of the same underlying funds. Minimum investments are usually higher for Portfolios and Portfolio Classes than for traditional mutual funds.

### How mutual funds are structured

AGF has mutual fund trusts and a mutual fund corporation. The Trust Funds are mutual fund trusts which may invest in mutual funds, which are trusts or corporations. The Tax Advantage Group is a mutual fund corporation, each Class of which works like a separate fund, which in turn can invest in mutual funds, which are trusts or corporations. Both types allow you to pool your money with other investors, however, there are a few differences you should know about:

- You buy "units" of a mutual fund trust and "shares" of a mutual fund corporation. Units and shares both represent ownership.
- If a mutual fund corporation has more than one investment objective, each investment objective is represented by a separate class of shares. Each class works like a separate mutual fund. Shares are issued and redeemed on the basis of the net asset value of the class.
- A mutual fund trust has only one investment objective.
- Both classes of a mutual fund corporation and mutual fund trusts offer different series of securities, each of which has different features, including some that offer distributions of capital. You'll find more information about the different series of shares of each Class of the Tax Advantage Group and the Trust Funds under *Purchases, Switches and Redemptions*.
- You can switch between series of the same class or a different class of a mutual fund corporation,

this is called a conversion. You can also switch between series of the same trust fund, called a reclassification, or switch from one mutual fund trust to another mutual fund trust or to a class of a mutual fund corporation. Please refer to the *Switches* section of this prospectus for further detail.

- A mutual fund corporation is a single entity and taxpayer regardless of how many classes it offers. The mutual fund corporation must consolidate its income, capital gains, expenses and capital losses from all the investments made for all classes in order to determine the amount of tax payable. For example, capital gains of one class are offset by capital losses of another class. With mutual fund trusts, the capital losses of one mutual fund trust cannot be offset against the capital gains of another mutual fund trust. Mutual fund trusts are separate taxpayers.
- An allocation policy is established for a multi-class corporation whereby each asset and liability is allocated either to a specific class or shared amongst multiple classes. AGF has established a policy to determine how it will, to the extent possible, allocate all of the Tax Advantage Group's assets, including its investments, income and gains, and all of the Tax Advantage Group's liabilities, including losses and tax reassessments, to a Class or among the Classes of the Tax Advantage Group in a manner that, in AGF's opinion, is fair, consistent and reasonable.
- A mutual fund corporation pays dividends out of income or capital gains, while a mutual fund trust pays distributions out of income or capital gains. Unlike mutual fund trust distributions, dividends are not declared regularly by a mutual fund corporation. A mutual fund corporation will have to pay tax on all sources of income other than capital gains in the event that it pays capital gains dividends. A mutual fund corporation typically pays out sufficient dividends to recover tax it pays on dividends received from taxable Canadian corporations. A mutual fund trust will not pay taxes on any source of income or capital gains as long as it distributes its net taxable income to securityholders. Both mutual fund corporations and mutual fund trusts may pay distributions out of capital.
- In some cases, the same investment objective and portfolio manager may be offered both by a mutual fund trust and a class of a multi-class mutual fund corporation, although not all the same series. In such circumstances, the investor has the additional option to select a fund based on the investor's particular circumstances.

- In general, the portfolio manager will seek to fairly allocate portfolio investments between the funds. However, while the investment objective of a mutual fund trust (trust fund) and a class of the mutual fund corporation (corporate class fund) may be identical, the performance of the respective funds may not be identical for various reasons. These reasons include, but are not limited to, timing differences in available cash flow to each fund, and differences in the manner in which the portfolio manager chooses to implement investment strategies between the trust fund and the corporate class fund.

## What are the risks?

Just like any investment, mutual funds have an element of risk. A mutual fund's portfolio is made up of many different investments, depending on its investment objectives. The value of these investments can change from day to day because of changes in interest rates, economic conditions, and market and company news. As a result, the price of the securities of a mutual fund may go up or down based on these changes. When you sell your investment in a mutual fund, you could receive less money than you invested.

The level of risk depends on the mutual fund's investment objectives and the kinds of securities it invests in. A general rule of investing is that the higher the potential for gains from a particular investment, the higher the risk and potential for losses associated with that investment. Mutual funds that invest in highly liquid, short-term securities, such as treasury bills, usually offer the lowest risk because their potential returns are tied to short-term interest rates. Mutual funds that invest mainly in bonds typically have higher long-term returns, but they carry more risk because their prices can change when interest rates change. Mutual funds that invest in equity securities expose investors to the highest level of risk because the prices of these securities can rise and fall significantly in a short period of time.

You should keep in mind that mutual funds come with no guarantees. AGF doesn't guarantee that the full amount of your original investment in a fund will be returned to you. Unlike bank accounts or guaranteed investment certificates (GICs), your investment in a mutual fund isn't covered by the Canada Deposit Insurance Corporation (CDIC) or any other government deposit insurer. Under exceptional circumstances, we may temporarily suspend securityholders' rights to sell their securities. See *When you may not be able to buy, switch or sell securities* for details.

## Specific risks of the Funds

The value of a Fund's investments can change for many reasons. You'll find the specific risks of investing in each Fund under that Fund's description in this simplified prospectus. What follows is a description of these risks listed in alphabetical order.

### Asset allocation risk

Investments in a Fund are subject to risks related to the Fund's portfolio manager's allocation choices. The selection of the underlying funds and the allocation of the Fund's assets among the various asset classes and market segments could cause the Fund to lose value or cause the Fund to underperform relevant benchmarks or other funds with similar investment objectives.

### Bond Connect risk

Certain Funds may invest in People's Republic of China (PRC) Domestic Bonds which are traded on the China Interbank Bond Market or PRC Corporate Bonds which trade on the SSE or SZSE through the Hong Kong Bond Connect ("Bond Connect Program"). The Bond Connect Program was developed by the People's Bank of China and the Hong Kong Monetary Authority. Unlike the Stock Connect Programs, the Bond Connect Program has not set any quotas for investments.

### Capital erosion risk

Certain Funds, as well as Series FV, Series T and Series V securities of the Funds, may make distributions comprised in whole or in part of return of capital. A return of capital distribution represents a return to you of a portion of your own invested capital. It therefore reduces the amount of your original investment. A return of capital should not be confused with yield or income generated by a Fund. Return of capital distributions that are not reinvested will reduce the net asset value of the Fund, which could reduce the Fund's ability to generate future distributions.

### Changes in legislation risk

There can be no assurance that income tax, securities or other laws, or any administrative practice or interpretation thereof, will not be changed in a manner which adversely affects mutual funds or their securityholders.

### Class risk

Each Class of the Tax Advantage Group has its own investment objective and fees, expenses, and liabilities, including tax liabilities and reassessments, if any, which are allocated to it and tracked separately. However, there is a risk that the expenses or liabilities of one Class may affect the value of the other Classes. If one Class is unable to pay its expenses or liabilities, the mutual fund corporation as a whole is legally responsible for covering the shortfall.

### Commodity risk

Funds that invest in natural resource companies or in income or royalty trusts based on commodities, such as oil and gas, will be affected by changes in commodity prices. Commodity prices tend to be cyclical and government regulations can affect the price of commodities.

In addition, some Funds invest directly or indirectly in commodities such as gold, silver, platinum or palladium. The net asset value of these Funds will be affected by changes in the price of such commodities which may occur as a result of a number of factors, including supply and demand, speculation, central bank and international monetary activities, political or economic instability and changes in interest rates. The price of these commodities may fluctuate significantly over a short period of time causing volatility in a Fund's net asset value.

### Concentration risk

A Fund may concentrate its investments in securities of a small number of issuers. The result is that the securities in which it invests may not be diversified across many sectors or they may be concentrated in specific regions or countries. A Fund may also have a significant portion of its portfolio invested in the securities of a single issuer. A relatively high concentration of assets in a single or small number of investments may reduce the diversification and liquidity of the Fund.

### Counterparty risk

A Fund may enter into derivatives with one or more counterparties. In entering into a derivative, the Fund will be fully exposed to the credit risk associated with the counterparty. Securityholders will have no recourse or rights against the assets of the counterparty or any affiliate thereof in respect of the derivatives or arising out of the derivatives or in respect of any payments due to securityholders.

### Credit risk

Credit risk is the risk that an issuer of a bond or other fixed income security will not be able to pay interest or repay the principal when it is due. Credit risk is generally lowest among issuers that have a high credit rating from an independent credit rating agency. It is generally highest among issuers that have a low credit rating or no credit rating. Debt securities issued by companies or governments in emerging markets often have higher credit risk (lower rated debt), while debt securities issued by well-established companies or by governments of developed countries tend to have lower credit risk (higher rated debt). The prices of securities with a low rating or no rating tend to fluctuate more than securities with higher ratings. They usually offer higher interest rates, which may help to compensate for the higher credit risk.

**Cybersecurity risk**

AGF and the Funds use information technology and the Internet to streamline business operations and to improve client and advisor experience. However, with the use of information technology and the Internet, AGF and each of the Funds are exposed to information technology events, through cybersecurity breaches, which could potentially have an adverse impact on their business. In general, a cybersecurity breach can result from either a deliberate attack or an unintentional event, and may arise from external or internal sources. Cybersecurity breaches include, but are not limited to, unauthorized access to AGF's or a Fund's digital information systems (ex. through "hacking" or other malicious software code) for the purpose of misappropriating assets or sensitive information (ex. personal securityholder information), corrupting data, equipment, or systems, or causing operational disruption.

Cyber incidents affecting the Funds, AGF or the Funds' service providers (including, but not limited to, a Fund's portfolio manager, sub-advisor(s), transfer agent, and custodian) have the ability to interfere with the Funds' ability to calculate their NAV, and impede trading, the ability of securityholders to transact business with the Funds, and the ability of the Funds to process transactions including redemptions. Similar adverse consequences could result from cyber incidents affecting the issuers of securities in which the Funds invest and counterparties with which the Funds engage in transactions.

Cybersecurity breaches could cause AGF or the Funds to be in violation of applicable privacy and other laws, and incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures or reimbursement, and/or financial loss. In addition, substantial costs may be incurred to prevent any cyber incidents in the future.

While the Funds and AGF have established business continuity plans and risk management systems designed to prevent or reduce the impact of cybersecurity attacks, there are inherent limitations in such plans and systems due to the ever changing nature of technology and cybersecurity attack tactics, and the possibility that certain risks have not been identified. Furthermore, although AGF has vendor oversight policies and procedures, a Fund cannot control the cyber security plans and systems put in place by its service providers or any other third party whose operations may affect the Fund or its shareholders. As a result, the Funds and their securityholders could be negatively affected

**Depository securities and receipts risk**

In some cases, rather than directly holding securities of non-Canadian and non-U.S. companies, a Fund may

hold these securities through a depository security and receipt (an "ADR" -- American Depositary Receipt, a "GDR" -- Global Depositary Receipt, or an "EDR" -- European Depositary Receipt). A depository receipt is issued by a bank or trust company to evidence its ownership of securities of a non-local corporation. The currency of a depository receipt may be different than the currency of the non-local corporation to which it relates. The value of a depository receipt will not be equal to the value of the underlying non-local securities to which the depository receipt relates as a result of a number of factors. These factors include the fees and expenses associated with holding a depository receipt, the currency exchange relating to the conversion of foreign dividends and other foreign cash distributions into local currencies, and tax considerations such as withholding tax and different tax rates between the jurisdictions. In addition, the rights of the Fund, as a holder of a depository receipt, may be different than the rights of holders of the underlying securities to which the depository receipt relates, and the market for a depository receipt may be less liquid than that of the underlying securities. The foreign exchange risk will also affect the value of the depository receipt and, as a consequence, the performance of the Fund holding the depository receipt. As the terms and timing with respect to the depository for a depository receipt are not within the control of a Fund or its portfolio manager and if the portfolio manager chooses only to hold depository receipts rather than the underlying security, the Fund may be forced to dispose of the depository receipt, thereby eliminating its exposure to the non-local corporation, at a time not selected by the portfolio manager of the Fund, which may result in losses to the Fund or the recognition of gains at a time which is not opportune for the Fund.

**Derivative risk**

A derivative is a contract between two parties. The value of the contract is based on or derived from an underlying asset, such as a stock, a market index, a currency, a commodity or a basket of securities. It is not a direct investment in the underlying asset itself. While derivatives can be useful for hedging against losses, making indirect investments and gaining exposure to financial markets and other assets, they have certain risks:

- There's no guarantee that hedging will be effective.
- There's no guarantee a market will exist for some derivatives. This could prevent a Fund from making a profit or limiting its losses.
- Exchanges can impose trading limits that could prevent us from carrying out the derivative contract.

- The price of a derivative may not accurately reflect the value of the underlying asset.
- The other party to a derivative contract may not be able to honour its obligations under the contract.
- If money has been deposited with a derivatives dealer and the dealer goes bankrupt, the Fund may lose its deposit.
- Derivatives don't prevent changes in the market value of the investments in a Fund's portfolio or prevent losses if the market value of the investments falls.
- Some exchange traded derivatives may lack liquidity when we try to complete the derivative contract.

### **Emerging markets risk**

In emerging market countries, securities markets may be less liquid, less diverse and may provide less transparency, making it more difficult to buy and sell securities. Also, some emerging markets economies may face political or other non-economic events that may have an impact on the normal functioning of the securities markets. Further, fixed income and equity markets may become more highly correlated at times than developed markets, which may make it difficult to buy and sell securities. The value of mutual funds that invest in emerging markets may fluctuate more than those that invest in developed markets.

### **Equity risk**

The prices of individual equity securities can rise and fall with the fortunes of the companies that issue them or with general stock market conditions. Changes in the price of individual equity securities held by a Fund will affect such Fund's price.

### **ETF general risks**

Some of the Funds intend to invest in ETFs. There are risks to investing in ETFs generally.

#### *Absence of an active market and lack of operating history risk*

There is no guarantee that any particular ETF will be available or will continue to be available at any time. The ETFs may be newly or recently organized investment funds with limited or no previous operating history. Although the ETFs are or will be listed on a Canadian or U.S. stock exchange, or such other stock exchanges as may be approved from time to time by Canadian securities regulatory authorities, there can be no assurance that an active public market for the ETFs will develop or be sustained.

#### *Leverage risk*

Some ETFs may employ leverage (Leveraged ETF) in an attempt to magnify returns by either a multiple or an inverse multiple of the particular commodity, benchmark, market index, or industry sector. This can result in the Leveraged ETF experiencing more volatility than the particular commodity, benchmark, market index, or industry sector, and achieving longer-term returns that deviate significantly from the particular commodity, benchmark, market index, or industry sector. An investment in a Leveraged ETF may therefore be highly speculative. In addition, Leveraged ETFs can magnify potential gains or losses, and as a result typically have a higher degree of risk than an ETF that simply tracks the particular commodity, benchmark, market index, or industry sector.

#### *Redemption risk*

A Fund's ability to realize the full value of an investment in an underlying ETF will depend on such Fund's ability to sell such ETF units or shares on a securities market. If a Fund chooses to exercise its rights to redeem ETF units or shares, then it may receive less than 100% of the ETF's then net asset value per unit or share.

#### *Reinvestment risk*

If an underlying ETF pays distributions in cash that a Fund is not able to reinvest in additional units or shares of the ETF on a timely or cost-effective basis, then the performance of such Fund will be impacted by holding such uninvested cash.

#### *Trading price of ETFs risk*

Units or shares of an ETF may trade in the market at a premium or discount to the ETF's net asset value per unit or share and there can be no assurance that units or shares will trade at prices that reflect their net asset value. The trading price of the units or shares will fluctuate in accordance with changes in the ETF's net asset value, as well as market supply and demand on the stock exchange.

### **ETF index risks**

Some of the Funds may invest in ETFs which (i) invest in securities that are included in one or more indices in substantially the same proportion as those securities are reflected in a referenced index or indices, or (ii) invest in a manner that substantially replicates the performance of such a referenced index or indices, whether on a leveraged or unleveraged basis.

#### *Calculation and termination of the indices risk*

If the computer or other facilities of the index providers or a stock exchange malfunction for any reason, calculation of the value of the indices and the determination by the manager of the prescribed number of units or shares and baskets of securities may be delayed and trading in units or shares of the ETF may be suspended for a period of time. In the event that an index provider ceases to calculate the indices or the license agreement with the manager of an ETF is terminated, the manager of the ETF may terminate the relevant ETF, change the investment objective of the ETF or seek to replicate an alternative index (subject to investor approval in accordance with the ETF's constituting documents), or make such other arrangements as the manager determines.

*Cease trading of constituent securities risk*

If constituent securities of the indices are cease traded at any time by order of a stock exchange, a securities regulatory authority or other relevant regulator, the manager of the ETF may suspend the exchange or redemption of units or shares of the ETF until such time as the transfer of the securities is permitted by law.

*Index investment strategy risk*

The indices on which the ETFs are based were not created by the index providers for the purpose of the ETFs. The index providers have the right to make adjustments or to cease calculating the indices without regard to the particular interests of the manager of the ETF, the ETF, or the investors in the ETF.

*Rebalancing and adjustment risk*

Adjustments to baskets of securities held by ETFs to reflect rebalancing of and adjustments to the underlying indices on which they are based will depend on the ability of the manager of the ETF and its brokers to perform their respective obligations. If a designated broker fails to perform, an ETF would be required to sell or purchase, as the case may be, constituent securities of the index on which it is based in the market. If this happens, the ETF would incur additional transaction costs that would cause the performance of the ETF to deviate more significantly from the performance of such index than would otherwise be expected.

*Risk of not replicating the indices*

The ETFs will not replicate exactly the performance of the underlying indices on which they are based because the total return

generated will be reduced by the management fee payable to the manager of the ETF and transaction costs incurred in adjusting the portfolio of securities held by the ETFs and other expenses of the ETFs, whereas such transaction costs and expenses are not included in the calculation of such indices. It is also possible that, for a short period of time, the ETFs may not fully replicate the performance of such indices due to the temporary unavailability of certain securities that are included in an index in the secondary market or due to other extraordinary circumstances.

*Tracking error risk*

Deviations in the tracking by an ETF of the index on which it is based could occur for a variety of reasons. For example, where an ETF tenders securities under a successful takeover bid for less than all securities of a constituent issuer and the constituent issuer is not taken out of the applicable index, the ETF would be required to buy replacement securities for more than the takeover bid proceeds.

Adjustments to the basket of securities necessitated by the rebalancing of or adjustment to an index could affect the underlying market for constituent securities of the applicable index which in turn would be reflected in the value of that index. Similarly, subscriptions for units or shares of an ETF by designated brokers and underwriters may impact the market for constituent securities of the index, as the designated broker or underwriter seeks to buy or borrow such securities to constitute baskets of securities to deliver to the ETF as payment for the units or shares to be issued.

**ETF industry sector risk**

Some of the Funds may invest in ETFs that provide exposure to securities involving industry sector risks. Investing in one specific sector of the stock market entails greater risk (and potential reward) than investing in all sectors of the stock market. If a sector declines or falls out of favour, the share values of most or all of the companies in that sector will generally fall faster than the market as a whole. The opposite is also true.

An industry can be significantly affected by, amongst other things, supply and demand, speculation, events relating to international political and economic developments, energy conservation, environmental issues, increased competition from other providers of services, commodity prices, regulation by various government authorities, government regulation of rates

charged to customers, service interruption due to environmental, operational or other mishaps, the imposition of special tariffs and changes in tax laws, regulatory policies and accounting standards, and general changes in market sentiment. Moreover, it is possible that other developments, such as increasingly strict environmental and safety laws and regulations and enforcement policies thereunder and claims for damages to property or persons resulting from operations, could result in substantial costs and liabilities, delays or an inability to complete projects or the abandonment of projects.

Exposure to equity securities that have exposure to commodity markets may entail greater volatility than traditional securities. The value of securities exposed to commodity markets may be affected by commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes and tariffs.

The extent of these factors cannot be accurately predicted and will change from time to time, but a combination of these factors may result in issuers not receiving an adequate return on invested capital. Many industries are very competitive and involve many risks that even a combination of experience, knowledge and careful evaluation may not be able to overcome.

#### **Foreign currency risk**

Some of the Funds intend to invest in foreign securities using foreign currency. Changes in the value of the Canadian dollar compared to foreign currencies will therefore affect the value, in Canadian dollars, of any foreign securities or foreign currencies in those Funds. In particular, securities that are priced in foreign currencies can lose value when the Canadian dollar rises against the foreign currency, and can gain value when the Canadian dollar weakens against the foreign currency. Foreign governments may impose currency exchange restrictions, which could limit a Fund's ability to buy and sell certain foreign investments and could reduce the value of the foreign securities such Fund holds.

#### **Foreign market risk**

Foreign investments involve additional risks because financial markets outside of Canada and the U.S. may be less liquid and companies may be less regulated and have lower standards of accounting and financial reporting. There may not be an established stock market or legal system that adequately protects the rights of investors. Foreign investments can also be affected by social, political, or economic instability. Foreign governments may impose investment restrictions. In general, securities issued by companies in more developed markets, such as the U.S. and Western Europe, have a lower foreign market risk.

Securities issued in emerging or developing markets, such as Southeast Asia or Latin America, tend to have a higher foreign market risk.

A Fund may trade in futures, forward and option contracts on exchanges located outside Canada and outside the U.S. where the regulations of Canadian or U.S. commodity futures regulators do not apply. Some foreign exchanges, in contrast to Canadian or U.S. exchanges, are "principals' markets" in which performance with respect to a contract is the responsibility only of the individual member with whom the trader has entered into a contract and not of the exchange or clearinghouse, if any. In the case of trading on such foreign exchanges, the Fund will be subject to the risk of the inability of, or refusal by, the counterparty, to perform with respect to such contracts. The Fund also may not have the same access to certain trades as do various other participants in foreign markets. Due to the absence of a clearinghouse system on certain foreign markets, such markets are significantly more susceptible to disruptions than Canadian or U.S. exchanges.

#### **Foreign tax risk**

Certain Funds may invest in global equity or debt securities. Many foreign countries preserve their right under domestic tax laws and applicable tax conventions with respect to taxes on income and on capital ("Tax Treaties") to impose tax on dividends and interest paid or credited to persons who are not resident in such countries. While the Funds intend to make investments in such a manner as to minimize the amount of foreign taxes incurred under foreign tax laws and subject to any applicable Tax Treaties, investments in global equity and debt securities may subject the Funds to foreign taxes on dividends and interest paid or credited to them or any gains realized on the disposition of such securities. Any foreign taxes incurred by a Fund will generally reduce the value of its portfolio.

#### **Gold and silver ETFs risk**

The Funds may invest in ETFs that invest directly in gold or silver. There is a risk that part or all of the ETF's gold or silver could be lost, damaged or stolen, notwithstanding the handling of deliveries of the commodity by and storage of the commodity in the vaults of the custodian or subcustodian of the ETF. The custodian of the ETF does not typically inspect the fineness or quality of the gold or silver that is delivered to it and there can be no assurance as to the fineness or quality of the gold or silver delivered.

#### **Infrastructure securities risk**

Certain Funds may invest in infrastructure-related securities. Infrastructure-related businesses are subject to a variety of factors that may adversely affect their business or operations, including high interest costs in

connection with capital construction programs, costs associated with environmental and other regulations, the effects of economic slowdown and surplus capacity, increased competition from other providers of services, uncertainties concerning the availability of fuel at reasonable prices, the effects of energy conservation policies and other factors. Additionally, infrastructure-related issuers may be subject to (i) regulation by various governmental authorities and governmental regulation of rates charged to customers, (ii) service interruption due to environmental, operational or other events and (iii) the imposition of special tariffs and changes in tax laws, regulatory policies and accounting standards. There is also the risk that corruption may negatively affect publicly-funded infrastructure projects, especially in emerging markets, resulting in delays and cost overruns.

The infrastructure sector also has some additional characteristics that cause certain risks to be more prevalent than in other industry sectors including:

**Technology risk**

A change could occur in the way a service or product is delivered rendering the existing technology obsolete. While the risk could be considered low in the infrastructure sector given the substantial fixed costs involved in constructing assets and the fact that many infrastructure technologies are well established, any technology change that occurs over the medium term could threaten the profitability of an infrastructure issuer. If such a change were to occur, these assets have very few alternative uses should they become obsolete.

**Regional or geographic risk**

An infrastructure issuer's assets may not be moveable. Should an event that somehow impairs the performance of an infrastructure issuer's assets occur in the geographic location where the issuer operates those assets, the performance of the issuer may be adversely affected.

**Through-put risk**

The revenue of many infrastructure issuers may be impacted by the number of users who use the products or services produced by the infrastructure issuers' assets. Any change in the number of users may negatively impact the profitability of the issuer.

**Interest rate risk**

Changes in interest rates have an impact on a whole range of investments. When interest rates rise, the prices of fixed-rate bonds or other securities like treasury bills tend to fall. When interest rates fall, the

prices of the fixed-rate bonds or treasury bills tend to rise. Fixed income securities with longer terms to maturity are usually more sensitive to changes in interest rates. Changes in the prices of these securities will affect the price of a Fund.

**Investments in Property Securities Risk**

Certain Funds may invest in securities of issuers that hold, or are exposed to, real property ("property securities"), either directly or indirectly. Property securities are subject to some of the same risks associated with the direct ownership of property including, but not limited to: adverse changes of the conditions of the real estate markets, obsolescence of properties, changes in availability, costs and terms of mortgage funds and the impact of environmental laws. However, investing in property securities is not the equivalent to investing directly in property and the performance of property securities may be more heavily dependent on general performance of stock markets than the general performance of the property sector.

Historically there has been an inverse relationship between interest rates and property values. Rising interest rates can decrease the value of the properties in which a property company invests and can also increase related borrowing costs. Either of these events can decrease the value of an investment in property securities.

The current taxation regimes of property-invested entities are potentially complex and may change in the future. This may impact, either directly or indirectly, the returns to investors in property securities and the taxation treatment thereof.

**Loan risk**

The credit ratings of loans or other income investments may be lowered if the financial condition of the party obligated to make payments with respect to such instruments changes. Credit ratings assigned by rating agencies are based on a number of factors and may not reflect the issuer's current financial condition or the volatility or liquidity of the security. In the event of bankruptcy of the issuer of loans or other income investments, a Fund could experience delays or limitations with respect to its ability to realize the benefits of any collateral securing the instrument. In order to enforce its rights in the event of a default, bankruptcy or similar situation, the Fund may be required to retain legal or similar counsel. This may increase the Fund's operating expenses and adversely affect net asset value. Due to their lower standing in the borrower's capital structure, junior loans can involve a higher degree of overall risk than senior loans of the same borrower.

**Liquidity risk**

Investors often describe the speed and ease with which an asset can be sold and converted into cash as its liquidity. Most of the investments owned by a Fund can usually be sold promptly at a fair price and therefore can be described as relatively liquid. But the Fund may also hold investments that are illiquid, which means they cannot be sold quickly or easily. Some investments are illiquid because of legal restrictions, the nature of the investment itself, settlement terms, or for other reasons. Sometimes, there may simply be a shortage of buyers. A Fund that has trouble selling an investment can lose money or incur extra costs. In addition, illiquid investments may be more difficult to value accurately and may experience larger price changes. This can cause greater fluctuations in the Fund's value.

**Participatory notes risk**

The Funds may invest in participatory notes. Participatory notes involve risks that are in addition to those normally associated with a direct investment in the foreign securities the participatory notes seek to replicate. The holder of a participatory note is not entitled to the same rights as an owner of the applicable underlying securities, such as voting rights. In addition, the holder is subject to the risk that the issuer of participatory notes (i.e., the issuing bank or broker dealer), which is the only responsible party under such notes, is unable or refuses to perform under the terms of the participatory notes. Therefore, if an issuer becomes insolvent, the Fund could lose the total value of its investment in such participatory notes. In addition, there is no assurance that there will be a trading market for participatory notes or that the trading price of participatory notes will equal the value of the underlying securities they seek to replicate.

**Repurchase agreement risk**

Through a repurchase agreement, a Fund sells a security at one price and agrees to buy it back from the buyer at a fixed price on a specified date. Repurchase agreements involve certain risks. In entering into repurchase agreements, the Fund is subject to the risk that the purchaser may not fulfill its obligations leaving the Fund holding cash in an amount that is less than the value of the sold securities at the relevant time. To limit this risk, the Fund must hold cash equal to not less than 102% of the value of the sold securities and the amount of the cash is adjusted daily to ensure this level is maintained. The Fund cannot lend more than 50% of its net asset value through securities lending or repurchase transactions. We also enter into repurchase agreements only with parties that have the approved credit ratings as mandated by the securities regulatory authorities.

**Reverse repurchase agreement risk**

Through a reverse repurchase agreement, a Fund buys securities for cash from a counterparty at a price set at the date of purchase and at the same time agrees to resell the same securities for cash to the counterparty at a price (usually higher) at a later date. Reverse repurchase agreements involve certain risks. The Fund is subject to the risk that the counterparty may not fulfill its obligation to repurchase the securities leaving the Fund holding securities which are trading at a price lower than the agreed repurchase price. Further, if the trading price decreases below the price at which the Fund initially bought the security, the Fund will suffer a loss. To limit these risks, the securities purchased must have a market value at the time of purchase equal to at least 102% of the cash paid for the securities purchased by the Fund and either the amount of the purchase price or the amount of purchased securities are adjusted to ensure this level is maintained. We also enter into reverse repurchase agreements only with parties that have the approved credit ratings as mandated by the securities regulatory authorities.

**Securities lending risk**

Securities lending involves lending for a fee portfolio securities held by a Fund for a set period of time to willing, qualified borrowers who have posted collateral. In lending its securities, a Fund is subject to the risk that the borrower may not fulfill its obligations or go bankrupt leaving the Fund holding collateral worth less than the securities it has lent, resulting in a loss to the Fund. To limit this risk, the Fund must hold collateral worth no less than 102% of the value of the loaned securities and the amount of collateral is adjusted daily to ensure this level is maintained. The collateral may only consist of cash, qualified securities or securities that can be immediately converted into identical securities to those that have been loaned. The Fund will not lend more than 50% of its net asset value through securities lending or repurchase transactions unless the Fund is permitted in law to lend a greater amount. Pursuant to applicable securities laws, the securities lending agent is required to be the custodian or sub-custodian of the Funds.

**Small company risk**

Investing in securities of smaller companies may be riskier than investing in larger, more established companies. Smaller companies may have limited financial resources, a less established market for their shares and fewer shares issued. This can cause the share prices of smaller companies to fluctuate more than those of larger companies. The market for the shares of small companies may be less liquid.

**Specialization risk**

Some mutual funds specialize in a particular industry, or in a single country or region of the world. This allows them to focus on the potential of that industry or geographic area, but it also means they may be more volatile than more broadly diversified funds because prices of securities in the same industry or region may tend to move up and down together. These specialty funds must continue to invest in a particular industry or geographic area, even if it is performing poorly.

**Stock Connect risk**

Certain Funds may invest in eligible China A-shares ("Stock Connect Securities") listed and traded on the Shanghai Stock Exchange ("SSE") through the Shanghai-Hong Kong Stock Connect program or listed and traded on the Shenzhen Stock Exchange ("SZSE") through the Shenzhen-Hong Kong Stock Connect program. The Shanghai-Hong Kong Stock Connect program is a securities trading and clearing program developed by Hong Kong Exchanges and Clearing Limited, SSE and China Securities Depository and Clearing Corporation Limited ("CSDC") for the establishment of mutual market access between The Stock Exchange of Hong Kong Limited ("SEHK") and SSE. Similarly, the Shenzhen-Hong Kong Stock Connect program is a securities trading and clearing program developed by the SEHK, SZSE, Hong Kong Securities Clearing Company Limited, and CSDC for the establishment of mutual market access between SEHK and SZSE. Each of Shanghai-Hong Kong Stock Connect program and Shenzhen-Hong Kong Stock Connect program are hereafter referred to as "Stock Connect". Stock Connect Securities generally may not be sold, purchased or transferred other than through Stock Connect in accordance with its rules and regulations. While Stock Connect is not subject to individual investment quotas, there are daily and aggregate investment quotas imposed by Chinese regulations which apply to all Stock Connect participants. These quotas may restrict or preclude a Fund's ability to invest in Stock Connect Securities at the Fund's preferred time.

**Substantial securityholder risk**

The purchase or redemption of a substantial number of securities of a Fund may require the portfolio manager to change the composition of the Fund's portfolio significantly or may force the portfolio manager to buy or sell investments at unfavourable prices, which can affect the Fund's returns. Therefore, the purchase or redemption of securities by a substantial securityholder, including another mutual fund, may adversely affect the Fund's performance and may increase the Fund's realized capital gains. Portfolio turnover for the Fund may result in increased trading costs, with the resulting size of the Fund impacting the trading expense ratio.

**Tax and corporate law risk of returns of capital**

The articles of the Tax Advantage Group provide authority to make distributions out of capital and it intends both to calculate capital in the manner contemplated by the corporate statute for corporations that are not mutual fund corporations and only to declare distributions out of capital if there is sufficient capital attributable to a series. However, no definitive case law exists to confirm that a mutual fund corporation may make distributions of capital and how it is to be calculated. Further, no advance income tax ruling has been requested or obtained from the CRA, nor is AGF aware of any published advance income tax ruling or the possibility of obtaining such a ruling, regarding the characterization of such distributions or the calculation of capital for such purposes.

**Underlying fund risk**

Certain of the Funds, including the Focus Funds, the Portfolios and Portfolio Classes, may invest directly in underlying funds. The risks of investing in such Funds include the risks associated with the securities in which an underlying fund invests, along with the other risks of an underlying fund. Accordingly, a Fund takes on the risk of an underlying fund and its respective securities in proportion to its investment in the underlying fund.

Also, if an underlying fund suspends redemptions or does not calculate its net asset value, the relevant Fund may not be able to value part of its assets or redeem its securities. As a result of adjustments to a Fund's assets, significant redemptions or purchases of underlying fund securities may be made. An adjustment to a Fund's holdings of underlying funds may result in gains being distributed to securityholders of the relevant Fund. As a result of such adjustments, the underlying fund may have to make large purchases or sales of securities to meet the redemption or purchase requests of a Fund. The portfolio manager of the underlying fund may have to change the underlying fund's holdings significantly or may be forced to buy or sell investments at unfavourable prices, which can affect its performance and the performance of the relevant Fund.

## ORGANIZATION AND MANAGEMENT OF THE AGF FUNDS

|   |   |
|---|---|
| <b>Manager</b>  | <p>The manager is responsible for the overall business and operations of each Fund. This includes providing or arranging for the day-to-day administration of the Funds.</p> <p>AGF is a signatory to the United Nations-supported Principles for Responsible Investment (PRI), a global, collaborative network of investors in recognition of the increasing relevance of Environmental, Social and Governance (ESG) issues within the investment process.</p>   |
| <p>AGF Investments Inc.<br/>TD Bank Tower, 31<sup>st</sup> Floor<br/>66 Wellington Street West<br/>Toronto, Ontario<br/>M5K 1E9, Canada</p> | <p>AGF is a signatory to the United Nations-supported Principles for Responsible Investment (PRI), a global, collaborative network of investors in recognition of the increasing relevance of Environmental, Social and Governance (ESG) issues within the investment process.</p>  |
| <b>Fund of funds</b>  | <p>All of the Funds have the ability to invest in securities of underlying funds, subject to certain conditions. Where AGF (or its affiliate or associate) is the manager of the other underlying fund, AGF will not vote the securities of the other underlying fund. Instead, we may, at our discretion, choose to flow through the voting rights attached to securities of the other underlying fund to securityholders of the Fund.</p>   |
| <b>Trustee</b>  | <p>The trustee of the Trust Funds holds the assets of each Trust Fund in trust on behalf of securityholders. There is no trustee of the Tax Advantage Group.</p>  |
| <b>Board of Directors of AGF All World Tax Advantage Group Limited</b>  | <p>The Board is responsible for the oversight of the Tax Advantage Group.</p> <p>The Board is currently comprised of 6 members, 4 of whom are independent of AGF and its affiliates. Additional information concerning the Board, including the names of its members, and governance of the Tax Advantage Group is available in the annual information form.</p>  |
| <b>Portfolio manager</b>  | <p>The portfolio manager makes the investment decisions for a Fund, buys and sells the investments for the Fund's portfolio and manages the portfolio.</p> <p>The portfolio manager for AGF Floating Rate Income Fund is located outside of Canada which may make it difficult to enforce legal rights against them.</p>  |
| <b>Sub-advisor</b>  | <p>If a Fund has a sub-advisor or sub-advisors, you'll find this information in the <i>Fund Details</i> section of each Fund.</p> <p>The sub-advisor gives advice and makes recommendations to the Fund's portfolio manager. The portfolio manager may accept or reject the advice of the sub-advisor. The Fund may seek advice from one or more sub-advisors.</p> <p>Some of the sub-advisors are located outside of Canada which may make it difficult to enforce legal rights against them. AGF is responsible for any investment advice given to those Funds by those sub-advisors located outside of Canada.</p> |
| <b>Distributors</b>   | <p>Securities of the Funds are distributed through registered dealers.</p>  |
| <b>Registrar</b>  | <p>The registrar keeps a record of the owners of securities of each Fund.</p>   |
| <p>AGF Investments Inc.<br/>Toronto, Ontario</p>  |   |

---

**Organization and management of the AGF funds...cont'd**

---

**Auditor**

PricewaterhouseCoopers LLP  
Toronto, Ontario

The auditor conducts an audit of the financial statements of each of the Funds in accordance with Canadian generally accepted auditing standards.

PricewaterhouseCoopers LLP is an independent Chartered Professional Accounting firm. Corporate law requires that securityholder approval be sought for a change of auditor of the Tax Advantage Group. The approval of securityholders will not be obtained before making a change to the auditor of a Trust Fund. Securityholders will be sent a written notice at least 60 calendar days before the effective date of any such change.

---

**Custodians**

CIBC Mellon Trust Company and State Street  
Trust Company Canada  
Toronto, Ontario

The custodian receives and holds all of a Fund's securities and portfolio assets, including cash, for safekeeping. Each Fund, other than AGF Floating Rate Income Fund, has appointed CIBC Mellon Trust Company as its custodian. AGF Floating Rate Income Fund has appointed State Street Trust Company Canada as its custodian.

CIBC Mellon Trust Company and State Street Trust Company Canada are independent of AGF.

---

**Securities Lending Agent**

The Bank of New York Mellon  
Toronto, Ontario

The securities lending agent arranges and administers loans of a Fund's portfolio securities for a fee, to willing, qualified borrowers who have posted collateral.

The Bank of New York Mellon is independent of AGF.

---

**Independent Review Committee**

In accordance with National Instrument 81-107, the mandate of the Independent Review Committee is to review and make recommendations with respect to, or in certain circumstances, approve, conflicts of interest matters but only if such matters are brought to it by AGF.

The Independent Review Committee is currently composed of three individuals, each of whom is independent of AGF and its affiliates.

The Independent Review Committee prepares at least annually a report of its activities for securityholders which is available on AGF's website at [www.AGF.com](http://www.AGF.com), or at the securityholder's request at no cost by contacting us at [tiger@AGF.com](mailto:tiger@AGF.com).

Additional information about the Independent Review Committee, including the names of the members, is available in the annual information form.

---

## PURCHASES, SWITCHES AND REDEMPTIONS

You can invest in the Funds through different accounts we offer, such as the registered plans described under *Optional Services*. You can also invest in the Funds through accounts or plans offered by other financial institutions. Ask your registered representative for details.

AGF does not monitor the appropriateness of any series of a Fund for any investor, including investors who hold securities through a discount broker account.

### Series of securities

Each series of securities is intended for different kinds of investors as follows:

#### MF Series:

MF Series securities are available to all investors and they can be purchased under this simplified prospectus.

#### Series D:

Series D securities are available only to investors who hold Series D securities at the time of an additional purchase and only for those who purchase through registered dealers who have entered into an agreement with AGF to distribute Series D securities. Series D securities can be purchased under this simplified prospectus.

#### Series F:

Series F securities are intended for investors who are participants in a fee-for-service or wrap account program sponsored by certain registered dealers or are investing via certain discount brokers.

Series F securities can be purchased under this simplified prospectus only through your registered dealer who has obtained the consent of AGF to offer Series F securities. Participation in the offering of Series F securities by a registered dealer is subject to terms and conditions relating to the distribution of Series F securities including the requirement (if applicable) of your registered representative to notify AGF if you are no longer enrolled in the fee-for-service or wrap account program.

No trailing commission or service fee is paid with respect to Series F securities.

If AGF is notified that you no longer meet the eligibility criteria, we will sell or reclassify your Series F securities in accordance with the instructions from your registered representative. In the absence of instructions, we may automatically sell your Series F securities or reclassify

them to MF Series securities. There may be tax implications arising from any sale. See *Income Tax Considerations for Investors* for more details.

#### Series FV:

Series FV securities are intended for investors who are participants in a fee-for-service or wrap account program sponsored by certain registered dealers (or are investing via certain discount brokers) and are seeking regular monthly distributions at a similar or higher rate than the distributions to the other currently offered series of the Fund, with the exception of Series T. The distributions to Series FV may include different amounts of return of capital depending on the Fund invested in. In the case of Classes within the Tax Advantage Group, it is possible that distributions on Series FV securities could be suspended, even though other securities continue to pay a distribution, if the capital attributable to Series FV securities was depleted. The targeted annual rate of Series FV securities is 5%. AGF may change this targeted annual rate at any time.

Series FV securities can be purchased under this simplified prospectus only through your registered dealer who has obtained the consent of AGF to offer Series FV securities. Participation in the offering of Series FV securities by a registered dealer is subject to terms and conditions relating to the distribution of Series FV securities including the requirement (if applicable) of your registered representative to notify AGF if you are no longer enrolled in the fee-for-service or wrap account program.

No trailing commission or service fee is paid with respect to Series FV securities.

If AGF is notified that you no longer meet the eligibility criteria, we will sell or reclassify your Series FV securities in accordance with the instructions from your registered representative. In the absence of instructions, we may automatically sell your Series FV securities or reclassify them to Series V securities. There may be tax implications arising from any sale. See *Income Tax Considerations for Investors* for more details.

#### Series I:

Series I securities are intended for institutional investors, including funds, who meet the criteria established by AGF. The management fees for Series I securities are negotiated in a subscription agreement with AGF and paid directly by Series I securityholders, not by the Fund. Series I securities may not be purchased by individuals. Series I securities are generally offered pursuant to this simplified prospectus. Series I investors should consult their own tax advisors

regarding the tax treatment of management and advisory fees paid directly by the investor.

### **Series O:**

Series O securities are intended for institutional investors, including funds, who meet the criteria established by AGF. The management fees for Series O securities are negotiated in a subscription agreement with AGF and paid directly by Series O securityholders, not by the Fund. Series O securities may not be purchased by individuals. Series O securities are generally offered pursuant to this simplified prospectus. Series O investors could consult their own tax advisors regarding the tax treatment of management and advisory fees paid directly by the investor.

### **Series Q:**

Series Q securities are available to a Household (which may consist of a single investor) that meets the minimum investment requirements of Series Q as described in *Buying Funds – Minimum Investments*.

Series Q securities are designed for investors who have agreed with their registered representative that they wish to purchase a series of securities offering reduced overall costs, including a reduced management fee via a tiered management fee schedule. The management fees and service fees for Series Q securities are paid directly by Series Q securityholders, not by the Fund. Management fees paid directly by the investor are generally not deductible for tax purposes. In addition, Series Q securityholders pay a service fee, which is payable to their registered dealer each quarter. This service fee is in addition to the management fee which is payable directly to us by investors who purchase Series Q securities. No trailing commission is paid with respect to Series Q securities.

Generally, a Household (which may consist of a single investor) will qualify and continue to qualify for the Gold Label securities if it meets one of the following minimum investment requirements: (i) maintain the higher of a book value or market value of at least \$100,000 in *each* Fund; or (ii) maintain the higher of an aggregate book value or market value of at least \$250,000 in *all* Funds. If the higher of the book value or market value of the Household falls below these minimums, the Series Q securities held by the investor(s) within the Household may be switched to an equivalent value of MF Series of the same Fund(s).

AGF will contact the Household's registered dealer and/or investment advisor before processing the switch(es). The switch(es) will not be processed if the Household increases their investment to the minimum investment amount within 30 calendar days of the Household's registered dealer and/or investment

advisor being notified. Subject to applicable laws, AGF may vary the terms of the Series Q securities or discontinue offering such securities at its sole discretion.

### **Series S:**

Series S securities are intended for institutional investors, including certain Funds, who meet the criteria established by AGF and who enter into an agreement whereby the Series S investor agrees to pay to AGF and the advisors, respectively, the management and advisory fees in Canadian dollars for AGF's services. Series S securities may not be purchased by individuals. Series S securities are generally offered pursuant to this simplified prospectus. Series S investors should consult their own tax advisors regarding the tax treatment of management and advisory fees paid directly by them.

### **Series T:**

Series T securities are designed for investors seeking regular monthly distributions at a higher rate than the distributions to the other series of the same Fund. The distributions to Series T may include different amounts of return of capital depending on the Fund invested in. In the case of Classes within the Tax Advantage Group, it is possible that distributions on Series T securities could be suspended, even though Series V securities continue to pay a distribution, if the capital attributable to Series T securities was depleted. The targeted annual rate of Series T securities is 8%. AGF may change this targeted annual rate at any time. Series T securities are available to all investors and they can be purchased under this simplified prospectus.

### **Series V:**

Series V securities are designed for investors seeking regular monthly distributions at a higher rate than the distributions to the other currently offered series of the Fund, with the exception of Series T. The distributions to Series V may include different amounts of return of capital depending on the Fund invested in. In the case of Classes within the Tax Advantage Group, it is possible that distributions on Series V securities could be suspended, even though Series T securities continue to pay a distribution, if the capital attributable to Series V securities was depleted. The targeted annual rate of Series V securities is 5%. AGF may change this targeted annual rate at any time. Series V securities are available to all investors and they can be purchased under this simplified prospectus.

### **Series W:**

Series W securities are available to a Household (which may consist of a single investor) that meets the

minimum investment requirements of Series W as described in *Buying Funds – Minimum Investments*.

Series W securities are designed for investors who are participants in a fee-for-service or wrap account program sponsored by certain registered dealers or are investing via certain discount brokers, and who have agreed with their registered representative that they wish to purchase a series of securities offering reduced overall costs, including a reduced management fee via a tiered management fee schedule. The management fees for Series W securities are paid directly by Series W securityholders, not by the Fund. Management fees paid directly by the investor are generally not deductible for tax purposes. No trailing commission or service fee is paid with respect to Series W securities.

Series W securities can be purchased under this simplified prospectus only through your registered dealer who has obtained the consent of AGF to offer Series W securities. Participation in the offering of Series W securities by a registered dealer is subject to terms and conditions relating to the distribution of Series W securities including the requirement (if applicable) of your registered representative to notify AGF if you are no longer enrolled in the fee-for-service or wrap account program.

If AGF is notified that you no longer meet the eligibility criteria, we will sell or reclassify your Series W securities in accordance with the instructions from your registered representative. In the absence of instructions, we may automatically sell your Series W securities or reclassify them to Series Q securities. There may be tax implications arising from any sale. See *Income Tax Considerations for Investors* for more details.

Generally, a Household (which may consist of a single investor) will qualify and continue to qualify for the Gold Label securities if it meets one of the following minimum investment requirements: (i) maintain the higher of a book value or market value of at least \$100,000 in *each* Fund; or (ii) maintain the higher of an aggregate book value or market value of at least \$250,000 in *all* Funds. If the higher of the book value or market value of the Household falls below these minimums, the Series W securities held by the investor(s) within the Household may be switched to an equivalent value of Series F of the same Fund(s).

AGF will contact the Household's registered dealer and/or investment advisor before processing the switch(es). The switch(es) will not be processed if the Household increases their investment to the minimum investment amount within 30 calendar days of the Household's registered dealer and/or investment advisor being notified. Subject to applicable laws, AGF may vary the terms of the Series W securities or

discontinue offering such securities at its sole discretion.

### **Classic Series:**

Classic Series securities of AGF Canadian Large Cap Dividend Fund are available to all investors and they can be purchased under this simplified prospectus.

### **How we calculate the price of a security**

You can buy, switch or transfer securities of the Funds through your registered dealer. You can sell your securities through your registered dealer or by writing to us directly. Selling your securities is also known as redeeming. All transactions are based on the Fund's security price per series next determined after we receive your purchase, switch, or sale request in good order. This price is also called the net asset value per security.

We usually calculate the security price of each series of a Fund at the end of each business day. A business day is any day that The Toronto Stock Exchange (TSX) is open. In unusual circumstances, we may suspend the calculation of a Fund's price. We calculate the net asset value per security of each series of a Fund by:

- adding up the assets of the Fund and determining the proportionate share of the series
- subtracting the liabilities of the Fund that are common to all series and determining the proportionate share of the series of the aggregate amount of liabilities common to all series
- subtracting the liabilities of the Fund that are specific to the series
- dividing the balance by the number of Fund securities of the series held by securityholders

Where a Fund only offers one series, the net asset value of each Fund is the same as the net asset value of the series.

In general, we calculate the price of shares of Classes of the Tax Advantage Group in the way we've described above. The common expenses of the Tax Advantage Group are shared by all Classes and are allocated to each Class. We may allocate expenses to a particular Class when it's reasonable to do so.

All of the Funds are valued in Canadian dollars.

Certain series of the following Funds can be bought in Canadian or U.S. dollars. We calculate separate U.S. and Canadian dollar prices for these Funds, based on the daily exchange rate. You can only make Canadian dollar investments in AGF registered plans.

AGF American Growth Class  
AGF Asian Growth Class

AGF Canadian Growth Equity Class  
 AGF Canadian Growth Equity Fund  
 AGF Canadian Large Cap Dividend Class  
 AGF China Focus Class  
 AGF Emerging Markets Class  
 AGF Emerging Markets Fund  
 AGF Equity Income Focus Fund  
 AGF European Equity Class  
 AGF Floating Rate Income Fund  
 AGF Global Bond Fund  
 AGF Global Dividend Fund  
 AGF Global Equity Class  
 AGF Global Equity Fund  
 AGF Global Real Assets Class (formerly, AGF Global Resources Class)  
 AGF Global Select Fund  
 AGF Global Strategic Balanced Fund  
 AGF Income Focus Fund  
 AGF Short-Term Income Class  
 AGF Total Return Bond Fund  
 AGF U.S. Small-Mid Cap Fund  
 AGFiQ U.S. Sector Class

All of our other Funds can be bought in Canadian dollars only.

## How we process orders

Your order must be in the proper form and include all necessary supporting documents. Your registered dealer is responsible for sending your order to us. If we receive your order to buy, switch or sell before 4 p.m. Toronto time on a business day, we'll process your order based on the price calculated that day. If we receive your order after 4 p.m. on a business day, we'll process your order based on the price calculated on the next business day. If the TSX's trading hours are shortened or changed for other regulatory reasons, we may change the 4 p.m. deadline. Your registered dealer or AGF will send you a confirmation of your order once we process it.

If we receive a payment or a purchase order from a registered plan account that is otherwise valid but fails to specify a Fund, or if any other documentation in respect of your purchase order is incomplete, we may invest your money into MF Series securities of AGF Canadian Money Market Fund, under the Front End Sales Charge option at a 0% sales charge. Once we know the Fund(s) you have selected and we have received your documentation in good order from your registered representative, we will then switch this investment into the Fund(s), series and sales charge option that you have selected, without additional charge, at the net asset value of the Fund(s) on the applicable switch date. If we receive a payment or a purchase order from a non-registered plan account that is otherwise valid but fails to specify a Fund, or if any

other documentation in respect of your purchase order is incomplete, we will return any money received, without interest, after five business days of attempting to notify your registered representative, unless we are notified of the Fund(s) you have selected and we have received your documentation in good order from your registered representative.

## Buying Funds

### Minimum Investment

The minimum amount you can buy depends on the Fund and series you are purchasing:

| MINIMUM INVESTMENT REQUIREMENTS<br>(PER FUND)   |   |                     |                            |
|---|---|---------------------|----------------------------|
| Fund  | Initial Purchase  | Subsequent Purchase | Systematic Investment Plan |
| Classic, MF, D, F, FV, T and V Series of all Funds (except for the Portfolios and Portfolio Classes)  | \$500   | \$25                | \$25                       |
| Series I, Series O and Series S of all Funds  | The minimum purchase amount will be agreed upon by you and AGF. |                     |                            |
| Series Q and Series W of all Funds (except for the Portfolios and Portfolio Classes)                  | \$100,000*  | \$25                | \$25                       |
| Series Q and Series W of the Portfolios and Portfolio Classes, as applicable                          | \$100,000*  | \$100               | \$100                      |
| All Series of the Portfolios and Portfolio Classes (except Series I, Series O, Series Q and Series W) | \$500   | \$100               | \$100                      |

\*Generally, a Household (which may consist of a single investor) will qualify or continue to qualify for the Gold Label Securities if it meets one of the following minimum investment requirements: (i) maintain the higher of a book value or market value of at least \$100,000 in *each* Fund; or (ii) maintain the higher of an aggregate book value or market value of at least \$250,000 in *all* Funds.

We may waive the minimum investment amounts.

You have to pay for your securities when you buy them. If we don't receive payment for your purchase within two business days (on the same business day for AGF Canadian Money Market Fund) of receiving your order, we'll sell your securities as of the close of business on the next business day. If the proceeds from the sale are more than the cost of buying the securities, the Fund will keep the difference. If the proceeds are less than the cost of buying the securities, your registered dealer must pay the shortfall and may in turn have the right to collect it from you.

We can reject all or part of your order within one business day of the Fund receiving it. If we reject your order, we'll return any money received, without interest.

If you switch the type of account you hold your securities in (for instance, switching from an investment account to an RRSP), you may pay a negotiable fee to your registered dealer of 0-2% of the net asset value in your account.

### If your investment falls below the minimum requirement

Because of the high cost of maintaining small accounts, we require that investors keep at least \$3,750 invested for each Portfolio and Portfolio Class and \$500 invested for each of the other Funds. If the value of your investment falls below the minimum requirement, we may sell, reclassify or convert your securities and send you the proceeds. We'll give you 30 calendar days notice before selling, reclassifying or converting, as applicable, so that you can buy more securities if you wish to raise the balance above the minimum.

If the higher of the book value or market value of the Household falls below the minimums for the Gold Label securities, the Series Q securities held by the investor(s) within the Household may be switched to an equivalent value of MF Series of the same Fund(s) and/or the Series W securities held by the investor(s) within the Household may be switched to an equivalent

value of Series F of the same Fund(s). AGF will contact the Household's registered dealer and/or investment advisor before processing the switch(es). The switch(es) will not be processed if the Household increases their investment to the minimum investment amount within 30 calendar days of the Household's registered dealer and/or investment advisor being notified.

### Choosing a sales charge option

When you buy securities of a Fund, you can choose any one of the following different sales charge options available for that series. Your registered representative usually receives a commission when you invest in the Funds. The commission depends on the sales charge option you choose and the amount you invest. You and your registered representative will determine which sales charge option is suitable for you.

#### Front-end option

The front-end option is available for all Funds in all Series, except Series F, Series FV, Series I, Series O, Series Q, Series S and Series W.

If you buy MF Series, Classic Series, Series D, Series T or Series V securities under this option, you may pay a sales commission at the time of purchase. The commission is a percentage of the amount you invest and is paid to your registered dealer. See *Dealer Compensation* for details. You and your registered representative negotiate the actual commission. See *Fees and expenses payable directly by you – Sales charges* for the front-end sales charge rates.

#### Deferred sales charge ("DSC") option

The DSC option is available for all Funds in the MF Series, Classic Series, Series T and Series V securities only, as applicable. If you buy under this option, you don't pay a sales commission when you invest in the Fund. Instead, we pay your registered dealer an upfront commission, except in the case of AGF Canadian Money Market Fund. See *Dealer Compensation* for details. However, under certain circumstances, if you sell, reclassify, convert or switch your MF Series, Classic Series, Series T or Series V securities (except in the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009) within seven years of buying the original securities, you'll pay us a deferred sales charge at the time of your transaction. When you switch securities of AGF Canadian Money Market Fund originally purchased under the DSC option on or after June 15, 2009 into another Fund with the same sales charge option, your registered dealer will receive a sales commission at the time of the switch, and a new DSC schedule will be created with respect to the investment in the new Fund.

In the case of a switch (including systematic switches) of your securities of a Fund (the "Original Fund") into securities of another Fund, the seven-year time period will continue to run from your purchase of securities of the Original Fund (i.e. each switch will not result in a new seven-year timeframe being created). See *Fees and expenses payable directly by you – Redemption fees* for the DSC rate schedule. Where, however, AGF Canadian Money Market is the Original Fund, a seven-year timeframe will be created (for the first time) at the time of each switch into another Fund.

#### Low load option

The low load option is available for all Funds in the MF Series, Classic Series, Series T and Series V securities only, as applicable. If you buy under this option, you don't pay a sales commission when you invest in the Fund. Instead, we pay your registered dealer an upfront commission, except in the case of AGF Canadian Money Market Fund. See *Dealer Compensation* for details. However, under certain circumstances, if you sell, reclassify, convert or switch your MF Series, Classic Series, Series T or Series V securities (except in the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009) within three years of buying the original securities, you'll pay us a deferred sales charge at the time of your transaction. When you switch securities of AGF Canadian Money Market Fund originally purchased under the low load option on or after June 15, 2009 into another Fund with the same sales charge option, your registered dealer will receive a sales commission at the time of the switch, and a new low load schedule will be created with respect to the investment in the new Fund.

In the case of a switch (including systematic switches) of your securities of a Fund (the "Original Fund") into securities of another Fund, the three-year time period will continue to run from your purchase of securities of the Original Fund (i.e. each switch will not result in a new three-year timeframe being created). See *Fees and expenses payable directly by you – Redemption fees* for the low load rate schedule. Where, however, AGF Canadian Money Market is the Original Fund, a three-year timeframe will be created (for the first time) at the time of each switch into another Fund.

#### Changing sales charge options

If after buying your securities, you agree with your registered representative to change your sales charge option from low load or DSC to front-end, whether or not you also switch from one series of securities to another within the same Fund, you will have to pay any deferred sales charge that applies at the time of such change.

## Selling Funds

You may choose to sell securities of a Fund at any time.

When you sell securities of a Fund, you receive the proceeds of your sale in cash. If you have not arranged for electronic transaction services, you must give us written instructions to sell your securities. We may accept a faxed copy of your written instructions from your registered representative only if your registered dealer has made arrangements with us to accept faxed instructions.

The Fund may charge you a short-term or frequent trading fee if you sell your securities within 30 calendar days of buying them, or make multiple sales within 15 calendar days of purchase. See *Fees and Expenses* for details about these fees.

Unless AGF and your registered dealer have arranged otherwise, we'll send your payment to you or to someone else you choose by cheque or wire payment within two business days of receiving your properly completed order for redemption. You'll receive payment in the currency in which you purchased the securities, unless you request payment in another currency through our currency exchange service. See *Optional Services* for details.

If you want the proceeds paid to someone else, or if you are selling more than \$25,000 of the Funds, your signature must be guaranteed by your bank, trust company or registered dealer. In some cases, we may require other documents or proof of signing authority. You can contact your registered representative or us to find out the documents that are required to complete the sale.

If we haven't received all required documents within ten business days of receiving your sell order, we'll buy back the securities as of the close of business on the tenth business day. If the purchase cost is less than the sale proceeds, the Fund will keep the difference. If the purchase cost is more than the sale proceeds, your registered dealer must pay the shortfall. Your registered dealer may have the right to collect the shortfall from you.

If you hold your securities in a non-registered account, you may realize a capital gain or loss when your securities are sold. Capital gains are taxable. For a discussion of the tax consequences, see *Income Tax Considerations for Investors*.

### Selling securities under the DSC option

Except in the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009, if you invest in MF Series, Classic Series, Series T or Series V securities under the DSC option and sell, reclassify or convert those securities within seven years

of buying the original securities, other than in the circumstances noted below, we will deduct the applicable deferred sales charge from your transaction.

Your MF Series, Classic Series, Series T or Series V securities will be sold in the order of purchase, with your oldest securities being sold first. For purposes of calculating the order of selling securities, both the purchased securities and securities issued on the reinvestment of distributions on such purchased securities are deemed to be issued on the same date. Securities purchased on a particular date will be redeemed in priority to reinvested securities of such Fund deemed issued on that same date.

Except in the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009, we'll deduct any deferred sales charge that applies when you sell your MF Series, Classic Series, Series T or Series V securities for cash or transfer them out of the AGF Funds.

You won't pay a deferred sales charge on:

- MF Series, Classic Series, Series T or Series V securities you hold for 7 years or more
- MF Series, Classic Series, Series T or Series V securities that qualify for the 10% free amount, provided you reinvest dividends or distributions, as applicable, you received on such securities as explained under the 10% free amount section
- MF Series, Classic Series, Series T or Series V securities you receive from reinvested dividends or distributions, as applicable. Before you can redeem these securities without paying deferred sales charges, you may need to pay deferred sales charges on redemptions of purchased securities as noted above
- Cash dividends or distributions, as applicable, paid by the Fund
- MF Series, Classic Series, Series T or Series V securities you switch from one Fund to another Fund, provided you remain in the same sales charge option

### Selling securities under the low load option

Except in the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009, if you invest in MF Series, Classic Series, Series T or Series V securities under the low load option and sell, reclassify or convert those securities within three years of buying the original securities, other than in the circumstances noted below, we will deduct the applicable low load sales charge from your transaction.

Your MF Series, Classic Series, Series T or Series V securities will be sold in the order of purchase, with

your oldest securities being sold first. For purposes of calculating the order of selling securities, both the purchased securities and securities issued on the reinvestment of distributions on such purchased securities are deemed to be issued on the same date. Securities purchased on a particular date will be redeemed in priority to reinvested securities of such Fund deemed issued on that same date.

Except in the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009, we'll deduct any low load sales charge that applies when you sell your MF Series, Classic Series, Series T or Series V securities for cash or transfer them out of the AGF Funds.

You won't pay a low load sales charge on:

- MF Series, Classic Series, Series T or Series V securities you hold for 3 years or more
- MF Series, Classic Series, Series T or Series V securities that qualify for the 10% free amount, provided you reinvest dividends or distributions, as applicable, you receive on such securities as explained under the 10% free amount section
- MF Series, Classic Series, Series T or Series V securities you receive from reinvested dividends or distributions, as applicable. Before you can redeem these securities without paying low load sales charges, you may need to pay low load sales charges on redemptions of purchased securities as noted above
- Cash dividends or distributions, as applicable, paid by the Fund
- MF Series, Classic Series, Series T or Series V securities you switch from one Fund to another Fund, provided you remain in the same sales charge option.

### 10% free amount

Each calendar year, you can sell or switch up to 10% of the market value of the MF Series, Classic Series, Series T or Series V securities you bought under the DSC option without paying a deferred sales charge (provided you reinvest any dividends or distributions, as applicable, you receive on your securities). You may also sell or switch up to 10% of the market value of the MF Series, Classic Series, Series T or Series V securities you bought under the low load option in each calendar year without paying a deferred sales charge (provided you reinvest any dividends or distributions, as applicable, you receive on your securities). This is referred to as the 10% free amount. The 10% free amount for each year is equal to:

- 10% of the market value, measured as at December 31 of the previous year, of your MF Series, Classic Series, Series T or Series V securities you bought under the DSC option and that you have held for less than 7 years, or 10% of the market value, measured as at December 31 of the previous year, of your MF Series, Classic Series, Series T or Series V securities you bought under the low load option and that you have held for less than 3 years; plus
- 10% of the market value of your MF Series, Classic Series, Series T or Series V securities you bought under the DSC option in the current year, or 10% of the market value of your MF Series, Classic Series, Series T or Series V securities bought under the low load option in the current year.

Any unused 10% free amount in a given year cannot be carried over to the next year.

If you choose to switch under the 10% free amount described in this section, such switches will result in the applicable securities being switched from the DSC or low load, as applicable, to the front-end purchase option. While no sales charge will be applied, the trailing commission payable to your registered dealer will thereafter be applicable to securities purchased under the front-end purchase option. See *Dealer Compensation – Trailing commission*. We require proper instructions from you in order to facilitate the 10% free amount switch described above.

For more information refer to the Funds' annual information form.

Except in the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009, we'll deduct any deferred sales charge that applies when you sell your MF Series, Classic Series, Series T or Series V securities for cash or transfer them out of the AGF Funds.

## Switches

### Switching between Funds

A switch involves moving money from one Fund to another Fund or within the same Fund. Generally, a switch may be an order to sell and buy, to reclassify or to convert your securities. We describe these kinds of switches below. When we receive your order, we'll sell, reclassify or convert your securities accordingly. The steps for buying and selling Funds also apply to switches.

Your registered representative may charge you a fee for switching. You and your registered representative negotiate the fee. The Fund may also charge you a

short-term or frequent trading fee if you switch your securities within 30 calendar days of buying them, or make multiple switches within 15 calendar days of purchase. See *Fees and expenses payable directly by you – Short-term or frequent trading fee* for details about these fees.

You won't pay a deferred sales charge when you switch from one Fund bought under the DSC option or low load option to another Fund within the same sales charge option. However, when you switch securities of AGF Canadian Money Market Fund originally purchased under the DSC or low load option on or after June 15, 2009 into another Fund with the same sales charge option, your registered dealer will receive a sales commission at the time of the switch, and a new DSC or low load schedule (as applicable) will be created with respect to the investment in the new Fund.

Except in the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009, if you bought MF Series, Classic Series, Series T or Series V securities under the DSC or low load option and you sell your securities for cash or reclassify or convert them to another purchase option of the same or another available series, you'll have to pay any deferred sales charge that applies.

See *Fees and expenses payable directly by you – Redemption fees* for the DSC and low load option redemption schedules. If you reclassify or convert from another series to MF Series, Classic Series, Series T or Series V, you can choose the front-end sales charge, DSC or low load option. See *Buying Funds – Choosing a sales charge option* for details.

At the completion of your DSC redemption schedule, DSC securities of the Fund may be switched by your registered dealer into securities carrying a front-end sales charge or another available series of securities of the Fund without increased costs to you, other than any applicable switch fees. Your registered dealer is paid a higher trailing commission on front-end sales charge securities, and may be paid a higher trailing commission if your DSC securities are switched into another series of securities. Your registered dealer or registered representative will generally be required to make certain disclosures to you and to obtain your written consent to switch between purchase options or to another series of securities. If you purchased DSC securities of the Fund, the trailing commissions on the securities will increase automatically on completion of the DSC redemption schedule. Please refer to the *Trailing commissions* section of this prospectus for further detail.

## Switching between Series of the Same Class

Switching between series of shares of the same Class is called a conversion. Therefore, you can convert shares of one series of a Class into shares of another series of the same Class if you are eligible for that series and the Class offers that series. When you convert shares within the Tax Advantage Group, the value of your investment won't change, but the number of shares you hold will change (except for any fees you pay to convert). This is because each series has a different share price. In general, a conversion between series of the same Class is not considered a disposition for tax purposes, so no capital gain or loss will result. However, any redemption of shares to pay for a switch fee charged by your registered dealer will be considered a disposition for tax purposes. For further discussion of the tax consequences, see *Income Tax Considerations for Investors*.

## Switching between Series of the Same Trust Fund

Switching between series of the same Trust Fund is called a reclassification. You can reclassify securities of one series of a Trust Fund into securities of another series of the same Trust Fund if you are eligible for that series and the Trust Fund offers that series. When you reclassify securities of a Trust Fund, the value of your investment won't change (except for any fees you pay to reclassify), but the number of securities you hold will change. This is because each series has a different unit price. In general, a reclassification is not considered a disposition for tax purposes, so no capital gain or loss will result. However, any redemption of securities to pay for a switch fee charged by your registered dealer will be considered a disposition for tax purposes. For further discussion of the tax consequences, see *Income Tax Considerations for Investors*.

## Switching between Classes

When you switch shares between Classes within the Tax Advantage Group, it's called a conversion.

You can convert shares of a Class into shares of another Class (within the same or different series). When you convert shares between Classes, the value of your investment won't change (except for any fees you pay to convert), but the number of shares you hold will change. Conversions of shares between two classes of a mutual fund corporation (such as the Tax Advantage Group) are treated as a disposition of those shares at their fair market value for tax purposes. Further, any redemption of shares to pay for a switch fee charged by your registered dealer will be considered a disposition for tax purposes. Conversions between shares of different series of the same Class of

the Tax Advantage Group will generally not be considered a disposition for tax purposes and no capital gain or loss will result. For further discussion of the tax consequences, see *Income Tax Considerations for Investors*.

### **Switching between Trust Funds or a Trust Fund and Class**

Switching between two different Trust Funds or between a Trust Fund and a Class (within the same or different series) of the Tax Advantage Group is considered a disposition for tax purposes. If you hold your securities in a non-registered account, you may realize a capital gain or loss on the disposition. Capital gains are taxable. The following switches are examples of taxable dispositions:

- if you switch from a series of securities of a Trust Fund to the same or another series of securities of another Trust Fund
- if you switch from a series of securities of a Trust Fund to the same or another series of shares of a Class of the Tax Advantage Group, or vice versa

For further discussion of the tax consequences, see *Income Tax Considerations for Investors*.

### **Short-term or frequent trading fee**

Generally, short-term and frequent trading activities in mutual funds may adversely affect securityholders. Short-term and frequent trading has the potential to increase costs associated with the administration of the trades and potentially poses challenges to portfolio managers in generating optimum returns through long term portfolio investments.

AGF has in place procedures designed to detect, identify and deter inappropriate short-term and frequent trading and may alter them from time to time, without notice. AGF reviews, at the time an order is received and processed for an account, purchases and redemptions (including switches) of a Fund to determine whether a redemption or switch out is made within a 30 calendar day period from the date of purchase, or whether there have been multiple redemptions or switches made within 15 calendar days of purchase. Such trades are considered short-term or frequent trades. In considering whether the activity is inappropriate, AGF, in its discretion, reviews the value of the transaction and/or the frequency of activity to assess its potential impact to the Fund and other securityholders in the Fund.

If inappropriate short-term or frequent trading activity is detected, AGF will take such action as it considers appropriate to deter the continuance of such activity. Such action may include the charging of a short-term or

frequent trading fee on redemptions or switches and the rejection of future purchase orders where multiple instances of short-term or frequent trading activity is detected in an account or group of accounts.

The relevant Fund may charge you (and retain) a short-term or frequent trading fee of up to 2% of the amount you redeem, if the trade, as determined by AGF, is detrimental to the Fund or to other securityholders. The fee is deducted from the amount you redeem or switch, or it is charged to your account and is in addition to any other trading fees to which you would otherwise be subject under this simplified prospectus.

The fee will not be applied in circumstances which do not involve inappropriate trading activity, including redemptions or switches:

- from money-market and short-term income funds
- that are systematic transactions available from AGF as optional services
- to access the 10% free redemption amount.

See *Fees and expenses payable directly by you – Short-term or frequent trading fee* for details.

### **When you may not be able to buy, switch or sell securities**

Securities regulations allow us to temporarily suspend your right to sell your Fund securities and postpone payment of your sale proceeds when:

- normal trading is suspended on an exchange on which securities are listed and traded, or on which specified derivatives are traded, if those securities or derivatives represent more than 50% by value, or underlying market exposure, of the total assets of the Fund without allowance for liabilities and if those securities or derivatives are not traded on any other exchange that represents a reasonably practical alternative for the Fund; or
- securities regulators give us permission.

While your right to sell securities is suspended, we won't accept orders to buy securities of the Fund. You may withdraw your sell order before the end of the suspension period. Otherwise, we'll sell your securities at the next price calculated after the suspension period ends.

For Funds that hold an underlying fund, the Fund may suspend the right to sell securities or postpone a redemption payment during any period when the right to sell securities of the underlying fund has been suspended or redemption payments from the underlying fund have been postponed.

## OPTIONAL SERVICES

This section tells you about the accounts, plans and services that are available to investors in the AGF Funds. Ask your registered representative to contact us at 1-800-268-8583 for full details.

### Currency exchange service

When you sell your securities, you can ask for the proceeds in a foreign currency, at the current rate of exchange.

We can also exchange currency when you buy securities. If you provide payment for your purchase in another currency (other than U.S. dollars for Funds that are priced in U.S. dollars) we can convert it to Canadian dollars. Please call us for further details.

### Electronic transaction services

You can arrange for your registered representative to place orders to buy, switch and sell securities of the Funds on your behalf by fax or telephone. You can also contact us by telephone to directly place orders to sell securities of the Funds. In addition, you can arrange for your registered representative to have money electronically transferred from or to your bank account when you buy or sell securities of the Funds in Canadian dollars. We don't offer this service for U.S. dollar investments.

### Registered Plans

We offer AGF RRSPs, Group RRSPs, RRIFs, LIRAs, LRSPs, RLSPs, LIFs, LRIFs, RLIFs, PRIFs, RESPs, Group RESPs, TFSA's and Group TFSA's. You will find the minimum investment amounts for all account types including these registered plans under Buying Funds. We may waive the minimum investment amounts. There are no administration fees charged by AGF to open, maintain or close a plan. See also *Fees and expenses payable by the Funds – Operating Expenses*.

You can also hold your securities in self-directed registered plans that you set up with other financial institutions. You may be charged a fee for these plans. You should consult your tax advisor for more information about the tax implications of registered plans.

### Systematic distribution switching plan

We'll automatically switch your reinvested distributions from one Fund to another Fund within the same series and under the same sales charge option. The switch will be processed and trade dated on the next business day immediately after a distribution has been reinvested. The automatic switching program also applies to reinvested dividends declared by the Funds.

The default start date for the systematic distribution switching plan is the first day of the month following receipt of your instructions to set up the plan.

The securities will be switched in the order of purchase, with your oldest securities being switched first. For purposes of calculating the order of switching securities, both the purchased securities and securities issued on the reinvestment of dividends and distributions on such purchased securities are deemed to be issued on the same date. At the time of a switch, the purchased securities of the Fund outstanding at that time are switched in priority to the reinvested securities of such Fund deemed issued on the same date.

When you enrol in our systematic distribution switching plan, you will receive a copy of the relevant Fund's Fund Facts document. Thereafter, you will be sent the Fund Facts solely upon request.

You can request that a copy of the Fund's Fund Facts, the annual simplified prospectus and any amendments be sent to you by calling us toll free at 1-800-268-8583, by emailing us at [tiger@AGF.com](mailto:tiger@AGF.com) or by asking your registered representative. You can also find the Fund Facts, the annual simplified prospectus and any amendments at [www.sedar.com](http://www.sedar.com) or on our website at [www.AGF.com](http://www.AGF.com).

### Systematic investment plan

You can make regular investments in the Funds weekly, biweekly, twice a month, monthly, bimonthly, quarterly, semi-annually or annually, on any business day of the month, for as little as \$25 a Fund or \$100 for a Portfolio or Portfolio Class. We'll automatically transfer money from your Canadian dollar chequing account and invest it in the Funds you choose. If the frequency or start date is not included in your instructions, we will default the frequency to monthly and the start date to the first day of the following month. We don't offer this service for U.S. dollar investments, AGF RRIFs or the locked-in plans.

When you enrol in our systematic investment plan, you will receive a copy of the relevant Fund's Fund Facts document. Thereafter, you will be sent the Fund Facts solely upon request.

You can request that a copy of the Fund's Fund Facts, the annual simplified prospectus and any amendments be sent to you by calling us toll free at 1-800-268-8583, by emailing us at [tiger@AGF.com](mailto:tiger@AGF.com) or by asking your registered representative. You can also find the Fund Facts, the annual simplified prospectus and any amendments at [www.sedar.com](http://www.sedar.com) or on our website at [www.AGF.com](http://www.AGF.com).

You have a statutory right to withdraw from an initial purchase of the Funds under the systematic investment

plan but you do not have a statutory right to withdraw from subsequent purchases of the Funds under the systematic investment plan where you do not request a current version of the Fund Facts. However, you continue to have all other statutory rights under securities law, including a misrepresentation right as described under *Purchasers' Statutory Rights* whether or not you have requested a current version of the Fund Facts.

### **Systematic switching plan**

You can make regular switches between the Funds weekly, biweekly, twice a month, monthly, bimonthly, quarterly, semi-annually or annually on any business day of the month. We'll automatically convert shares of one Class to another Class or sell securities of one Fund and use the proceeds to buy another Fund within the same series and under the same sales charge option. The short-term trading fee does not apply to securities sold through this service. You may have to pay a negotiable fee to your registered dealer. You and your registered representative negotiate the fee. See *Fees and Expenses* for details. If you hold your securities in a non-registered account, you may realize a capital gain or loss. Capital gains are taxable.

When you enrol in our systematic switching plan, you will receive a copy of the relevant Fund's Fund Facts document. Thereafter, you will be sent the Fund Facts solely upon request.

You can request that a copy of the Fund's Fund Facts, the annual simplified prospectus and any amendments be sent to you by calling us toll free at 1-800-268-8583, by emailing us at [tiger@AGF.com](mailto:tiger@AGF.com) or by asking your registered representative. You can also find the Fund Facts, the annual simplified prospectus and any amendments at [www.sedar.com](http://www.sedar.com) or on our website at [www.AGF.com](http://www.AGF.com).

### **Systematic withdrawal plan**

You can receive regular Canadian dollar payments from your Funds through our systematic withdrawal plan. We'll sell the number of securities needed to make the payment and send the proceeds to you by cheque or deposit to your bank account. You can choose to receive payments weekly, biweekly, twice a month, monthly, bimonthly, quarterly, semi-annually or annually, on any business day. If the frequency or start date is not included in your instructions, we will default the frequency to monthly and the start date to the first day of the following month. The short-term trading fee does not apply to securities sold through this service. We don't offer this service for automatic deposits in U.S. dollars. If you hold your securities in a non-registered account, you may realize a capital gain or

loss when your securities are sold. Capital gains are taxable.

If the value of the investment in your account falls below \$3,750 for each Portfolio and Portfolio Class or \$500 for the other Funds, we may sell your securities and send you the proceeds. If you withdraw more money than your Fund securities are earning, you'll eventually use up your investment.

## FEES AND EXPENSES

The following table lists the fees and expenses that you may have to pay if you invest in the Funds. You may have to pay some of these fees and expenses directly. The Funds pay some of these fees and expenses, which reduces the value of your investment. All amounts payable by investors referred to herein, including those listed on the table, are expressed exclusive of applicable Canadian sales and use taxes.

The Funds are required to pay goods and services tax ("GST") or harmonized sales tax ("HST"), as applicable, on management fees and operating expenses in respect of each series of a Fund, based on the residence for tax purposes of the investors of the particular series. Changes in existing HST rates, the adoption of HST by additional provinces, the repeal of HST by HST-participating provinces and changes in the breakdown of the residence of the Fund's investors may have an impact on a Fund year over year.

For fees and expenses payable directly by investors, the applicable rate of GST or HST, as applicable, will be determined based on the investor's place of residence.

We must obtain approval from investors in MF Series, Series D, Series T, Series V, or Classic Series of a Fund in order to (i) change the basis of the calculation of a fee or expense that is charged to the Fund in a way that could result in an increase in charges to these series or to their securityholders or (ii) introduce a fee or expense to be charged to the Fund or directly to its securityholders that could result in an increase in charges to these series or its securityholders, unless the fee or expense is charged by an entity that is at arm's length to the Fund. If the fee or expense is charged by an entity that is at arm's length to the Fund then we will not seek approval from MF Series, Series D, Series T, Series V, or Classic Series securityholders and instead, such securityholders will be sent a written notice of such change at least 60 days prior to the effective date. For Series F, Series FV, Series I, Series O, Series Q, Series S or Series W, we may change the basis of the calculation of a fee or expense, or introduce a new fee or expense, in each case in a way that could result in an increase in charges to the series, upon providing at least 60 days' written notice before the effective date of any such change.

| Fees and expenses payable by the Funds                              |  |          |          |           |          |          |
|---|--|----------|----------|-----------|----------|----------|
| <b>Management Fees (in %):</b>                                      | <p>These fees are calculated and accrued daily and paid monthly. Management fees are fees for various services provided to the Funds including investment management and advisory services, sales and trailing commissions to registered dealers on the distribution of each Fund's securities, and general administrative expenses of the manager such as overhead, salaries, rent and legal and accounting fees. These fees are paid directly to AGF and, where applicable, its affiliates. The table below shows the total annual rate of the management fees for the MF Series, Series D, Series F, Series FV, Series T and Series V securities payable by each Fund, and the Classic Series securities payable by AGF Canadian Large Cap Dividend Fund.</p> |          |          |           |          |          |

\* The rate for management fees payable for Classic Series securities of AGF Canadian Large Cap Dividend Fund is 1.50%.

---

**Fees and expenses payable by the Funds**

---

**Management fees**

The total annual aggregate management and advisory fees payable by each Unit Trust (except AGF American Growth Fund) to AGF and the portfolio adviser is 1% for Series S securities. These fees are calculated and accrued daily and paid monthly. These fees may be waived by AGF under certain circumstances. Please refer to *Fund of funds* section below for further detail.

**Management fee reductions**

We sometimes may agree to waive, at our discretion, or negotiate a lower management fee for certain investors in a Fund. Our decision to do this depends on a number of factors, including the size of the investment or the nature of the investment.

- The fee reduction for series where the Trust Fund pays the fees is received by the investor as follows: We reduce the management fee we charge to the Trust Fund and the Trust Fund pays you an amount equal to the reduction. This is called a *management fee distribution*. Management fee distributions are calculated and credited daily and paid at least quarterly, first out of net income and net realized capital gains and then out of capital of the Trust Fund. Management fee distributions are reinvested in the Trust Fund. If the Trust Fund offers more than one series of securities, the amount of distributions payable to all holders of the series will be reduced by the amount of any management fee distribution to the holders of that series.
- For the Tax Advantage Group, you will receive the amount of the reduction. This is called a *management fee rebate*. Management fee rebates are reinvested in additional securities of the relevant series of a Class, at least quarterly.

The tax consequences of receiving a management fee distribution or rebate are discussed under *Income Tax Considerations* in the annual information form.

If applicable, and at AGF's discretion, grandfathered management fee distributions and rebates from prior fund reorganizations will continue to be reinvested at least annually.

**Fund of funds**

In accordance with Canadian securities legislation, including National Instrument 81-102 – *Investment Funds* ("NI 81-102"), a Fund may invest in underlying funds. Fees and expenses are payable by the underlying funds in addition to the fees and expenses payable by the Fund. However, a Fund may only invest in one or more underlying funds provided that the Fund does not pay management fees or incentive fees on the portion of its assets that it invests in an underlying fund that, to a reasonable person, would duplicate a fee payable by the underlying fund for the same service. The management fee payable by the Fund will be reduced to the extent of such duplication. Management expense ratio (MER) disclosure included in the Fund's management report of fund performance will include expenses related to the Fund's investments in underlying funds. See *Specific information about each of the mutual funds in this document – Investing in other investment funds*.

---

## Fees and expenses payable by the Funds

|   |   |
|---|---|
| <b>Operating expenses</b>                               | <p>In addition to the management fees, each series of a Fund pays its own expenses and its share of the Fund's expenses that are common to all series. The Funds shall be responsible for payment of all expenses relating to the operation of the Funds and the carrying on of their business. In particular and without limiting the generality of the foregoing, the Fund shall pay for any expenses incurred in respect of the following: commissions or service charges and brokerage fees; legal fees; custodian and safekeeping fees; audit fees; securityholder administrative costs, fund accounting and valuation costs; fees and expenses of the Independent Review Committee*; for Tax Advantage Group only, the director's fees and expenses; taxes (including HST); interest expenses; bank charges; borrowing costs; regulatory filings and other fees; costs of preparing, printing, and distributing financial reports, prospectuses (other than the preliminary prospectus and annual information form for a new Fund), Fund Facts and other continuous disclosure documents; fees paid to external service providers associated with tax reclaims, refunds or the preparation of foreign tax reports on behalf of the Funds, and tax filing fees; and costs and expenses relating to complying with all existing and new applicable laws, regulations, requirements, and policies (including any new applicable laws, regulations, requirements and policies arising after April 26, 2018 as they relate to registrar and transfer agency services)**. Subject to applicable securities rules, a Fund that invests in underlying funds also indirectly bear its proportionate share of the operating expenses of the underlying funds, after giving effect to any rebates or waivers. Securityholders will be sent a written notice at least 60 calendar days before the effective date of any change to such common or series-specific expenses that could result in an increase in charges to the Funds. Each Class pays its own expenses and its share of the Tax Advantage Group's common expenses, and indirectly bears its proportionate share of the operating expenses of the underlying funds in which the Class invests, subject to applicable securities rules and after giving effect to any rebates or waivers. We may waive or absorb any of these expenses. AGF has agreed with investors in Series O, Series Q, Series S and Series W securities that AGF will reimburse the Fund for operating expenses (other than brokerage commissions, counterparty fees, fees and expenses of the Independent Review Committee or extraordinary items) that would otherwise be charged to that series of a Fund. As a result, the Series O, Series Q, Series S and Series W net asset value will not be reduced by such expenses.</p> <p>* Including insurance. As at the date of this simplified prospectus, each member of the Independent Review Committee receives an annual retainer of \$40,000 (\$45,000 for the Chairman) and \$1,000 for each meeting of the Independent Review Committee that the member attends, plus reimbursement of expenses, if any, for attending each meeting. These fees and expenses are allocated among all of the funds managed by AGF to which NI 81-107 applies, including the Portfolios and Portfolio Classes, the Harmony Pools and Portfolios, and AGFIQ ETFs, in a manner that is considered by AGF to be fair and reasonable.</p> <p>**April 26, 2018 is the date that AGF first announced that it would be seeking securityholder approval to introduce the proposed Administration Fee (defined below).</p> |
| <b>Registrar and transfer agency administration fee</b> | <p>AGF pays certain operating expenses relating to registrar and transfer agency services of certain series of certain Funds and, in return, the applicable Funds pay AGF a fixed annual administration fee ("<b>Administration Fee</b>").</p> <p>In exchange for the Administration Fee payable by each Fund to AGF, AGF pays certain operating expenses relating to registrar and transfer agency services for MF Series, Series D, Series F, Series FV, Series I, Series T, Series V, and Classic Series. The Funds also pay for all other operating expenses as described above under "Operating expenses". The Administration Fee paid to AGF by a Fund in respect of a participating series may, in any future period, be less than or exceed the actual registrar and transfer agency expenses that were incurred for the participating series.</p> <p>The Administration Fee is calculated and accrued daily and paid to AGF monthly. The table below shows the Administration Fee (in %) for MF Series, Series D, Series F, Series FV, Series I, Series T, Series V, and Classic Series, as applicable, payable by each of the below Funds.</p>  |

\* The Administration Fee payable for Classic Series securities of AGF Canadian Large Cap Dividend Fund is 0.1382%.

## Fees and expenses payable directly by you

### Management fees – Series I, O, Q and W

There are no management fees payable by the Funds for Series I, Series O, Series Q or Series W securities. The management fees for Series I, Series O, Series Q and Series W securities are paid directly by Series I, Series O, Series Q or Series W securityholders, as applicable, not by the Fund. Investors may only purchase Series I, Series O, Series Q and Series W securities through a registered dealer. The maximum annual rates for Series O, Series Q and Series W securities, excluding applicable taxes, depend on the Fund you buy (rate reductions may apply), as per the chart below. The maximum annual rate for Series I securities, excluding applicable taxes, is 1.25%.

| Funds   | Series O maximum rates | Series Q maximum rates | Series W maximum rates |

If you are considering an investment in Series I, Series O, Series Q or Series W securities, you should consult your independent tax advisor about the tax treatment of you paying the management fees directly.

## Fees and expenses payable directly by you

|   | <p>For Series Q and Series W, we deduct the management fee by automatically selling the securities in your account on or about March 20, June 20, September 20 and December 20 of each year. If you hold your securities in a non-registered account, you may realize a capital gain or loss when your securities are sold. Capital gains are taxable. You should consult a tax advisor about the tax treatment of the management fee. If you sell most or all of your securities before the end of a quarter, we will deduct the management fee (plus any service fee) you owe from the sale proceeds and send you the balance. We may change the date and method of deducting such fees.</p>  |      |                     |                           |      |                          |      |                                 |      |                                       |      |                                      |      |                              |      |                             |      |                                 |      |                                       |      |                                     |      |   |      |                               |      |                                     |      |                               |      |                                     |      |                              |      |                                    |      |                                    |      |                                |      |                            |      |                           |      |

| <b>Service fees – Series Q</b>            | <p>When you buy Series Q securities of the Funds, a negotiated service fee can be paid to your registered dealer on a quarterly basis. This fee is in addition to the management fee you pay directly to AGF. The actual service fee depends on the arrangements you negotiate with your registered dealer. See <i>Dealer Compensation - Series Q service fees</i>.</p> <p>The maximum annual rates, excluding applicable taxes, depend on the Fund you buy:</p> <table> <tr> <th>Fund</th><th>Maximum Service Fee</th></tr> <tr> <td>AGF American Growth Class</td><td>1.00</td></tr> <tr> <td>AGF American Growth Fund</td><td>1.00</td></tr> <tr> <td>AGF Canadian Growth Equity Fund</td><td>1.00</td></tr> <tr> <td>AGF Canadian Large Cap Dividend Class</td><td>1.00</td></tr> <tr> <td>AGF Canadian Large Cap Dividend Fund</td><td>1.00</td></tr> <tr> <td>AGF Diversified Income Class</td><td>1.00</td></tr> <tr> <td>AGF Diversified Income Fund</td><td>1.00</td></tr> <tr> <td>AGF Elements Balanced Portfolio</td><td>1.15</td></tr> <tr> <td>AGF Elements Balanced Portfolio Class</td><td>1.15</td></tr> <tr> <td>AGF Elements Conservative Portfolio</td><td>1.15</td></tr> <tr> <td>AGF Elements Conservative Portfolio Class</td><td>1.15</td></tr> <tr> <td>AGF Elements Global Portfolio</td><td>1.15</td></tr> <tr> <td>AGF Elements Global Portfolio Class</td><td>1.15</td></tr> <tr> <td>AGF Elements Growth Portfolio</td><td>1.15</td></tr> <tr> <td>AGF Elements Growth Portfolio Class</td><td>1.15</td></tr> <tr> <td>AGF Elements Yield Portfolio</td><td>0.65</td></tr> <tr> <td>AGF Elements Yield Portfolio Class</td><td>0.65</td></tr> <tr> <td>AGF Emerging Markets Balanced Fund</td><td>1.00</td></tr> <tr> <td>AGF Emerging Markets Bond Fund</td><td>0.50</td></tr> <tr> <td>AGF Emerging Markets Class</td><td>1.00</td></tr> <tr> <td>AGF Emerging Markets Fund</td><td>1.00</td></tr> </table> | Fund | Maximum Service Fee | AGF American Growth Class | 1.00 | AGF American Growth Fund | 1.00 | AGF Canadian Growth Equity Fund | 1.00 | AGF Canadian Large Cap Dividend Class | 1.00 | AGF Canadian Large Cap Dividend Fund | 1.00 | AGF Diversified Income Class | 1.00 | AGF Diversified Income Fund | 1.00 | AGF Elements Balanced Portfolio | 1.15 | AGF Elements Balanced Portfolio Class | 1.15 | AGF Elements Conservative Portfolio | 1.15 | AGF Elements Conservative Portfolio Class | 1.15 | AGF Elements Global Portfolio | 1.15 | AGF Elements Global Portfolio Class | 1.15 | AGF Elements Growth Portfolio | 1.15 | AGF Elements Growth Portfolio Class | 1.15 | AGF Elements Yield Portfolio | 0.65 | AGF Elements Yield Portfolio Class | 0.65 | AGF Emerging Markets Balanced Fund | 1.00 | AGF Emerging Markets Bond Fund | 0.50 | AGF Emerging Markets Class | 1.00 | AGF Emerging Markets Fund | 1.00 |

| <b>Sales charges</b> | <b>Front-end sales charge</b><br>The front-end sales charge is available for all Funds in all Series, other than Series F, Series FV, Series I, Series O, Series Q, Series S and Series W. You and your registered representative negotiate the sales charge. The sales charge is deducted from the amount you invest in the Fund. The rate depends on the Fund you buy: |                                    |
|                      | <b>Fund</b>  | <b>Front-end sales charge rate</b> |
|                      | AGF Canadian Money Market Fund (MF Series only)  | up to 2%                           |
|                      | All other Funds  | up to 6%                           |

## Fees and expenses payable directly by you

| <b>Switch fees</b>                        | <p>If you switch a series of securities of a Fund or Class, other than Series F, Series FV, Series I, Series O, Series Q and Series W, to the same series of securities of another Fund or Class, you may pay a fee to your registered dealer of 0-2% of the net asset value being switched.</p> <p><b>Reclassification/conversion fee</b></p> <p>If you reclassify or convert MF Series, Classic Series, Series T or Series V securities you bought under the DSC option or low load option to another sales charge option, you'll also have to pay any deferred sales charge that applies. See below for details about the deferred sales charge. If you reclassify or convert securities from Series D, Series F, Series FV, Series I, Series O, Series Q, Series S or Series W to MF Series, Classic Series, Series T or Series V, you can choose the front-end sales charge option, the DSC option, or the low load option. See <i>Choosing a sales charge option</i> for details.</p> <p>You'll find more information about reclassifying and converting under <i>Switches</i>.</p>   |                     |          |                                 |      |   |      |  |      |   |      |   |      |   |      |                                  |      |                     |                            |                                      |      |  |      |
|---|---|---------------------|----------|---------------------------------|------|---|------|--|------|---|------|---|------|---|------|----------------------------------|------|---------------------|----------------------------|--------------------------------------|------|--|------|
| <b>Redemption fees</b>                    | <p><b>DSC</b></p> <p>The DSC option is available for all Funds in the MF Series, Classic Series, Series T and Series V securities only. Except in the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009, you may have to pay a deferred sales charge if you buy MF Series, Classic Series, Series T or Series V securities under the DSC option and then sell, reclassify or convert them to another purchase option within 7 years of buying the original securities. Some exceptions apply. In the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009, you may have to pay a deferred sales charge if you buy applicable securities under the DSC option, switch those securities into another AGF Fund and then sell, reclassify or convert them to another purchase option within 7 years of the switch to the new AGF Fund. See <i>Selling Funds – Selling securities under the DSC option</i> for details. The deferred sales charge is based on the value of the securities when you bought them and is deducted from the value of the securities you sell, reclassify or convert. The rate depends on how long you held your securities:</p> <table data-bbox="375 1066 1421 1339"> <thead> <tr> <th>Securities you sell</th><th>DSC rate</th></tr> </thead> <tbody> <tr> <td>within two years of buying them</td><td>5.5%</td></tr> <tr> <td>during the third year after buying them</td><td>5.0%</td></tr> <tr> <td>during the fourth year after buying them</td><td>4.5%</td></tr> <tr> <td>during the fifth year after buying them</td><td>4.0%</td></tr> <tr> <td>during the sixth year after buying them</td><td>3.0%</td></tr> <tr> <td>during the seventh year after buying them</td><td>1.5%</td></tr> <tr> <td>after seven years of buying them</td><td>Zero</td></tr> </tbody> </table> <p><b>Low load</b></p> <p>The low load option is available for all Funds in the MF Series, Classic Series, Series T and Series V securities only. Except in the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009, you may have to pay a deferred sales charge if you buy MF Series, Classic Series, Series T, or Series V securities under the low load option and then sell, reclassify or convert them to another purchase option within 3 years of buying the original securities. Some exceptions apply. In the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009, you may have to pay a deferred sales charge if you buy applicable securities under the low load option, switch those securities into another AGF Fund and then sell, reclassify or convert them to another purchase option within 3 years of the switch to the new AGF Fund. See <i>Selling Funds – Selling securities under the low load option</i> for details. The deferred sales charge is based on the value of the securities when you bought them and is deducted from the value of the securities you sell, reclassify or convert. The rate depends on how long you held your securities:</p> <table data-bbox="375 1801 1421 1894"> <thead> <tr> <th>Securities you sell</th><th>Low load sales charge rate</th></tr> </thead> <tbody> <tr> <td>within the first year of buying them</td><td>3.0%</td></tr> <tr> <td>during the second year after buying them</td><td>2.5%</td></tr> </tbody> </table> | Securities you sell | DSC rate | within two years of buying them | 5.5% | during the third year after buying them | 5.0% | during the fourth year after buying them | 4.5% | during the fifth year after buying them | 4.0% | during the sixth year after buying them | 3.0% | during the seventh year after buying them | 1.5% | after seven years of buying them | Zero | Securities you sell | Low load sales charge rate | within the first year of buying them | 3.0% | during the second year after buying them | 2.5% |

|  | after 3 years of buying them  | Zero |
| <b>Fee-for-service or wrap account fee</b> | In certain circumstances, if you purchase Series F, Series FV or Series W securities of a Fund, you may pay a fee to your registered dealer for the fee-for-service or wrap account program. This fee is negotiated between you and your registered dealer.   |      |
| <b>Short-term or frequent trading fee</b>  | A Fund may charge you (and retain) a short-term trading fee of up to 2% of the net asset value if you sell or switch securities of that Fund within 30 calendar days of buying them. A Fund may also charge you (and retain) a frequent trading fee of 2% if you sell or switch securities within 15 calendar days of buying them. We deduct the fee from the value of the securities you are selling or switching, subject to certain exceptions, and pay it to the applicable Fund. This fee is in addition to any other redemption fees. See <i>Purchases, Switches and Redemptions – Short-term or frequent trading fee</i> . |      |

## IMPACT OF SALES CHARGES

The table below shows the fees that you would have to pay while invested in securities of a Fund under our different sales charge options. It assumes that:

- you invest \$1,000 in securities of the Fund for each period and sell all of your securities immediately before the end of the period.
- the sales charge under the front-end sales charge option is 6%. See *Fees and expenses payable directly by you – Sales charges* for the front-end sales charge rates.
- the deferred sales charge under the DSC option applies only if you sell your MF Series, Classic Series, Series T or Series V securities within seven years of buying them. See *Fees and expenses payable directly by you – Redemption fees* for the DSC rate schedule.
- the deferred sales charge under the low load option applies only if you sell your MF Series, Classic Series, Series T or Series V securities within three years of buying them. See *Fees and expenses payable directly by you – Redemption fees* for the low load rate schedule.
- you haven't used your 10% free amount under the DSC or low load option.

| Sales Charge Options          | At Time of Purchase | 1 Year | 3 Years | 5 Years | 10 Years |
|-------------------------------|---------------------|--------|---------|---------|----------|
| Front-end sales charge option | \$60                | n/a    | n/a     | n/a     | n/a      |
| DSC option <sup>1</sup>       | n/a                 | \$55   | \$50    | \$40    | n/a      |
| Low load option <sup>2</sup>  | n/a                 | \$30   | \$20    | n/a     | n/a      |

<sup>1</sup> Series D, Series F, Series FV, Series I, Series O, Series Q, Series S and Series W securities cannot be purchased under the DSC option.

<sup>2</sup> Series D, Series F, Series FV, Series I, Series O, Series Q, Series S and Series W securities cannot be purchased under the low load option.

## DEALER COMPENSATION

### Sales commissions

Your registered dealer usually receives a sales commission when you invest in the MF Series, Series D, Classic Series, Series T or Series V securities of a Fund. You can choose any one of the following different sales charge options available for that specific series. You and your registered representative will determine which sales charge option is suitable for you. AGF does not monitor or make any determination as to the appropriateness of any series of a Fund (or sales charge option) for any investor purchased through a registered dealer, including a discount broker.

### Front-end sales charge option

The front-end sales charge option is available for all Funds in all Series, other than Series F, Series FV, Series I, Series O, Series Q, Series S and Series W. When you buy under this option, you and your registered representative negotiate the sales charge. We deduct the sales charge from your investment and pay it to your registered dealer. The sales charge is up to 2% for AGF Canadian Money Market Fund and up to 6% for all other Funds.

### DSC option

The DSC option is available for all Funds in the MF Series, Classic Series, Series T and Series V securities

only, as applicable. Except in the case of AGF Canadian Money Market Fund, when you buy MF Series, Classic Series, Series T or Series V securities under this option, we pay your registered dealer a sales commission of 5% of the amount you invest. Except in the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009, you may have to pay us a fee if you sell, convert to a different purchase option or reclassify your MF Series, Classic Series, Series T or Series V securities within 7 years of buying the original securities. See *Fees and expenses payable directly by you – Redemption fees* for details on the DSC redemption schedule. When you switch securities of AGF Canadian Money Market Fund originally purchased under the DSC option into another Fund with the same sales charge option, we pay your registered dealer a sales commission of 5% at the time of the switch, and a new DSC schedule will be created with respect to the investment in the new Fund.

### Low load option

The low load option is available for all Funds in the MF Series, Classic Series, Series T and Series V securities only, as applicable. Except in the case of AGF Canadian Money Market Fund securities purchased on or after June 15, 2009, when you buy MF Series, Classic Series, Series T or Series V securities under this option, we pay your registered dealer a sales commission of 2.5% of the amount you invest. Except

in the case of AGF Canadian Money Market Fund, you may have to pay us a fee if you sell, convert to a different purchase option or reclassify your MF Series, Classic Series, Series T or Series V securities within 3 years of buying the original securities. See *Fees and expenses payable directly by you – Redemption fees* for details on the low load redemption schedule. When you switch securities of AGF Canadian Money Market Fund originally purchased under the low load option into another Fund with the same sales charge option, we pay your registered dealer a sales commission of 2.5% at the time of the switch, and a new low load schedule will be created with respect to the investment in the new Fund.

## Trailing commission

For MF Series, Series D, Classic Series, Series T or Series V securities, we pay your registered dealer a trailing commission on the securities purchased or issued on the reinvestment of any distributions, subject to certain eligibility requirements. Your registered dealer may choose to receive the trailing commission either on a monthly or quarterly basis.

Trailing commissions payable to your registered dealer in connection with securities either purchased or issued on the reinvestment of any distribution commencing April 18, 2006 are set out in the following table.

For all MF Series or Classic Series securities purchased prior to April 18, 2006 on a low load or DSC basis or issued on the reinvestment of distributions on such purchased securities, trailing commissions in accordance with the following chart will also be payable commencing April 18, 2006 to your registered dealer if, on or after this date, you:

- change the type of account you hold your MF Series or Classic Series securities in (for instance, changing from an investment account to an RRSP)
- transfer your account from one registered dealer to another account at a different registered dealer
- transfer beneficial ownership of your MF Series or Classic Series securities to another person, or
- switch your MF Series or Classic Series securities (whether a switch between Funds, a reclassification or a conversion).

Trailing commissions in accordance with the following chart will also be payable commencing April 18, 2006 to your registered dealer on any MF Series or Classic Series securities either originally purchased on or after April 3, 2000 and prior to April 18, 2006 or issued on the reinvestment of any distributions during this period on such originally purchased securities if you provide your registered dealer with your express written consent.

For purchases of Series F, Series FV, Series I, Series O, Series Q, Series S, or Series W securities, we do not pay any trailing commission to your registered dealer. We also do not pay any trailing commissions to your registered dealer for MF Series of the AGF Canadian Money Market Fund purchased under the DSC or low load options. Your registered dealer is paid a fee in respect of Series F, Series FV, and Series W securities under the terms of your arrangement with your registered dealer.

Generally, the trailing commission is a percentage of the total value of MF Series, Series D, Classic Series, Series T or Series V, securities held by a registered representative's clients. The maximum annual rate of the trailing commission depends upon the sales charge option chosen, the type of fund and the purchase date. See the following table for details.

We will also pay trailing commissions to the discount broker for securities purchased through your discount brokerage account, if a trailing commission is payable on the series you purchase.

## Series Q service fees

When you buy Series Q securities of a Fund, a negotiated service fee can be paid to your registered dealer on a quarterly basis, based on the average net asset value of your Series Q securities held during the quarter. The actual fee depends on the arrangements you negotiate with your registered dealer. The maximum annual rates, excluding applicable taxes, depend on the Fund you buy and are disclosed under *Fees and expenses payable directly by you – Service Fees – Series Q*.

Series Q service fees are based on the average net asset value of Series Q securities of the Fund you held during the quarter. To determine average net asset value, we take the total value of your investment in the Series Q securities on each calendar day in the quarter and divide this number by the total number of calendar days in the quarter.

We deduct the service fee by automatically selling the Series Q securities in your account on or about March 20, June 20, September 20 and December 20 of each year. If you hold your securities in a non-registered account, you may realize a capital gain or loss when your securities are sold. Capital gains are taxable. You should consult a tax advisor about the tax treatment of the service fee. If you sell most or all of your securities before the end of a quarter, we will deduct the management fee plus any service fee you owe from the sale proceeds and send you the balance. We may change the date and method of deducting such fees.

| Fund  | Maximum Annual Trailing Commission Rate |                       |                |                       |   |   |   |   |   |   |
|---|---|-----------------------|----------------|-----------------------|---|---|---|---|---|---|
|   | Front-End                               |                       |                |                       | DSC   |   |   | Low-Load                                      |   |   |
|   | MF Series                               | Series T and Series V | Classic Series | Series D <sup>1</sup> | MF Series                                     | Series T and Series V                         | Classic Series                                | MF Series                                     | Series T And Series V                         | Classic Series <sup>1</sup>                   |

<sup>1</sup> DSC and Low Load options are not available for Series D, Series F, Series FV, Series I, Series O, Series Q, Series S and Series W.

Where an investor purchases a fund which invests in an AGF Fund and AGF has agreed to be responsible for the payment of sales commission and trailing commissions to the registered dealer on such fund on fund purchases, AGF will pay the same sales commission and trailing commissions to the dealer selling the top fund as if the investor purchased MF Series securities directly in the AGF Fund, regardless of what series of securities the top fund purchases in the underlying AGF Fund.

### **Other kinds of dealer compensation**

In addition to the commissions described above, we may also provide educational conferences and events, marketing support programs and other programs to registered dealers or financial advisors and their registered representatives in accordance with securities laws. These include:

- materials describing the benefits of mutual fund investing
- conferences sponsored by registered dealers, for which we pay up to 10% of the cost
- audio and video materials for dealer seminars
- co-operative dealer advertising, for which we pay up to 50% of the cost
- national media advertising

We may change the terms and conditions of these commissions and programs or discontinue them, at any time.

### **Dealer compensation from management fees**

During our financial year ended November 30, 2018, the amount we paid to registered dealers in sales and trailing commissions, service fees and other kinds of dealer compensation for all mutual funds managed by AGF was approximately 50% of the total management fees that we received from investors or the AGF Funds we managed in that year.

## INCOME TAX CONSIDERATIONS FOR INVESTORS

This section is a summary of how investing in the Funds can affect your taxes. It assumes that, for purposes of the Tax Act and at all relevant times, you are resident in Canada, hold securities of the Funds as capital property and deal at arm's length and are not affiliated with the Funds. This information may or may not apply to you. We recommend that you consult your tax advisor about your own situation.

More detailed information is available in the annual information form.

### How your investment can make money

Your investment in a Fund can earn income from:

- any earnings the Fund makes or realizes on its investments which are allocated to you in the form of distributions in the case of Trust Funds and dividends in the case of the Tax Advantage Group;
- any capital gains that you realize when you switch or sell your securities of the Fund at a profit. If you switch or sell your investment at a loss, it is called a capital loss.

### How your investment is taxed

The tax you pay on your mutual fund investment depends on whether you hold your securities in a non-registered account or in a registered plan, such as an RRSP or a TFSA.

#### Securities held in a registered plan

If you hold securities of a Fund in a registered plan, you generally pay no tax on distributions or dividends paid or payable to your registered plan or on any capital gains that your registered plan makes from selling or switching or otherwise disposing of these securities. However, most withdrawals from registered plans are subject to tax (other than withdrawals from a TFSA and certain permitted withdrawals from RESPs and RDSPs).

The securities of the Unit Trusts are not "qualified investments" for registered plans and such registered plans and their beneficiaries may be subject to significant adverse tax consequences as a result of holding such securities. **Accordingly, it is recommended that securities of the Unit Trusts not be held in registered plans.**

It is proposed that part way through 2019, the Harmony U.S. Equity Pool will be merged into the AGF American Growth Fund. Following the merger, AGF American Growth Fund is expected to be a "qualified investment" for registered plans.

#### Trust Fund Securities held in a non-registered account

If you hold securities of a Trust Fund in a non-registered account, you must include your share of the Trust Fund's distributions of net income and the taxable portion of net capital gains (in Canadian dollars) in your income. These amounts are taxed as if you received them directly. Distributions must be included in your income, whether you receive them in cash or have them reinvested in additional securities of the Trust Fund. Payments of distributions under the AGF Elements Advantage Program ("Elements Advantage Distributions") or distributions of management fee reductions are generally taxable, unless they constitute a return of capital as described below.

Distributions, including management fee distributions and Elements Advantage Distributions<sup>1</sup>, for all Trust Funds, except money market funds, may include a return of capital. When the net income and net realized capital gains available for distribution of a mutual fund is less than the amount distributed, the difference may be a return of capital. A return of capital is generally not taxable, but will reduce the adjusted cost base of your securities of the Trust Fund. We explain how to calculate adjusted cost base below.

Some of the Trust Funds make interim (or monthly) distributions to a series during the year and may make a final distribution in December. For such Funds, net income for tax purposes will not be allocated amongst series until December and will be based on the proportionate share of the Fund of each series at the relevant time in December. This means that the amount of net income for tax purposes allocated to a series may not be in proportion to its share of interim distributions made to all series during the year.

Management fees paid directly by the investors are generally not deductible for tax purposes.

We will issue a tax slip to you each year that shows the type of distributions the Trust Fund distributed to you, including any management fee distributions, Elements Advantage Distributions or a return of capital amount, where applicable. You can claim any tax credits that apply to those earnings. For example, if a Trust Fund's distributions include amounts designated as taxable dividends from a taxable

respect of their existing holdings as described in the annual information form.

---

<sup>1</sup> AGF Elements Advantage Program has not been available to investors since June 22, 2009, although Elements Advantage Distributions may still be made to investors in

Canadian corporation, you may qualify for dividend tax credits as permitted by the Tax Act.

All switches and sales of securities, except for reclassifications, are considered dispositions for tax purposes. If the value of the securities sold is greater than the adjusted cost base of the securities, you will have a capital gain. If the value of the securities sold is less than the adjusted cost of the securities, you will have a capital loss which can be applied against capital gains. In general, you must include one-half of the amount of a net capital gain in your income for tax purposes.

A reclassification involves moving money from one series of a Trust Fund to another series of the same Trust Fund. Based in part on the administrative practice of the CRA, a reclassification is generally not considered a disposition for tax purposes, so no capital gain or loss will result.

Each Unit Trust may allocate all or any portion of its net taxable capital gains to securityholders who have redeemed units of the Fund at any time in the year, provided that such amount of the net taxable capital gains allocated to a redeeming securityholder (the "Net Taxable Capital Gains Allocation on Redemption") shall not exceed the amount, if any, by which the amount payable on the redemption of the units exceeds the adjusted cost base of the units being redeemed. The Net Taxable Capital Gains Allocation on Redemption will be designated by the Unit Trust such that such allocation will be deemed to be a taxable capital gain of the redeeming securityholder. In computing their gain on redemption, a redeeming securityholder's proceeds of disposition of their units will be equal to the net asset value of such units (determined as of the applicable valuation day in respect of the redemption) less the amount of the Net Taxable Capital Gains Allocation on Redemption.

### **Tax Advantage Group Securities held in a non-registered account**

The Tax Advantage Group may pay ordinary dividends and/or capital gains dividends. The Board determines when dividends are paid based upon the recommendation of AGF.

Dividends from the Classes are taxable in the year you receive them, whether you receive them in cash or have them reinvested in additional shares.

Dividends may include ordinary dividends and capital gains dividends. Ordinary dividends you receive from the Classes that are "taxable dividends" or "eligible dividends" (each as defined in the Tax Act) are generally subject to the applicable gross-up and dividend tax credit rules that apply to such dividends

received from "taxable Canadian corporations" (as defined in the Tax Act).

Capital gains dividends are treated as realized capital gains. In general, you must include one-half of the amount of a capital gain in your income for tax purposes.

The Tax Advantage Group may pay capital gains dividends in order to obtain a refund of capital gains taxes paid by the Tax Advantage Group. Generally, these would be payable on a pro-rata basis to each Class, based on the amount of taxable dividends from taxable Canadian corporations and/or capital gains earned by each Class, as applicable. However, the Board has the right to distribute capital gains dividends to a particular Class if the Board believes it reasonable to do so based upon the recommendation of AGF. The dividend to be paid to a Class will be paid proportionately amongst the series of such Class, after adjusting for series expenses. In general, you must include any management fee rebates you receive in your income. However, in some circumstances, you may instead elect to reduce the adjusted cost base of your securities by the amount of the rebate.

Certain Classes may also pay out to holders of Series FV, Series T or Series V securities amounts in respect of a return of capital. These payments are called distributions. It is not expected that distributions of a return of capital made to holders of Series FV, Series T or Series V will be taxable. Distributions of a return of capital that are not taxable, will reduce the adjusted cost base of your securities.

Management fees paid directly by the investors are generally not deductible for tax purposes.

We will issue a tax slip to you each year that shows the amount and type of dividends and/or distributions you received.

If you sell your shares for cash or switch shares outside of the Tax Advantage Group, you will realize a capital gain (or capital loss). Conversions of shares between two classes of a mutual fund corporation (such as the Tax Advantage Group) will be treated as a disposition of those shares at their fair market value. Conversions between shares of different series of the same Class of the Tax Advantage Group will not be considered a disposition for tax purposes. In general, one-half of a capital gain (a "taxable capital gain") must be included in income for tax purposes. One-half of a capital loss (an "allowable capital loss") must be applied against taxable capital gains realized in the same year, and any excess amount of such allowable capital loss may be applied against net taxable capital gains in other taxation years subject to the rules in the Tax Act.

## Calculating adjusted cost base

You must calculate the adjusted cost base of your securities separately for each series of securities of the Fund that you own. In general, the aggregate adjusted cost base of your investment in a series of securities of a Fund equals:

- your initial investment, including any applicable sales charges you paid, *plus*
- any additional investments, including any applicable sales charges you paid, *plus*
- any reinvested distributions or dividends, including management fee distributions, rebates or Elements Advantage Distributions, *minus*
- any distributions that were a return of capital, *minus*
- the adjusted cost base of any securities previously disposed of

To the extent that the adjusted cost base of your securities would otherwise be a negative amount as a result of you receiving a distribution from a Fund that is a return of capital, the negative amount will be deemed to be a capital gain realized by you from a disposition of the securities and your adjusted cost base of the securities will be increased by the amount of such deemed gain to zero.

You should keep detailed records of the purchase cost of your securities, and distributions and dividends you receive on those securities, so you can calculate their adjusted cost base. You may wish to consult a tax advisor to help you with these calculations.

## Enhanced tax information reporting

Each of Tax Advantage Group and the Trust Funds is a "Reporting Canadian financial institution" for purposes of the Canada-U.S. Enhanced Tax Information Exchange Agreement (the "IGA") and Part XVIII of the Tax Act, and intends to satisfy its obligations under Canadian law for enhanced tax reporting to the CRA. As a result of such status, securityholders may be requested to provide information to the Tax Advantage Group or the Trust Funds or their registered dealer relating to their citizenship, residency and, if applicable, a U.S. federal tax identification number or such information relating to the "controlling person(s)" in the case of certain entities. If a securityholder or any of the controlling person(s) of certain entities is identified as a U.S. taxpayer (including a U.S. citizen who is resident in Canada) or if the securityholder does not provide the requested information, the IGA and Part XVIII of the Tax Act will generally require certain account information and payments made with respect to the securityholder to be reported to the CRA, unless the investment is held in a registered plan. The CRA will

then exchange the information with the U.S. Internal Revenue Service pursuant to the provisions of the Canada-U.S. Income Tax Treaty.

Part XIX of the Tax Act implements the Organisation for Economic Co-operation and Development Common Reporting Standard. The Tax Advantage Group and each Trust Fund, and registered dealers are required by law to have procedures in place to identify accounts held by residents of countries (other than Canada and the U.S.) or by certain entities the "controlling persons" of which are resident in those countries and to report certain account information and transactions to the CRA. Such information will be exchanged on a reciprocal, bilateral basis with countries that are signatories to the Multilateral Competent Authority Agreement on Automatic Exchange of Financial Account Information or that have agreed to a bilateral information exchange with Canada under the Common Reporting Standard. Securityholders are required by law to provide certain information regarding their investment in the Tax Advantage Group or a Trust Fund for the purposes of such information exchange unless the investment is held within a registered plan.

## Buying Securities Late in the Year

Many of the Trust Funds make their only or largest distribution in December. If you buy securities of a Trust Fund just before it makes such a distribution, or securities of the Tax Advantage Group just before a dividend record date, you will be taxed on the entire distribution or dividend even though the Fund may have earned the income or realized the gain giving rise to the distribution or dividend before you owned the securities. That means you may have to pay tax on your proportionate share of the net income or net realized capital gains the Fund earned for the whole year, even though you were not invested in the Fund during the whole year.

## Portfolio Turnover

A Fund's portfolio turnover rate usually indicates how actively the portfolio manager manages the portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling each security in its portfolio once in the course of its financial year. The higher a Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance that you will receive an income or taxable capital gains distribution from a Trust Fund or a capital gains dividend from the Tax Advantage Group.

## PURCHASERS' STATUTORY RIGHTS

Securities legislation in some provinces gives you the right to withdraw from an agreement to buy mutual funds within two business days of receiving the simplified prospectus or fund facts, or to cancel your purchase within 48 hours of receiving confirmation of your order.

Securities legislation in some provinces and territories also allows you to cancel an agreement to buy your securities and get your money back, or to make a claim for damages, if the simplified prospectus, annual information form, fund facts or financial statements misrepresent any facts about the Fund. These rights must usually be exercised within certain time limits.

For more information, refer to the securities legislation of your province or territory or consult your lawyer.

## ADDITIONAL INFORMATION ABOUT FUND REORGANIZATIONS

Pursuant to securities legislation, securityholder approval may not be required for certain Fund reorganizations. Should securityholder approval not be sought, you will be sent a written notice at least 60 days before the effective date of the change.

## SPECIFIC INFORMATION ABOUT EACH OF THE MUTUAL FUNDS DESCRIBED IN THIS DOCUMENT

On the following pages, you'll find detailed descriptions of each Fund in this simplified prospectus to help you make your investment decisions. Here's what each section of the Fund descriptions tells you:

### Fund details

This is a summary of some basic information about the Fund, such as when it was started and the type of securities it offers. At AGF, we have mutual fund trusts and a mutual fund corporation. When you invest in a mutual fund trust, you buy units of the trust. When you invest in a mutual fund corporation, you buy shares of the corporation.

This section also tells you if the securities of the Fund are eligible for registered plans, such as RRSPs, Group RRSPs, LRSPs, RRIFs, LRIAs, LIRAs, LIFs, RESPs, Group RESPs, RLIFs, RLSPs, PRIFs, TFSA's or Group TFSA's, RDSPs, DPSPs, money purchase pension plans and defined contribution pension plans. See

*Income Tax Considerations for Investors – Securities held in a registered plan.*

## What does the Fund invest in?

This section describes the Fund's fundamental investment objectives and the strategies the portfolio manager uses in trying to achieve those objectives. You'll find out the types of securities the Fund can invest in and how the portfolio manager chooses investments and manages the portfolio. Here are details about some special types of investments the Funds can make:

### Derivatives

A Fund can use derivatives as long as the use of derivatives is consistent with the Fund's objectives and is permitted in law. A derivative is a contract between two parties. The value of the contract is based on or derived from an underlying asset, such as a stock, a market index, a currency, a commodity or a basket of securities. It's not a direct investment in the underlying asset itself. Examples of derivatives are options, forward contracts and futures contracts.

- An option is the right, but not the obligation, to buy or sell a security, currency, commodity, or market index at an agreed upon price by a certain date. The buyer of the option makes a payment - called a premium - to the seller for this right.
- A forward contract is an agreement to buy or sell an asset, such as a security or currency, at an agreed upon price at a future date or to pay the difference in value between the contract date and the settlement date. Forward contracts are generally not traded on organized exchanges and aren't subject to standardized terms and conditions.
- Like a forward contract, a futures contract is an agreement between two parties to buy or sell an asset at an agreed upon price at a future date or to pay the difference in value between the contract date and the settlement date. Futures contracts are normally traded on a registered futures exchange. The exchange usually specifies certain standardized features of the contract including the basket of securities.

### Investing in other investment funds

A Fund may invest in, or have exposure to, securities of another investment fund, including other investment funds managed by AGF, if, among other things,

- the other investment fund is a mutual fund, other than an alternative mutual fund, that is subject to NI 81-102; or (ii) the other investment fund is an alternative mutual fund or a non-redeemable

investment fund that is subject to NI 81-102 and, at the time of the purchase of that security, the investment fund holds no more than 10% of its net asset value in securities of alternative mutual funds and non-redeemable investment funds

- where AGF (or its affiliate or associate) is the manager of the other investment fund, AGF does not vote the Fund's holdings in the other investment fund, or, if it chooses at its discretion, flows through the voting rights to securityholders of the Fund
- at the time the Fund purchases securities of the other investment fund, the other investment fund holds no more than 10% of the market value of its net assets in securities of other investment funds
- the other investment fund is a reporting issuer in a jurisdiction
- no management fees or portfolio management fees are payable by the Fund that, to a reasonable person, would duplicate a fee payable by the other investment fund for the same service
- where AGF (or its affiliate or associate) is the manager of the other investment fund, no sales fees or redemption fees are payable by the Fund in relation to its purchases or redemptions of the securities of the other investment fund except brokerage fees incurred for the purchase or sale of securities issued by an investment fund that are listed for trading on a stock exchange
- no sales fees or redemption fees are payable by the Fund in relation to its purchases or redemptions of the securities of the other investment fund that, to a reasonable person, would duplicate a fee payable by an investor in the other investment fund except brokerage fees incurred for the purchase or sale of securities issued by an investment fund that are listed for trading on a stock exchange

## Investments in ETFs

Subject to securities legislation, a mutual fund (such as the Funds) is permitted to invest in ETFs. Such ETFs may include ETFs that offer securities that would be categorized as "index participation units" (i.e. IPU) within the meaning of NI 81-102. Securities of ETFs that are not "index participation units" (i.e. Non-IPUs) may also be permissible pursuant to securities legislation and/or any required exemptive relief granted from the Canadian securities regulatory authorities.

Exemptive relief has specifically been obtained from the Canadian securities regulatory authorities to permit the Funds to be able to invest in (i) certain Gold/Silver ETFs and certain Index ETFs, to the extent certain

conditions are met; and (ii) securities of ETFs that are not IPU) beyond the limits imposed by securities legislation to the extent certain conditions are met.

## Repurchase agreements and securities lending

Through a repurchase agreement, a mutual fund sells a security at one price and concurrently agrees to buy it back from the buyer at a fixed price on a specified date. The buyer may be a broker-dealer or other buyer. Securities lending involves lending for a fee portfolio securities held by the Fund for a set period of time to willing, qualified borrowers who have posted collateral. A Fund may enter into repurchase agreements and securities lending transactions if no more than 50% of its net asset value is at risk under repurchase transactions and securities lending agreements, unless the Fund is permitted in law to invest in a greater amount. Each of the Funds has appointed a securities lending agent for purposes of entering into securities lending transactions with suitable counterparties. Pursuant to applicable securities laws, the securities lending agent is required to be the custodian or sub-custodian of the Funds.

## Reverse repurchase agreements

Through a reverse repurchase agreement, a mutual fund buys securities for cash from a counterparty at a price set at the date of purchase and at the same time agrees to resell the same securities for cash to the counterparty at a price (usually higher) at a later date. The counterparty may be a broker-dealer or other buyer. In the event the counterparty defaults, since the types of securities purchased by the mutual fund are restricted to certain higher quality debt instruments of certain governments and other issuers, the mutual fund should be able to reduce or eliminate its losses.

## What are the risks of investing in the Fund?

This section tells you some of the risks of investing in the Fund. You'll find a description of each risk in Specific risks of the Funds. For a more complete discussion about the risks of investing in the Fund, you should consult your registered representative.

## Investment Risk Classification Methodology

AGF assigns a risk rating to each Fund as an additional guide to help investors decide whether a Fund is right for them. This information is only a guide.

The risk rating classification methodology used by AGF to determine the risk rating of each Fund is the methodology required by the regulatory authorities in NI 81-102. For each Fund, the investment risk level is based on the historical volatility of the Fund as

measured by the 10-year standard deviation of the returns of the Fund. Just as historical performance may not be indicative of future returns, a Fund's historical volatility may not be indicative of its future volatility. Investors should be aware that other types of risk, both measurable and non-measurable, also exist. Using this methodology, AGF assigns a risk rating to each Fund as either low, low to medium, medium, medium to high, or high risk.

The risk rating for each Fund is determined by calculating its standard deviation for the most recent 10 years using monthly returns and assuming the reinvestment of all income and capital gains distributions in additional Units of the Fund.

Standard deviation is a statistical measure used to estimate the dispersion of a set of data around the average value of the data. In the context of investment returns, it measures the amount of variability of returns that has historically occurred relative to the average return. The higher the standard deviation, the greater the variability of returns it has experienced in the past.

For the below Funds, which do not have at least 10 years of performance history, AGF uses a reference index that reasonably approximates or, for a newly established fund, that is reasonably expected to approximate, the standard deviation of the Fund (or in certain cases a highly similar fund managed by AGF) as a proxy:

| Name of Fund                       | Reference Index or Comparable Fund Used   | Description  |
|------------------------------------|---|--|
| AGF American Growth Fund           | AGF American Growth Class   | The comparable fund is the class equivalent of AGF American Growth Fund. Both Funds have substantially similar investment objectives and strategies.   |
| AGF Asian Growth Fund              | AGF Asian Growth Class  | The comparable fund is the class equivalent of AGF Asian Growth Fund. Both Funds have substantially similar investment objectives and strategies.  |
| AGF Elements Yield Portfolio Class | AGF Elements Yield Portfolio  | The comparable fund is the trust fund equivalent of AGF Elements Yield Portfolio Class. Both Funds have substantially similar investment objectives and strategies.  |
| AGF Emerging Markets Balanced Fund | 20% Barclays Capital EM USD Aggregate Bond Index / 30% Barclays Capital Global Aggregate Bond Index / 50% MSCI Emerging Markets Index               | The AGF Emerging Markets Balanced Fund risk classification is based on the Fund's return and the return of a blend of three indices (a) Barclays Capital EM USD Aggregate Bond Index (b) Bloomberg Barclays Global Aggregate Bond Index and (c) MSCI Emerging Markets Index. Barclays Capital EM USD Aggregate Bond Index is a measure of emerging market debt. The Bloomberg Barclays Global Aggregate Index is a flagship measure of global investment grade debt from twenty-four local currency markets. The MSCI Emerging Markets Index captures large and mid cap representation across 24 Emerging Markets (EM) countries.  |
| AGF Emerging Markets Bond Fund     | 40% JPM GBI-EM Global Diversified, 35% JPM CEMBI Broad Diversified, 25% JPM EMBI Global   | The AGF Emerging Markets Bond Fund risk classification is based on the Fund's return and the return of a blend of three indices (a) J.P. Morgan GBIEM Global Diversified Index (b) J.P. Morgan CEMBI Broad Diversified Index and (c) J.P. Morgan EMBI Global Index. These three indices are comprehensive emerging market debt indices covering government bonds and corporate bonds in locally denominated and foreign currencies.  |
| AGF Equity Income Focus Fund       | 25% S&P/TSX Composite Index / 25% FTSE Canada Universe Bond Index / 25% MSCI All Country World Index / 25% Barclays Capital Global High Yield Index | The AGF Equity Income Focus Fund risk classification is based on the Fund's return and the return of a blend of four indices (a) S&P/TSX Composite Index (b) FTSE Canada Universe Bond Index (c) MSCI All Country World Index and (d) Barclays Capital Global High Yield Index. The S&P/TSX Composite Index is a broad market measure for the Canadian equity market; it includes common stocks and income trust units. The FTSE Canada Universe Bond Index is designed to be a broad measure of the Canadian investment-grade fixed income market, covering government, quasi-government and corporate bonds. The MSCI All Country World Index captures large and mid-cap representation across 23 developed markets and 24 emerging markets countries. The Barclays Capital Global High Yield Index measures the performance of the global high yield bond market. |
| AGF European Equity Fund           | AGF European Equity Class   | The comparable fund is the class equivalent of AGF European Equity Fund. Both Funds have substantially similar investment objectives and strategies.   |

| Name of Fund                     | Reference Index or Comparable Fund Used   | Description  |
|----------------------------------|---|--|
| AGF Fixed Income Plus Class      | AGF Fixed Income Plus Fund  | To achieve its objectives, AGF Fixed Income Plus Class may invest in units of the comparable fund or directly in securities similar to those held by the comparable fund.  |
| AGF Flex Asset Allocation Fund   | 40% MSCI (All Country) World Index / 60% Barclays Capital Global Aggregate Bond   | The AGF Flex Asset Allocation Fund risk classification is based on the Fund's return and the return of a blend of two indices (a) MSCI All Country World Net Return Index and (b) Bloomberg Barclays Global Aggregate Index. The MSCI All Country World NR Index captures large and mid-cap representation across 23 developed markets and 24 emerging markets countries. The Bloomberg Barclays Global Aggregate Index captures performance of global investment grade debt from twenty-four local currency markets.  |
| AGF Floating Rate Income Fund    | S&P/ Loan Syndications and Trading Association Leveraged Loan Index   | The AGF Floating Rate Income Fund risk classification is based on the Fund's return and the return of the S&P/ LSTA Leveraged Loan Index. The S&P/ LSTA Leveraged Loan Index is a market value weighted syndicated loan index.   |
| AGF Global Bond Fund             | Bloomberg Barclays Global Aggregate Index   | The AGF Global Bond Fund risk classification is based on the Fund's return and the return of the Bloomberg Barclays Global Aggregate Index. The Bloomberg Barclays Global Aggregate Index captures performance of global investment grade debt from twenty-four local currency markets.  |
| AGF Global Convertible Bond Fund | 70% UBS Thomson Reuters Qualified Global Convertible Index/ 20% Bloomberg Barclays US Corporate High Yield Bond Index / 10% FTSE Canada 91 Day T-Bill Index       | The AGF Global Convertible Bond Fund risk classification is based on the Fund's return and the return of a blend of three indices (a) UBS Thomson Reuters Qualified Global Convertible Index (b) Barclays Capital U.S. Corporate High Yield Bond TR Index and (c) FTSE Canada 91 Day T-Bill Index. The UBS Thomson Reuters Qualified Global Convertible Index is designed to provide a broad measure of the performance of the investable, global convertible bond market. The Bloomberg Barclays US Corporate High Yield Bond Index measures the USD-denominated, high yield, fixed-rate corporate bond market. The FTSE Canada 91 Day T-Bill Index measures the performance of 3-month Government of Canada Treasury Bills.  |
| AGF Global Dividend Class        | AGF Global Dividend Fund  | To achieve its objectives, AGF Global Dividend Class may invest in units of the comparable fund or directly in securities similar to those held by the comparable fund.  |
| AGF Global Real Assets Class     | 25% S&P Global Infrastructure Index/ 15% MSCI World Real Estate Index/ 20% MSCI World Energy Index/ 20% MSCI World Materials Index/ 20% S&P/TSX Global Gold Index | The AGF Global Real Assets Class risk classification is based on the Fund's return and the return of a blend of five indices (a) S&P Global Infrastructure Index (b) MSCI World Real Estate Index (c) MSCI World Energy Index (d) MSCI World Materials Index and (e) S&P/TSX Global Gold Index. The S&P Global Infrastructure Index is designed to track 75 companies from around the world chosen to represent the listed infrastructure industry while maintaining liquidity and tradability. The MSCI World Real Estate Index is a free float-adjusted market capitalization index that consists of large and mid-cap equity across 23 developed market countries. All securities in the index are classified in the Real Estate Sector according to GICS®. The MSCI World Energy Index is designed to capture the large and mid-cap segments across 23 developed market countries. All securities in the index are classified in the Energy sector as per GICS®. The MSCI World Materials Index is designed to capture the large and mid-cap segments across 23 developed market countries. All securities in the index are classified in the Materials sector as per GICS®. The S&P/TSX Global Gold Index is designed to provide an investable index of global gold securities. |

| Name of Fund                | Reference Index or Comparable Fund Used   | Description   |
|-----------------------------|---|---|
| AGF Global Real Assets Fund | 25% S&P Global Infrastructure Index/ 15% MSCI World Real Estate Index/ 20% MSCI World Energy Index/ 20% MSCI World Materials Index/ 20% S&P/TSX Global Gold Index | The AGF Global Real Assets Fund risk classification is based on the Fund's return and the return of a blend of five indices (a) S&P Global Infrastructure Index (b) MSCI World Real Estate Index (c) MSCI World Energy Index (d) MSCI World Materials Index and (e) S&P/TSX Global Gold Index. The S&P Global Infrastructure Index is designed to track 75 companies from around the world chosen to represent the listed infrastructure industry while maintaining liquidity and tradability. The MSCI World Real Estate Index is a free float-adjusted market capitalization index that consists of large and mid-cap equity across 23 developed market countries. All securities in the index are classified in the Real Estate Sector according to GICS®. The MSCI World Energy Index is designed to capture the large and mid-cap segments across 23 developed market countries. All securities in the index are classified in the Energy sector as per GICS®. The MSCI World Materials Index is designed to capture the large and mid-cap segments across 23 developed market countries. All securities in the index are classified in the Materials sector as per GICS®. The S&P/TSX Global Gold Index is designed to provide an investable index of global gold securities. |
| AGF Income Focus Fund       | 50% FTSE Canada Universe Bond Index / 25% S&P/TSX 60 Index / 25% FTSE Canada High Yield Bond Index  | The AGF Income Focus Fund risk classification is based on the Fund's return and the return of a blend of three indices (a) S&P/TSX 60 Index (b) FTSE Canada Universe Bond Index and (c) FTSE Canada High Yield Bond Index. The FTSE Canada Universe Bond Index is designed to be a broad measure of the Canadian investment-grade fixed income market, covering government, quasi-government and corporate bonds. The S&P/TSX 60 Index covers the 60 largest market capitalization securities within the S&P/TSX Composite. The FTSE Canada High Yield Bond Index is designed to be a broad measure of the Canadian non-investment grade fixed income market.   |
| AGF Tactical Fund           | FTSE Canada 91 Day T-Bill Index + 100bps  | The AGF Tactical Fund risk classification is based on the Fund's return and the return of the FTSE Canada 91 Day T-Bill Index + 100bps. The FTSE Canada 91 Day T-Bill Index + 100bps is representative of the Fund's absolute return objective.   |
| AGF Total Return Bond Class | AGF Total Return Bond Fund  | To achieve its objectives, AGF Total Return Bond Class may invest in units of the comparable fund or directly in securities similar to those held by the comparable fund.   |
| AGFIQ U.S. Sector Class     | MSCI USA Minimum Volatility Net Total Return Index  | The AGFIQ U.S. Sector Class risk classification is based on the Fund's return and the return of the MSCI USA Minimum Volatility Net Total Return Index. The MSCI USA Minimum Volatility Net Total Return Index aims to reflect the performance characteristics of a minimum variance strategy applied to the large and mid-cap U.S. equity universe.  |

There may be times when AGF believes this methodology produces a result that does not reflect a Fund's risk based on other qualitative factors. As a result, AGF may place the Fund in a higher risk rating category, as appropriate. AGF will review the risk rating for each Fund on an annual basis or if there has been a material change to a Fund's investment objectives or investment strategies.

A more detailed explanation of standard deviation and the methodology AGF uses to determine the risk rating of the Funds is available on request, at no cost, by calling us toll-free at 1-800-268-8583, emailing us at [tiger@AGF.com](mailto:tiger@AGF.com) or writing to us at AGF Investments

Inc. – Client Services, 55 Standish Court, Suite 1050, Mississauga, Ontario L5R 0G3.

## Who Should Invest in this Fund?

This section can help you decide if the Fund might be suitable for your account. It includes information about the level of investor risk tolerance that would be appropriate for each Fund. This section is meant as a general guide only. For advice about your account, you should consult your registered representative.

## Distribution/Dividend policy

This section tells you when the Trust Funds usually distribute any earnings to investors or when the Tax Advantage Group pays dividends. This section will also tell you whether your distributions or dividends will be reinvested, or whether in certain cases you may ask to receive them in cash instead. The Fund may change its distribution/dividend policy at any time.

Each series of a Trust Fund is entitled to its share of the net income and net realized capital gains adjusted for the series specific expenses of the Trust Fund other than management fee distributions and Elements Advantage Distributions. Net income and realized capital gains earned by a Fund during the year will first be allocated to securityholders who receive management fee distributions or Elements Advantage Distributions and the remainder will be allocated to all securityholders on the basis described above. As a result, distributions of net income and net realized capital gains per security will likely be different for each series of the Trust Fund.

To the extent that distributions made during the year exceed the net income and net realized capital gains of a Trust Fund allocated as described above, such distributions may include a return of capital. A distribution of a return of capital may not be proportionately shared amongst series. In particular, management fee distributions, Elements Advantage Distributions and Series FV, Series T and Series V monthly distributions may include a return of capital. Return of capital represents a return to an investor of a portion of their own invested capital.

Any dividends paid by the Tax Advantage Group would generally be allocated amongst all Classes on a pro-rata basis, based on the amount of Canadian dividends and/or capital gains earned by each Class, as applicable. However, the Board has the right to pay dividends only to a particular Class if it believes it is appropriate to do so based on AGF's recommendation. Lastly, any dividend payable will be shared proportionately amongst all series of the Class, after adjusting for series specific expenses. As a result, dividends will likely be different for each series.

The Tax Advantage Group has a distribution policy to make monthly distributions of a return of capital to holders of Series FV, Series T and Series V securities of certain Classes so long as there is sufficient capital attributable to the relevant series. If a series of a Class is converted into Series FV, Series T or Series V, it is necessary to determine how much capital will be added to the capital of Series FV, Series T or Series V as a result of that conversion. To do so, the Tax Advantage Group must determine the capital of each existing series. Previously, it was not necessary for the Tax

Advantage Group to track the capital attributable to each series. As some of the Classes of the Tax Advantage Group have been outstanding for many years, it is not possible to determine precisely what the actual aggregate capital of each existing series is. The Tax Advantage Group will use an amount as the initial aggregate capital for each series outstanding at the time Series FV, Series T and Series V are first offered which it reasonably believes can be demonstrated to constitute capital for tax purposes but which may be less than the actual aggregate capital of such series if it could be definitively determined.

For information on how distributions or dividends can affect your taxes, see *Income Tax Considerations for Investors*. Information on current distribution rates is available on AGF's website at [www.AGF.com](http://www.AGF.com).

## Fund expenses indirectly borne by investors

This information is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. While you do not pay these costs directly, they have the effect of reducing the Fund's returns. The information is based on an initial investment of \$1,000 and a total annual return of 5% and assumes that the management expense ratio of the Fund was the same throughout each period shown as it was during the last completed financial year. For additional information refer to *Fees and Expenses* earlier in this document. Information is shown only for series of securities of a Fund that were outstanding and operational at the end of the last completed financial year.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide capital growth. It invests primarily in shares of Canadian companies that are expected to profit from future economic growth.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses a bottom-up growth investment style, focusing on companies that it believes may exhibit superior growth potential. When evaluating companies, it looks for four key characteristics:

- strong management
- above-average growth
- financial strength
- attractive valuations

The Fund may also invest in foreign securities which will vary from time to time. Foreign securities are not typically expected to exceed 49% of the net assets of the Fund at the time of purchase.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about

securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- changes in legislation risk
- class risk
- commodity risk
- counterparty risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk
- substantial securityholder risk\*

\* As of March 31, 2019, three securityholders held 11.57%, 23.42% and 37.56% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you seek the growth potential of equity securities through a mix of small, medium and large capitalization Canadian companies
- you are investing for the longer term
- you tolerate medium to high risk
- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| <b>Fees and expenses payable over (\$)</b> | <b>1 year</b> | <b>3 years</b> | <b>5 years</b> | <b>10 years</b> |
|--|---------------|----------------|----------------|-----------------|
| MF Series                                  | 27.98         | 88.20          | 154.59         | 351.89          |
| Series F                                   | 16.21         | 51.10          | 89.57          | 203.88          |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide long-term growth of capital by investing primarily in equity securities of Canadian issuers.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses a bottom-up growth investment style, focusing on companies that it believes may exhibit superior growth potential. When evaluating companies, it looks for four key characteristics:

- strong management
- above-average growth
- financial strength
- attractive valuations

The Fund may also invest in foreign securities which will vary from time to time. Foreign securities are not typically expected to exceed 49% of the net assets of the Fund at the time of purchase.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive

and more flexible than investing directly in the underlying assets

- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income.

When the Fund uses derivatives for purposes other than hedging, it holds enough cash or money market instruments to fully cover its positions, as required by securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in

aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

The Fund's portfolio turnover rate, which may be greater than 70% in a year, indicates how actively the portfolio of the Fund is managed. The higher the portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance you will receive taxable distributions in the year. Generally distributions are taxable if you hold the Fund in a non-registered account. See *Income Tax Considerations for Investors*.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- counterparty risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk

- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*

\* As of March 31, 2019, one securityholder held 33.45% of the Fund.

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of Canadian companies
- you are investing for the longer term
- you tolerate medium risk
- with respect to Series D securities, you are currently holding Series D securities and intend to make an additional investment in Series D securities
- with respect to Series Q securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

For Series FV, Series T and Series V securities, the Fund will make monthly distributions at a rate determined by AGF from time to time. The rate for Series T securities will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Fund also makes a distribution in December each year to all investors of any net income and any net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions. If the share of Series FV, Series T or Series V of net income and net realized capital gains is higher than the

total distributions made during the year at the monthly rate to such series, Series FV, Series T and Series V will receive a second distribution in December in the amount of such excess that is automatically reinvested. If the aggregate amount of the monthly distributions made to Series FV, Series T or Series V in a year exceeds the portion of the net income and net realized capital gains allocated to Series FV, Series T or Series V, the excess will constitute a return of capital. Due to the higher rate of Series FV, Series T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide superior returns with reasonable risk through a combination of dividends and capital growth from Canadian companies and interest income.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To meet these objectives, the Fund may invest in units of AGF Canadian Large Cap Dividend Fund. The Fund may also invest directly in securities similar to those held by AGF Canadian Large Cap Dividend Fund where the portfolio manager believes it would be beneficial to securityholders to do so.

The portfolio managers use a combination of quantitative and fundamental investment styles. They manage the Fund conservatively and aim for a portfolio

yield that is higher than the S&P/TSX Composite Total Return Index. The portfolio managers then evaluate individual companies, scoring each company through the lens of income, quality, growth and valuation factors. They invest in companies with above-average results, diversifying the portfolio among income, growth and cyclical stocks.

The Fund may also invest in foreign securities which will vary from time to time. The portfolio managers will determine the asset allocation to foreign content from time to time but foreign securities are not typically expected to exceed 49% of the net assets of the Fund at the time of purchase. AGF uses a proprietary quantitative framework to assist in determining which countries to invest in and the amount to allocate to each country.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. The Fund may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the

performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- class risk
- counterparty risk
- credit risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk

- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- tax and corporate law risk of returns of capital
- underlying fund risk

## Who should invest in this Fund?

Consider this Fund if:

- you want the income and growth potential of equity securities of Canadian companies
- you are investing for the longer term
- you tolerate medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you are willing to receive monthly distributions of capital
- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on Series FV, Series T and Series V securities are always reinvested. Dividends on securities of other series of the Fund held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities of other series held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Distribution policy

The Fund has a policy to make monthly distributions of a return of capital to holders of Series FV, Series T and Series V securities so long as there is sufficient capital attributable to the relevant series. AGF determines, from time to time, the rate at which distributions will be made. The amount of the distribution to Series T

securities will generally be higher than to Series FV and Series V securities. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Each distribution generally will be a return of capital. Distributions on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested unless you tell us you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. Distributions on Series FV, Series T and Series V securities are not guaranteed to occur on a specific date and the Class is not responsible for any fees or charges incurred by you because the Class did not make a distribution on a particular day. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- capital erosion risk
- changes in legislation risk
- counterparty risk
- credit risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks

- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk

## Who should invest in this Fund?

Consider this Fund if:

- you want the income and growth potential of equity securities of Canadian companies
- you are investing for the longer term
- you tolerate medium risk
- with respect to Series D securities, you are currently holding Series D securities and intend to make an additional investment in Series D securities
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

The current policy of the Fund is to make distributions at the end of any month that it is determined that there is any net income payable and, in any event, the Fund will make monthly distributions to Series FV, Series T and Series V securities at a rate determined by AGF from time to time. The rate for Series T securities will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Fund also makes a distribution in December each year to all investors of net income or net realized capital gains, if any, remaining after

allocating net income and net realized capital gains first to management fee distributions and monthly distributions. In the case of all series, other than Series FV, Series T and Series V, the December distribution will be in an amount equal to their respective shares of the net income and net capital gains in excess of the amount previously distributed to them as monthly distributions. If the share of Series FV, Series T or Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, Series FV, Series T and Series V will receive a second distribution in December in the amount of such excess that is automatically reinvested. If the aggregate amount of the monthly distributions made to a series in a year exceeds the portion of the net income and net realized capital gains allocated to that series, the excess will constitute a return of capital. Due to the higher rate of Series FV, Series T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide superior capital growth. It invests primarily in shares and other securities of small and medium Canadian companies that have the potential to generate above-average growth.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses a fundamental bottom-up investment process to identify attractive businesses trading at reasonable valuations. This core investment process is complemented by top-down macroeconomic and industry outlooks. The portfolio manager may develop strong views concerning certain macro or industry factors, in which case sector weights are adjusted to compensate for the expected opportunities/risks.

In selecting securities to achieve the investment objectives of the Fund, key investment criteria include:

- quality management aligned with securityholders
- superior revenue and earnings growth potential
- attractive valuation
- the capability to finance future growth

The Fund does not seek to replicate the sector weights or composition of the relevant benchmark index. In the event that adequate risk-adjusted returns cannot be reasonably expected, the portfolio manager is comfortable having no exposure to a sector. The portfolio manager also looks outside the benchmark index to find compelling investment ideas, including companies that are out of favour, misunderstood, or otherwise overlooked by the investment community.

The portfolio manager strives to maintain appropriate diversification in order to manage the higher risk of a small-cap portfolio. In general, the Fund would typically hold 50-75 investments, concentrated in companies that offer the most attractive risk/reward profiles. Sectors with inherent volatility or high stock-specific risk (i.e. junior mining and oil & gas) are broadly diversified.

The Fund may also invest in foreign securities which will vary from time to time. Foreign securities are not typically expected to exceed 10% of the net assets of the Fund at the time of purchase.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive

and more flexible than investing directly in the underlying assets

- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in

aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending on the portfolio manager's buying and selling activities of the Fund's investments. This may lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests primarily in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- changes in legislation risk
- commodity risk
- counterparty risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk
- substantial securityholder risk\*

\* As of March 31, 2019, one securityholder held 17.86% of the Fund.

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of Canadian companies
- you are investing for the longer term
- you tolerate medium risk

## Distribution policy

The Fund distributes in December each year to all investors any net income and net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions. It may make general distributions at other times.

Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide investors with long-term capital appreciation along with the potential for monthly income, primarily through investing in high dividend yielding shares trading on Canadian stock exchanges. The Fund may also invest in money market instruments and fixed income investments issued by corporations and governments of Canada.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

When selecting companies to invest in, the portfolio manager focuses on securities which offer an attractive current yield combined with the following

characteristics: superior management, industry leadership, a high level of profitability relative to others in that industry, a sound financial position and strong earnings and dividend growth.

The portfolio manager looks for companies with attractive valuations relative to their longer-term growth prospects. Because of the Fund's focus on dividend-paying securities, the Fund will typically be invested in relatively mature yet growing businesses and, as such, will have limited exposure to early stage growth companies, companies which require high levels of capital expenditures or companies with high rates of internal reinvestment.

The Fund may also invest in foreign securities which will vary from time to time. Foreign securities are not typically expected to exceed 30% of the net assets of the Fund at the time of purchase.

The Fund invests primarily in common shares, rights, warrants, securities convertible into common shares, instalment receipts, exchange traded funds and fixed income securities.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- capital erosion risk
- changes in legislation risk
- concentration risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk

- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk
- substantial securityholder risk\*

\* As of March 31, 2019, two securityholders held 12.40% and 23.70% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you are seeking a well-diversified Canadian fund
- you are investing for the medium to long-term
- you tolerate medium risk
- with respect to Series D securities, you are currently holding Series D securities and intend to make an additional investment in Series D securities
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

The current policy of the Fund is to make distributions monthly based on the amounts received in respect of portfolio securities to the Fund during such month, and in any event, the Fund will make monthly distributions to Series FV, Series T and Series V securities at a rate determined by AGF from time to time. The rate for Series T securities will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Fund also makes a distribution in December each year to all investors of net income or net realized capital gains, if any,

remaining after allocating net income and net realized capital gains first to management fee distributions and monthly distributions. In the case of all series, other than Series FV, Series T and Series V, the December distribution will be in an amount equal to their respective shares of the net income and net capital gains in excess of the amount previously distributed to them as monthly distributions. If the share of Series FV, Series T or Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, Series FV, Series T and Series V will receive a second distribution in December in the amount of such excess that is automatically reinvested. If the aggregate amount of the monthly distributions made to Series FV, Series T or Series V in a year exceeds the portion of the net income and net realized capital gains allocated to Series FV, Series T or Series V, the excess will constitute a return of capital. Due to the higher rate of Series FV, Series T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide long-term capital growth. It invests primarily in equity securities of established U.S. companies.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager follows a bottom-up growth investment style. It uses fundamental analysis to evaluate a company's growth potential, financial condition and management. As part of this evaluation, the portfolio manager looks for companies that have above-average earnings and/or revenue growth, display key growth characteristics relative to their own

history, industry or overall market, and can sustain their competitive position.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in

accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- class risk
- concentration risk
- counterparty risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign tax risk
- gold and silver ETFs risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*
- tax and corporate law risk of returns of capital

\* As of March 31, 2019, one securityholder held 17.87% of the Fund.

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of U.S. companies

- you are investing for the longer term
- you tolerate medium risk
- with respect to Series D securities, you are currently holding Series D securities and intend to make an additional investment in Series D securities
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you are willing to receive monthly distributions of capital

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on Series FV, Series T and Series V securities are always reinvested. Dividends on securities of other series of the Fund held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities of other series held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Distribution policy

The Fund has a policy to make monthly distributions of a return of capital to holders of Series FV, Series T and Series V securities so long as there is sufficient capital attributable to the relevant series. AGF determines, from time to time, the rate at which distributions will be made. The amount of the distribution to Series T securities will generally be higher than to Series FV and Series V securities. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Each distribution generally will be a return of capital. Distributions on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested unless you tell us you want cash payments instead. For general information about AGF's distribution policy, see *Specific*

*information about each of the mutual funds described in this document – Distribution/Dividend policy.*

Distributions on Series FV, Series T and Series V securities are not guaranteed to occur on a specific date and the Class is not responsible for any fees or charges incurred by you because the Class did not make a distribution on a particular day. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| <b>Fees and expenses payable over (\$)</b> | <b>1 year</b> | <b>3 years</b> | <b>5 years</b> | <b>10 years</b> |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide long-term capital growth. It invests primarily in equity securities of established U.S. companies.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager follows a bottom-up growth investment style. It uses fundamental analysis to evaluate a company's growth potential, financial condition and management. As part of this evaluation, the portfolio manager looks for companies that have above-average earnings and/or revenue growth, display key growth characteristics relative to their own history, industry or overall market, and can sustain their competitive position.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive dividends. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- concentration risk
- counterparty risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign tax risk
- gold and silver ETFs risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*

\* As of March 31, 2019, three securityholders held 16.65%, 32.42% and 34.86% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of U.S. companies
- you are investing for the longer term
- you tolerate medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

For Series FV, Series T and Series V securities, the Fund will make monthly distributions at a rate determined by AGF from time to time. The rate for Series T securities will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Fund also makes a distribution in December each year to all investors of any net income and any net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions. If the share of Series FV, Series T or Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, Series FV, Series T and Series V will receive a second distribution in December in the amount of such excess that is automatically reinvested. If the aggregate amount of the monthly distributions made to Series FV, Series T or Series V in a year exceeds the portion of the net income and net realized capital gains allocated to Series FV, Series T or Series V, the excess will constitute a return of capital. Due to the higher rate of Series FV, Series T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

Fund expense information is not shown for the Fund because the series of the Fund are all less than one year old.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide long-term capital growth. It invests primarily in shares of companies that are located or active mainly in Asia or the Pacific Rim Region and are principally traded on Asian stock exchanges.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The Fund may invest in one or more countries in Asia and the Pacific Rim, including Hong Kong, Indonesia, Malaysia, the Philippines, South Korea, Taiwan, Singapore, Thailand, China, India and others. There are no restrictions on the amount the Fund invests in a country or an industry. The Fund can invest in companies of any size.

The portfolio manager uses primarily a bottom-up stock selection process favouring companies that are reasonably priced relative to their growth potential. Country allocation is used as an overlay to focus the stock research effort rather than to determine specific country targets. Company visits as well as interviews with competitors, suppliers and customers form a key part of the research process.

When selecting stocks, the portfolio manager looks for several key criteria: proven management, strong ability to execute and scalable business models. The portfolio manager tends to avoid companies that are over-

owned and have persistent negative free cash flow or volatile and unpredictable earnings. When selecting companies, the focus is based on:

- ability to generate high growth in sales, margins and cash flow
- financial strength
- strong management teams

Although the preference is for concentrated portfolios, the disciplined approach also ensures broad diversification across countries and sectors.

The Fund may use options, forward contracts and other permitted derivatives, including equity linked notes, as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may invest in China A-shares listed and traded on the Shanghai Stock Exchange through the Shanghai-Hong Kong Stock Connect program or listed and traded on the Shenzhen Stock Exchange through the Shenzhen-Hong Kong Stock Connect program. Please see "Stock Connect risk" for more information. As well, the Fund may invest in participatory notes. Please see "Participatory notes risk" for more information.

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that

seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling and the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- changes in legislation risk
- class risk
- counterparty risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- liquidity risk
- participatory notes risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk
- specialization risk
- stock connect risk
- substantial securityholder risk\*

\* As of March 31, 2019, two securityholders held 20.17% and 38.83% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of Asian companies
- you are investing for the longer term
- you tolerate medium to high risk

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| <b>Fees and expenses payable over (\$)</b> | <b>1 year</b> | <b>3 years</b> | <b>5 years</b> | <b>10 years</b> |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide long-term capital growth. It invests primarily in shares of companies that are located or active mainly in Asia or the Pacific Rim Region and are principally traded on Asian stock exchanges.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The Fund may invest in one or more countries in Asia and the Pacific Rim, including Hong Kong, Indonesia, Malaysia, the Philippines, South Korea, Taiwan, Singapore, Thailand, China, India and others. There are no restrictions on the amount the Fund invests in a country or an industry. The Fund can invest in companies of any size.

The portfolio manager uses primarily a bottom-up stock selection process favouring companies that are reasonably priced relative to their growth potential. Country allocation is used as an overlay to focus the stock research effort rather than to determine specific country targets. Company visits as well as interviews with competitors, suppliers and customers form a key part of the research process.

When selecting stocks, the portfolio manager looks for several key criteria: proven management, strong ability to execute and scalable business models. The portfolio manager tends to avoid companies that are over-owned and have persistent negative free cash flow or volatile and unpredictable earnings. When selecting companies, the focus is based on:

- ability to generate high growth in sales, margins and cash flow
- financial strength
- strong management teams

Although the preference is for concentrated portfolios, the disciplined approach also ensures broad diversification across countries and sectors.

The Fund may use options, forward contracts and other permitted derivatives, including equity linked notes, as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about

securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may invest in China A-shares listed and traded on the Shanghai Stock Exchange through the Shanghai-Hong Kong Stock Connect program or listed and traded on the Shenzhen Stock Exchange through the Shenzhen-Hong Kong Stock Connect program. Please see "Stock Connect risk" for more information. As well, the Fund may invest in participatory notes. Please see "Participatory notes risk" for more information.

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

Trading costs may increase depending upon the portfolio manager's buying and selling and the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive taxable distributions. See *Income Tax Considerations for Investors*.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- changes in legislation risk
- counterparty risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- liquidity risk
- participatory notes risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk
- specialization risk
- stock connect risk
- substantial securityholder risk\*

\* As of March 31, 2019, two securityholders held 16.35% and 75.76% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of Asian companies
- you are investing for the longer term
- you tolerate medium to high risk

## Distribution policy

The Fund distributes in December each year to all investors any net income and net realized capital gains remaining after allocating net realized capital gains to units which have been redeemed during the year. It may make general distributions at other times. For information about reinvestments, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| <b>Fees and expenses payable over (\$)</b> | <b>1 year</b> | <b>3 years</b> | <b>5 years</b> | <b>10 years</b> |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide long-term capital growth. It invests primarily in stocks and bonds of companies based in China, or in companies that will benefit from economic development and growth in the PRC.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses primarily a bottom-up stock selection process favouring companies that are reasonably priced relative to their growth potential. Company visits as well as interviews with competitors, suppliers and customers form a key part of the research process.

Quantitative models are used to screen and generate investment ideas.

When selecting stocks, the portfolio manager looks for several key criteria: proven management, strong ability to execute and scalable business models. The ability to generate sustainable growth in sales, margins and cash flow, financial strength and valuations are also key considerations in stock selection. The portfolio manager tends to avoid companies that are over-owned and have persistent negative free cash flow or volatile and unpredictable earnings.

There are no restrictions on the amount the Fund invests in an industry. The Fund can invest in companies of any size.

The Fund may reduce investments in equity securities and increase investments in debt securities and prime short-term obligations. Such debt securities and prime short-term obligations may be of the PRC or other Asian, Canadian or U.S. corporations or governments depending on their relative attractiveness and the outlook for foreign exchange markets having regard to the investment objective.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may invest in China A-shares listed and traded on the Shanghai Stock Exchange through the Shanghai-Hong Kong Stock Connect program or listed and traded on the Shenzhen Stock Exchange through the Shenzhen-Hong Kong Stock Connect program. Please see "Stock Connect risk" for more information. As well, the Fund may invest in participatory notes. Please see "Participatory notes risk" for more information.

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that

seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- changes in legislation risk
- class risk
- concentration risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- liquidity risk
- participatory notes risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk
- specialization risk
- stock connect risk

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of Chinese companies and China-sensitive companies
- you are investing for the longer term
- you tolerate high risk

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide superior capital growth. It invests primarily in shares of companies that are located or active mainly in emerging market countries.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To meet these objectives, the Fund may invest in units of AGF Emerging Markets Fund. The Fund may also invest directly in securities similar to those held by AGF Emerging Markets Fund where the portfolio manager believes it would be beneficial to securityholders to do so.

The Fund intends to invest primarily in issuers located in emerging markets, as defined by the Morgan Stanley Capital International Emerging Markets Index, as well as issuers located in Hong Kong and Singapore. The portfolio manager uses a quantitative framework to assist in determining which countries to invest in and the amount to allocate to each country.

The portfolio manager then uses a bottom-up stock selection process favouring companies that are trading at a significant discount to what it believes is their underlying earnings potential. These companies should have the ability to generate above-average growth in

sales, earnings and cash flow. When evaluating companies, the focus is based on:

- strong long-term earnings
- growth
- excellent management teams
- dominance of their underlying markets

This disciplined approach also ensures broad diversification across countries and sectors.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market

instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. The Fund may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may invest in China A-shares listed and traded on the Shanghai Stock Exchange through the Shanghai-Hong Kong Stock Connect program or listed and traded on the Shenzhen Stock Exchange through the Shenzhen-Hong Kong Stock Connect program. Please see "Stock Connect risk" for more information. As well, the Fund may invest in participatory notes. Please see "Participatory notes risk" for more information.

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of

200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- changes in legislation risk
- class risk
- counterparty risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- emerging markets risk
- foreign tax risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- participatory notes risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk

- small company risk
- specialization risk
- stock connect risk
- underlying fund risk

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of emerging market countries
- you are investing for the longer term
- you tolerate medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide superior capital growth. It invests primarily in shares of companies that are located or active mainly in emerging market countries.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The Fund intends to invest primarily in issuers located in emerging markets, as defined by the Morgan Stanley Capital International Emerging Markets Index, as well as issuers located in Hong Kong and Singapore. The portfolio manager uses a quantitative framework to assist in determining which countries to invest in and the amount to allocate to each country.

The portfolio manager then uses a bottom-up stock selection process favouring companies that are trading at a significant discount to what it believes is their underlying earnings potential. These companies should have the ability to generate above-average growth in sales, earnings and cash flow. When evaluating companies, the focus is based on:

- strong long-term earnings
- growth
- excellent management teams
- dominance of their underlying markets

This disciplined approach also ensures broad diversification across countries and sectors.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may invest in China A-shares listed and traded on the Shanghai Stock Exchange through the Shanghai-Hong Kong Stock Connect program or listed and traded on the Shenzhen Stock Exchange through the Shenzhen-Hong Kong Stock Connect program. Please see "Stock Connect risk" for more information. As well, the Fund may invest in participatory notes. Please see "Participatory notes risk" for more information.

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that

seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- changes in legislation risk
- counterparty risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- participatory notes risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk
- specialization risk
- stock connect risk
- substantial securityholder risk\*

\* As of March 31, 2019, three securityholders held 14.25%, 17.76% and 23.18% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of emerging market countries
- you are investing for the longer term
- you tolerate medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

The Fund distributes in December each year to all investors any net income and net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions. It may make general distributions at other times.

Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide long-term capital growth. It invests primarily in shares of companies operating mainly in Europe and that trade on European stock exchanges.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses a bottom-up value investment approach to select stocks that appear to be trading at a discount to their estimated fair value. This includes evaluating the financial condition and management of a company, its industry and the overall economy. It looks for stocks that are selling at a substantial discount to its estimate of their intrinsic business value.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and

*Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's

returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- class risk
- concentration risk
- counterparty risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- specialization risk
- tax and corporate law risk of returns of capital

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of European companies
- you are investing for the longer term
- you tolerate medium to high risk
- with respect to Series FV, Series T and Series V securities, you are willing to receive monthly distributions of capital

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on Series FV, Series T and Series V securities are always reinvested. Dividends on securities of other series of the Fund held in AGF registered plans are

always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities of other series held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Distribution policy

The Fund has a policy to make monthly distributions of a return of capital to holders of Series FV, Series T and Series V securities so long as there is sufficient capital attributable to the relevant series. AGF determines, from time to time, the rate at which distributions will be made. The amount of the distribution to Series T securities will generally be higher than to Series FV and Series V securities. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Each distribution generally will be a return of capital. Distributions on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested unless you tell us you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. Distributions on Series FV, Series T and Series V securities are not guaranteed to occur on a specific date and the Class is not responsible for any fees or charges incurred by you because the Class did not make a distribution on a particular day. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| <b>Fees and expenses payable over (\$)</b> | <b>1 year</b> | <b>3 years</b> | <b>5 years</b> | <b>10 years</b> |
|--|---------------|----------------|----------------|-----------------|
| MF Series                                  | 32.40         | 102.13         | 179.02         | 407.50          |
| Series F                                   | 13.85         | 43.65          | 76.50          | 174.14          |
| Series T                                   | 32.82         | 103.46         | 181.35         | 412.81          |
| Series V                                   | 34.87         | 109.92         | 192.66         | 438.55          |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide long-term capital growth. It invests primarily in shares of companies operating mainly in Europe and that trade on European stock exchanges.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses a bottom-up value investment approach to select stocks that appear to be trading at a discount to their estimated fair value. This includes evaluating the financial condition and management of a company, its industry and the overall economy. It looks for stocks that are selling at a substantial discount to its estimate of their intrinsic business value.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets

- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about the mutual fund described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds (“Gold/Silver ETFs”) that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the “Index ETFs”) which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund’s investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

Trading costs may increase depending upon the portfolio manager’s buying and selling activities of the Fund’s investments. This may in turn lower the Fund’s returns. It also increases the possibility that you’ll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Fund* under *What are the risks?*

- changes in legislation risk

- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk

- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*

\* As of March 31, 2019, three securityholders held 13.61%, 30.82% and 39.73% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of European companies
- you are investing for the longer term
- you tolerate medium to high risk

## Distribution policy

The Fund distributes in December each year to all investors any net income and net realized capital gains remaining after allocating net realized capital gains to units which have been redeemed during the year. It may make general distributions at other times. For information about reinvestments, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What Does the Fund Invest In?

### Investment Objectives

The Fund's objective is to seek long-term total returns by investing primarily in a diversified portfolio of dividend-paying equity securities of issuers located around the world.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To meet these objectives, the Fund may invest in units of AGF Global Dividend Fund. The Fund may also invest directly in securities similar to those held by AGF Global Dividend Fund where the portfolio manager believes it would be beneficial to securityholders to do so.

The portfolio manager uses a quantitative model to assist in determining which countries to invest in and the amount to allocate to each country.

It then uses a bottom-up conservative growth investment philosophy to uncover stocks that are reasonably priced relative to their growth potential.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve

the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may invest in China A-shares listed and traded on the Shanghai Stock Exchange through the Shanghai-Hong Kong Stock Connect program or listed and traded on the Shenzhen Stock Exchange through the Shenzhen-Hong Kong Stock Connect program. Please see "Stock Connect risk" for more information. As well, the Fund may invest in participatory notes. Please see "Participatory notes risk" for more information.

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturns or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in

accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

The Fund is subject to the following risks:

- capital erosion risk (Series FV and Series V only)
- changes in legislation risk
- class risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- participatory notes risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- stock connect risk
- tax and corporate law risk of returns of capital
- underlying fund risk

## Who should invest in this Fund?

Consider this Fund if:

- you want the income and growth potential of equity securities of foreign companies
- you are investing for the longer term
- you tolerate low to medium risk

- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV and Series V securities, you are willing to receive monthly distributions of capital
- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

## Dividend Policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on Series FV and Series V securities are always reinvested. Dividends on securities of other series of the Fund held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities of other series held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Distribution policy

The Fund has a policy to make monthly distributions of a return of capital to holders of Series FV and Series V securities so long as there is sufficient capital attributable to the relevant series. AGF determines, from time to time, the rate at which distributions will be made. The targeted annual rate for Series FV and Series V is 5%. AGF may change this targeted annual rate at any time. Each distribution generally will be a return of capital. Distributions on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested unless you tell us you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. Distributions on Series FV and Series V securities are not guaranteed to occur on a specific date and the Class is not responsible for any fees or charges incurred by you because the Class did not make a distribution on a particular day. For

information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What Does the Fund Invest In?

### Investment Objectives

The Fund's objective is to seek long-term total returns by investing primarily in a diversified portfolio of dividend-paying equity securities of issuers located around the world.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses a quantitative model to assist in determining which countries to invest in and the amount to allocate to each country.

It then uses a bottom-up conservative growth investment philosophy to uncover stocks that are reasonably priced relative to their growth potential.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these

derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may invest in China A-shares listed and traded on the Shanghai Stock Exchange through the Shanghai-Hong Kong Stock Connect program or listed and traded on the Shenzhen Stock Exchange through the Shenzhen-Hong Kong Stock Connect program. Please see "Stock Connect risk" for more information. As well, the Fund may invest in participatory notes. Please see "Participatory notes risk" for more information.

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturns or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which

may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

The Fund is subject to the following risks:

- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- participatory notes risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- stock connect risk
- substantial securityholder risk\*

\* As of March 31, 2019, two securityholders held 15.72% and 17.58% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want the income and growth potential of equity securities of foreign companies
- you are investing for the longer term
- you tolerate low to medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

For Series FV, Series T and Series V securities, the Fund will make monthly distributions at a rate determined by AGF from time to time. The rate for Series T securities will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Fund also makes a distribution in December each year to all investors of any net income and any net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions. If the share of Series FV, Series T or Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, Series FV, Series T and Series V will receive a second distribution in December in the amount of such excess that is automatically reinvested. If the aggregate amount of the monthly distributions made to Series FV, Series T or Series V in a year exceeds the portion of the net income and net realized capital gains allocated to Series FV, Series T or Series V, the excess will constitute a return of capital. Due to the higher rate of Series FV, Series T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual*

*funds described in this document –*

*Distribution/Dividend policy.* For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| <b>Fees and expenses payable over (\$)</b> | <b>1 year</b> | <b>3 years</b> | <b>5 years</b> | <b>10 years</b> |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide long-term capital growth. It invests primarily in shares of companies around the world. It may invest up to 25% of its assets in companies in emerging markets.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses a quantitative framework to assist in determining which countries to invest in and the amount to allocate to each country.

It then uses a bottom-up conservative growth investment philosophy to uncover stocks that are reasonably priced relative to their growth potential.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund

under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may invest in China A-shares listed and traded on the Shanghai Stock Exchange through the Shanghai-Hong Kong Stock Connect program or listed and traded on the Shenzhen Stock Exchange through the Shenzhen-Hong Kong Stock Connect program. Please see "Stock Connect risk" for more information. As well, the Fund may invest in participatory notes. Please see "Participatory notes risk" for more information.

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time and by changes in interest rates. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- class risk
- counterparty risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- liquidity risk
- participatory notes risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk
- stock connect risk
- substantial securityholder risk\*
- tax and corporate law risk of returns of capital

\* As of March 31, 2019, three securityholders held 14.65%, 23.89% and 28.69% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of foreign companies
- you are investing for the longer term
- you tolerate medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you are willing to receive monthly distributions of capital
- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on Series FV, Series T and Series V securities are always reinvested. Dividends on securities of other series of the Fund held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities of other series held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Distribution policy

The Fund has a policy to make monthly distributions of a return of capital to holders of Series FV, Series T and Series V securities so long as there is sufficient capital attributable to the relevant series. AGF determines, from time to time, the rate at which distributions will be made. The amount of the distribution to Series T securities will generally be higher than to Series FV and Series V securities. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Each distribution generally will be a return of capital. Distributions on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us

you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested unless you tell us you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. Distributions on Series FV, Series T and Series V securities are not guaranteed to occur on a specific date and the Class is not responsible for any fees or charges incurred by you because the Class did not make a distribution on a particular day. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide superior capital growth. It invests primarily in shares of companies around the world with superior growth potential.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses a bottom-up earnings growth momentum style, looking at a company's revenue, earnings, profitability, earnings quality, growth potential, as well as an industry's strength and a country's strength. When selecting investments, the portfolio manager pays particular attention to the following criteria:

- accelerating sales and earnings growth rates
- strong earnings momentum and positive earnings surprise
- high earnings quality
- technical factors, such as the security's relative strength, price supports and trading volume

Sector and country allocations are generally determined by where the portfolio manager finds the best investment opportunities.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund

under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

The Fund's portfolio turnover rate, which may be greater than 70% in a year, indicates how actively the portfolio of the Fund is managed. The higher the portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance you will receive taxable distributions in the year. Generally distributions are taxable if you hold the Fund in a non-registered account. See *Income Tax Considerations for Investors*.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- changes in legislation risk
- concentration risk
- counterparty risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk

- small company risk

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of global companies
- you are investing for the longer term
- you tolerate medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

The Fund distributes in December each year to all investors any net income and net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions. It may make general distributions at other times.

Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| <b>Fees and expenses payable over (\$)</b> | <b>1 year</b> | <b>3 years</b> | <b>5 years</b> | <b>10 years</b> |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to obtain superior capital growth. It invests primarily in shares of small and medium companies with superior growth potential in the U.S.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses a bottom-up earnings growth momentum investment style, looking at a company's revenue, earnings, profitability, earnings quality, growth potential as well as industry strength. When selecting investments, the portfolio manager pays particular attention to the following criteria:

- accelerating sales and earnings growth rates
- strong earnings momentum and positive earnings surprise
- high earnings quality
- technical factors, such as the security's relative strength, price supports and trading volume

Sector allocation is generally determined by where the portfolio manager finds the best investment opportunities.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of*

*investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the

Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- changes in legislation risk
- concentration risk
- counterparty risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of equity securities of small to medium U.S. companies
- you are investing for the medium to longer term
- you tolerate medium to high risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

The Fund distributes in December each year to all investors any net income and net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions. It may make general distributions at other times.

Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are

reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide long-term capital appreciation while normally maintaining lower than market volatility. The Fund incorporates embedded downside risk management in order to protect capital in periods of falling equity markets. The Fund seeks to obtain exposure to a diversified portfolio consisting primarily of, but not limited to, any combination of U.S. sector based ETFs and/or equity securities, short-term instruments, as well as cash and cash equivalents.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager seeks to provide risk controls in down markets and enhanced alpha in up markets. The Fund will invest primarily in U.S. sector based ETFs and equities, as well as cash and cash equivalents. While the Fund is typically not expected to invest in fixed income securities other than short-term instruments (cash equivalents), the portfolio manager may obtain exposure to bonds from time to time, should market conditions warrant such an allocation. The Fund may be invested in ETFs and/or securities

representing the primary sectors of the S&P 500, which include: consumer discretionary, consumer staples, energy, financials, healthcare, industrials, materials, technology, and utilities.

Allocations, as well as the aforementioned goals of providing risk controls and enhanced alpha, are based on proprietary multifactor quantitative models that utilize fundamental factors as well as market risk measurement factors to establish allocations to primary sector S&P 500 ETFs as well as to allocate to cash and cash equivalents. The sector allocation model is driven by factors related to size, valuation and momentum whereas the market risk model utilizes, but not limited to price and return data to generate a proprietary equity risk indicator. A consolidated model, which overlays the equity risk indicator onto the sector allocation model, determines final allocations for the strategy. The Fund has the flexibility to be invested in any combination of sector ETFs and/or equity securities, investment grade bonds, high-quality short-term securities, cash, and cash equivalents.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

You'll find more information about derivatives and repurchase/reverse repurchase agreements under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that

seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- changes in legislation risk
- class risk
- concentration risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk

## Who should invest in this Fund?

Consider this Fund if:

- you want the growth potential of U.S. equity securities
- you are comfortable holding 100% cash and/or short-term instruments in down markets
- you are investing for the longer term
- you tolerate low to medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on securities held in AGF registered plans are always reinvested unless, with respect to TFSA's and Group TFSA's, you tell us you want cash payments instead. Dividends on securities held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide portfolio diversification and long-term capital growth. It invests primarily in equities and equity-related securities of companies operating in industries and sectors associated with real assets and located around the world. Real assets include, but are not limited to infrastructure, energy, precious metals and real estate.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The real assets portfolio is designed to provide global diversification and long term capital appreciation outside of traditional asset classes through investment in listed securities globally, encompassing energy, materials, infrastructure, and precious metals. This investment profile provides a focus on market sectors that help protect real returns and investor purchasing power, and offer greater diversification potential.

In addition to adding value within each of the underlying asset classes through bottom-up fundamental security selection, the real asset portfolio also seeks to add value by employing tactical weighting to each asset class and utilizing derivatives to manage risk and enhance income for the overall portfolio. The portfolio

manager regularly performs this relative value assessment and incorporates views on a variety of fundamental, technical, quantitative and economic factors.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and

- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending on the portfolio manager's buying and selling activities of the Fund's investments. This may lower the Fund's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- class risk
- commodity risk
- concentration risk
- counterparty risk
- change in legislation risk
- credit risk
- cybersecurity risk
- depositary securities and receipts risk
- derivatives risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign tax risk
- foreign market risk
- gold and silver ETFs risk
- investments in property securities risk
- infrastructure securities risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- specialisation risk
- small companies risk
- substantial security holder risk\*

\* As of March 31, 2019, two securityholders held 15.56% and 20.05% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want to invest in global equities with some exposure to fixed income and commodities

- you are looking for long term growth plus some income
- you are investing for the medium to long term
- you tolerate medium risk

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide portfolio diversification and long-term capital growth. It invests primarily in equities and equity-related securities of companies operating in industries and sectors associated with real assets and located around the world. Real assets include, but are not limited to infrastructure, energy, precious metals and real estate.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The real assets portfolio is designed to provide global diversification and long term capital appreciation outside of traditional asset classes through investment in listed securities globally, encompassing energy, materials, infrastructure, and precious metals. This investment profile provides a focus on market sectors that help protect real returns and investor purchasing power, and offer greater diversification potential.

In addition to adding value within each of the underlying asset classes through bottom-up fundamental security selection, the real asset portfolio also seeks to add

value by employing tactical weighting to each asset class and utilizing derivatives to manage risk and enhance income for the overall portfolio. The portfolio manager regularly performs this relative value assessment and incorporates views on a variety of fundamental, technical, quantitative and economic factors.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market

instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending on the portfolio manager's buying and selling activities of the Fund's investments. This may lower the Fund's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity securities, its value is affected by stock prices, which can rise and fall in a short period of time. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- commodity risk
- concentration risk
- counterparty risk
- change in legislation risk
- credit risk
- cybersecurity risk
- depositary securities and receipts risk
- derivatives risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign tax risk
- foreign market risk
- gold and silver ETFs risk
- investments in property securities risk
- infrastructure securities risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- specialisation risk
- small companies risk

## Who should invest in this Fund?

Consider this Fund if:

- you want to invest in global equities with some exposure to fixed income and commodities
- you are looking for long term growth plus some income
- you are investing for the medium to long term
- you tolerate medium risk
- with respect to Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

The Fund distributes in December each year to all investors any net income remaining after allocating net income and net realized capital gains first to management fee distributions. It may make general distributions at other times. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's investment objective is to provide long-term capital appreciation by investing primarily in a diversified portfolio of equity securities which fit the Fund's concept of sustainable development.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The Fund invests primarily in a broad selection of global equity securities including convertibles, warrants and income trust securities.

The portfolio manager looks for companies with no capitalization bias and which may typically possess proven management, proprietary/strategic advantages and financial strength. In the portfolio manager's opinion, these companies have above-average sales or earnings growth potential and favourable valuation levels with respect to these growth expectations.

The portfolio manager has identified a number of sustainability themes which provide an investment framework through which to identify attractive opportunities. As a result of this process, the portfolio manager does not invest in certain sectors, such as

fossil fuel producers, and may have a reduced weighting in others, due to their lack of positive exposure to sustainability themes.

The portfolio manager also looks for companies that fit the environmental concept of sustainable development which, as defined in a 1987 report of the World Commission on Environment and Development, is economic development that meets the needs of current generations without compromising the ability of future generations to meet theirs. This concept may be modified by the manager without securityholder approval.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets

- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which

may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

The specific risks of investing in this Fund are as described under *What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?* and include the following which are particularly applicable to this Fund:

- capital erosion risk
- changes in legislation risk
- counterparty risk
- credit risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*

\* As of March 31, 2019, two securityholders held 16.77% and 22.78% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you are a growth-oriented investor
- you are investing for the longer term
- you tolerate medium to high risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

The current policy of the Fund is to make distributions quarterly based on the amounts received in respect of portfolio securities to the Fund during such quarter. Quarterly distributions may be comprised of net income, net realized capital gains and a return of capital. In December, the Fund distributes net income or net realized capital gains, if any, remaining after giving effect to any management fee distributions and quarterly distributions. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide high long-term total investment returns with moderate risk through a combination of long-term capital growth and current income. It invests primarily in a mix of common and preferred shares of Canadian companies, Canadian federal and provincial bonds, high quality corporate bonds and money market instruments.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses a top-down approach to asset allocation and sector selection and a bottom-up approach to stock selection. Managing risk is the most important factor of the decision-making process.

Asset allocation starts with a macro review of the domestic and global economies. The portfolio manager then determines the risk and return potential of each asset class and the weightings of each asset class in the Fund. The Fund's targeted ex-cash "neutral" weighting is 60% equities and 40% fixed income. Asset allocation will fluctuate plus or minus 10% on an absolute basis (i.e. a maximum of 70% and a minimum of 30% equities or fixed income) based upon relative valuation opportunities with consideration to the risk/reward characteristics of each asset class and portfolio manager activity.

When selecting companies to invest in, the portfolio manager focuses on securities which offer an attractive current yield combined with the following characteristics: superior management, industry leadership, a high level of profitability relative to others in that industry, a sound financial position and strong earnings and dividend growth.

The Fund may also invest in foreign securities which will vary from time to time. Foreign securities are not typically expected to exceed 30% of the net assets of the Fund at the time of purchase.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income

securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity, fixed income securities and money market instruments, its value is affected by security prices, which can rise and fall in a short period of time and by changes in interest rates.

The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- capital erosion risk
- changes in legislation risk
- counterparty risk
- credit risk

- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk
- underlying fund risk

## Who should invest in this Fund?

Consider this Fund if:

- you want a balanced portfolio of Canadian equity and fixed income securities in a single fund
- you are investing for the medium to longer term
- you tolerate low to medium risk
- with respect to Series D securities, you are currently holding Series D securities and intend to make an additional investment in Series D securities
- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

AGF determines the rate from time to time at which monthly distributions in each month, other than December, to a series of the Fund will be made, which rate will not be the same for all series, and which rate may be determined to be zero. In particular, the rate for Series T will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSA's and Group

TFSA's, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Fund also makes a distribution in December each year to all investors of any net income and any net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions and monthly distributions. In the case of all series, other than Series FV, Series T and Series V, the December distribution will be in an amount equal to their respective shares of the net income and net capital gains in excess of the amount previously distributed to them as monthly distributions. If the share of Series FV, Series T or Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, such series will receive a second distribution in December in the amount of such excess that is automatically invested. If the aggregate amount of the monthly distributions made to a series in a year exceeds the portion of the net income and net capital gains allocated to that series, the excess will constitute a return of capital. Due to the higher rate of Series FV, Series T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's investment objective is to seek a balance of current income and long-term capital appreciation by investing primarily in a diversified portfolio of dividend-paying and distribution-paying Canadian equity and income securities including income trusts, common and preferred shares and corporate debt.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager employs a top-down macro outlook (economic conditions, industry outlook) combined with fundamental "bottom up" company analysis (competitive landscape, quality management, balance sheet). The portfolio manager focuses on inefficient sectors, adopts a long-term outlook, maintains the discipline to buy only at an attractive valuation, and is willing to take off benchmark positions.

The Fund may also invest in foreign securities which will vary from time to time. Foreign securities are not typically expected to exceed 49% of the net assets of the Fund at the time of purchase.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

The specific risks of investing in this Fund are as described under *What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?* and include the following which are particularly applicable to this Fund:

- asset allocation risk
- capital erosion risk
- changes in legislation risk
- counterparty risk
- credit risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk

## Who should invest in this Fund?

Consider this Fund if:

- you seek a balance between current income and long-term capital appreciation
- you are investing for the medium to long term
- you tolerate medium risk
- you wish to receive a monthly distribution
- with respect to Series Q securities, you are intending to make a large investment in a Fund

## Distribution policy

AGF determines the rate from time to time at which monthly distributions in each month, including the month of December, to a series of the Fund will be made, which rate will not be the same for all series, and which rate may be determined to be zero. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. The Fund also makes a distribution in December each year to all

investors of any net income and any net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions and monthly distributions. In the case of all series, the December distribution will be in an amount equal to the greater of i) the distribution at the monthly rate applicable for such series or ii) their respective shares of the net income and net capital gains in excess of the amount previously distributed to them as monthly distributions. If the aggregate amount of the monthly distributions made to a series in a year exceeds the portion of the net income and net capital gains allocated to that series, the excess will constitute a return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

### **Fund expenses indirectly borne by investors**

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to achieve a high level of current income and long-term growth of capital by investing primarily in units of the AGF Diversified Income Fund.

The investment objective of AGF Diversified Income Fund is to achieve a high level of current income and long-term growth of capital by investing primarily in a diversified portfolio of income, dividend and distribution paying Canadian securities including common shares, income trusts and other types of equity and fixed income securities.

The fundamental investment objective may only be changed with the approval of shareholders at a meeting called for that purpose.

### Investment Strategies

The Fund invests primarily in the AGF Diversified Income Fund (the "underlying fund"), which is also managed by AGF. As of the date of this simplified prospectus, the Fund invests approximately 100% of its net assets in the underlying fund. The underlying fund aims to provide a high level of current income and long-

term growth of capital by investing primarily in a diversified portfolio of income, dividend and distribution paying Canadian securities including common shares, income trusts and other types of equity and fixed income securities. The strategies below relate to the underlying fund.

The portfolio manager of the underlying fund invests primarily in high yield, investment grade and convertible corporate bonds, government and real return bonds and other income producing securities such as income trusts, dividend-paying equity securities and money market instruments. The portfolio manager looks for securities with a history of steady interest, dividend or distribution payouts and whether such securities have the ability to sustain payouts for a reasonable period of time and are favourably priced with respect to these payout expectations.

The underlying fund may invest up to 49% of its assets (at market value at time of purchase) in foreign (non-Canadian) securities.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. The Fund may invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the

performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

In addition to the risks of investing in the Fund directly, the Fund indirectly has the same risks in proportion to its investment in the underlying fund. The direct and indirect risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- changes in legislation risk
- class risk
- concentration risk
- counterparty risk
- credit risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk

- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- underlying fund risk

## Who should invest in this Fund?

Consider this Fund if:

- you are an income-oriented investor
- you are investing for the medium to long term
- you have low to medium tolerance for risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's investment objective is to achieve a high level of current income and long-term growth of capital by investing primarily in a diversified portfolio of income, dividend and distribution paying Canadian securities including common shares, income trusts and other types of equity and fixed income securities.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The Fund invests primarily in high yield, investment grade and convertible corporate bonds, government and real return bonds and other income producing securities such as income trusts, dividend-paying equity securities and money market instruments. The portfolio manager looks for securities with a history of steady interest, dividend or distribution payouts and whether such securities have the ability to sustain payouts for a reasonable period of time and are favourably priced with respect to these payout expectations. The Fund may invest up to approximately 49% of its assets (at market value at time of purchase) in foreign (non-Canadian) securities.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about

securities lending and the strategies used by the Fund under *What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

The specific risks of investing in this Fund are as described under *What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?* and include the following which are particularly applicable to this Fund:

- asset allocation risk
- capital erosion risk
- changes in legislation risk
- concentration risk
- counterparty risk
- credit risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*

\* As of March 31, 2019, one securityholder held 27.28% of the Fund.

## Who should invest in this Fund?

Consider this Fund if:

- you are an income-oriented investor
- you are investing for the medium to long term
- you tolerate low to medium risk
- you wish to receive a monthly distribution
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

AGF determines the rate from time to time at which monthly distributions in each month, including the month of December, to a series of the Fund will be made, which rate will not be the same for all series, and which rate may be determined to be zero. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. The Fund also makes a distribution in December each year to all investors of any net income and any net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions and monthly distributions. In the case of all series, the December distribution will be in an amount equal to the greater of i) the distribution at the monthly rate applicable for such series or ii) their respective shares of the net income and net capital gains in excess of the amount previously distributed to them as monthly distributions. If the aggregate amount of the monthly distributions made to a series in a year exceeds the portion of the net income and net capital gains allocated to that series, the excess will constitute a return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide above-average long-term total return. It invests primarily in a mix of emerging market equity and fixed income (via mutual funds and/or underlying holdings), as well as cash and cash equivalents.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the portfolio manager may allocate the assets of the Fund among two or more underlying funds, which are managed by AGF, or may invest directly in securities as described below.

The Fund uses an asset allocation approach to adjust its holdings among equities and fixed income.

Within the equity component:

- the portfolio manager intends to invest primarily in issuers located in emerging markets, as defined by the Morgan Stanley Capital International Emerging Markets Total Return Index, as well as issuers located in Hong Kong and Singapore. The portfolio manager uses a quantitative framework to assist in determining which countries to invest in and the amount to allocate to each country
- the portfolio manager then uses a bottom-up stock selection process favouring companies that are

trading at a significant discount to what is believed to be their underlying cash earnings potential.

These companies should have the ability to generate positive and sustainable earnings growth, thus enabling them to achieve economic profits over time (return in excess of cost of capital). When evaluating companies, the focus is based on:

- strong franchise
- above average cash generation
- positive earnings/earnings sustainability
- ability or prospective ability to pay dividends

this disciplined approach also ensures broad diversification across countries and sectors.

Within the fixed income component:

- the portfolio manager employs a top-down fundamental approach that is based on currency, country and category allocation, and duration management, and is complemented with a bottom-up approach to security selection
- The portfolio manager takes a diversified approach to maximize the total return of the Fund by expanding beyond emerging market sovereign debt and investing in the entire emerging market fixed income opportunity set. The actively managed Fund is primarily a portfolio of local and foreign currency, denominated emerging market sovereign and corporate debt instruments issued

by a broad range of countries. Overall, the portfolio manager looks for fixed income securities that provide an attractive return relative to the risk of each credit type

- The portfolio manager may engage in active currency management strategies to exploit or hedge the risk of changes in currency exchange rates.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. The Fund may invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and

investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling and the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive taxable distributions. See *Income Tax Considerations for Investors*. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity, fixed income securities, and money market instruments, its value is affected by security prices, which can rise and fall in a short period of time and by changes in interest rates. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- changes in legislation risk
- concentration risk
- counterparty risk
- credit risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk
- specialization risk
- underlying fund risk

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| Fees and expenses payable over (\$) | 1 year | 3 years | 5 years | 10 years |
|-------------------------------------|--------|---------|---------|----------|
| MF Series                           | 30.19  | 95.16   | 166.80  | 379.69   |
| Series F                            | 18.32  | 57.74   | 101.21  | 230.39   |

## Who should invest in this Fund?

Consider this Fund if:

- you want a portfolio of emerging market equity and fixed income securities in a single fund
- you are investing for the medium term
- you tolerate low to medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

The Fund distributes in December each year to all investors any net income and net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions. It may make general distributions at other times.

Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## What Does the Fund Invest In?

### Investment Objectives

The Fund's objective is to provide total return over a market cycle, with a focus on capital preservation and risk management. The Fund utilizes a systematic investment framework to construct a diversified portfolio consisting primarily of, but not limited to, any combination of global ETFs, equity securities, fixed income, and short-term instruments as well as cash and cash equivalents.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The Fund uses a flexible approach seeking to provide total returns over a market cycle through the construction of a portfolio of equity, fixed income and non-traditional asset classes. The Fund is managed actively and relies on strategic, dynamic and tactical asset allocation processes to achieve its objective.

The Fund invests primarily in equity, fixed income, commodities, property and infrastructure through index-oriented ETFs as well as derivatives and cash and cash equivalents. During periods of market volatility, the Fund may allocate all, or a portion of its assets to any of these asset classes for risk management and to achieve its investment objective.

The Fund relies on a three pillar approach of strategic, dynamic and tactical asset allocation in a systematic framework to achieve its objective.

The Fund first looks to identify and categorise global asset classes by designing strategic portfolios for each market environment or regime. The Fund then uses quantitative analysis to identify the current market sentiment/regime to generate meaningful and timely, dynamic shifts to portfolio positioning. Finally, the Fund incorporates tactical asset allocation positioning based in quantitative and fundamental analysis to inform the final portfolio mix.

The Fund will primarily utilize index-oriented ETFs to achieve its investment objective. The Fund will also utilize derivatives as well as cash and cash equivalents in a manner consistent with its investment objective.

The Fund may hold a portion or all of its assets in cash or money market instruments for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its

investment objectives by temporarily investing most of its assets in cash or money market securities or money market ETFs during periods of market downturn.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets

When the Fund uses derivatives for purposes other than hedging, to fully cover its obligations, the Fund holds cover in the form of cash, an investment in, or a right or obligation to acquire, the underlying interest, as permitted under securities laws for such derivative.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about the mutual fund described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturns or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

The Fund's portfolio turnover rate, which may be greater than 70% in a year, indicates how actively the portfolio of the Fund is managed. The higher the portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance you will receive taxable distributions in the year. Generally distributions are taxable if you hold the Fund in a non-registered account. See *Income Tax Considerations for Investors*.

## What are the risks of investing in the Fund?

The Fund is subject to the following risks:

- asset allocation risk
- changes in legislation risk
- commodity risk
- concentration risk

- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| Fees and expenses payable over (\$) | 1 year | 3 years | 5 years | 10 years |
|-------------------------------------|--------|---------|---------|----------|
| MF Series                           | 21.71  | 68.44   | 119.95  | 273.05   |
| Series F                            | 16.43  | 51.81   | 90.81   | 206.70   |

## Who should invest in this Fund?

Consider this Fund if:

- you want and you have tolerance for volatility consistent with a conservative portfolio
- you are investing for the medium term
- you tolerate low to medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

The Fund distributes in December each year to all investors any net income and net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions. It may make general distributions at other times.

Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide superior returns with moderate risk through a combination of capital appreciation and interest income. The Fund uses an asset allocation approach. It invests primarily in a mix of shares of companies in countries and industries that are expected to have superior growth, bonds and short-term money market instruments.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The Fund uses an asset allocation approach to adjust its holdings among equities and fixed income.

Within the equity component, the portfolio manager uses a proprietary quantitative framework to assist in determining which countries to invest in and the

amount to allocate to each country. The portfolio manager then uses a bottom-up conservative growth investment philosophy to uncover stocks that are reasonably priced relative to their growth potential.

Within the fixed income component, the portfolio manager seeks to maximize the total return of the portfolio through a bottom-up approach to corporate bond selection and a top-down approach to country allocation, category allocation and duration management. The portfolio manager looks for bond issues that provide an attractive return relative to the risk of each credit.

The Fund may also invest in sub-investment grade securities including emerging market or high yield debt.

The portfolio manager may engage in active currency management strategies to exploit or hedge the risk of changes in currency exchange rates.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and

is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in equity and fixed income securities, its value is affected by stock prices, which can rise and fall in a short period of time and by changes in interest rates. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- concentration risk
- counterparty risk
- credit risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- equity risk
- ETF general risks

- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*
- underlying fund risk

\* As of March 31, 2019, one securityholder held 36.72% of the Fund.

## Who should invest in this Fund?

Consider this Fund if:

- you want a mix of foreign equity and fixed income securities in a single fund
- you are investing for the medium to longer term
- you tolerate medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

For Series FV, Series T and Series V securities, the Fund will make monthly distributions at a rate determined by AGF from time to time. The rate for Series T securities will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSA's and Group TFSA's, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Fund also makes a distribution in December each year to all investors of any net income and any net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions. If

the share of Series FV, Series T or Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, Series FV, Series T and Series V will receive a second distribution in December in the amount of such excess that is automatically reinvested. If the aggregate amount of the monthly distributions made to Series FV, Series T or Series V in a year exceeds the portion of the net income and net realized capital gains allocated to Series FV, Series T or Series V, the excess will constitute a return of capital. Due to the higher rate of Series FV, Series T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| <b>Fees and expenses payable over (\$)</b> | <b>1 year</b> | <b>3 years</b> | <b>5 years</b> | <b>10 years</b> |
|--|---------------|----------------|----------------|-----------------|
| MF Series                                  | 27.01         | 85.15          | 149.26         | 339.75          |
| Series F                                   | 14.45         | 45.55          | 79.84          | 181.74          |
| Series T                                   | 27.58         | 86.95          | 152.40         | 346.90          |
| Series V                                   | 28.44         | 89.67          | 157.17         | 357.77          |

# AGF TACTICAL FUND

## Fund details

|                                     |   |
|-------------------------------------|---|
| <b>Type of fund:</b>                | Global asset allocation fund                                      |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide absolute total return. At any time the Fund may invest tactically in a portfolio that could include global equity and fixed income securities including equity and fixed income exchange traded funds (ETFs) as well as cash and cash equivalents.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses a tactical, flexible approach to provide absolute total return through the construction of a portfolio of global equity, fixed income securities, derivatives and cash and cash equivalents. The Fund is not managed relative to an index but rather seeks to achieve positive total returns.

The Fund may invest in fixed income securities and other debt instruments, derivative instruments, commodities-related investments and equity securities including ETFs. At any given time, the Fund may allocate all, or a portion of its assets, to any of these asset classes. The Fund has no geographic limits on where it may invest and may have significant investment in a single geographic region or country, including emerging and frontier markets.

The Fund may invest in IPUs as permitted by NI 81-102.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates

- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions. You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds (“Gold/Silver ETFs”) that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the “Index ETFs”) which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund’s investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund’s investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager’s buying and selling activities of the Fund’s investments. This may in turn lower the Fund’s returns. It also increases the possibility that you’ll receive dividends. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

The value of the Fund’s investments can change for many reasons. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- changes in legislation risk
- commodity risk
- concentration risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk

- gold and silver ETFs risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk
- substantial securityholder risk\*

\* As of March 31, 2019, three securityholders held 12.86%, 27.83% and 39.56% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want total return
- you are investing for the longer term
- you tolerate medium to high risk

## Distribution policy

The Fund distributes in December each year to all investors any net income and net realized capital gains remaining after allocating net realized capital gains to units which have been redeemed during the year. It may make general distributions at other times. For information about reinvestments, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| Fees and expenses payable over (\$) | 1 year | 3 years | 5 years | 10 years |
|-------------------------------------|--------|---------|---------|----------|
| Series S                            | 2.34   | 7.38    | 12.94   | 29.46    |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide maximum income, while preserving capital and liquidity. It invests primarily in Canadian money market instruments, such as Canadian treasury bills.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The Fund invests in high quality money market instruments, such as Government of Canada, provincial treasury bills, government guaranteed agency paper and bankers acceptance paper. The weighted average term to maturity of the Fund's investments is restricted in law to 90 days or less. It aims to maintain a constant unit price of \$10.00.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets and interest rates
- to gain exposure to securities and financial markets. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

You'll find more information about derivatives and repurchase/reverse repurchase agreements under *What does the Fund invest in?*

## What are the risks of investing in the Fund?

Because the Fund invests primarily in Canadian money market instruments, the income it earns varies with short-term interest rates. There's no guarantee that the unit price of the Fund will always be \$10.00. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- changes in legislation risk
- credit risk

- cybersecurity risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*

\* As of March 31, 2019, one securityholder held 21.11% of the Fund.

## Who should invest in this Fund?

Consider this Fund if you want the lower risk associated with money market instruments.

## Distribution policy

The Fund credits net income daily to securityholders' accounts and reinvests the distribution monthly. The Fund makes distributions of net realized capital gains, if any, each year in December and such distribution is automatically reinvested annually. If you elect to receive cash payments in lieu of reinvestment, you must notify AGF in writing of your election to automatically redeem your securities reinvested that month. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's investment objective is to provide steady income to investors by investing primarily in fixed-income securities.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To meet these objectives, the Fund may invest in units of AGF Fixed Income Plus Fund. The Fund may also invest directly in securities similar to those held by AGF Fixed Income Plus Fund where the portfolio manager believes it would be beneficial to securityholders to do so.

The portfolio manager invests primarily in high-quality Canadian government and corporate fixed income securities with maturities in excess of one year. This Fund may also invest in convertibles and high yield bonds. The Fund may invest up to approximately 49% of its assets (at market value at time of purchase) in foreign (non-Canadian) securities.

The portfolio manager looks for government or corporate securities with a history of steady interest or distribution payouts. In the portfolio manager's opinion,

these securities have the ability to sustain the payouts for a reasonable period of time and are favourably priced with respect to these payout expectations.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and

- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

The specific risks of investing in this Fund are as described under *What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?* and include the following which are particularly applicable to this Fund:

- changes in legislation risk
- class risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*
- underlying fund risk

\* As of March 31, 2019, one securityholder held 24.49% of the Fund.

## Who should invest in this Fund?

Consider this Fund if:

- you are an income-oriented investor
- you are investing for the medium term
- you tolerate low risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's investment objective is to provide steady income to investors by investing primarily in fixed-income securities.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager invests primarily in high-quality Canadian government and corporate fixed income securities with maturities in excess of one year. This Fund may also invest in convertibles and high yield bonds. The Fund may invest up to approximately 49% of its assets (at market value at time of purchase) in foreign (non-Canadian) securities.

The portfolio manager looks for government or corporate securities with a history of steady interest or distribution payouts. In the portfolio manager's opinion, these securities have the ability to sustain the payouts for a reasonable period of time and are favourably priced with respect to these payout expectations.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and

is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?* and *Specific information*

about each of the mutual funds described in this document.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's

returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

The specific risks of investing in this Fund are as described under *What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?* and include the following which are particularly applicable to this Fund:

- capital erosion risk
- changes in legislation risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*

\* As of March 31, 2019, two securityholders held 11.26% and 15.37% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you are an income-oriented investor
- you are investing for the medium term
- you tolerate low risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

The current policy of the Fund is to make distributions quarterly based on the amounts received in respect of portfolio securities to the Fund during such quarter. Quarterly distributions may be comprised of net income, net realized capital gains and a return of capital. In December, the Fund distributes net income or net realized capital gains, if any, remaining after giving effect to any management fee distributions and quarterly distributions. Distributions on securities held

in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

### **Fund expenses indirectly borne by investors**

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide maximum income while preserving capital and liquidity. It invests primarily in short-term instruments, government guaranteed securities and corporate paper with a minimum A credit rating.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The Fund invests primarily in cash and short-term instruments such as government guaranteed securities, bankers acceptance and corporate paper.

The Fund may also invest in foreign securities which will vary from time to time. Foreign securities are not typically expected to exceed 49% of the net assets of the Fund at the time of purchase.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets

- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds (“Gold/Silver ETFs”) that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the “Index ETFs”) which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund’s investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund’s investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager’s buying and selling of the Fund’s investments. This also increases the possibility that you’ll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests primarily in fixed income securities and money market instruments, it is affected by changing interest rates. When mutual funds hold more than 10% of their net assets in securities of a single issuer, such funds have less diversification which may have an adverse impact on a fund’s returns. Concentration can also lead to increased volatility in a fund’s security price and it may result in the fund’s position in the issuer’s securities being less liquid. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- changes in legislation risk
- class risk
- concentration risk
- counterparty risk
- credit risk
- cybersecurity risk
- ETF general risks

- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk

## Who should invest in this Fund?

Consider this Fund if:

- you want the income potential of short-term fixed income securities
- you are investing for the short term
- you want the lower risk associated with money market instruments and short-term fixed income securities

## Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund’s board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF’s dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| Fees and expenses payable over (\$) | 1 year | 3 years | 5 years | 10 years |
|-------------------------------------|--------|---------|---------|----------|
| MF Series                           | 9.12   | 28.75   | 50.39   | 114.70   |
| Series F                            | 6.20   | 19.55   | 34.27   | 78.01    |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to maximize total returns by investing primarily in fixed income securities of emerging market issuers.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager employs a top-down fundamental approach that is based on currency, country and category allocation, and duration management, and is complemented with a bottom-up approach to security selection.

The portfolio manager takes a diversified approach to maximize the total return of the Fund by expanding beyond emerging market sovereign debt and investing in the entire emerging market fixed income opportunity set. The actively managed Fund is primarily a portfolio of local and foreign currency, denominated emerging market sovereign and corporate debt instruments issued by a broad range of countries. Overall, the portfolio manager looks for fixed income securities that provide an attractive return to the risk of each credit type.

The portfolio manager may engage in active currency management strategies to exploit or hedge the risk of changes in currency exchange rates.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and

- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in fixed income securities, its value is affected by changes in interest rates. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- bond connect risk
- changes in legislation risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- emerging markets risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- specialization risk
- substantial securityholder risk\*

\* As of March 31, 2019, three securityholders held 11.04%, 14.56% and 48.19% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want a total return approach to emerging markets fixed income securities
- you are investing for the medium term
- you tolerate low to medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

The Fund makes distributions monthly based on the estimated annual income of the Fund. In December, the Fund distributes net income or net realized capital gains, if any, remaining after giving effect to any management fee distributions and monthly distributions. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide a high level of current income by investing primarily in senior floating rate loans and other floating rate debt securities of companies domiciled in the U.S.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager uses a bottom-up, research driven investment approach, diversifying across sector, issuer and credit tier to invest in senior floating rate loans ("senior loans"). The portfolio manager invests primarily in senior loans that pay interest rates that float, adjust or vary periodically generally based on a recognized base lending rate such as the London Inter-Bank Offered Rate ("LIBOR"), a prime rate or another base lending rate used by commercial banks and lenders. As these base lending rates are subject to change periodically, senior loans are generally less sensitive to interest rate changes than other income

investments. The borrowers of the senior loans in which the Fund invests are primarily domiciled in the U.S. The Fund can also invest in high yield bonds.

Senior loans and high yield bonds typically are of below investment grade quality and have below investment grade credit ratings (by an "approved credit rating agency" as defined under NI 81-102) which ratings are associated with securities having high risk, speculative characteristics. Senior loans are generally secured with specific collateral of the borrower and are generally senior to other more junior securities within the borrower's capital structures in the event of default. Senior loans may include provisions that require the borrower to maintain or achieve a certain level of financial performance or to refrain from taking certain actions to avoid default. Senior loans are often associated with recapitalizations, mergers and acquisitions or refinancings. Senior loans are typically arranged through a lead commercial or investment bank and syndicated to other banks and non-bank investors.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and

is permitted in law. The Fund may invest in derivatives, such as currency forwards, in order to hedge the risk of its exposure to the U.S. dollar and other currencies in which senior loans and other investments are denominated. In addition, it may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or

industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in fixed income securities, its value is affected by changes in interest rates. The impact of interest rate changes on floating rate investments may be mitigated by the periodic interest rate reset of the investments. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- concentration risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- loan risk
- specialization risk
- substantial securityholder risk\*

\* As of March 31, 2019, five securityholders held 10.73%, 12.58%, 13.15%, 19.71% and 23.00% of Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want the income potential of floating rate bank loan securities
- you are investing for the medium to long term
- you tolerate low to medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

The current policy of the Fund is to make distributions monthly based on the amounts received in respect of portfolio securities to the Fund during such month, and in any event, the Fund will make monthly distributions to Series FV, Series T and Series V securities at a rate determined by AGF from time to time. The rate for Series T securities will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time.

Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Fund also makes a distribution in December each year to all investors of net income or net realized capital gains, if any, remaining after allocating net income and net realized capital gains first to management fee distributions and monthly distributions. In the case of all series, other than Series FV, Series T and Series V, the December distribution will be in an amount equal to their respective shares of the net income and net capital gains in excess of the amount previously distributed to them as monthly distributions. If the share of Series FV, Series T or Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, Series FV, Series T and Series V will receive a second distribution in December in the amount of such excess that is automatically reinvested. If the aggregate amount of the monthly distributions made to Series FV,

Series T or Series V in a year exceeds the portion of the net income and net realized capital gains allocated to Series FV, Series T or Series V, the excess will constitute a return of capital. Due to the higher rate of Series FV, Series T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide interest income and capital appreciation. It invests primarily in investment grade debt securities of governments, corporations and other issuers around the world.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager seeks to maximize the total return of the Fund through a top-down fundamental approach that is based on currency, country and category allocation, and duration management, and is complemented with a bottom-up approach to corporate bond selection.

The Portfolio manager invests in a diversified portfolio of investment grade debt and debt-related instruments denominated in currencies of any member state of the OECD or in other freely convertible currencies, issued by governments, supranational entities, corporations and other issuers around the world. The portfolio manager looks for bond issues that provide an attractive return relative to the risk of each credit type. The fund may also invest in sub-investment grade securities including emerging market or high yield debt.

Typically sub-investment grade exposure will not exceed 20% of the fixed income allocation.

The portfolio manager may engage in active currency management strategies to exploit or hedge the risk of changes in currency exchange rates.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests in fixed income securities, its value is affected by changes in interest rates. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- bond connect risk
- changes in legislation risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*

\* As of March 31, 2019, three securityholders held 11.65%, 25.22% and 35.78% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want the income potential of foreign fixed income securities
- you are investing for the medium term
- you tolerate low to medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

The Fund makes distributions monthly based on the estimated annual income of the Fund. In December, the Fund distributes net income or net realized capital gains, if any, remaining after giving effect to any management fee distributions and monthly distributions. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| <b>Fees and expenses payable over (\$)</b> | <b>1 year</b> | <b>3 years</b> | <b>5 years</b> | <b>10 years</b> |

## What does the Fund invest in?

### Investment Objectives

The Fund's investment objective is to seek to generate attractive long-term returns through interest income and capital appreciation. The Fund will invest primarily in global convertible bonds issued by entities domiciled or conducting business anywhere in the world.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager invests primarily in convertible securities issued by companies from around the world of all market capitalizations, including, but not limited to: corporate bonds, debentures, notes or preferred stocks; all of which can be converted into common stock providing an opportunity for equity participation. Incorporating both a top down (category and sector allocation) and bottom up (security selection) investment approach, the portfolio manager will assess the relative attractiveness of a convertible bond with the principal focus to select convertibles which it believes

will produce income and long-term growth at reasonable valuations. The portfolio manager will diversify the portfolio by sector as well as by issuer, and will attempt to mitigate interest rate risk by monitoring both the issuers and the duration of the portfolio.

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market

instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

The specific risks of investing in this Fund are as described under *What is a Mutual Fund and What are the Risks of Investing in a Mutual Fund?* and include the following which are particularly applicable to this Fund:

- capital erosion risk
- changes in legislation risk
- concentration risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- specialization risk
- substantial securityholder risk\*

\* As of March 31, 2019, three securityholders held 15.49%, 18.95% and 34.73% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you are seeking investments in global convertible bond funds
- you are investing for the longer term
- you tolerate low to medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

The current policy of the Fund is to make distributions to all series of the Fund, other than Series FV and Series V, quarterly based on the amounts received in respect of portfolio securities to the Fund during such quarter. Such quarterly distributions may be comprised of net income, net realized capital gains and a return of capital. For Series FV and Series V Units, AGF determines the rate from time to time at which monthly distributions will be made. The rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series FV and Series V is 5%. AGF may change this targeted annual rate at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV and Series V will receive a distribution in December each year at the monthly rate applicable for such series. The Fund also makes a distribution in December each year to all investors of any net income and net realized capital gains remaining, after giving effect to any management fee distributions and quarterly distributions, as applicable. In the case of all series, other than Series FV and Series V, the December distribution will be an amount equal to their respective shares of the net income and net capital gains in excess of the amount previously distributed to them as quarterly distributions. If the share of Series FV and Series V of net income and net realized capital gains is higher than the total distributions made during the year to such series, such series will receive a second distribution in December in the amount of such excess that is automatically reinvested. If the aggregate amount of distributions made to a series in a year exceeds the portion of the net income and net capital gains allocated to that series, the excess will

constitute a return of capital. Due to the higher rate of Series FV and Series V, Series FV and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| Fees and expenses payable over (\$) | 1 year | 3 years | 5 years | 10 years |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to generate a high level of income and maximize return by investing primarily in fixed income securities issued or guaranteed by corporations around the world and rated BB+ equivalent or lower.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager seeks to maximize the total return of the portfolio through a bottom-up approach to corporate bond selection and a top-down approach to category allocation and duration management. The portfolio manager looks for bond issues that provide an attractive return relative to the risk of each credit.

The Fund will primarily invest in below investment grade debt, i.e. a credit rating below BBB from Standard & Poor's (or an equivalent rating from another rating agency).

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling of the Fund's investments. This also increases the possibility that you'll receive distributions. Generally, distributions are

taxable if you hold the Fund in a non-registered account.

The Fund's portfolio turnover rate, which may be greater than 70% in a year, indicates how actively the portfolio of the Fund is managed. The higher the portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance you will receive taxable distributions in the year. Generally distributions are taxable if you hold the Fund in a non-registered account. See *Income Tax Considerations for Investors*.

## What are the risks of investing in the Fund?

Because the Fund invests in fixed income securities, its value is affected by changes in interest rates. When mutual funds hold more than 10% of their net assets in securities of a single issuer, such funds have less diversification which may have an adverse impact on a fund's returns. Concentration can also lead to increased volatility in a fund's security price and it may result in the fund's position in the issuer's securities being less liquid. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- bond connect risk
- changes in legislation risk
- concentration risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- specialization risk
- substantial securityholder risk\*

\* As of March 31, 2019, two securityholders held 21.81% and 22.26% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you want the income potential of fixed income securities
- you are investing for the medium term
- you tolerate low risk
- with respect to Series Q securities, you are intending to make a large investment in a Fund

## Distribution policy

The current policy of the Fund is to make distributions monthly based on the estimated annual income of the Fund. In December, the Fund distributes net income or net realized capital gains, if any, remaining after giving effect to any management fee distributions and monthly distributions. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide interest income and capital appreciation by investing in debt securities of governments and other issuers around the world.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To meet these objectives, the Fund may invest in units of AGF Total Return Bond Fund. The Fund may also invest directly in securities similar to those held by AGF Total Return Bond Fund where the portfolio manager believes it would be beneficial to securityholders to do so.

The portfolio manager seeks to maximize the total return of the portfolio through a bottom-up approach to corporate bond selection and a top-down approach to country allocation, category allocation and duration management. The portfolio manager looks for bond issues that provide an attractive return relative to the risk of each credit.

The Fund may also invest in below investment grade government and corporate debt, i.e. a credit rating below BBB from Standard & Poor's (or an equivalent rating from another rating agency).

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling of the Fund's investments. This also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

Because the Fund invests primarily in fixed income securities, its value is affected by changes in interest rates. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- bond connect risk
- capital erosion risk (Series FV and Series V only)
- changes in legislation risk
- class risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- specialization risk
- underlying fund risk

## Who should invest in this Fund?

Consider this Fund if:

- you are investing for the medium to longer term
- you tolerate low risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth
- with respect to Series FV and Series V securities, you are willing to receive monthly distributions of capital

### Dividend policy

The Fund has no policy to pay regular dividends to its securityholders. The Fund's board of directors determines when and if a dividend is paid based upon the recommendation of AGF. The Fund may pay ordinary dividends or capital gains dividends. Dividends on Series FV and Series V securities are always reinvested. Dividends on securities of other series of the Fund held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities of other series held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

### Distribution policy

The Fund has a policy to make monthly distributions of a return of capital to holders of Series FV and Series V securities so long as there is sufficient capital attributable to the relevant series. AGF determines, from time to time, the rate at which distributions will be made. The targeted annual rate for Series FV and Series V is 5%. AGF may change this targeted annual rate at any time. Each distribution generally will be a return of capital. Distributions on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested unless you tell us you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. Distributions on Series FV and Series V securities are not guaranteed to occur on a specific date and the Class is not responsible for any fees or charges incurred by you because the Class did not make a distribution on a particular day. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

### Fund expenses indirectly borne by investors

This example shows how much the Fund would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| Fees and expenses payable over (\$) | 1 year | 3 years | 5 years | 10 years |
|-------------------------------------|--------|---------|---------|----------|
| MF Series                           | 18.99  | 59.87   | 104.93  | 238.86   |
| Series F                            | 10.66  | 33.61   | 58.91   | 134.10   |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide interest income and capital appreciation by investing in debt securities of governments and other issuers around the world.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

The portfolio manager seeks to maximize the total return of the portfolio through a bottom-up approach to corporate bond selection and a top-down approach to country allocation, category allocation and duration management. The portfolio manager looks for bond issues that provide an attractive return relative to the risk of each credit.

The Fund may also invest in below investment grade government and corporate debt, i.e. a credit rating below BBB from Standard & Poor's (or an equivalent rating from another rating agency).

The Fund may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income

When the Fund uses derivatives for purposes other than hedging, it holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund may in its discretion use derivatives, it is not required to do so as an investment strategy.

Securities lending transactions may be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieve the Fund's investment objectives and to enhance the Fund's return. You'll find more information about securities lending and the strategies used by the Fund under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund may enter into repurchase and/or reverse repurchase agreements to enhance the Fund's returns, similar to securities lending transactions.

The Fund may invest in securities of another mutual fund, including other mutual funds managed by AGF or its affiliates, so long as the investment is in accordance with securities laws and the Fund's own portfolio restrictions. It may also invest in cash or cash equivalents.

You'll find more information about derivatives, repurchase/reverse repurchase agreements and investing in other mutual funds under *What does the Fund invest in?*

The Fund may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, cash equivalents or fixed income securities during periods of market downturn or for other reasons.

The Fund has obtained exemptive relief from the Canadian securities regulatory authorities so that it may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and

- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund may choose to invest in other ETFs in a manner consistent with the Fund's investment objectives and permitted by law.

## What are the risks of investing in the Fund?

Because the Fund invests primarily in fixed income securities, its value is affected by changes in interest rates. The risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- bond connect risk
- capital erosion risk (Series FV and Series V only)
- changes in legislation risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- specialization risk
- substantial securityholder risk\*

\* As of March 31, 2019, three securityholders held 15.28%, 19.23% and 21.65% of the Fund, respectively.

## Who should invest in this Fund?

Consider this Fund if:

- you are investing for the medium to longer term
- you tolerate low risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

The current policy of the Fund is to make distributions monthly based on the estimated annual income of the Fund, and in any event, the Fund will make monthly distributions to Series FV and Series V securities at a rate determined by AGF from time to time. The rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV and Series V will receive a distribution in December at the monthly rate applicable for such series. The Fund also makes a distribution in December each year to all investors of net income or net realized capital gains, if any, remaining after allocating net income and net realized capital gains first to management fee distributions and monthly distributions. In the case of all series, other than Series FV and Series V, the December distribution will be in an amount equal to their respective shares of the net income and net capital gains in excess of the amount previously distributed to them as monthly distributions. If the share of Series FV or Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, Series FV and Series V will receive a second distribution in December in the amount of such excess that is automatically reinvested. If the aggregate amount of the monthly distributions made to Series FV or Series V in a year exceeds the portion of the net income and net realized capital gains allocated to Series FV or Series V, the excess will constitute a return of capital. Due to the higher rate of Series FV and Series V, Series FV and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

## What does the Portfolio invest in?

### Investment Objectives

The Portfolio's objective is to provide high long-term returns by investing primarily in a diversified mix of equity, income and bond mutual funds.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the portfolio manager generally allocates the Portfolio assets among underlying funds, which are primarily managed by AGF or an AGF affiliate.

AGF has set, and will review quarterly, target dynamic allocations between equity, income and bond funds for the Portfolio, consistent with the portfolio's investment objective. The target asset mix is 60% equities and 40% fixed income. AGF may review and adjust the target allocation at any time at its sole discretion,

depending on economic conditions and the relative value of equity and fixed income securities. AGF typically will keep the weighting for each asset class within 10% above or below the amounts set out above.

Asset allocation decisions are based on estimates of forecasted return for each asset class, standard deviation and asset class correlations with the goal of providing a high level of risk-adjusted returns.

The Portfolio and the underlying funds may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Portfolio's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive

and more flexible than investing directly in the underlying assets

- to profit from declines in financial markets
- to enhance income in the Portfolio through the generation of premium income.

When the Portfolio or an underlying fund uses derivatives for purposes other than hedging, such fund holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Portfolio, or an underlying fund, may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Portfolio may hold a portion of its assets in cash, money market securities or money market mutual funds for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash or money market securities or money market funds during periods of market downturn.

Investors in the Portfolio have no rights of ownership in securities of the underlying funds. AGF may, at its discretion, deliver notices, proxy material and other continuous disclosure information about the underlying funds and flow through to you the voting rights attached to the securities of the underlying funds owned by the Portfolio.

Securities lending transactions may be used in conjunction with an underlying fund's other investment strategies in a manner considered most appropriate to achieve the underlying fund's investment objectives and to enhance the underlying fund's return. You'll find more information about securities lending and the strategies used by the Funds under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Portfolio and the underlying funds have obtained exemptive relief from the Canadian securities regulatory authorities so that each may:

- purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of

purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Portfolio's and underlying funds' investment objectives;

- invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Portfolio and the underlying funds may choose to invest in other ETFs in a manner consistent with their respective investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Portfolio's investments. This may in turn lower the Portfolio's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Portfolio in a non-registered account.

## What are the risks of investing in the Portfolio?

In addition to the risks of investing in the Portfolio directly, the Portfolio indirectly has the same risks in proportion to its investment in the underlying funds. The direct and indirect risks of this Portfolio are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk

- securities lending risk
- substantial securityholder risk\*
- underlying fund risk

\* As of March 31, 2019, one securityholder held 12.74% of the Fund.

## Who should invest in this Portfolio?

Consider this Portfolio if:

- you are looking for a balanced mix of equity and fixed income funds in a single portfolio
- you are investing for the medium term
- you are comfortable with low to medium risk
- with respect to Series D securities, you are currently holding Series D securities and intend to make an additional investment in Series D securities
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

For Series FV, Series T and Series V securities, the Portfolio will make monthly distributions at a rate determined by AGF from time to time. The rate for Series T securities will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Portfolio also makes a distribution in December each year to all investors of any net income and any net realized capital gains remaining after allocating net income and net realized capital gains first to Elements Advantage Distributions. If the share of Series FV, Series T or Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, Series FV, Series T and Series V will receive a second distribution in December in the amount of such excess that is

automatically reinvested. If the aggregate amount of the monthly distributions made to Series FV, Series T or Series V in a year exceeds the portion of the net income and net realized capital gains allocated to Series FV, Series T or Series V, the excess will constitute a return of capital. Due to the higher rate of Series Series FV, T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Portfolio expenses indirectly borne by investors

This example shows how much the Portfolio would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| Fees and expenses payable over (\$) | 1 year | 3 years | 5 years | 10 years |
|-------------------------------------|--------|---------|---------|----------|
| MF Series                           | 24.48  | 77.16   | 135.25  | 307.87   |
| Series D                            | 23.85  | 75.20   | 131.81  | 300.04   |
| Series F                            | 10.51  | 33.13   | 58.06   | 132.16   |
| Series T                            | 24.22  | 76.37   | 133.85  | 304.69   |
| Series V                            | 25.24  | 79.55   | 139.44  | 317.41   |

## What does the Portfolio invest in?

### Investment Objectives

The Portfolio's objective is to provide long-term returns with lower risk by investing primarily in a diversified mix of income, bond, money market and equity mutual funds.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the portfolio manager generally allocates the Portfolio assets among underlying funds, which are primarily managed by AGF or an AGF affiliate.

AGF has set, and will review quarterly, target dynamic allocations between income, bond, money market and equity funds for the Portfolio, consistent with the portfolio's investment objective. The target asset mix is 40% equities and 60% fixed income. AGF may review and adjust the target allocation at any time at its sole discretion, depending on economic conditions and the relative value of equity and fixed income securities. AGF typically will keep the weighting for each asset class within 10% above or below the amounts set out above.

Asset allocation decisions are based on estimates of forecasted return for each asset class, standard deviation and asset class correlations with the goal of providing a high level of risk-adjusted returns.

The Portfolio and the underlying funds may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Portfolio's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Portfolio through the generation of premium income.

When the Portfolio or an underlying fund uses derivatives for purposes other than hedging, such fund holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Portfolio, or an underlying fund, may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Portfolio may hold a portion of its assets in cash, money market securities or money market funds for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, money market securities or money market funds during periods of market downturn.

Investors in the Portfolio have no rights of ownership in securities of the underlying funds. AGF may, at its discretion, deliver notices, proxy material and other continuous disclosure information about the underlying funds and flow through to you the voting rights attached to the securities of the underlying funds owned by the Portfolio.

Securities lending transactions may be used in conjunction with an underlying fund's other investment strategies in a manner considered most appropriate to achieve the underlying fund's investment objectives and to enhance the underlying fund's return. You'll find more information about securities lending and the strategies used by the Funds under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Portfolio and the underlying funds have obtained exemptive relief from the Canadian securities regulatory authorities so that each may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Portfolio's and underlying funds' investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and

- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Portfolio and the underlying funds may choose to invest in other ETFs in a manner consistent with their respective investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Portfolio's investments. This may in turn lower the Portfolio's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Portfolio in a non-registered account.

## What are the risks of investing in the Portfolio?

In addition to the risks of investing in the Portfolio directly, the Portfolio indirectly has the same risks in proportion to its investment in the underlying funds. The direct and indirect risks of this Portfolio are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- changes in legislation risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*
- underlying fund risk

\* As of March 31, 2019, one securityholder held 13.87% of the Fund.

## Who should invest in this Portfolio?

Consider this Portfolio if:

- you want a mix of fixed income and equity funds in a single portfolio
- you are investing for the medium term
- you are comfortable with low risk

- with respect to Series D securities, you are currently holding Series D securities and intend to make an additional investment in Series D securities
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund

## Distribution policy

The Portfolio distributes in December each year to all investors any net income and net realized capital gains remaining after allocating net income and net realized capital gains first to Elements Advantage Distributions. It may make general distributions at other times.

Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Portfolio expenses indirectly borne by investors

This example shows how much the Portfolio would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Portfolio invest in?

### Investment Objectives

The Portfolio's objective is to provide superior long-term returns by investing primarily in equity mutual funds from around the globe.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the portfolio manager generally allocates the Portfolio assets among underlying funds, which are primarily managed by AGF or an AGF affiliate.

AGF has set, and will review quarterly, target dynamic allocations between equity funds for the Portfolio, consistent with the portfolio's investment objective. The target asset mix is 100% equities. AGF may review and adjust the target allocation at any time at its sole discretion, depending on economic conditions and the relative value of equity and fixed income securities. AGF typically will keep the weighting for each asset class within 10% of the amount set out above.

Asset allocation decisions are based on estimates of forecasted return for each asset class, standard

deviation and asset class correlations with the goal of providing a high level of risk-adjusted returns.

The Portfolio and the underlying funds may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Portfolio's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Portfolio through the generation of premium income.

When the Portfolio or an underlying fund uses derivatives for purposes other than hedging, such fund holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Portfolio, or an underlying fund, may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Portfolio may hold a portion of its assets in cash, money market securities or money market mutual funds for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash or money market securities or money market funds during periods of market downturn.

Investors in the Portfolio have no rights of ownership in securities of the underlying funds. AGF may, at its discretion, deliver notices, proxy material and other continuous disclosure information about the underlying funds and flow through to you the voting rights attached to the securities of the underlying funds owned by the Portfolio.

Securities lending transactions may be used in conjunction with an underlying fund's other investment strategies in a manner considered most appropriate to achieve the underlying fund's investment objectives and to enhance the underlying fund's return. You'll find more information about securities lending and the strategies used by the Funds under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Portfolio and the underlying funds have obtained exemptive relief from the Canadian securities regulatory authorities so that each may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Portfolio's and underlying funds' investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Portfolio and the underlying funds may choose to invest in other ETFs in a manner consistent with their respective investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Portfolio's investments. This may in turn lower the Portfolio's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Portfolio in a non-registered account.

## What are the risks of investing in the Portfolio?

In addition to the risks of investing in the Portfolio directly, the Portfolio indirectly has the same risks in proportion to its investment in the underlying funds. The direct and indirect risks of this Portfolio are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- changes in legislation risk
- commodity risk
- counterparty risk

## What does the Portfolio invest in?

### Investment Objectives

The Portfolio's objective is to provide superior long-term returns by investing primarily in equity mutual funds diversified with income and/or bond mutual fund holdings.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the portfolio manager generally allocates the Portfolio assets among underlying funds, which are primarily managed by AGF or an AGF affiliate.

AGF has set, and will review quarterly, target dynamic allocations between income, bond and equity funds for the Portfolio, consistent with the portfolio's investment objective. The target asset mix is 80% equities and 20% fixed income. AGF may review and adjust the

target allocation at any time at its sole discretion, depending on economic conditions and the relative value of equity and fixed income securities. AGF typically will keep the weighting for each asset class within 10% above or below the amounts set out above.

Asset allocation decisions are based on estimates of forecasted return for each asset class, standard deviation and asset class correlations with the goal of providing a high level of risk-adjusted returns.

The Portfolio and the underlying funds may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Portfolio's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive

and more flexible than investing directly in the underlying assets

- to profit from declines in financial markets
- to enhance income in the Portfolio through the generation of premium income.

When the Portfolio or an underlying fund uses derivatives for purposes other than hedging, such fund holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Portfolio, or an underlying fund, may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Portfolio may hold a portion of its assets in cash, money market securities or money market mutual funds for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash or money market securities or money market funds during periods of market downturn.

Investors in the Portfolio have no rights of ownership in securities of the underlying funds. AGF may, at its discretion, deliver notices, proxy material and other continuous disclosure information about the underlying funds and flow through to you the voting rights attached to the securities of the underlying funds owned by the Portfolio.

Securities lending transactions may be used in conjunction with an underlying fund's other investment strategies in a manner considered most appropriate to achieve the underlying fund's investment objectives and to enhance the underlying fund's return. You'll find more information about securities lending and the strategies used by the Funds under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Portfolio and the underlying funds have obtained exemptive relief from the Canadian securities regulatory authorities so that each may:

- purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of

purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Portfolio's and underlying funds' investment objectives;

- invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Portfolio and the underlying funds may choose to invest in other ETFs in a manner consistent with their respective investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Portfolio's investments. This may in turn lower the Portfolio's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Portfolio in a non-registered account.

## What are the risks of investing in the Portfolio?

In addition to the risks of investing in the Portfolio directly, the Portfolio indirectly has the same risks in proportion to its investment in the underlying funds. The direct and indirect risks of this Portfolio are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- commodity risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk

- reverse repurchase agreement risk
- securities lending risk
- underlying fund risk

## Who should invest in this Portfolio?

Consider this Portfolio if:

- you want a mix of domestic and foreign equity and fixed income funds in a single portfolio
- you are investing for the medium to longer term
- you are comfortable with low to medium risk
- with respect to Series D securities, you are currently holding Series D securities and intend to make an additional investment in Series D securities
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

For Series FV, Series T and Series V securities, the Portfolio will make monthly distributions at a rate determined by AGF from time to time. The rate for Series T securities will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Portfolio also makes a distribution in December each year to all investors of any net income and any net realized capital gains remaining after allocating net income and net realized capital gains first to Elements Advantage Distributions. If the share of Series FV, Series T or Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, Series FV, Series T and Series V will receive a second distribution in December in the amount of such excess that is automatically reinvested. If the aggregate amount of the monthly distributions made to Series FV, Series T

or Series V in a year exceeds the portion of the net income and net realized capital gains allocated to Series FV, Series T or Series V, the excess will constitute a return of capital. Due to the higher rate of Series FV, Series T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Portfolio expenses indirectly borne by investors

## What does the Portfolio invest in?

### Investment Objectives

The Portfolio's objective is to achieve high current income by investing primarily in a diversified mix of income, bond and equity funds that may include exposure to income trusts, royalty trusts and REITs.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the portfolio manager generally allocates assets among underlying funds, which are primarily managed by AGF or an AGF affiliate.

AGF will review quarterly the Portfolio's dynamic allocations between income, bond and equity mutual funds to be consistent with the investment objective. The target asset mix is 25% equities and 75% fixed income. AGF may review and adjust the target allocation at any time at its sole discretion, depending on economic conditions and the relative value of equity

and fixed income securities. AGF typically will keep the weighting for each asset class within 10% above or below the amounts set out above.

Asset allocation decisions are based on estimates of forecasted return for each asset class, standard deviation and asset class correlations with the goal of providing a consistent level of current income.

The Portfolio and the underlying funds may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Portfolio's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets

- to enhance income in the Portfolio through the generation of premium income.

When the Portfolio or an underlying fund uses derivatives for purposes other than hedging, such fund holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Portfolio, or an underlying fund, may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Portfolio may hold a portion of its assets in cash, money market securities or money market mutual funds for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash or money market securities or money market funds during periods of market downturn.

Investors in the Portfolio have no rights of ownership in securities of the underlying funds. AGF may, at its discretion, deliver notices, proxy material and other continuous disclosure information about the underlying funds and flow through to you the voting rights attached to the securities of the underlying funds owned by the Portfolio.

Securities lending transactions may be used in conjunction with an underlying fund's other investment strategies in a manner considered most appropriate to achieve the underlying fund's investment objectives and to enhance the underlying fund's return. You'll find more information about securities lending and the strategies used by the Funds under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Portfolio and the underlying funds have obtained exemptive relief from the Canadian securities regulatory authorities so that each may:

- purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify

returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Portfolio's and underlying funds' investment objectives;

- invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Portfolio and the underlying funds may choose to invest in other ETFs in a manner consistent with their respective investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Portfolio's investments. This may in turn lower the Portfolio's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Portfolio in a non-registered account.

## What are the risks of investing in the Portfolio?

In addition to the risks of investing in the Portfolio directly, the Portfolio indirectly has the same risks in proportion to its investment in the underlying funds. The direct and indirect risks of this Portfolio are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- capital erosion risk
- changes in legislation risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- substantial securityholder risk\*
- underlying fund risk

\* As of March 31, 2019, one securityholder held 17.17% of the Fund.

## Who should invest in this Portfolio?

Consider this Portfolio if:

- you are an income-oriented investor, investing for the medium term
- you wish to receive a regular distribution paid on a monthly basis that could include return of capital
- you are comfortable with low risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

AGF determines the rate from time to time at which monthly distributions in each month, including the month of December, to a series of the Portfolio will be made, which rate will not be the same for all series, and which rate may be determined to be zero. In particular, the rate for Series T securities will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change this targeted annual rate at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Portfolio also makes a distribution in December each year to all investors of any net income and any net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions and monthly distributions. In the case of all series, other than Series FV, Series T and Series V, the December distribution will be in an amount equal to the greater of i) the distribution at the monthly rate applicable for such series or ii) their respective shares of the net income and net capital gains in excess of the amount previously distributed to them as monthly distributions. If the share of Series FV, Series T and Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, such series will receive a second distribution in December in the amount of such excess that is automatically reinvested.

If the aggregate amount of the monthly distributions made to a series in a year exceeds the portion of the net income and net capital gains allocated to that series, the excess will constitute a return of capital. Due to the higher rate of Series FV, Series T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Portfolio expenses indirectly borne by investors

This example shows how much the Portfolio would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| <b>Fees and expenses payable over (\$)</b> | <b>1 year</b> | <b>3 years</b> | <b>5 years</b> | <b>10 years</b> |
|--|---------------|----------------|----------------|-----------------|
| MF Series                                  | 20.92         | 65.95          | 115.59         | 263.12          |
| Series F                                   | 9.82          | 30.97          | 54.28          | 123.57          |

## What does the Portfolio Class invest in?

### Investment Objectives

The Portfolio Class's objective is to provide high long-term returns by investing primarily in a diversified mix of equity, income and bond mutual funds.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the portfolio manager generally allocates the Portfolio Class assets among underlying funds, which are primarily managed by AGF or an AGF affiliate.

AGF has set, and will review quarterly, target dynamic allocations between equity, income and bond funds for the Portfolio Class, consistent with the portfolio's investment objective. The target asset mix is 60% equities and 40% fixed income. AGF may review and

adjust the target allocation at any time at its sole discretion, depending on economic conditions and the relative value of equity and fixed income securities. AGF typically will keep the weighting for each asset class within 10% above or below the amounts set out above.

Asset allocation decisions are based on estimates of forecasted return for each asset class, standard deviation and asset class correlations with the goal of providing a high level of risk-adjusted returns.

The Portfolio Class and the underlying funds may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Portfolio Class's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates

- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Portfolio Class through the generation of premium income.

When the Portfolio Class or an underlying fund uses derivatives for purposes other than hedging, such fund holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Portfolio Class, or an underlying fund, may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Portfolio Class may hold a portion of its assets in cash, money market securities or money market mutual funds for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash or money market securities or money market funds during periods of market downturn.

Investors in the Portfolio Class have no rights of ownership in securities of the underlying funds. AGF may, at its discretion, deliver notices, proxy material and other continuous disclosure information about the underlying funds and flow through to you the voting rights attached to the securities of the underlying funds owned by the Portfolio Class.

Securities lending transactions may be used in conjunction with an underlying fund's other investment strategies in a manner considered most appropriate to achieve the underlying fund's investment objectives and to enhance the underlying fund's return. You'll find more information about securities lending and the strategies used by the Funds under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Portfolio Class and the underlying funds have obtained exemptive relief from the Canadian securities regulatory authorities so that each may:

- purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of

200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Portfolio Class's and underlying funds' investment objectives;

- invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Portfolio Class and the underlying funds may choose to invest in other ETFs in a manner consistent with their respective investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Portfolio Class's investments. This may in turn lower the Portfolio Class's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Portfolio Class in a non-registered account.

## What are the risks of investing in the Portfolio Class?

In addition to the risks of investing in the Portfolio Class directly, the Portfolio Class indirectly has the same risks in proportion to its investment in the underlying funds. The direct and indirect risks of this Portfolio Class are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- class risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk

- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- tax and corporate law risk of returns of capital
- underlying fund risk

## Who should invest in this Portfolio Class?

Consider this Portfolio Class if:

- you are looking for a balanced mix of equity and fixed income funds in a single portfolio
- you are investing for the medium term
- you are comfortable with low to medium risk
- with respect to Series D securities, you are currently holding Series D securities and intend to make an additional investment in Series D securities
- with respect to Series Q and Series W securities, you are intending to make a large investment in the Portfolio Class
- with respect to Series FV, Series T and Series V securities, you are willing to receive monthly distributions of capital
- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

## Dividend policy

The Portfolio Class has no policy to pay regular dividends to its securityholders. The Tax Advantage Group board determines when and if a dividend is paid, based upon the recommendation of AGF. The Portfolio Class may pay ordinary dividends or capital gains dividends. Dividends on Series FV, Series T and Series V securities are always reinvested. Dividends on securities of other series of the Portfolio Class held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities of other series held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Distribution policy

The Portfolio Class has a policy to make monthly distributions of a return of capital to holders of Series FV, Series T and Series V securities so long as there is sufficient capital attributable to the relevant series. AGF determines, from time to time, the rate at which distributions will be made. The amount of the distribution to Series T securities will generally be higher than to Series FV and Series V securities. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Each distribution generally will be a return of capital. Distributions on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested unless you tell us you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. Distributions on Series FV, Series T and Series V securities are not guaranteed to occur on a specific date and the Class is not responsible for any fees or charges incurred by you because the Class did not make a distribution on a particular day. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Portfolio expenses indirectly borne by investors

This example shows how much the Portfolio Class would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| Fees and expenses payable over (\$) | 1 year | 3 years | 5 years | 10 years |
|-------------------------------------|--------|---------|---------|----------|
| MF Series                           | 24.76  | 78.05   | 136.81  | 311.42   |
| Series D                            | 26.26  | 82.78   | 145.09  | 330.27   |
| Series F                            | 11.29  | 35.60   | 62.40   | 142.04   |
| Series T                            | 24.96  | 78.69   | 137.93  | 313.96   |
| Series V                            | 24.97  | 78.73   | 138.00  | 314.12   |

## What does the Portfolio Class invest in?

### Investment Objectives

The Portfolio Class's objective is to provide long-term returns with lower risk by investing primarily in a diversified mix of income, bond, money market and equity mutual funds.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the Portfolio manager generally allocates the Portfolio Class assets among underlying funds, which are primarily managed by AGF or an AGF affiliate.

AGF has set, and will review quarterly, target dynamic allocations between income, bond, money market and equity funds for the Portfolio Class, consistent with the portfolio's investment objective. The target asset mix is 40% equities and 60% fixed income. AGF may review and adjust the target allocation at any time at its sole

discretion, depending on economic conditions and the relative value of equity and fixed income securities. AGF typically will keep the weighting for each asset class within 10% above or below the amounts set out above.

Asset allocation decisions are based on estimates of forecasted return for each asset class, standard deviation and asset class correlations with the goal of providing a high level of risk-adjusted returns.

The Portfolio Class and the underlying funds may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Portfolio Class's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets

- to profit from declines in financial markets
- to enhance income in the Portfolio Class through the generation of premium income.

When the Portfolio Class or an underlying fund uses derivatives for purposes other than hedging, such fund holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Portfolio Class, or an underlying fund, may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Portfolio Class may hold a portion of its assets in cash, money market securities or money market funds for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash, money market securities or money market funds during periods of market downturn.

Investors in the Portfolio Class have no rights of ownership in securities of the underlying funds. AGF may, at its discretion, deliver notices, proxy material and other continuous disclosure information about the underlying funds and flow through to you the voting rights attached to the securities of the underlying funds owned by the Portfolio Class.

Securities lending transactions may be used in conjunction with an underlying fund's other investment strategies in a manner considered most appropriate to achieve the underlying fund's investment objectives and to enhance the underlying fund's return. You'll find more information about securities lending and the strategies used by the Funds under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Portfolio Class and the underlying funds have obtained exemptive relief from the Canadian securities regulatory authorities so that each may:

- purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which

may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Portfolio Class's and underlying funds' investment objectives;

- invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Portfolio Class and the underlying funds may choose to invest in other ETFs in a manner consistent with their respective investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Portfolio Class's investments. This may in turn lower the Portfolio Class's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Portfolio Class in a non-registered account.

## What are the risks of investing in the Portfolio Class?

In addition to the risks of investing in the Portfolio Class directly, the Portfolio Class indirectly has the same risks in proportion to its investment in the underlying funds. The direct and indirect risks of this Portfolio Class are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- capital erosion risk (Series FV and Series V only)
- changes in legislation risk
- class risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- tax and corporate law risk of returns of capital
- underlying fund risk

## Who should invest in this Portfolio Class?

Consider this Portfolio Class if:

- you want a mix of fixed income and equity funds in a single portfolio
- you are investing for the medium term
- you are comfortable with low risk
- with respect to Series D securities, you are currently holding Series D securities and intend to make an additional investment in Series D securities
- with respect to Series Q and Series W securities, you are intending to make a large investment in the Portfolio Class
- with respect to Series FV and Series V securities, you are willing to receive monthly distributions of capital
- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

## Dividend policy

The Portfolio Class has no policy to pay regular dividends to its securityholders. The Tax Advantage Group board determines when and if a dividend is paid, based upon the recommendation of AGF. The Portfolio Class may pay ordinary dividends or capital gains dividends. Dividends on Series FV and Series V securities are always reinvested. Dividends on securities of other series of the Portfolio Class held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Distribution policy

The Portfolio Class has a policy to make monthly distributions of a return of capital to holders of Series FV and Series V securities so long as there is sufficient capital attributable to the relevant series. AGF determines, from time to time, the rate at which distributions will be made. The targeted annual rate for Series FV and Series V is 5%. AGF may change this targeted annual rate at any time. Each distribution

generally will be a return of capital. Distributions on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested unless you tell us you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. Distributions on Series FV and Series V securities are not guaranteed to occur on a specific date and the Class is not responsible for any fees or charges incurred by you because the Class did not make a distribution on a particular day. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Portfolio expenses indirectly borne by investors

This example shows how much the Portfolio Class would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| Fees and expenses payable over (\$) | 1 year | 3 years | 5 years | 10 years |
|-------------------------------------|--------|---------|---------|----------|
| MF Series                           | 24.77  | 78.08   | 136.86  | 311.53   |
| Series D                            | 29.64  | 93.43   | 163.75  | 372.75   |
| Series F                            | 11.73  | 36.98   | 64.82   | 147.54   |
| Series V                            | 26.05  | 82.11   | 143.92  | 327.60   |

## What does the Portfolio Class invest in?

### Investment Objectives

The Portfolio Class's objective is to provide superior long-term returns by investing primarily in equity mutual funds from around the globe.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the portfolio manager generally allocates the Portfolio Class assets among underlying funds, which are primarily managed by AGF or an AGF affiliate.

AGF has set, and will review quarterly, target dynamic allocations between equity funds for the Portfolio Class, consistent with the portfolio's investment objective. The target asset mix is 100% equities. AGF may review and adjust the target allocation at any time at its sole discretion, depending on economic conditions and the relative value of equity and fixed income securities. AGF typically will keep the weighting for each asset class within 10% of the amount set out above.

Asset allocation decisions are based on estimates of forecasted return for each asset class, standard

deviation and asset class correlations with the goal of providing a high level of risk-adjusted returns.

The Portfolio Class and the underlying funds may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Portfolio Class's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Portfolio Class through the generation of premium income.

When the Portfolio Class or an underlying fund uses derivatives for purposes other than hedging, such fund holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Portfolio Class, or an underlying fund, may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Portfolio Class may hold a portion of its assets in cash, money market securities or money market mutual funds for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash or money market securities or money market funds during periods of market downturn.

Investors in the Portfolio Class have no rights of ownership in securities of the underlying funds. AGF may, at its discretion, deliver notices, proxy material and other continuous disclosure information about the underlying funds and flow through to you the voting rights attached to the securities of the underlying funds owned by the Portfolio Class.

Securities lending transactions may be used in conjunction with an underlying fund's other investment strategies in a manner considered most appropriate to achieve the underlying fund's investment objectives and to enhance the underlying fund's return. You'll find more information about securities lending and the strategies used by the Funds under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Portfolio Class and the underlying funds have obtained exemptive relief from the Canadian securities regulatory authorities so that each may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Portfolio Class's and underlying funds' investment objectives;
- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Portfolio Class and the underlying funds may choose to invest in other ETFs in a manner consistent with their respective investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Portfolio Class's investments. This may in turn lower the Portfolio Class's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Portfolio Class in a non-registered account.

## What are the risks of investing in the Portfolio Class?

In addition to the risks of investing in the Portfolio directly, the Portfolio Class indirectly has the same risks in proportion to its investment in the underlying funds. The direct and indirect risks of this Portfolio Class are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- changes in legislation risk
- class risk
- commodity risk
- counterparty risk
- cybersecurity risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- underlying fund risk

## Who should invest in this Portfolio Class?

Consider this Portfolio Class if:

- you want a globally diversified mix of equity funds in a single portfolio
- you are investing for the longer term
- you are comfortable with medium risk
- with respect to Series D securities, you are currently holding Series D securities and intend to

make an additional investment in Series D securities

- with respect to Series Q and Series W securities, you are intending to make a large investment in the Portfolio Class
- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

## Dividend policy

The Portfolio Class has no policy to pay regular dividends to its securityholders. The Tax Advantage Group board determines when and if a dividend is paid, based upon the recommendation of AGF. The Portfolio Class may pay ordinary dividends or capital gains dividends. Dividends on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Portfolio expenses indirectly borne by investors

This example shows how much the Portfolio Class would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

## What does the Portfolio Class invest in?

### Investment Objectives

The Portfolio Class's objective is to provide superior long-term returns by investing primarily in equity mutual funds diversified with income and/or bond mutual fund holdings.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the portfolio manager generally allocates the Portfolio Class assets among underlying funds, which are primarily managed by AGF or an AGF affiliate.

AGF has set, and will review quarterly, target dynamic allocations between income, bond and equity funds for the Portfolio Class, consistent with the portfolio's investment objective. The target asset mix is 80%

equities and 20% fixed income. AGF may review and adjust the target allocation at any time at its sole discretion, depending on economic conditions and the relative value of equity and fixed income securities. AGF typically will keep the weighting for each asset class within 10% above or below the amounts set out above.

Asset allocation decisions are based on estimates of forecasted return for each asset class, standard deviation and asset class correlations with the goal of providing a high level of risk-adjusted returns.

The Portfolio Class and the underlying funds may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Portfolio Class's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates

- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Portfolio Class through the generation of premium income.

When the Portfolio Class or an underlying fund uses derivatives for purposes other than hedging, such fund holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Portfolio Class, or an underlying fund, may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Portfolio Class may hold a portion of its assets in cash, money market securities or money market mutual funds for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash or money market securities or money market funds during periods of market downturn.

Investors in the Portfolio Class have no rights of ownership in securities of the underlying funds. AGF may, at its discretion, deliver notices, proxy material and other continuous disclosure information about the underlying funds and flow through to you the voting rights attached to the securities of the underlying funds owned by the Portfolio Class.

Securities lending transactions may be used in conjunction with an underlying fund's other investment strategies in a manner considered most appropriate to achieve the underlying fund's investment objectives and to enhance the underlying fund's return. You'll find more information about securities lending and the strategies used by the Funds under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Portfolio Class and the underlying funds have obtained exemptive relief from the Canadian securities regulatory authorities so that each may:

- purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of

200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Portfolio Class's and underlying funds' investment objectives;

- invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Portfolio Class and the underlying funds may choose to invest in other ETFs in a manner consistent with their respective investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Portfolio Class's investments. This may in turn lower the Portfolio Class's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Portfolio Class in a non-registered account.

## What are the risks of investing in the Portfolio Class?

In addition to the risks of investing in the Portfolio Class directly, the Portfolio indirectly has the same risks in proportion to its investment in the underlying funds. The direct and indirect risks of this Portfolio Class are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- capital erosion risk (Series FV, Series T and Series V only)
- changes in legislation risk
- class risk
- commodity risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk

- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- tax and corporate law risk of returns of capital
- underlying fund risk

## Who should invest in this Portfolio Class?

Consider this Portfolio Class if:

- you want a mix of domestic and foreign equity and fixed income funds in a single portfolio
- you are investing for the medium to longer term
- you are comfortable with low to medium risk
- with respect to Series D securities, you are currently holding Series D securities and intend to make an additional investment in Series D securities
- with respect to Series Q and Series W securities, you are intending to make a large investment in the Portfolio Class
- with respect to Series FV, Series T and Series V securities, you are willing to receive monthly distributions of capital
- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

## Dividend policy

The Portfolio Class has no policy to pay regular dividends to its securityholders. The Tax Advantage Group board determines when and if a dividend is paid, based upon the recommendation of AGF. The Portfolio Class may pay ordinary dividends or capital gains dividends. Dividends on Series FV, Series T and Series V securities are always reinvested. Dividends on securities of other series of the Portfolio Class held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities of other series held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Distribution policy

The Portfolio Class has a policy to make monthly distributions of a return of capital to holders of Series FV, Series T and Series V securities so long as there is sufficient capital attributable to the relevant series. AGF determines, from time to time, the rate at which distributions will be made. The amount of the distribution to Series T securities will generally be higher than to Series FV and Series V securities. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Each distribution generally will be a return of capital. Distributions on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested unless you tell us you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. Distributions on Series FV, Series T and Series V securities are not guaranteed to occur on a specific date and the Class is not responsible for any fees or charges incurred by you because the Class did not make a distribution on a particular day. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Portfolio expenses indirectly borne by investors

This example shows how much the Portfolio Class would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| Fees and expenses payable over (\$) | 1 year | 3 years | 5 years | 10 years |
|-------------------------------------|--------|---------|---------|----------|
| MF Series                           | 26.93  | 84.90   | 148.81  | 338.74   |
| Series F                            | 13.56  | 42.74   | 74.91   | 170.53   |
| Series T                            | 26.90  | 84.80   | 148.64  | 338.34   |
| Series V                            | 27.82  | 87.69   | 153.70  | 349.87   |

## What does the Portfolio Class invest in?

### Investment Objectives

The Portfolio Class's objective is to achieve high current income by investing primarily in a diversified mix of income, bond and equity funds that may include exposure to income trusts, royalty trusts and REITs.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the portfolio manager generally allocates assets among underlying funds, which are primarily managed by AGF or an AGF affiliate.

AGF will review quarterly the Portfolio Class's dynamic allocations between income, bond and equity mutual funds to be consistent with the investment objective. The target asset mix is 25% equities and 75% fixed income. AGF may review and adjust the target allocation at any time at its sole discretion, depending on economic conditions and the relative value of equity and fixed income securities. AGF typically will keep the

weighting for each asset class within 10% above or below the amounts set out above.

Asset allocation decisions are based on estimates of forecasted return for each asset class, standard deviation and asset class correlations with the goal of providing a consistent level of current income.

The Portfolio Class and the underlying funds may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Portfolio Class's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Portfolio Class through the generation of premium income.

When the Portfolio Class or an underlying fund uses derivatives for purposes other than hedging, such fund

holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Portfolio Class, or an underlying fund, may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Portfolio Class may hold a portion of its assets in cash, money market securities or money market mutual funds for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash or money market securities or money market funds during periods of market downturn.

Investors in the Portfolio Class have no rights of ownership in securities of the underlying funds. AGF may, at its discretion, deliver notices, proxy material and other continuous disclosure information about the underlying funds and flow through to you the voting rights attached to the securities of the underlying funds owned by the Portfolio Class.

Securities lending transactions may be used in conjunction with an underlying fund's other investment strategies in a manner considered most appropriate to achieve the underlying fund's investment objectives and to enhance the underlying fund's return. You'll find more information about securities lending and the strategies used by the Funds under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Portfolio Class and the underlying funds have obtained exemptive relief from the Canadian securities regulatory authorities so that each may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Portfolio Class's and underlying funds' investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Portfolio Class and the underlying funds may choose to invest in other ETFs in a manner consistent with their respective investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Portfolio Class's investments. This may in turn lower the Portfolio Class's returns. It also increases the possibility that you'll receive dividends. Generally, dividends are taxable if you hold the Portfolio Class in a non-registered account.

## What are the risks of investing in the Portfolio Class?

In addition to the risks of investing in the Portfolio Class directly, the Portfolio Class indirectly has the same risks in proportion to its investment in the underlying funds. The direct and indirect risks of this Portfolio Class are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- capital erosion risk (Series FV and Series V only)
- changes in legislation risk
- class risk
- counterparty risk
- credit risk
- cybersecurity risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- tax and corporate law risk of returns of capital
- underlying fund risk

## Who should invest in this Portfolio Class?

Consider this Portfolio Class if:

- you are an income-oriented investor, investing for the medium term
- you are comfortable with low risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in the Portfolio Class
- with respect to Series FV and Series V securities, you are willing to receive monthly distributions of capital
- you are investing in a non-registered account and want to invest in a fund within a corporate class structure that has significant loss carryforwards that will enable tax-deferred growth

## Dividend policy

The Portfolio Class has no policy to pay regular dividends to its securityholders. The Tax Advantage Group board determines when and if a dividend is paid, based upon the recommendation of AGF. The Tax Advantage Group may pay ordinary dividends or capital gains dividends. Dividends on Series FV and Series V securities are always reinvested. Dividends on securities of other series of the Portfolio Class held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Dividends on securities of other series held in other registered plans or non-registered accounts are reinvested unless you tell us that you want cash payments instead. For general information about AGF's dividend policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how dividends can affect your taxes, see *Income Tax Considerations for Investors*.

## Distribution policy

The Portfolio Class has a policy to make monthly distributions of a return of capital to holders of Series FV and Series V securities so long as there is sufficient capital attributable to the relevant series. AGF determines, from time to time, the rate at which distributions will be made. The targeted annual rate for Series FV and Series V is 5%. AGF may change this targeted annual rate at any time. Each distribution generally will be a return of capital. Distributions on securities held in AGF registered plans are always reinvested unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans

or non-registered accounts are reinvested unless you tell us you want cash payments instead. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. Distributions on Series FV and Series V securities are not guaranteed to occur on a specific date and the Class is not responsible for any fees or charges incurred by you because the Class did not make a distribution on a particular day. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Portfolio Class expenses indirectly borne by investors

This example shows how much the Portfolio Class would pay in expenses on a \$1,000 investment with a 5% annual return and assumes reinvestment of the 5% return.

| Fees and expenses payable over (\$) | 1 year | 3 years | 5 years | 10 years |
|-------------------------------------|--------|---------|---------|----------|
| MF Series                           | 20.88  | 65.83   | 115.39  | 262.67   |
| Series F                            | 9.92   | 31.27   | 54.81   | 124.76   |
| Series V                            | 21.23  | 66.92   | 117.30  | 267.01   |

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to achieve a high level of income and capital appreciation by investing primarily in fixed income and dividend paying equity securities globally.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the Fund may invest in underlying funds managed by AGF or an AGF affiliate.

AGF has set, and will review quarterly, target dynamic allocations between Canadian balanced, global dividend and high yield bond funds for the Fund, consistent with the Fund's investment objective. The Fund's investment in the underlying funds will be rebalanced to the target weighting, which will generally be quarterly, or as AGF deems appropriate. The Fund may also invest directly in securities similar to those held by the underlying funds where the portfolio manager believes it would be beneficial to

securityholders to do so. You'll find more information about investing in other mutual funds under *What is a Mutual Fund and what are the risks of investing in a Mutual Fund?*

The Fund and the underlying funds may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income.

When the Fund or an underlying fund uses derivatives for purposes other than hedging, such fund holds enough cash, money market instruments or other

required investments to fully cover its positions in accordance with securities regulations.

While the Fund, or an underlying fund, may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Fund may hold a portion of its assets in cash, money market securities or money market mutual funds for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash or money market securities or money market funds during periods of market downturn.

Investors in the Fund have no rights of ownership in securities of the underlying funds. AGF may, at its discretion, deliver notices, proxy material and other continuous disclosure information about the underlying funds and flow through to you the voting rights attached to the securities of the underlying funds owned by the Fund.

Securities lending transactions may be used in conjunction with other investment strategies of an underlying fund, in a manner considered most appropriate to achieve the underlying fund's investment objectives and to enhance the underlying fund's return. You'll find more information about securities lending and the strategies used by the Funds under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document*.

The Fund or an underlying fund may enter into repurchase and/or reverse repurchase agreements to enhance its returns, similar to securities lending transactions. You'll find more information about repurchase/reverse repurchase agreements under *What does the Fund invest in?*

The Fund and the underlying funds has obtained exemptive relief from the Canadian securities regulatory authorities so that each may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify

returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's and the underlying funds' investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund and the underlying funds may choose to invest in other ETFs in a manner consistent with their respective investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

In addition to the risks of investing in the Fund directly, the Fund indirectly has the same risks in proportion to its investment in the underlying funds. The direct and indirect risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- capital erosion risk
- changes in legislation risk
- commodity risk
- counterparty risk
- credit risk
- cybersecurity risk
- depositary securities and receipts risk
- derivative risk
- emerging markets risk
- equity risk
- ETF general risks
- ETF index risks
- ETF industry sector risk
- foreign currency risk
- foreign market risk
- foreign tax risk
- gold and silver ETFs risk
- interest rate risk
- liquidity risk
- repurchase agreement risk
- reverse repurchase agreement risk
- securities lending risk
- small company risk
- underlying fund risk

## Who should invest in this Fund?

Consider this Fund if:

- you want a managed portfolio of equity and fixed income securities in a single fund
- you are an income oriented investor, investing for the medium to long term
- you can tolerate low to medium risk
- with respect to Series Q and Series W securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

AGF determines the rate from time to time at which monthly distributions in each month, including the month of December, to a series of the Fund will be made, which rate will not be the same for all series, and which rate may be determined to be zero. In particular, the rate for Series T securities will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change this targeted annual rate at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSA's and Group TFSA's, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Fund also makes a distribution in December each year to all investors of any net income and any net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions and monthly distributions. In the case of all series, other than Series FV, Series T and Series V, the December distribution will be in an amount equal to the greater of i) the distribution at the monthly rate applicable for such series or ii) their respective shares of the net income and net capital gains in excess of the amount previously distributed to them as monthly distributions. If the share of Series FV, Series T and Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, such series will receive a second distribution in December in the amount of such excess that is automatically reinvested. If the aggregate

amount of the monthly distributions made to a series in a year exceeds the portion of the net income and net capital gains allocated to that series, the excess will constitute a return of capital. Due to the higher rate of Series FV, Series T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## Fund expenses indirectly borne by investors

## What does the Fund invest in?

### Investment Objectives

The Fund's objective is to provide income by investing primarily in fixed income securities and dividend paying equity securities.

Any change to the fundamental investment objectives must be approved by a majority of votes cast at a meeting of securityholders called for that purpose.

### Investment Strategies

To achieve these objectives, the Fund may invest in underlying funds managed by AGF or an AGF affiliate.

AGF has set, and will review quarterly, target dynamic allocations between bond, dividend and balanced funds for the Fund, consistent with the Fund's investment objective. The Fund's investment in the underlying funds will be rebalanced to the target weighting, which will generally be quarterly, or as AGF deems appropriate. The Fund may also invest directly in securities similar to those held by the underlying funds where the portfolio manager believes it would be beneficial to securityholders to do so. You'll find more information about investing in other mutual funds under *What is a Mutual Fund and what are the risks of investing in a Mutual Fund?*

The Fund may also invest in foreign securities which will vary from time to time.

The Fund and the underlying funds may use options, forward contracts and other permitted derivatives as long as the use of these derivatives is consistent with the Fund's objectives and is permitted in law. It may use derivatives in the following ways:

- to hedge against declines in security prices, financial markets, exchange rates and interest rates
- to gain exposure to securities, financial markets and foreign currencies. This can be less expensive and more flexible than investing directly in the underlying assets
- to profit from declines in financial markets
- to enhance income in the Fund through the generation of premium income.

When the Fund or an underlying fund uses derivatives for purposes other than hedging, such fund holds enough cash, money market instruments or other required investments to fully cover its positions in accordance with securities regulations.

While the Fund, or an underlying fund, may in its discretion use derivatives, it is not required to do so as an investment strategy.

The Fund may hold a portion of its assets in cash, money market securities or money market mutual funds for cash management purposes, for rebalancing purposes or for defensive purposes and may choose to deviate from its investment objectives by temporarily investing most or all of its assets in cash or money market securities or money market funds during periods of market downturn.

Investors in the Fund have no rights of ownership in securities of the underlying funds. AGF may, at its discretion, deliver notices, proxy material and other continuous disclosure information about the underlying funds and flow through to you the voting rights attached to the securities of the underlying funds owned by the Fund.

Securities lending transactions may be used in conjunction with other investment strategies of an underlying fund, in a manner considered most appropriate to achieve the underlying fund's investment objectives and to enhance the underlying fund's return. You'll find more information about securities lending and the strategies used by the Funds under *What is a mutual fund and what are the risks of investing in a mutual fund?* and *Specific information about each of the mutual funds described in this document.*

The Fund or an underlying fund may enter into repurchase and/or reverse repurchase agreements to enhance its returns, similar to securities lending transactions. You'll find more information about repurchase/reverse repurchase agreements under *What does the Fund invest in?*

The Fund and the underlying funds has obtained exemptive relief from the Canadian securities regulatory authorities so that each may:

- a) purchase (i) up to 10% of its net asset value, taken at market value at the time of purchase, in certain gold or silver exchange traded funds ("Gold/Silver ETFs") that seek to replicate the performance of gold or silver or the value of a specified derivative (the underlying interest of which is gold or silver) which may utilize leverage in an attempt to magnify returns by a multiple of 200% and (ii) up to 10% of its net asset value in aggregate, taken at market value at the time of purchase, in certain exchange traded funds that seek to replicate the performance of an index or industry sector index (the "Index ETFs") which may utilize leverage in an attempt to magnify returns by either a multiple of 200% or an inverse multiple of 200%, provided such investment is in accordance with the Fund's and the underlying funds' investment objectives;

- b) invest in Underlying Non-IPU ETFs in excess of the control restrictions in paragraph 2.2(1) of NI 81-102, subject to certain restrictions; and
- c) invest up to 10% of its net asset value in U.S. Underlying Non-IPU ETFs, subject to certain restrictions.

The Fund and the underlying funds may choose to invest in other ETFs in a manner consistent with their respective investment objectives and permitted by law.

Trading costs may increase depending upon the portfolio manager's buying and selling activities of the Fund's investments. This may in turn lower the Fund's returns. It also increases the possibility that you'll receive distributions. Generally, distributions are taxable if you hold the Fund in a non-registered account.

## What are the risks of investing in the Fund?

In addition to the risks of investing in the Fund directly, the Fund indirectly has the same risks in proportion to its investment in the underlying funds. The direct and indirect risks of this Fund are as follows. For an explanation of each risk, see *Specific risks of the Funds* under *What are the risks?*

- asset allocation risk
- capital erosion risk
- changes in legislation risk
- commodity risk
- counterparty risk
- credit risk
- cybersecurity risk

- reverse repurchase agreement risk
- securities lending risk
- small company risk
- underlying fund risk

## Who should invest in this Fund?

Consider this Fund if:

- you want a managed portfolio of equity and fixed income securities in a single fund
- you are an income oriented investor, investing for the medium to long term
- you can tolerate low risk
- with respect to Series Q securities, you are intending to make a large investment in a Fund
- with respect to Series FV, Series T and Series V securities, you prefer regular monthly cash flows that may include a return of capital

## Distribution policy

AGF determines the rate from time to time at which monthly distributions in each month, including the month of December, to a series of the Fund will be made, which rate will not be the same for all series, and which may be determined to be zero. In particular, the rate for Series T will generally be higher than the rate for Series FV and Series V securities and the rate for Series FV and Series V securities may be higher than the rate for all other existing series. The targeted annual rate for Series T is 8%, and the targeted annual rate for Series FV and Series V is 5%. AGF may change these targeted annual rates at any time. Distributions on securities held in AGF registered plans are always reinvested, unless, with respect to TFSAs and Group TFSAs, you tell us you want cash payments instead. Distributions on securities held in other registered plans or non-registered accounts are reinvested, unless you tell us that you want cash payments instead. Series FV, Series T and Series V will receive a distribution in December at the monthly rate applicable for such series. The Fund also makes a distribution in December each year to all investors of any net income and any net realized capital gains remaining after allocating net income and net realized capital gains first to management fee distributions and monthly distributions. In the case of all series, other than Series FV, Series T and Series V, the December distribution will be in an amount equal to the greater of i) the December distribution at the monthly rate applicable for such series or ii) their respective shares of the net income and net capital gains in excess of the amount previously distributed to them as monthly distributions. If the share of Series FV, Series T or Series V of net income and net realized capital gains is higher than the total distributions made during the year at the monthly rate to such series, Series FV, Series T and Series V will receive a second distribution in December in the amount of such excess that is automatically reinvested. If the aggregate amount of

the monthly distributions made to a series in a year exceeds the portion of the net income and net capital gains allocated to that series, the excess will constitute a return of capital. Due to the higher rate of Series FV, Series T and Series V, Series FV, Series T and Series V securityholders will receive a higher amount by way of return of capital. For general information about AGF's distribution policy, see *Specific information about each of the mutual funds described in this document – Distribution/Dividend policy*. For information about how distributions can affect your taxes, see *Income Tax Considerations for Investors*.

## **CHANGE OF RISK RATINGS**

Effective as of the date of this amendment, AGF Investments Inc. (“**AGF**”), the manager and trustee of the Funds, changed the risk ratings of the following 11 Funds:

| <b>Fund Name</b>                          | <b>Previous Risk Rating</b> | <b>New Risk Rating</b> |
|---|-----------------------------|------------------------|
| AGF Asian Growth Class                    | Medium to High              | Medium                 |
| AGF Asian Growth Fund                     | Medium to High              | Medium                 |
| AGF Canadian Large Cap Dividend Class     | Medium                      | Low to Medium          |
| AGF Canadian Large Cap Dividend Fund      | Medium                      | Low to Medium          |
| AGF Elements Global Portfolio             | Medium                      | Low to Medium          |
| AGF Elements Global Portfolio Class       | Medium                      | Low to Medium          |
| AGF Global Equity Class                   | Medium                      | Low to Medium          |
| AGF Global Equity Fund                    | Medium                      | Low to Medium          |
| AGF Global Sustainable Growth Equity Fund | Medium to High              | Medium                 |
| AGF Tactical Income Fund                  | Medium                      | Low to Medium          |
| AGFiQ Dividend Income Fund                | Medium                      | Low to Medium          |

Accordingly, the following changes to Part B of the Prospectus apply:

- The following row for AGF Asian Growth Fund is hereby deleted in its entirety from the chart which appears under the section “Investment Risk Classification Methodology” on pages 53-55 of the Prospectus:

| <b>Name of Fund</b>   | <b>Reference Index or Comparable Fund Used</b> | <b>Description</b>  |
|-----------------------|--|---|
| AGF Asian Growth Fund | AGF Asian Growth Class                         | The comparable fund is the class equivalent of AGF Asian Growth Fund. Both Funds have substantially similar investment objectives and strategies. |

- AGF Asian Growth Class – on page 83 of the Prospectus, under the heading “Who should invest in this Fund?”, the third bullet is deleted in its entirety and replaced with “you tolerate medium risk”;

- AGFiQ Dividend Income Fund - on page 74 of the Prospectus, under the heading “Who should invest in this Fund?”, the third bullet is deleted in its entirety and replaced with “you tolerate low to medium risk”.

### **PURCHASERS’ STATUTORY RIGHTS**

Securities legislation in some provinces and territories gives you the right to withdraw from an agreement to buy mutual funds within two business days of receiving the simplified prospectus or fund facts, or to cancel your purchase within 48 hours of receiving confirmation of your order. Securities legislation in some provinces and territories also allows you to cancel an agreement to buy your securities and get your money back, or to make a claim for damages, if the simplified prospectus, fund facts, annual information form or financial statements misrepresent any facts about the Funds. These rights must usually be exercised within certain time limits. For more information, refer to the securities legislation of your province or territory or consult your lawyer.

**AMENDMENT NO. 2 DATED JULY 26, 2019 TO THE  
SIMPLIFIED PROSPECTUS DATED APRIL 18, 2019  
AS AMENDED BY AMENDMENT NO.1 DATED MAY 14, 2019  
(THE “PROSPECTUS”), OF**

**AGF U.S. Small-Mid Cap Fund  
(Mutual Fund Series, Series F, Series O, Series Q, and Series W Securities)**

**(the “Fund”)**

The Prospectus relating to the offering of Mutual Fund Series, Series F, Series O, Series Q and Series W securities, as applicable, of the Fund is amended as set out below. All capitalized terms have the respective meaning set out in the Prospectus, unless otherwise specifically defined in this amendment.

All page references refer to the version of the Prospectus available on the AGF internet site at [www.agf.com](http://www.agf.com), or at [www.sedar.com](http://www.sedar.com).

**CHANGE OF RISK RATING**

Effective as of the date of this amendment, AGF Investments Inc. (“AGF”), the manager and trustee of the Fund, changed the risk rating of the Fund as follows:

| <b>Fund Name</b>            | <b>Previous Risk Rating</b> | <b>New Risk Rating</b> |
|-----------------------------|-----------------------------|------------------------|
| AGF U.S. Small-Mid Cap Fund | Medium to High              | Medium                 |

Accordingly, the following changes to Part B of the Prospectus apply:

- AGF U.S. Small-Mid Cap Fund - on page 117 of the Prospectus, under the heading “Who should invest in this Fund?” the third bullet is deleted in its entirety and replaced with “you tolerate medium risk”.

**PURCHASERS’ STATUTORY RIGHTS**

Securities legislation in some provinces and territories gives you the right to withdraw from an agreement to buy mutual funds within two business days of receiving the simplified prospectus or fund facts, or to cancel your purchase within 48 hours of receiving confirmation of your order.
