- **Franklin Templeton Specialised Investment Funds - Templeton Global Multisector Plus SIF**
- **Franklin Templeton Specialised Investment Funds - Templeton Global Multisector Plus II SIF**

Franklin Templeton Specialised Investment Funds - IMPORTANT INFORMATION

THE COMPANY IS RESERVED FOR WELL-INFORMED INVESTORS WHO, ON THE BASIS OF THIS ISSUING DOCUMENT, HAVE MADE THEIR OWN ASSESSMENT OF THE CONDITIONS OF THEIR PARTICIPATION IN THE COMPANY. ACCORDINGLY, IT IS THE RESPONSIBILITY OF THE PARTICIPATING INVESTOR, TO DETERMINE WHETHER THEIR RIGHTS AND OBLIGATIONS AS SHAREHOLDERS ARE SUITABLE FOR THEM.

If you are in any doubt about the contents of this issuing document (the "Issuing Document"), you should consult your bank, stockbroker, solicitor, accountant or other financial advisor. No one is authorised to give any information other than that contained in this Issuing Document, or in any of the documents referred to herein.

The Company

The Company is incorporated in Luxembourg under the laws of the Grand Duchy of Luxembourg as a *société anonyme* and qualifies as a *société d'investissement à capital variable - fonds d'investissement spécialisé* ("SICAV-FIS").

The Company is registered on the official list of specialised investment funds pursuant to the Luxembourg law of 13 February 2007 relating to specialised investment funds, as may be amended from time to time (the "Law of 13 February 2007"). The Company qualifies as an alternative investment fund within the meaning of article 1(39) of the Luxembourg law of 12 July 2013 on alternative investment fund managers, as may be amended from time to time (the "Law of 12 July 2013").

The Company has appointed Franklin Templeton International Services S.à r.l (the "Management Company") with its registered office at 8A, Rue Albert Borschette, L-1246 Luxembourg, Grand Duchy of Luxembourg as alternative investment fund manager to provide investment management, administration and marketing functions to the Company with the possibility to delegate certain of such functions to third-parties.

The Funds are authorised in Luxembourg. The Funds may be marketed in other member states of the EEA, to professional investors within the meaning of the Law of 12 July 2013 only, on the basis of the passport regime set out in Article 29 and following of the Law of 12 July 2013.

The Company may apply for registration of the Shares in various other legal jurisdictions worldwide. It is the responsibility of any persons wishing to make an application for Shares pursuant to this Issuing Document to inform themselves of and to observe all applicable laws and regulations of any relevant jurisdictions. Prospective subscribers for Shares should make themselves aware of the legal requirements with respect to such application and of any applicable taxes in the countries of their respective citizenship, residence or domicile.

The Company does not have any debentures, loans, borrowings or indebtedness in the nature of liabilities under acceptances or acceptance credits, mortgage hire purchase commitments, guarantees or other material contingent liabilities, unless otherwise mentioned in this Issuing Document.

The Company is not registered in the United States of America under the Investment Company Act of 1940. The Shares of the Company have not been registered in the United States of America under the

Securities Act of 1933. The Shares made available under this offer may not be directly or indirectly offered or sold in the United States of America or any of its territories or possessions or areas subject to its jurisdiction or to or for the benefit of residents thereof, unless pursuant to an exemption from registration requirements available under US law, any applicable statute, rule or interpretation. US Persons are not eligible to invest in the Company. Prospective Investors shall be required to declare that they are not a US Person and are not applying for Shares on behalf of any US Person. In the absence of written notice to the Company to the contrary, if a prospective investor provides a non-US address on the application form for investment in the Company, this will be deemed to be a representation and warranty from such investor that he/she/it is not a US Person and that such investor will continue to be a non-US Person unless and until the Company is otherwise notified of a change in the investor's US Person status.

The term "US Person" shall mean any person that is a United States person within the meaning of Regulation S under the United States Securities Act of 1933 or as defined by the U.S. Commodity Futures Trading Commission for this purpose, as the definition of such term may be changed from time to time by legislation, rules, regulations or judicial or administrative agency interpretations.

The Company is not registered in any provincial or territorial jurisdiction in Canada and Shares of the Company have not been qualified for sale in any Canadian jurisdiction under applicable securities laws. The Shares made available under this offer may not be directly or indirectly offered or sold in any provincial or territorial jurisdiction in Canada or to or for the benefit of residents thereof, unless such Canadian resident is, and will remain at all times during their investment, a "permitted client" as that term is defined in Canadian securities legislation. Prospective Investors may be required to declare that they are not a Canadian resident and are not applying for Shares on behalf of any Canadian residents. If an Investor becomes a Canadian resident after purchasing Shares of the Company, the Investor will not be able to purchase any additional Shares of the Company.

The attention of Investors is also drawn to the fixed amount which may be levied on transactions by Distributors, local paying agent and correspondent banks established in certain jurisdictions.

Statements made in this Issuing Document are based on the laws and practice currently in force in the Grand Duchy of Luxembourg, and are subject to changes in those laws and practice.

This Issuing Document does not constitute an offer to anyone or solicitation by anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so.

The price of Shares in the Company and the income from them may go down as well as up and an Investor may not get back the amount invested. Attention of Investors is more specifically drawn to the fact that investment by the Company may trigger specific risks, as more fully described under section "Risk Considerations" below.

The most recent audited annual report of the Company, which is available free of charge and upon request at the registered office of the Company and the Management Company, form an integral part of this Issuing Document.

Investors desiring to receive further information regarding the Company (including the procedures relating to complaints handling, the strategy followed for the exercise of the voting rights of the Company, the policy for placing orders to deal on behalf of the Company with other entities, the best execution policy as well as the arrangements relating to the fee, commission or non-monetary benefit in relation with the investment management and administration of the Company) or wishing to make a complaint about the operation of the Company should contact the Management Company client service department, 8A, Rue Albert Borschette L-1246 Luxembourg.

The Company and the Management Company draw the Investors' attention to the fact that any Investor will only be able to fully exercise its Investor's rights directly against the Company, notably the right to participate in general meetings of the Shareholders, if the Investor is registered itself and in its own name in the register of Shareholders of the Company. If an Investor invests in the Company through an intermediary investing in the Company in its own name but on behalf of the Investor, it may not always be possible for the Investor to exercise certain Shareholder rights directly against the Company. Investors are advised to take advice on their rights.

The Management Company, acting as principal distributor of the Company, (the "Principal Distributor") will also organise and oversee the marketing and distribution of Shares. The Principal Distributor may engage sub-distributors, intermediaries, brokers and/or professional investors (who may be affiliates of Franklin Templeton Investments).

Moreover, the Management Company decided that, when required by the relevant legal, regulatory and/or tax environment applicable to some particular countries where the Shares of the Company are or will be offered, the duties of organising and overseeing the marketing and distribution of Shares, or the distribution of Shares itself, currently dedicated on a worldwide basis to the Principal Distributor, may be allocated to such other entities (who may be affiliates of Franklin Templeton Investments) directly appointed by the Management Company from time to time.

Subject to the provisions of the agreements in place with the Management Company, such other parties may in turn engage sub-distributors, intermediaries, brokers and/or professional investors (who may be affiliates of Franklin Templeton Investments). Notwithstanding the foregoing, the Management Company will also monitor the appointment and activities of the sub-distributors, intermediaries, brokers and/or professional investors as mentioned above.

Distributors, sub-distributors, intermediaries and Brokers/Dealers engaged in the activity of marketing and distributing the Shares shall abide by and enforce all the terms of this Issuing Document including, where applicable, the terms of any mandatory provisions of Luxembourg laws and regulations relating to the distribution of the Shares. They shall also abide by the terms of any laws and regulations applicable to them in the country where their activity takes place, including, in particular, any relevant requirements to identify and know their clients. They must not act in any way that would be damaging or onerous on the Company and/or the Management Company in particular by submitting the Company and/or the Management Company to regulatory, fiscal or reporting information it would otherwise not have been subject to. They must not hold themselves out as representing the Company.

For the avoidance of doubt, Investors buying Shares or investing through such other parties (or through sub-distributors, intermediaries, dealers and/or professional investors appointed by such other parties) will not be charged additional fees and expenses by the Company or the Management Company.

Whenever applicable, all references in this Issuing Document relating to the Principal Distributor should therefore also read as references to such other parties appointed by the Management Company.

The Directors of the Company, whose names appear in section "Administrative Information", are responsible for the information contained in this Issuing Document. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Issuing Document is in accordance with the facts and does not omit anything likely to affect the import of such information. The Board of Directors accepts responsibility accordingly.

Board of Directors' and Management Company's Powers

The Board of Directors is responsible for the Company's management and administration and has appointed the Management Company to perform the day-to-day management and administration of the Company in accordance with the Articles and the Alternative Investment Fund Management Agreement dated 16 June 2016 and effective as of 16 June 2016.

The Board of Directors may authorise the creation of additional Funds in the future with different investment objectives, subject to the amendment of this Issuing Document.

The Board of Directors may decide to offer or issue in any Fund any of the existing Share Classes which terms and conditions are more fully described in the section "Share Classes" and "Investment Management Fees", including Alternative Currency Classes, Hedged Share Classes as well as Share Classes with different dividend policies. Investors will be informed of the issue of such Shares upon publication of the Net Asset Value per Share of such Share Class as described in the section "Publication of Share Prices".

If the total value of the Shares of any Fund is at any time below USD 50 million, or the equivalent thereof in the currency of the relevant Fund, the Board of Directors may decide to redeem all the Shares outstanding of such Fund, or merge the Fund into an eligible Fund. Notice of such redemption or merger will be sent to the registered Investors by mail. The price at which Shares will be redeemed will be based on the Net Asset Value per Share of such Fund determined upon realisation of all assets attributable to such Fund.

The Board of Directors reserves the right at any time, without notice, to discontinue the issue or sale of Shares pursuant to this Issuing Document.

Shares offered or in issue in the various Funds, Classes and currencies are more fully described in the section "Share Classes".

The assets of each Fund are exclusively available to satisfy the rights of Shareholders and of creditors which have arisen in connection with the creation, operation or liquidation of that Fund. For the purpose of the relations as between Shareholders, each Fund will be deemed to be a separate entity.

The determination of the prices of Shares of each Fund may be suspended during a period when trading on a relevant stock exchange is substantially restricted or when other specified circumstances exist which make it impracticable to dispose of or value any of the Company's investments (see Appendix D). No Share may be issued, redeemed or switched during a period of suspension. A notice

of any suspension shall be published, if appropriate, in such newspapers as the Board of Directors and/or the Management Company may from time to time determine.

The distribution of this Issuing Document in some jurisdictions may require the translation of this Issuing Document into the languages specified by the regulatory authorities of those jurisdictions. In case of inconsistency between the translated and the English version of this Issuing Document, the English version shall prevail.

The Issuing Document shall be kept up-to-date and shall be made available on the Internet site: <http://www.franklintempleton.lu> and may be found on the Internet site of Franklin Templeton Investments' Distributors and can be obtained free of charge and upon request at the registered office of the Company and the Management Company.

DEFINITIONS

"Accumulation Share"	a Share which accumulates the net income attributable to a Share so that it is reflected in the increased Net Asset Value of that Share
"Alternative Investment Fund" or "AIF"	a fund or Undertaking for Collective Investment ("UCI") that falls under the Alternative Investment Fund Managers Directive ("AIFMD"), terms for which definitions are provided separately
"AIFMD"	Alternative Investment Fund Managers Directive (Directive 2011/61/EU) including the Commission Delegated Regulation (EU) No. 231/2013 and the European Union (Alternative Investment Fund Managers Directive) Regulations (S.I. No. 257 of 2013) and any implementing measures as implemented in Luxembourg by the Law of 12 July 2013 on Alternative Investment Fund Managers
"Alternative Currency Class"	a Share Class in an alternative currency to the base currency of the Fund
"Annual General Meeting"	the annual general meeting of the Shareholders of the Company
"Articles"	the articles of incorporation of the Company as amended from time to time
"Board of Directors"	the board of directors of the Company
"Broker-Dealer"	financial intermediary or advisor
"Business Day"	any full day on which the banks in Luxembourg are normally open for business
"CLO"	a Collateralized Loan Obligation (or CLO) is a form of structured product transaction whereby a special purpose vehicle is formed, issues a number of classes or "tranches" of debt securities with different payment priorities as well as a residual, equity class of securities to investors, and uses the proceeds of the sale of these securities in order to acquire a pool of collateral assets primarily consisting of syndicated commercial bank loans. Payments on the pool of collateral assets are used to pay off and/or redeem the investor securities over time pursuant to specified payment priorities, during which an investment manager manages the pool of collateral assets

"Commitment Method"	a method for measuring risk or "Exposure" that factors in the market risk of the underlying investments held in a SIF sub-fund or AIF, calculated by (i) taking the sum of the absolute values of the positions held, (ii) including the incremental Exposure associated with any financial derivatives instruments held by converting such financial derivatives into equivalent positions in the underlying assets of those derivatives (sometimes referred to as "notional exposure"), after (iii) netting and hedging arrangements where the market value of underlying security positions may be offset by other commitments related to the same underlying positions, (iv) including the incremental Exposure through any reinvestment of borrowings where such reinvestment increases the exposure of the SIF or AIF, and (v) including any incremental Exposure created in accordance with repurchase / reverse repurchase agreements and securities lending or borrowing arrangements. Leverage according to the Commitment Method, including Exposure to underlying assets and the incremental Exposure from financial derivatives, repurchase/reverse repurchase agreements and securities lending and borrowings arrangements as described above, is expressed as an absolute percentage of total net assets. See Appendix B for more information
"Company"	Franklin Templeton Specialised Investment Funds
"Contract Note"	see sub-section "Contract Note" under section "Investor General Information"
"CSSF"	<i>Commission de Surveillance du Secteur Financier</i> – The regulatory and supervisory authority of the Company in Luxembourg
"Dealing Cut-Off Time"	the time prior to which a transaction instruction must be received in order for the transaction to be processed at the current day's NAV as further described in Appendix A of this Issuing Document
"Dealing Day"	any Valuation Day which is also a Business Day. Dealing Day restrictions in any jurisdiction may be obtained upon request
"Depository"	J.P. Morgan Bank Luxembourg S.A., a Luxembourg based bank, appointed by the Company as the Company's depository within the meaning of the Law of 12 July 2013
"Directors"	the members of the Board of Directors

"Distributor"	an entity or person duly appointed by the Management Company, acting as Principal Distributor, or the Company to distribute or arrange for the distribution of Shares
"Distribution Share"	a Share which normally distributes its investment income, unless otherwise stated in the relevant Fund policy
"EEA"	European Economic Area
"Eligible Investor"	a well-informed investor, which shall be an Institutional Investor, a Professional Investor or an Experienced Investor
"Experienced Investor"	<p>an investor who meets the following conditions:</p> <p>a) he/she/it has confirmed in writing that he/she/it adheres to the status of well-informed investor, and</p> <p>b) (i) he/she/it invests a minimum of the USD equivalent of EUR 125,000 in the specialised investment fund, or</p> <p>(ii) he/she/it has been the subject of an assessment made by a credit institution within the meaning of Directive 2006/48/EC, by an investment firm within the meaning of Directive 2004/39/EC or by a management company within the meaning of Directive 2009/65/EC certifying his/her/its expertise, his/her/its experience and his/her/its knowledge in adequately apprising an investment in the specialised investment fund,</p> <p>in accordance with article 2 of the Law of 13 February 2007</p>
"Eligible State"	includes any member state of the European Union ("EU"), any member state of the Organisation for Economic Co-operation and Development ("OECD"), and any other state which the Directors deem appropriate with regard to the investment objective of each Fund
"Equity Fund"	an Equity Fund's assets are mainly or solely invested in or exposed to equity securities issued by companies which are listed and traded on stock exchanges (equities). Equity Funds can either invest globally (global equity Funds) or be concentrated in specific countries (country-specific Funds), geographic regions (regional Funds) or sectors (sector-specific Funds)
"EU"	European Union
"Exposure"	a measure of risk exposure for a SIF sub-fund or AIF that factors in the market risk exposure of underlying investments, including the incremental market risk exposure and actual or implied Leverage associated with borrowings or financial derivative instruments if and where held or entered into the

portfolio. Under the AIFMD Directive, SIFs or AIFs are required to measure such risk exposure using both the "Gross Method" and the "Commitment Method". These exposure figures are then divided by total net assets to arrive at a ratio which indicates the level of Leverage for the SIF or AIF according to the two methods. Definitions for the two methods are provided separately

"FATCA"	Foreign Account Tax Compliance Act
"FFI"	a Foreign Financial Institution as defined in FATCA
"Financial Year"	the financial year of the Company ends on 31 March of each year
"Fixed Income Fund"	a Fixed Income Fund's assets are mainly or solely invested in or exposed to debt securities (including, but not limited to, bonds) which pay a fixed or variable rate of interest and which may be issued by companies, national or local governments and/or international organizations which are supported by several governments (such as the World Bank). Fixed Income Funds may invest globally or focus on a geographic region or country and may invest in bonds issued by different types of issuer or focus on just one (such as governments). The performance of Fixed Income Funds is often linked to broad economic factors and particularly any changes in interest rates
"Franklin Templeton Investments"	FRI and its subsidiaries and affiliates worldwide
"FRI"	Franklin Resources Inc. One Franklin Parkway, San Mateo, California, a holding company for various subsidiaries that, together, are referred to as Franklin Templeton Investments
"Fund"	a sub-fund within the Company, i.e. a distinct pool of assets and liabilities within the Company, distinguished mainly by its specific investment policy and objective as created from time to time in accordance with article 71 of the Law of 13 February 2007
"Gross Method"	a method of calculating risk or "Exposure" that factors in the market risk of the underlying investments held in a SIF sub-fund or AIF, calculated by (i) taking the sum of the absolute values of the positions held, (ii) excluding the value of any cash and cash equivalents which are highly liquid and in the base currency of the SIF or AIF, as well as excluding cash borrowings that remain in cash or cash equivalents, (iii) including the incremental market risk Exposure associated with any financial derivatives instruments held by converting such financial derivatives into equivalent positions in the

	underlying assets of those derivatives (sometimes referred to as "notional exposure"), and (iv) including the incremental Exposure through repurchase/reverse repurchase agreements, securities lending or borrowing arrangements to the extent such activity, including any reinvestment of collateral or borrowings, increases the Exposure of the SIF or AIF. Leverage according to the Gross Method, including Exposure to underlying assets and the incremental Exposure from financial derivatives, repurchase/reverse repurchase agreements and securities lending and borrowings arrangements, is expressed as an absolute percentage of total net assets. See Appendix B for more information
"Holdings"	shares held in a single Share Class within the Investor Portfolio
"Institutional Investor"	as defined from time to time by the guidelines or recommendations of the competent Luxembourg financial supervisory authority within the meaning of article 2 of the Law of 13 February 2007. Please refer to "Share Classes" section for the list of qualifying Institutional Investors
"Investment Fund(s)"	undertaking(s) for collective investment in which the Funds may invest
"Investment Manager(s)"	a company appointed by the Management Company and which provides portfolio day-to-day management in respect of the investment and re-investment of the assets of the Funds
"Investor"	a purchaser of Shares in the Company either directly or through a Nominee structure
"Investor Portfolio" or sometimes referred to as "Portfolio"	a portfolio of Holdings in the name of the registered Investor(s)
"Investor Portfolio Number"	personal number attributed to an Investor upon acceptance of an application
"ISIN Code"	International Securities Identification Number that uniquely identifies a Fund / Share Class
"Law of 13 February 2007"	the Luxembourg law of 13 February 2007 relating to specialised investment funds, as may be amended from time to time
"Law of 12 July 2013"	the Luxembourg law of 12 July 2013 on alternative investment fund managers, as may be amended from time to time

"Leverage"	a risk measure that is expressed as a ratio calculated taking the sum of a specific Fund's Exposure to underlying assets plus the incremental Exposure from financial derivative instruments, repurchase/reverse repurchase agreements and securities lending or borrowings arrangements, divided by the Fund's total net assets
"Management Company"	Franklin Templeton International Services S.à r.l. or, where relevant, the members of the Management Company's board of managers
"Net Asset Value per Share" or "NAV"	the value per Share of any Share Class determined in accordance with the relevant provisions described under the heading "Determination of Net Asset Value of Shares" as set out in Appendix D
"Nominee"	an institution which purchases and holds Shares in its own name and on behalf of an Investor
"OECD"	Organisation for Economic Cooperation and Development
"Principal Distributor"	the Management Company acting as principal distributor of the Company
"Professional Investor"	in accordance with Annex III of the Luxembourg law of 5 April 1993 on the financial sector, as amended, and within the meaning of article 2 of the Law of 13 February 2007. Please refer to "Share Classes" section for the list of qualifying Professional Investors
"Regulated Market"	a market which is regulated, operates regularly and is recognised and open to the public in an Eligible State
"Share"	a Share of any Share Class in the capital of the Company
"Share Class"	a class of Shares with a specific fee structure, currency of denomination or other specific feature
"Shareholder"	a holder of Shares in the Company
"SICAV-FIS"	<i>société d'investissement à capital variable - fonds d'investissement spécialisé</i>
"SIF"	a specialised investment fund (<i>fonds d'investissement spécialisé</i>) subject to the Law of 13 February 2007

"Third Party Payment"	payments received from, or made by/to, a party other than the registered Investor
"UCI"	Undertaking for Collective Investment
"UCITS"	Undertaking for Collective Investment in Transferable Securities authorised according to the UCITS Directive
"UCITS Directive"	The Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009, as amended
"USA" or "US"	United States of America
"USD"	United States Dollars
"Valuation Day"	in respect of a Fund, any day which is determined by the Board of Directors as being a day as of which the assets and liabilities of the relevant Fund shall be valued in accordance with the provisions of the Articles and the Issuing Document, as disclosed in the information section of the relevant Fund
"Value-at-Risk (VaR) approach"	an approach for measuring risk based on Value-at-Risk or VaR, which is a measure of the maximum potential loss that can arise at a given confidence level over a specific time period under normal market conditions. VaR may be expressed in absolute terms as a currency amount specific to a portfolio, or as a percentage when the currency amount is divided by total net assets. VaR may also be expressed in relative terms, where the VaR of the Fund (expressed in percentage terms) is divided by the VaR of its relevant benchmark (also expressed in percentage terms), generating a ratio known as relative VaR

**All references herein to time are to Central European time (CET) unless otherwise indicated.
Words implying the singular shall, where the context permits, include the plural and vice versa.**

FUND INFORMATION, OBJECTIVES AND INVESTMENT POLICIES

The exclusive objective of the Company is the collective investment of the assets of the Funds in permitted assets with the purpose of spreading investment risks and affording its Shareholders the results of the management of their assets.

Shares are exclusively reserved to Shareholders qualifying as Eligible Investors.

As more fully disclosed in Appendix D, a Fund shall be solely liable for its own assets and liabilities.

Each Fund may invest in transferable securities, units or shares of Investment Funds, "when issued" securities, lend its portfolio securities and borrow money, all within the limits of the Company's investment restrictions and any further restrictions imposed in the investment policy of the relevant Fund. Within the same limits, each Fund may for the purpose of generating additional capital or income or for reducing costs or risks enter, either as purchaser or seller, into optional as well as non-optional repurchase transactions.

Further, subject to the limits set forth in the investment restrictions in Appendix B and in the investment policy of the relevant Fund, the Company may with respect to each Fund, invest in financial derivative instruments for the purpose of efficient portfolio management and/or to hedge against market or currency risks.

In addition, the Company may also seek to protect and enhance the asset value of its different Funds through hedging strategies consistent with the Funds' investment objectives by utilising, for example, currency options, forward contracts and futures contracts.

Each Fund may, on an ancillary basis, hold liquid assets when the Investment Manager believes they offer more attractive opportunities or as a temporary defensive measure in response to adverse market, economic, political, or other conditions, or to meet liquidity, redemption, and short-term investing needs. In exceptional market circumstances and on a temporary basis only, 100% of any Fund's net assets may be invested in liquid assets, with due regard to the principle of risk spreading. Such assets may be kept in the form of cash deposits or in money market instruments.

Any material change to the investment objective and/or the investment policy of the Company decided by the Board of Directors shall be reflected in this Issuing Document upon approval from the CSSF and shall be notified to the Shareholders in accordance with applicable Luxembourg regulatory requirements.

The investment objectives and policies described below are binding on the Management Company and the Investment Manager of the Funds.

Franklin Templeton Specialised Investment Funds – Templeton Global Bond Plus SIF

Asset Class

Fixed Income Fund

Base Currency

US dollar (USD)

Investment Objectives

The Fund's principal investment objective is to maximise, consistent with prudent investment management, total investment return consisting of a combination of interest income, capital appreciation and currency gains.

Investment Policy

The Fund seeks to achieve its objective by investing principally in a portfolio of fixed or floating-rate debt securities (including non-investment grade securities) and debt obligations issued by government or government-related issuers worldwide. The Fund may also, in accordance with the investment restrictions, invest in debt securities (including non-investment grade securities) of corporate issuers. The Fund may also purchase debt obligations issued by supranational entities organised or supported by several national governments, such as the International Bank for Reconstruction and Development or the European Investment Bank. The Fund may also utilise financial derivative instruments for hedging, efficient portfolio management and/or investment purposes. These financial derivative instruments may be either dealt on regulated markets or over-the-counter, and may include, inter alia, swaps (such as credit default swaps or fixed income related total return swaps), forwards and cross forwards, futures contracts (including those on government securities), as well as options. Use of financial derivative instruments may result in negative exposures in a specific yield curve/duration, currency or credit. The Fund may also invest in securities or structured products (such as credit-linked securities) where the security is linked to or derives its value from another security or is linked to assets, currencies or an official inflation index of any country. The Fund may hold up to 10% of its net assets in securities in default. The Fund may purchase fixed income securities and debt obligations denominated in any currency, and may hold equity securities to the extent that such securities result from the conversion or exchange of a preferred stock or debt obligation.

The Fund may invest up to 25% of its net assets in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) with a credit rating below investment grade at the time of purchase.

The Fund will achieve its objective by applying a UCITS-like investment strategy.

The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital.

Investor Profile

Considering the investment objectives, as stated above, the Fund may appeal to Investors looking to:

- maximise total investment return consisting of a combination of interest income, capital appreciation and currency gains
- invest for the medium to long term

Valuation Day

The assets and liabilities of the Fund will be valued on any day on which the New York Stock Exchange ("NYSE") is open or any full day on which banks in Luxembourg are open for normal business (other than during a suspension of normal dealing).

Risk Considerations

The risks listed below are the main risks of the Fund. Investors should be aware that other risks may also be relevant to this Fund from time to time. Please refer to the Section "Risk Considerations" for a full description of these risks.

- Class Hedging risk
- Counterparty risk
- Credit risk
- Credit-Linked Securities risk
- Defaulted Debt Securities risk
- Derivative Instruments risk
- Dividend Policy risk
- Emerging Markets risk
- Europe and Eurozone risk
- Foreign Currency risk
- Inflation-Indexed Securities risk
- Interest Rate Securities risk
- Investment Funds risk
- Liquidity risk
- Low-Rated or Non-Investment Grade Securities risk
- Market risk
- Sovereign Debt risk
- Structured Notes risk
- Swap Agreements risk

Leverage

The maximum level of Leverage permitted in respect of the Fund is as follows:

- (a) using the Gross Method for calculating Exposure, the ratio is 350% of the Fund's net assets; and
- (b) using the Commitment Method for calculating Exposure, the ratio is 300% of the Fund's net assets.

Investment Objectives

The Fund's principal investment objective is to maximise, consistent with prudent investment management, total investment return consisting of a combination of interest income, capital appreciation, and currency gains.

Investment Policy

The Fund seeks to achieve its objective by investing principally in a portfolio of fixed and/or floating-rate debt securities and debt obligations (including investment grade and non-investment grade securities) issued by government and government-related issuers or corporate entities worldwide. The Fund may also purchase debt obligations issued by supranational entities organised or supported by several national governments, such as the International Bank for Reconstruction and Development or the European Investment Bank. The Fund may also utilise financial derivative instruments for hedging, efficient portfolio management and/or investment purposes. These financial derivative instruments may be either dealt on regulated markets or over-the-counter, and may include, inter alia, swaps (such as credit default swaps, interest rate swaps or fixed income related total return swaps), forwards and cross forwards, futures contracts (including those on government securities), as well as options. Use of financial derivative instruments may result in negative exposures in a specific yield curve/duration, currency or credit. The Fund may also, in accordance with the investment restrictions, invest in securities or structured products (such as credit-linked securities, commercial and residential mortgage-backed securities as well as collateralised debt obligations, including collateralised loan obligations) where the security is linked to or derives its value from another security or is linked to assets, currencies or an official inflation index of any country. The Fund may also purchase mortgage- and asset-backed securities and convertible bonds. The Fund may hold up to 10% of its net assets in securities in default. The Fund may purchase fixed income securities and debt obligations denominated in any currency and may hold equity securities to the extent that such securities result from the conversion or exchange of a preferred stock or debt obligation. The Fund may also participate in mortgage dollar roll transactions.

The Fund may use futures contracts on US Treasury securities to help manage risks relating to interest rates and other market factors, to increase liquidity, and to quickly and efficiently cause new cash to be invested in the securities markets or, if cash is needed to meet shareholder redemption requests, to remove Fund's assets from exposure to the market. On an ancillary basis, the Fund may gain exposure to debt market indexes by investing in index-based financial derivatives and credit default swaps.

The Fund may invest up to 25% of its net assets in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) with a credit rating below investment grade at the time of purchase.

The Fund will achieve its objective by applying a UCITS-like investment strategy.

The Fund may distribute income gross of expenses. Whilst this might allow more income to be

distributed, it may also have the effect of reducing capital.

Investor Profile

Considering the investment objectives, as stated above, the Fund may appeal to Investors looking to:

- maximise total investment return consisting of a combination of interest income, capital appreciation and currency gains
- invest for the medium to long term

Investment Objectives

The Fund's principal investment objective is to maximise, consistent with prudent investment management, total investment return consisting of a combination of interest income, capital appreciation, and currency gains.

Investment Policy

The Fund seeks to achieve its objective by investing principally in a portfolio of fixed and/or floating-rate debt securities and debt obligations issued by government and government-related issuers or corporate entities worldwide. The Fund may also purchase debt obligations issued by supranational entities organised or supported by several national governments, such as the International Bank for Reconstruction and Development or the European Investment Bank. The Fund may also utilise financial derivative instruments for hedging, efficient portfolio management and/or investment purposes within the limits set out in the UCITS Directive. These financial derivative instruments may be either dealt on regulated markets or over-the-counter, and may include, inter alia, swaps (such as credit default swaps, interest rate swaps or fixed income related total return swaps), forwards and cross forwards, futures contracts (including those on government securities), as well as options. Use of financial derivative instruments may result in negative exposures in a specific yield curve/duration, currency or credit. The Fund may also, in accordance with the investment restrictions, invest in securities or structured products (such as credit-linked securities) where the security is linked to or derives its value from another security or is linked to assets, currencies or an official inflation index of any country.

The Fund will not invest more than 30% of its net assets in securities and debt obligations rated below investment grade. The Fund may invest up to 25% of its net assets in debt securities issued and/or guaranteed by a single sovereign issuer (including its government, public or local authority) with a credit rating below investment grade at the time of purchase.

The Fund may also purchase mortgage- and asset-backed securities (provided that they have received an investment grade rating), collateralised debt obligations, including collateralised loan obligations as well as convertible bonds. The Fund may purchase fixed income securities and debt obligations denominated in any currency and may hold equity securities to the extent that such securities result from the conversion or exchange of a preferred stock or debt obligation.

The Fund may use futures contracts on US Treasury securities to help manage risks relating to interest rates and other market factors, to increase liquidity, and to quickly and efficiently cause new cash to be invested in the securities markets or, if cash is needed to meet shareholder redemption requests, to remove Fund's assets from exposure to the market. On an ancillary basis, the Fund may gain exposure to debt market indexes by investing in index-based financial derivatives and credit default swaps.

The Fund will achieve its objective by applying a UCITS-like investment strategy. The Fund will at all time observe the restrictions applicable to UCITS and invest only in transferable securities as permitted under the UCITS Directive.

The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital.

Investor Profile

Considering the investment objectives, as stated above, the Fund may appeal to Investors looking to:

- maximise total investment return consisting of a combination of interest income, capital appreciation and currency gains
- invest for the medium to long term

Valuation Day

The assets and liabilities of the Fund will be valued on any day on which the New York Stock Exchange ("NYSE") is open or any full day on which banks in Luxembourg are open for normal business (other than during a suspension of normal dealing).

Leverage

The maximum level of Leverage permitted in respect of the Fund is as follows:

- (a) using the Gross Method for calculating Exposure, the ratio is 350% of the Fund's net assets; and
- (b) using the Commitment Method for calculating Exposure, the ratio is 300% of the Fund's net assets.

The Fund uses the VaR Approach (Relative VaR) for managing exposure to financial derivative instruments. Relative VaR is the ratio of portfolio VaR to the reference benchmark VaR. The reference benchmark used for this purpose is a blended benchmark consisting of the Barclays Multiverse Index (50%), Barclays Global High-Yield Index (25%), J.P. Morgan Emerging Markets Bond Index Global (12.5%), and J.P. Morgan Government Bond Index-Emerging Markets (12.5%). The Fund has set an internal limit of 200% for Relative VaR.

Important information for Investors

Shares in this Fund are only available to Professional Investors and Institutional Investors.

RISK CONSIDERATIONS

Investors must read this "Risk Considerations" section before investing in any of the Funds.

The value of the Shares will increase as the value of the securities owned by any Fund increases and will decrease as the value of the Fund's investments decreases. In this way, Investors participate in any change in the value of the securities owned by the relevant Fund(s). In addition to the factors that affect the value of any particular security that a Fund owns, the value of the Fund's Shares may also change with movements in the stock and bond markets as a whole.

A Fund may own securities of different types, or from different asset classes (equities, bonds, money market instruments, financial derivative instruments) depending on the Fund's investment objective.

Different investments have different types of investment risk. The Funds also have different kinds of risks, depending on the securities they hold. This "Risk Considerations" section contains explanations of the various types of investment risks that may be applicable to the Funds. Please refer to the section "Fund Information, Objectives and Investment Policies" of this Issuing Document for details as to the principal risks applicable to each Fund. Investors should be aware that other risks may also be relevant to the Funds from time to time.

General

This section explains some of the risks that apply to all the Funds. It does not purport to be a complete explanation and other risks may also be relevant from time to time. In particular, the Company's performance may be affected by changes in market and/or economic and political conditions, and in legal, regulatory and tax requirements. No guarantee or representation is made that the investment program will be successful and there can be no assurance that the Fund(s)' investment objective(s) will be attained. Also, past performance is no guide to future performance, and the value of investments may go down as well as up. Changes in rates of exchange between currencies may cause the value of a Fund's investments to diminish or increase.

The Company or any of its Funds may be exposed to risks that are outside of their control – for example legal and regulatory risks from investments in countries with unclear and changing laws or the lack of established or effective avenues for legal redress or as a result of the registration of the Funds in non-EU jurisdictions, the Funds may be subject, without any notice to the shareholders in the Funds concerned, to more restrictive regulatory regimes potentially preventing the Funds from making the fullest possible use of the investment limits. Regulators and self-regulatory organisations and exchanges are authorised to take extraordinary actions in the event of market emergencies. The effect of any future regulatory action on the Company could be substantial and adverse. The Funds may be exposed to the risk of terrorist actions, to the risk that economic and diplomatic sanctions may be in place or imposed on certain States and military action may be commenced. The impact of such events is unclear, but could have a material effect on general economic conditions and market liquidity. Investors are reminded that in certain circumstances their right to redeem Shares, as described in the section "How to sell Shares", may be suspended as further described in Appendix D.

The Company or any of its Funds may be exposed to operational risks, being the risk that operational processes, including those related to the safekeeping of assets, valuation and transaction processing may fail, resulting in losses. Potential causes of failure may arise from human errors, physical and electronic system failures and other business execution risks as well as external events.

Class Hedging risk

The Company may engage in currency hedging transactions with regard to a certain Share Class (the "Hedged Share Class"). Hedged Share Classes are designed (i) to reduce exchange rate fluctuations between the currency of the Hedged Share Class and the base currency of the Fund or (ii) to reduce exchange rate fluctuations between the currency of the Hedged Share Class and other material currencies within the Fund's portfolio.

The hedging will be undertaken to reduce exchange rate fluctuations in case the base currency of the Fund or other material currencies within the Fund (the "reference currency(ies)") is(are) declining or increasing in value relative to the hedged currency. The hedging strategy employed will seek to reduce as far as possible the exposure of the Hedged Share Classes so that the performance of the Hedged Share Classes closely tracks the performance of the Share Classes in base currency. No assurance can be given that the hedging objective will be achieved. In the case of a net flow to or from a Hedged Share Class the hedging may not be adjusted and reflected in the Net Asset Value of the Hedged Share Class until the following or a subsequent Business Day following the Valuation Day on which the instruction was accepted.

This risk for holders of any Hedged Share Class may be mitigated by using any of the efficient portfolio management techniques and instruments (including currency options and forward currency exchange contracts, currency futures, written call options and purchased put options on currencies and currency swaps), within the conditions and limits imposed by the Luxembourg financial supervisory authority.

Investors should be aware that the hedging strategy may substantially limit Investors of the relevant Hedged Share Class from benefiting from any potential increase in value of the Share Class expressed in the reference currency(ies), if the Hedged Share Class currency falls against the reference currency(ies). Additionally, Investors of the Hedged Share Class may be exposed to fluctuations in the Net Asset Value per Share reflecting the gains/losses on and the associated transactions costs of the relevant financial instruments used to implement the hedging strategy. The gains/losses on and the transactions costs of the relevant financial instruments will accrue solely to the relevant Hedged Share Class.

Any financial instruments used to implement such hedging strategies with respect to one or more Classes of a Fund shall be assets and/or liabilities of such Fund as a whole, but will be attributable to the relevant Class(es) and the gains/losses on and the costs of the relevant financial instruments will accrue solely to the relevant Class. However, due to the lack of segregated liabilities between Classes of the same Fund, costs which are principally attributed to a specific Class may be ultimately charged to the Fund as a whole. Any currency exposure of a Class may not be combined with or offset against that of any other Class of a Fund. The currency exposure of the assets attributable to a Class may not be allocated to other Classes. No intentional leveraging should result from currency hedging transactions of a Class although hedging may exceed 100% for short periods (i) between redemption instructions and execution of the hedge trade and (ii) between market value decreases of assets being hedged and the execution of the hedge adjustment. More details as to the rules governing allocation of assets and liabilities at a Class level are contained in Appendix D.

Collateralised Debt Obligations risk

Some funds may invest in particular types of asset-backed security known as Collateralised Debt Obligation (CDOs) or (if loans are the underlying asset) Collateralised Loan Obligations (CLOs). The risks of an investment in a CDO or CLO depend largely on the type of collateral held by the special

purpose entity (SPE) and the tranche of the CDO or CLO in which a Fund invests. In a typical CDO or CLO structure, there are multiple tranches with varying degrees of seniority, with the most senior tranche getting first access to the interest and principal payments from the pool of underlying assets, the next most senior getting second access, and so on down the line until the residual (or equity tranche) which has the last call on the interest and principal. The lower the priority of the tranche is, the greater the risk. Investment risk may also be affected by the performance of the collateral manager (the entity responsible for selecting and managing the pool of collateral securities held by the SPE trust), especially during a period of market volatility. CDOs or CLOs may be deemed to be illiquid securities and subject to a Fund's restrictions on investments in illiquid securities. A Fund's investment in CDOs or CLOs will not receive the same investor protection as an investment in registered securities. As a result of these factors, prices of CDO or CLO tranches can decline considerably.

In addition to the normal risks associated with debt securities and asset backed securities (e.g., interest rate risk, credit risk and default risk), CDOs and CLOs carry additional risks including, but not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or quality or go into default or be downgraded; (iii) a Fund may invest in tranches of a CDO or CLO that are subordinate to other classes; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer, difficulty in valuing the security or unexpected investment results.

Concentration risk

Some Funds may take concentrated positions in a limited number of markets by making relatively large investments in debt securities issued and/or guaranteed by one or a few sovereign issuer(s) or by applying global macros strategies that seek to benefit from macro-economic opportunities or themes in selected areas, e.g. changes in national income, rate of growth, inflation, price levels or currencies. By being less diversified, such Funds may be more volatile than broadly diversified Funds, or may be exposed to greater risk since under performance of one or a few positions will have a greater impact in a less diversified Fund where there are fewer positions so each position will tend to be a larger percentage of total net assets. The relevant Funds may be adversely affected as a result of such greater volatility or risk.

Convertible and Hybrid Securities risk

A convertible security is generally a debt obligation, preferred stock or other security that pays interest or dividends and may be converted by the holder within a specified period of time into common stock at a specified conversion price. The value of convertible securities may rise and fall with the market value of the underlying stock or, like a debt security, vary with changes in interest rates and the credit quality of the issuer. A convertible security tends to perform more like a stock when the underlying stock price is high relative to the conversion price (because more of the security's value resides in the option to convert) and more like a debt security when the underlying stock price is low relative to the conversion price (because the option to convert is less valuable). Because its value can be influenced by many different factors, a convertible security is not as sensitive to interest rate changes as a similar non-convertible debt security, and generally has less potential for gain or loss than the underlying stock.

Hybrid securities are those that, like convertible securities described above, combine both debt and equity characteristics. Hybrids may be issued by corporate entities (referred to as corporate hybrids) or by financial institutions (commonly referred as contingent convertible bonds or "CoCos"). Hybrid

securities are subordinated instruments that generally fall in the capital structure between equity and other subordinated debt, i.e. such securities will be the most junior securities above equity. Such securities will generally have a long maturity and may even be perpetual in nature. Coupon payments may be discretionary and as such may be cancelled by the issuer at any point, for any reason, and for any length of time. The cancellation of coupon payments may not amount to an event of default. Hybrid securities are callable at pre-determined levels. It cannot be assumed that hybrid securities, including perpetual securities, will be called on the call date. The investor may not receive return of principal on a given call date or on any date.

Contingent convertible securities issued by financial institutions ("CoCos"), which became popular following the 2008-2009 financial crisis as a way of mitigating the impact of stressed market conditions, have certain additional characteristics not typical of corporate hybrids. For CoCos, conversion is tied to a pre-specified trigger event based on the capital structure of the financial institution and/or to when the regulator deems the bank to be no longer viable. The contingent convertible bond may convert to equity or, alternatively, may be purely loss absorbing and convert to nothing. Trigger levels may differ from one issue to the next and the risk of conversion will depend on the distance of the capital ratio to the trigger level and/or the point at which the regulator deems the issuer no longer viable (i.e. the bonds are "bail-in-able" at the "point of non-viability" or PONV), making it difficult for the Investment Manager and/or Investment Co-Managers of the relevant Fund to anticipate the triggering events that would require the debt to convert into equity or be simply loss absorbing. It may also be difficult for the Investment Manager and/or Investment Co-Manager to assess how the securities will behave upon conversion. Because conversion occurs after a specified event, conversion may occur when the share price of the underlying equity is less than when the bond was issued or purchased. Whereas traditional convertible securities are convertible at the option of the holder and the holder of such bonds will generally convert when the share price is higher than the strike price (i.e. when the issuer is doing well), CoCos tend to convert when the issuer is in crisis and needs additional equity or loss absorption in order to survive. As a result, there is greater potential for capital loss with CoCos compared to conventional convertible securities. The trigger could be activated through a material loss in capital as represented in the numerator or an increase in risk weighted assets (due to a shift to riskier assets) as measured in the denominator. Unlike for corporate hybrids, cancelled coupon payments do not generally accumulate and are instead written off. Holders of CoCos may see their coupons cancelled while the issuer continues to pay dividends on common equity, unlike the case of corporate hybrids which typically have so-called "dividend pusher/stopper clauses" which link the payment of hybrid coupons to equity dividends. CoCos may suffer from capital structure inversion risk, since investors in such securities may suffer loss of capital when equity holders do not in the event the pre-defined trigger is breached before the regulator deems the issuer non-viable (if the regulator declares non-viability before such a breach, the normal creditor hierarchy should apply). The value of CoCos may be subject to a sudden drop in value should the trigger level be reached. A Fund may be required to accept cash or securities with a value less than its original investment or, in the event of instances where the contingent convertible bond is intended to be only loss absorbing, the Fund may lose its entire investment.

Counterparty risk

Counterparty risk is the risk to each party of a contract that the counterparty will fail to perform its contractual obligations and/or to respect its commitments under the term of such contract, whether due to insolvency, bankruptcy or other cause.

When over-the-counter (OTC) or other bilateral contracts are entered into (inter alia OTC derivatives, repurchase agreements, security lending, etc.), the Company may find itself exposed to risks arising

from the solvency of its counterparties and from their inability to respect the conditions of these contracts.

Credit risk

Credit risk, a fundamental risk relating to all fixed income securities as well as money market instruments, is the chance that an issuer will fail to make principal and interest payments when due. Issuers with higher credit risk typically offer higher yields for this added risk. Conversely, issuers with lower credit risk typically offer lower yields. Generally, government securities are considered to be the safest in terms of credit risk, while corporate debt, especially those with poorer credit ratings, have the highest credit risk. Changes in the financial condition of an issuer, changes in economic and political conditions in general, or changes in economic and political conditions specific to an issuer (particularly a sovereign or supranational issuer), are all factors that may have an adverse impact on an issuer's credit quality and security values. Related to credit risk is the risk of downgrade by a rating agency. Rating agencies such as Standard & Poor's, Moody's and Fitch, among others, provide ratings for a wide array of fixed income securities (corporate, sovereign, or supranational) which are based on their creditworthiness. The agencies may change their ratings from time to time due to financial, economic, political, or other factors, which, if the change represents a downgrade, can adversely impact the value of the affected securities.

Credit-Linked Securities risk

Credit-linked securities are debt securities that represent an interest in a pool of, or are otherwise collateralised by one or more corporate debt obligations or credit default swaps incorporating debt or bank loan obligations. Such debt obligations may represent the obligations of one or more corporate issuers. A Fund that invests in credit-linked securities has the right to receive periodic interest payments from the issuer of the credit-linked security (usually the seller of the underlying credit default swap(s)) at an agreed-upon interest rate, and a return of principal at the maturity date.

A Fund that invests in credit-linked securities bears the risk of loss of its principal investment, and the periodic interest payments expected to be received for the duration of its investment in the credit-linked security, in the event that one or more of the debt obligations underlying the credit default swaps go into default or otherwise become non-performing. Upon the occurrence of such a credit event (including bankruptcy, failure to timely pay interest or principal, or a restructuring), the Fund affected will generally reduce the principal balance of the related credit-linked security by the Fund's pro rata interest in the par amount of the defaulted underlying debt obligation in exchange for the actual value of the defaulted underlying obligation or the defaulted underlying obligation itself, resulting in a loss of a portion of the Fund's investment. Thereafter, interest on the credit-linked security will accrue on a smaller principal balance and a smaller principal balance will be returned at maturity. To the extent a credit-linked security represents an interest in underlying obligations of a single corporate or other issuer, a credit event with respect to such issuer presents greater risk of loss to a Fund than if the credit-linked security represented an interest in underlying obligations of multiple issuers.

In addition, the Fund bears the risk that the issuer of the credit-linked security will default or become bankrupt. In such an event, the Fund may have difficulty being repaid, or fail to be repaid, the principal amount of its investment and the remaining periodic interest payments thereon.

An investment in credit-linked securities also involves reliance on the counterparty to the credit default swap entered into with the issuer of the credit-linked security to make periodic payments to the issuer under the terms of the swap. Any delay or cessation in the making of such payments may be

expected in certain instances to result in delays or reductions in payments to the Fund as an investor in such credit-linked securities. Additionally, credit-linked securities are typically structured as limited recourse obligations of the issuer of such securities such that the securities issued will usually be obligations solely of the issuer and will not be obligations or responsibilities of any other person.

Most credit-linked securities are structured as US Rule 144A securities so that they may be freely traded among institutional buyers. A Fund will generally only purchase credit-linked securities, which are determined to be liquid in the opinion of the Investment Manager. However, the market for credit-linked securities may suddenly become illiquid. The other parties to the transaction may be the only investors with sufficient understanding of the derivative to be interested in bidding for it. Changes in liquidity may result in significant, rapid and unpredictable changes in the prices for credit-linked securities. In certain cases, a market price for a credit-linked security may not be available or may not be reliable, and the Fund could experience difficulty in selling such security at a price the Investment Manager believes is fair.

The value of a credit-linked security will typically increase or decrease with any change in value of the underlying debt obligations, if any, held by the issuer and the credit default swap. Further, in cases where the credit-linked security is structured such that the payments to a Fund are based on amounts received in respect of, or the value of performance of, any underlying debt obligations specified in the terms of the relevant credit default swap, fluctuations in the value of such obligation may affect the value of the credit-linked security.

Custody risk

Assets of the Company are safe kept by the custodian and Investors are exposed to the risk of the custodian not being able to fully meet its obligation to reconstitute in a short timeframe all of the assets of the Company in the case of bankruptcy of the custodian. The assets of the Company will be identified in the custodian's books as belonging to the Company. Securities and debt obligations (including loan assignments and loan participations) held by the custodian will be segregated from other assets of the custodian which mitigates but does not exclude the risk of non-restitution in case of bankruptcy. However, no such segregation applies to cash which increases the risk of non-restitution in case of bankruptcy. The custodian does not keep all the assets of the Company itself but uses a network of sub-custodians which are not part of the same group of companies as the custodian. Investors are exposed to the risk of bankruptcy of the sub-custodians in the same manner as they are to the risk of bankruptcy of the custodian. A Fund may invest in markets where custodial and/or settlement systems are not fully developed. The assets of the Fund that are traded in such markets and which have been entrusted to such sub-custodians may be exposed to risk in circumstances where the custodian will have no liability.

Defaulted Debt Securities risk

Some Funds may invest in debt securities on which the issuer is not currently making interest payments (defaulted debt securities). These Funds may buy defaulted debt securities if, in the opinion of the Investment Manager, it appears likely that the issuer may resume interest payments or other advantageous developments appear likely in the near future. These securities may become illiquid.

The risk of loss due to default may also be considerably greater with lower-quality securities because they are generally unsecured and are often subordinated to other creditors of the issuer. If the issuer of a security in a Fund's portfolio defaults, the Fund may have unrealised losses on the security, which may lower the Fund's Net Asset Value per Share. Defaulted securities tend to lose much of their value before they default. Thus, the Fund's Net Asset Value per Share may be adversely affected before an

issuer defaults. In addition, the Fund may incur additional expenses if it must try to recover principal or interest payments on a defaulted security.

Included among the issuers of debt securities or obligations in which the Company may invest are entities organised and operated solely for the purpose of restructuring the investment characteristics of various securities or obligations. These entities may be organised by investment banking firms, which receive fees in connection with establishing each entity and arranging for the placement of its securities.

Derivative Instruments risk

The performance of derivative instruments depends largely on the performance of an underlying currency, security, index or other reference asset, and such instruments often have risks similar to the underlying instrument, in addition to other risks. A Fund may use options, futures, options on futures, and forward contracts on currencies, securities, indices, interest rates or other reference assets for hedging, efficient portfolio management and/or investment purposes. Derivative instruments involve costs and can create economic leverage in the Fund's portfolio which may result in significant volatility and cause the Fund to participate in losses (as well as gains) in an amount that significantly exceeds the Fund's initial investment. In the case of futures transactions, the amount of the initial margin is small relative to the value of the futures contract so that transactions are "leveraged" or "geared". A relatively small market movement will have a proportionately larger impact which may work for or against the Fund. The placing of certain orders which are intended to limit losses to certain amounts may not be effective because market conditions may make it impossible to execute such orders.

Transactions in options may also carry a high degree of risk. Selling ("writing" or "granting") an option generally entails considerably greater risk than purchasing options. Although the premium received by the Fund is fixed, the Fund may sustain a loss well in excess of that amount. The Fund will also be exposed to the risk of the purchaser exercising the option and the Fund will be obliged either to settle the option in cash or to acquire or deliver the underlying investment. If the option is "covered" by the Fund holding a corresponding position in the underlying investment or a future on another option, the risk may be reduced. The risk of loss to a Fund for a swap transaction on a net basis depends on which party is obliged to pay the net amount to the other party. If the counterparty is obliged to pay the net amount to the Fund, the risk of loss to the Fund is the loss of the entire amount that the Fund is entitled to receive; if the Fund is obliged to pay the net amount, the Fund's risk of loss is limited to the net amount due (please also refer to "Swap Agreements risk").

Certain derivatives have the potential for a high degree of leverage regardless of the size of the initial investment. The use of leverage may cause a Fund to liquidate portfolio positions to satisfy its obligations or to meet asset segregation requirements when it may not be advantageous to do so. Other risks include illiquidity, mispricing or improper valuation of the derivative instrument, and imperfect correlation between the value of the derivative and the underlying instrument so that a Fund may not realise the intended benefits. Their successful use will usually depend on the Investment Manager's ability to accurately forecast movements in the market relating to the underlying instrument. Should a market or markets, or prices of particular classes of investments move in an unexpected manner, especially in unusual or extreme market conditions, a Fund may not achieve the anticipated benefits of the transaction, and it may realise losses, which could be significant. If the Investment Manager is not successful in using such derivative instruments, a Fund's performance may be worse than if the Investment Manager did not use such derivative instruments at all. To the extent that a Fund uses such instruments for hedging purposes, there is the risk of imperfect correlation between movements in the

value of the derivative instrument and the value of the underlying investment or other asset being hedged. There is also the risk, especially under extreme market conditions, that an instrument, which usually would operate as a hedge, provides no hedging benefits at all.

A Fund may engage in transactions involving derivative instruments that trade on exchanges or that may be privately negotiated and trade "over-the-counter" (OTC) and not on an exchange. Exchange-traded derivatives include futures, options, options on futures, and warrants. Examples of OTC derivative instruments include currency forwards, interest rate swaps, credit default swaps, total return swaps or contracts for differences. Use of such OTC instruments could result in a loss if the counterparty to the transaction (with respect to forward currency contracts and other OTC derivatives) does not perform as promised, including because of such counterparty's bankruptcy or insolvency. This risk may be heightened during volatile market conditions. Collateral is employed for many OTC derivative transactions – it needs to be pledged to the counterparty if a Fund has a net loss on a given transaction and a Fund may hold collateral pledged by the counterparty to the Fund if the Fund has a net gain on a given transaction. The value of the collateral may fluctuate, however, and it may be difficult to sell, so there are no assurances that the value of collateral held will be sufficient to cover the amount owed to a Fund or will not be absorbed by other outstanding obligations of the counterparty. Other risks include the inability to close out a position because the trading market becomes illiquid (particularly in the OTC markets) or the availability of counterparties becomes limited for a period of time. In addition, the presence of speculators in a particular market could lead to price distortions. To the extent that a Fund is unable to close out a position because of market illiquidity, the Fund may not be able to prevent further losses of value in its derivatives holdings and the Fund's liquidity may be impaired to the extent that it has a substantial portion of its otherwise liquid assets marked as segregated to cover its obligations under such derivative instruments. A Fund may also be required to take or make delivery of an underlying instrument that the Investment Manager would otherwise have attempted to avoid. Some derivatives can be particularly sensitive to changes in interest rates or other market prices. Investors should bear in mind that, while a Fund may intend to use derivative strategies on a regular basis, it is not obligated to actively engage in these transactions, generally or in any particular kind of derivative, if the Investment Manager elects not to do so due to availability, cost or other factors.

Financial derivative instruments may be used for, among other purposes, synthetic short selling. In order to replicate short exposure either for investment purposes or to hedge a long position in the same or a similar asset, synthetic short selling can be accomplished through the use of derivatives. The purchase of credit default swaps (CDS), for example, for a particular issuer without owning a debt obligation of that issuer effectively results in the Fund having a short exposure to that issuer. The Fund may also purchase credit default swaps to hedge an existing position in the same issuer. Purchasing a put option on a stock, debt obligation, or a currency without owning the stock, debt obligation or currency is also effectively going short (and again such a transaction may be entered into for the purpose of hedging an existing position). The only investment at risk in such strategies is the premium paid for the CDS or option, unlike the case of going short actual stocks, bonds or currencies where the full investment in such assets is at risk. Another synthetic short selling strategy is the selling of interest rate futures which will benefit from a rise in interest rates, thereby replicating going short interest rates. Where premium is paid for such synthetic short selling strategies (e.g. for credit default swaps or put options), there is the possibility of losing the entire investment if no credit event occurs (in the case of credit default swaps) or the option expires worthless (because the underlying asset did not fall below the strike price). Where a futures contract is entered into (e.g. selling interest rate futures), the potential loss is governed by the degree to which interest rates move down instead of up, the conversion factor applied vis-à-vis the basket of eligible securities, the time to delivery, and the

notional amount associated with the contract. Additional strategies similar to these may be implemented with similar consequences and potential risks. Risk is mitigated by virtue of daily adjustment of variation margin and/or the maintenance of eligible collateral against the position. There is no assurance that such synthetic short selling strategies as described herein will be as effective in achieving short exposure for investment or hedging purposes as actual short selling strategies.

Under recent financial reforms, certain types of derivatives (i.e., certain swaps) are, and others eventually are expected to be, required to be cleared through a central counterparty. Central clearing is designed to reduce counterparty credit risk and increase liquidity compared to OTC swaps, but it does not eliminate those risks completely. With cleared swaps, there is also a risk of loss by a Fund of its initial and variation margin deposits in the event of bankruptcy of the FCM with which the Fund has an open position in a swap contract. If an FCM does not provide accurate reporting, the Fund is also subject to the risk that the FCM could use the Fund's assets to satisfy its own financial obligations or the payment obligations of another customer to the central counterparty. With cleared swaps, a Fund may not be able to obtain as favorable terms as it would be able to negotiate for a bilateral, uncleared swap. In addition, an FCM may unilaterally amend the terms of its agreement with a Fund, which may include the imposition of position limits or additional margin requirements with respect to the Fund's investment in certain types of swaps. Central counterparties and FCMs generally can require termination of existing cleared swap transactions at any time, and can also require increases in margin above the margin that is required at the initiation of the swap agreement.

The regulation of cleared and uncleared swaps, as well as other derivatives, is a rapidly changing area of law and is subject to modification by government and judicial action. In addition, regulators and exchanges in many jurisdictions are authorised to take extraordinary actions in the event of a market emergency, including, for example, the implementation or reduction of speculative position limits, the implementation of higher margin requirements, the establishment of daily price limits and the suspension of trading. It is not possible to predict fully the effects of current or future regulation. New requirements, even if not directly applicable to a Fund, may increase the cost of a Fund's investments and cost of doing business, which could adversely affect investors.

The use of derivative strategies may also have a tax impact on a Fund. The timing and character of income, gains or losses from these strategies could impair the ability of the Investment Manager to utilise derivatives when it wishes to do so.

Dilution and Swing Pricing risk

The actual cost of purchasing or selling the underlying investments of a Fund may be different from the carrying value of these investments in the Fund's valuation. The difference may arise due to dealing and other costs (such as taxes) and/or any spread between the buying and selling prices of the underlying investments.

These dilution costs can have an adverse effect on the overall value of a Fund and thus the Net Asset Value per Share may be adjusted in order to avoid disadvantaging the value of investments for existing Shareholders. The size of the adjustment impact is determined by factors such as the volume of transactions, the purchase or sale prices of the underlying investments and the valuation method adopted to calculate the value of such underlying investments of the Fund.

Distressed Securities risk

Investment in distressed securities (i.e. which have a Standard & Poor's notation below CCC long-term rating or equivalent) may cause additional risks for a Fund. Such securities are regarded as

predominantly speculative with respect to the issuer's capacity to pay interest and principal or maintain other terms of the offer documents over any long period of time. They are generally unsecured and may be subordinated to other outstanding securities and creditors of the issuer. Whilst such issues are likely to have some quality and protective characteristics, these are outweighed by large uncertainties or major risk exposure to adverse economic conditions. Therefore, a Fund may lose its entire investment, may be required to accept cash or securities with a value less than its original investment and/or may be required to accept payment over an extended period of time. Recovery of interest and principal may involve additional cost for the relevant Fund. Under such circumstances, the returns generated from the relevant Fund's investments may not compensate the shareholders adequately for the risks assumed.

Dividend Policy risk

Certain Funds, particularly those that pursue investment strategies seeking to generate income, may have a dividend policy that allows for payment of dividends out of capital as well as from income and net realised and net unrealised capital gains. Where this is done, while it may allow for more income to be distributed, it also amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. This has the effect of reducing capital and the potential for long-term capital growth as well as increasing any capital losses. Examples of when this may occur include:

- if the securities markets in which the Fund invests were sufficiently declining so that the Fund has incurred net capital losses;
- if dividends are paid gross of fees and expenses such that fees and expenses are paid out of net realised and net unrealised capital gains or initially subscribed capital.

Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (if the Fund is in a net capital loss position) may reduce capital growth and may result in an immediate reduction of the net asset value per share. See also "Taxation of the Company" section below.

Emerging Markets risk

All Fund investments in the securities issued by corporations, governments, and government related entities in different nations and denominated in different currencies involve certain risks. These risks are typically increased in developing countries and Emerging Markets. Such risks, which can have adverse effects on portfolio holdings, may include: (i) investment and repatriation restrictions; (ii) currency fluctuations; (iii) the potential for unusual market volatility as compared to more industrialised nations; (iv) government involvement in the private sector; (v) limited investor information and less stringent investor disclosure requirements; (vi) shallow and substantially smaller liquid securities markets than in more industrialised countries, which means a Fund may at times be unable to sell certain securities at desirable prices; (vii) certain local tax law considerations; (viii) limited regulation of the securities markets; (ix) international and regional political and economic developments; (x) possible imposition of exchange controls or other local governmental laws or restrictions; (xi) the increased risk of adverse effects from deflation and inflation; (xii) the possibility of limited legal recourse for the Fund; and (xiii) the custodial and/or the settlement systems may not be fully developed.

Investors in Funds investing in Emerging Markets should in particular be informed that the liquidity of securities issued by corporations and public-law entities in Emerging Markets may be substantially smaller than with comparable securities in industrialised countries.

Europe and Eurozone risk

Some Funds may invest in Europe and the Eurozone. Mounting sovereign debt burdens (e.g. any sovereigns within the Eurozone, which default on their debts, may be forced to restructure their debts and faced difficulties in obtaining credit or refinancing) and slowing economic growth among European countries, combined with uncertainties in European financial markets, including feared or actual failures in the banking system, the possibility for one or more countries to withdraw from the European Union, including the United Kingdom, which is a significant market in the global economy and the possible break-up of the Eurozone and Euro currency, may adversely affect interest rates and the prices of both fixed income and equity securities across Europe and potentially other markets as well. These events may increase volatility, liquidity and currency risks associated with investments in Europe. The aforesaid economic and financial difficulties in Europe may spread across Europe and as a result, a single or several European countries may exit the Eurozone or a sovereign within the Eurozone may default on its debts. In any event of the break-up of the Eurozone or Euro currency, the relevant Funds may be exposed to additional operational or performance risks.

While the European governments, the European Central Bank, and other authorities are taking measures (e.g. undertaking economic reforms and imposing austerity measures on citizens) to address the current fiscal conditions, these measures may not have the desired effect and therefore the future stability and growth of Europe is uncertain. The performance and value of the relevant Funds may be adversely affected should there be any adverse credit events (e.g. downgrade of the sovereign credit rating or default or bankruptcy of any Eurozone countries).

Foreign Currency risk

Since the Company values the portfolio holdings of each of its Funds in either US dollar, Japanese yen or euro, changes in currency exchange rates adverse to those currencies may affect the value of such holdings and each respective Fund's yield thereon.

Since the securities, including cash and cash equivalents, held by a Fund may be denominated in currencies different from its base currency, the Fund may be affected favourably or unfavourably by exchange control regulations or changes in the exchange rates between such reference currency and other currencies. Changes in currency exchange rates may influence the value of a Fund's Shares, and also may affect the value of dividends and interests earned by the Fund and gains and losses realised by said Fund. If the currency in which a security is denominated appreciates against the base currency, the price of the security could increase. Conversely, a decline in the exchange rate of the currency would adversely affect the price of the security.

To the extent that a Fund or any Share Class seeks to use any strategies or instruments to hedge or to protect against currency exchange risk, there is no guarantee that hedging or protection will be achieved. Unless otherwise stated in any Fund's investment policy, there is no requirement that any Fund seeks to hedge or to protect against currency exchange risk in connection with any transaction.

Currency management strategies may substantially change a Fund's exposure to currency exchange rates and could result in losses to the Fund if currencies do not perform as the Investment Manager expects. In addition, currency management strategies, to the extent that they reduce the Fund's exposure to currency risks, may also reduce the Fund's ability to benefit from favorable changes in currency exchange rates. There is no assurance that the Investment Manager's use of currency management strategies will benefit the Fund or that they will be, or can be, used at appropriate times. Furthermore, there may not be perfect correlation between the amount of exposure to a particular currency and the amount of securities in the portfolio denominated in that currency. Investing in

foreign currencies for purposes of gaining from projected changes in exchange rates, as opposed to hedging currency risks applicable to the Fund's holdings, further increases the Fund's exposure to foreign investment losses.

Investors should be aware of the fact that the Chinese Renminbi (RMB) is subject to a managed floating exchange rate based on market supply and demand with reference to a basket of currencies. Currently, the RMB is traded in two markets: one in Mainland China, and one outside Mainland China (primarily in Hong Kong). The RMB traded in Mainland China is not freely convertible and is subject to exchange controls and certain requirements by the government of Mainland China. The RMB traded outside Mainland China, on the other hand, is freely tradable. Whilst the RMB is traded freely outside Mainland China, the RMB spot, forward foreign exchange contracts and related instruments reflect the structural complexities of this evolving market. Accordingly, Alternative Currency Classes denominated in RMB may be exposed to greater foreign exchange risks.

Frontier Markets risk

Investments in Emerging Market countries involve risks as set out in the section "Emerging Markets risks" above. Investments in Frontier Markets involve risks similar to investments in Emerging Markets but to a greater extent since Frontier Markets are even smaller, less developed, and less accessible than other Emerging Markets. Frontier Markets may also experience greater political and economic instability and may have less transparency, less ethical practices, and weaker corporate governance compared to other Emerging Markets and the relevant Fund/Investors may be adversely impacted. Such markets are also more likely to have investment and repatriation restrictions, exchange controls and less developed custodial and settlement systems than other Emerging Markets. The countries that comprise Frontier Markets include the lesser developed countries located in Africa, Asia, the Middle East, Eastern Europe and Latin America. As a result, the relevant Fund/Investors may be adversely impacted.

Inflation-Indexed Securities risk

Inflation-indexed securities have a tendency to react to changes in real interest rates. Real interest rates represent nominal (stated) interest rates lowered by the anticipated effect of inflation. In general, the price of an inflation-indexed security can decrease when real interest rates increase, and can increase when real interest rates decrease. Interest payments on inflation-indexed securities will fluctuate as the principal and/or interest is adjusted for inflation and can be unpredictable, therefore, the Fund's income distributions may fluctuate more than the income distributions of a typical fixed income fund. There can be no assurance that the Consumer Price Index or any other measure used to adjust the principal amounts of the Fund's debt securities will accurately correspond to the rate of inflation experienced by a particular investor. Any increase in the principal amount of an inflation-protected debt security will be considered taxable ordinary income, even though investors, such as the Fund, do not receive their principal until maturity.

Interest Rate Securities risk

All Funds that invest in debt securities or money market instruments are subject to interest rate risk. A fixed income security's value will generally increase in value when interest rates fall and decrease in value when interest rates rise. Interest rate risk is the chance that such movements in interest rates will negatively affect a security's value or, in a Fund's case, its Net Asset Value. Fixed income securities with longer-term maturities tend to be more sensitive to interest rate changes than shorter-term securities. As a result, longer-term securities tend to offer higher yields for this added risk. While changes in interest rates may affect a Fund's interest income, such changes may positively or negatively affect the Net Asset Value of the Fund's Shares on a daily basis.

Variable rate securities (which include floating-rate debt securities) generally are less sensitive to interest rate changes than fixed rate debt securities. However, the market value of variable rate debt securities may decline when prevailing interest rates rise if their interest rates do not rise as much, or as quickly, as interest rates in general. Conversely, variable rate securities will not generally increase in market value if interest rates decline. However, when interest rates fall, there will be a reduction in the payments of interest received by a Fund from its variable rate securities. Floating-rate securities may be rated below investment grade (such securities are commonly referred to as "junk bonds"). Limits on the aggregate amount by which a variable rate security's interest rate may increase over its lifetime or during any one adjustment period can prevent the interest rate from ever adjusting to prevailing market rates.

Investment Funds risk

A Fund's performance is directly impacted by the performance of any Investment Funds held by it. The ability of a Fund to achieve its investment goal is directly related to, in part, the ability of the Investment Funds to meet their investment goal.

Investing in other Investment Funds may be more costly to a Fund than if the Fund had invested in the underlying securities directly. Shareholders of the Fund will indirectly bear the fees and expenses (including management and advisory fees and other expenses) of the underlying Investment Funds. As the Fund's allocations among the Investment Funds change from time to time, or to the extent that the expense ratios of the underlying funds change, the expenses borne by the Fund may increase or decrease. In addition, the determination of Net Asset Value of the Shares of any particular Investment Fund held by a Fund may be suspended under certain conditions as indicated in Appendix D ("Suspension of Calculation of Net Asset Value"). In the event this were to happen, it could impede the ability of a Fund to meet a redemption request.

A Fund's investments in Investment Funds may subject the Fund to additional risks than if the Fund would have invested directly in the Investment Funds' underlying securities. These risks include the possibility that an unregistered fund or an ETF may experience a lack of liquidity that can result in greater volatility than its underlying securities. In addition, an ETF may trade at a premium or discount to its net asset value, as shares of an ETF are bought and sold based on exchanges on market values and not at the ETF's net asset value.

Another risk of investing in Investment Funds is the possibility that one Investment Fund may buy the same securities that another Investment Fund sells. If this happens, an investor in the affected Fund would indirectly bear the costs of these transactions without accomplishing the intended investment purpose. Also, the Fund or the Investment Funds may hold common portfolio securities, thereby reducing the diversification benefits to the Fund.

Legal and regulatory risk

The Funds must comply with various legal requirements, including requirements imposed by the securities laws and companies laws in various jurisdictions, including the Grand Duchy of Luxembourg.

The interpretation and application of legislative acts can be often contradictory and this may impact the enforceability of the various agreements and guarantees entered into by the Funds. Legislation could be imposed retrospectively or may be issued in the form of internal regulations not generally available to the public. The interpretation and application of laws and regulations can be often

contradictory and uncertain particularly in respect of matters relating to taxation.

Courts may not adhere to the requirements of the law and the relevant contract and it cannot be guaranteed that any recourse or judgment obtained in a foreign court will be enforced in certain jurisdictions where the assets relating to securities held by the Funds are located.

Liquidity risk

Liquidity risk takes two forms: asset side liquidity risk and liability side liquidity risk. Asset side liquidity risk refers to the inability of a Fund to sell a security or position at its quoted price or market value due to such factors as a sudden change in the perceived value or credit worthiness of the position, or due to adverse market conditions generally. Liability side liquidity risk refers to the inability of a Fund to meet a redemption request, due to the inability of the Fund to sell securities or positions in order to raise sufficient cash to meet the redemption request. Markets where the Fund's securities are traded could also experience such adverse conditions as to cause exchanges to suspend trading activities. Reduced liquidity due to these factors may have an adverse impact on the Net Asset Value of the Fund and, as noted, on the ability of the Fund to meet redemption requests in a timely manner.

Certain securities may be considered illiquid due to a limited trading market, financial weakness of the issuer, legal or contractual restrictions on resale or transfer, or are otherwise classified as illiquid in the sense that they cannot be sold within seven days at approximately the price at which the Fund values them. Securities that are illiquid involve greater risk than securities that trade in more liquid markets. Market quotations for such securities may be volatile and/or subject to large spreads between bid and ask prices. Illiquidity may have an adverse impact on market price and the Fund's ability to sell particular securities when necessary to meet the Fund's liquidity needs or in response to a specific economic event.

Low-Rated or Non-Investment Grade Securities risk

Some Funds may invest in higher-yielding securities rated lower than investment grade. High-yield debt securities (including loans) and unrated securities of similar credit quality ("high-yield debt instruments" or "junk bonds") involve greater risk of a complete loss of the Fund's investment, or delays of interest and principal payments, than higher-quality debt securities. Issuers of high-yield debt instruments are not as strong financially as those issuing securities of higher credit quality. High-yield debt instruments are generally considered predominantly speculative by the applicable rating agencies as these issuers are more likely to encounter financial difficulties and are more vulnerable to changes in the relevant economy, such as a recession or a sustained period of rising interest rates, that could affect their ability to make interest and principal payments when due. If an issuer stops making interest and/or principal payments, payments on the securities may never resume. These instruments may be worthless and the Fund could lose its entire investment.

The prices of high-yield debt instruments fluctuate more than higher-quality securities. Prices are especially sensitive to developments affecting the issuer's business or operations and to changes in the ratings assigned by rating agencies. In addition, the entire high-yield debt market can experience sudden and sharp price swings due to changes in economic conditions, stock market activity, large sustained sales by major investors, a high-profile default, or other factors. Prices of corporate high-yield debt instruments often are closely linked with the company's stock prices and typically rise and fall in response to factors that affect stock prices.

High-yield debt instruments are generally less liquid than higher-quality securities. Many of these securities are not registered for sale with relevant regulatory authorities in the local jurisdiction and/or do not trade frequently. When they do trade, their prices may be significantly higher or lower than expected. At times, it may be difficult to sell these securities promptly at an acceptable price, which may limit the Fund's ability to sell securities in response to specific economic events or to meet redemption requests. As a result, high-yield debt instruments generally pose greater illiquidity and valuation risks.

The use of credit ratings in evaluating debt securities can involve certain risks, including the risk that the credit rating may not reflect the issuer's current financial condition or events since the security was last rated by a rating agency. Credit ratings may be influenced by conflicts of interest or based on historical data that no longer apply or are accurate. Recently, legislation and regulations to reform rating agencies have been proposed and may adversely impact the Fund's investments or investment process.

Unrated debt securities determined by the Investment Manager to be of comparable quality to rated securities which the Fund may purchase may pay a higher interest rate than such rated debt securities and be subject to a greater risk of illiquidity or price changes. Less public information is typically available about unrated securities or issuers.

Exposure to the low-rated or high-yield debt may be achieved through synthetic means. For example, the CDX is a credit default swap on a basket of high yield bonds, constituting in effect a high yield bond index. By purchasing such an instrument, the Fund is buying protection (i.e. the ability to get par for the bonds in the event of an unfavourable credit event), allowing the Fund to hedge its exposure or go short the high yield sector. By selling such an instrument short and holding cash against the potential obligation to purchase it, the Fund is selling protection and effectively getting long exposure to the high yield sector more efficiently than purchasing individual bonds. The risks associated with such synthetic instruments are comparable to those of the underlying high yield securities that the instruments are seeking to replicate, in addition to the risk that the synthetic instruments themselves do not perform as intended due to adverse market conditions.

Market risk

The market values of securities owned by a Fund will go up or down, sometimes rapidly or unpredictably. Securities may decline in value due to factors affecting individual issuers, securities markets generally or particular industries or sectors within the securities markets. The value of a security may go up or down due to general market conditions which are not specifically related to a particular issuer, such as real or perceived adverse economic conditions, changes in the general outlook for revenues or corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. They may also go up or down due to factors that affect an individual issuer or a particular industry or sector, such as changes in production costs and competitive conditions within an industry. During a general downturn in the securities markets, multiple asset classes may decline in value. When markets perform well, there can be no assurance that securities held by a Fund will participate in or otherwise benefit from the advance.

Stock prices tend to go up and down more dramatically than those of debt securities. A slower-growth or recessionary economic environment could have an adverse effect on the prices of the various stocks held by the Fund.

Mortgage- and Asset-Backed Securities risk

Some Funds may invest in mortgage- and asset-backed securities. Mortgage-backed securities (sometimes referred as mortgage pass-through securities) are securities that are backed by pools of mortgage loans where the payment of interest and principal from the underlying mortgages are passed through to the holders of the mortgage-backed securities. The underlying mortgages may be single family, multi-family, or commercial mortgages (that latter are frequently called commercial mortgage-backed securities, or CMBS), and may be fixed rate or adjustable rate mortgages (if adjustable, such securities are called Adjustable Rate Mortgage Securities or ARMS). Mortgage-backed securities differ from conventional debt securities in that principal is paid back over the life of the security rather than at maturity, as the underlying mortgages are subject to unscheduled pre-payments of principal before the security's maturity date due to voluntary prepayments, refinancings or foreclosures on the underlying mortgage loans. To the Fund this means a loss of anticipated interest, and a portion of its principal investment represented by any premium the Fund may have paid over par at the time of purchase. Mortgage pre-payments generally increase when interest rates fall.

Mortgage-backed securities also are subject to extension risk. An unexpected rise in interest rates could reduce the rate of pre-payments on mortgage-backed securities and extend their life. This could cause the price of the mortgage-backed securities to be more sensitive to interest rate changes. Issuers of asset-backed securities may have limited ability to enforce the security interest in the underlying assets, and credit enhancements provided to support the securities, if any, may be inadequate to protect investors in the event of default.

Collateralised Mortgage Obligations (CMOs) are securities backed by a pool of mortgage pass-through securities or actual mortgage loans that are structured into various tranches with varying maturities and varying priorities in terms of their access to the principal and interest payments from the underlying assets. Such securities will have, depending on the tranches, varying degrees of pre-payment risk and credit risk, depending on their priority in the capital structure. The shorter, more senior tranches will generally be lower risk than the longer dated, more junior tranches.

Mortgage-backed securities may be offered as interest only (IO) or principal only (PO) strips, where only the interest or the principal of the underlying mortgages in the pool is passed on to the security holders. These types of securities are highly sensitive to the pre-payment experience associated with the underlying mortgages and will behave in opposite ways to the same trend in pre-payments. For IO securities, early pre-payments within the pool will mean less than expected interest payments since the mortgages will have terminated, adversely affecting security holders. For PO securities, early pre-payments within the pool will mean quicker repayment of principal than expected, benefiting security holders. Because of the highly sensitive nature of these securities, the possibility of sharp declines in prices is much greater compared to conventional mortgage-backed securities.

Mortgage- and asset-backed securities may be structured as synthetic securities. For example, the CMBX is a credit default swap on a basket of CMBS bonds, constituting in effect a CMBS index. By purchasing such an instrument, the Fund is buying protection (i.e. the ability to get par for the bonds in the event of an unfavourable credit event), allowing the Fund to hedge its exposure or go short the CMBS sector. By selling such an instrument short and holding cash against the potential obligation to purchase it, the Fund is selling protection and effectively getting long exposure to the CMBS sector more quickly and efficiently than purchasing individual bonds. The risks associated with such synthetic instruments are comparable to those of the underlying ABS or MBS securities that the instruments are seeking to replicate, in addition to the risk that the synthetic instruments themselves do not perform as intended due to adverse market conditions.

Asset-backed securities are very similar to mortgage-backed securities, except that the securities are collateralised by other types of assets besides mortgages, such as credit card receivables, home-equity loans, manufactured homes, automobile loans, student loans, equipment leases, or senior bank loans, among others. Like mortgage-backed securities, asset-backed securities are subject to pre-payment and extension risks.

Mortgage Dollar Roll risk

Some Funds may engage in mortgage dollar roll transactions. In a mortgage dollar roll, a Fund sells mortgage-backed securities for delivery in the current month and simultaneously contracts to repurchase substantially similar securities on a specified future date (typically so-called "to-be-announced" or TBA securities where the actual securities underlying the transaction are not identified, rather only certain parameters are specified, e.g. coupon, maturity, issuer, mortgage type, and month of settlement). During the period between the sale and repurchase (the "roll period"), the Fund foregoes principal and interest paid on the mortgage-backed securities. The Fund is compensated by the difference between the current sales price and the lower forward price for the future purchase (often referred to as the "drop"), as well as by the interest earned on the cash proceeds of the initial sale. The Fund could suffer a loss if the contracting party fails to perform the future transaction and the Fund is therefore unable to buy back the mortgage-backed securities it initially sold. Mortgage dollar rolls will be entered into only with high-quality government securities dealers and member banks of the US Federal Reserve System.

Mortgage dollar rolls transactions may (due to the deemed borrowing position involved), increase the Fund's overall investment exposure and result in losses. Mortgage dollar rolls will be considered borrowings for purposes of the Fund's borrowing limitations unless the Fund segregates on its books an offsetting cash position or a position of liquid securities of equivalent value.

Nomineeship risk

The legislative framework in some markets is only beginning to develop the concept of legal/formal ownership and of beneficial ownership or interest in securities. Consequently, the courts in such markets may consider that any nominee or custodian as registered holder of securities would have full ownership thereof and that a beneficial owner may have no rights whatsoever in respect thereof.

Investors' attention is drawn to the fact that any Investor will only be able to fully exercise his Shareholder's rights directly against the Company, if the Investor is registered himself in the Company's Shareholders' register. In cases where an Investor invests in the Company through a Nominee type of intermediary, which invests into the Company in its own name but on behalf of the Investor, it may not always be possible for the Investor to exercise certain Shareholder rights directly against the Company. Investor investing through a Nominee type of intermediary or custodian must notably be aware that in case of discontinuity in the operation of such intermediary or custodian, whether due to insolvency, bankruptcy or other cause, there is a risk of delay in the ability to exercise rights or even loss of rights. Investors are advised to take advice on their rights.

Non-Regulated Markets risk

Some Funds may invest in securities of issuers in countries whose markets do not qualify as regulated markets due to their economic, legal or regulatory structure, and therefore these Funds may not invest more than 10% of their net assets in such securities.

Portfolio Turnover risk

The Investment Manager may sell a security or enter into or close out of a derivative position when it believes it is appropriate to do so, regardless of how long the Fund has held the instrument. These activities increase the Fund's portfolio turnover and may increase the Fund's transaction costs.

Prepayment risk

Debt securities are subject to prepayment risk when the issuer can "call" the security, or repay principal, in whole or in part, prior to the security's maturity. When a Fund reinvests the prepayments of principal it receives, it may receive a rate of interest that is lower than the rate on the existing security, potentially lowering the Fund's income, yield and its distributions to shareholders. Securities subject to prepayment may offer less potential for gains during a declining interest rate environment and have greater price volatility. Prepayment risk is greater in periods of falling interest rates.

Repurchase Transactions risk

The entering by the Company into repurchase transactions involves certain risks and there can be no assurance that the objective sought to be obtained from such use will be achieved.

Investors must notably be aware that (1) in the event of the failure of the counterparty with which cash of a Fund has been placed there is the risk that collateral received may yield less than the cash placed out, whether because of inaccurate pricing of the collateral, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (2) (i) locking cash in transactions of excessive size or duration, (ii) delays in recovering cash placed out, or (iii) difficulty in realising collateral may restrict the ability of the Fund to meet sale requests, security purchases or, more generally, reinvestment; and that (3) repurchase transactions will, as the case may be, further expose a Fund to risks similar to those associated with optional or forward derivative financial instruments, which risks are further described in other sections of the Prospectus.

The counterparties to repurchase agreement transactions must have a minimum credit rating of A- or better, as rated by Standard & Poor's, Moody's or Fitch, at the time of the transactions. The collateral received by the Company in respect of repurchase agreements transactions may be US Treasury bills or US government agency bonds supported by the full faith and credit of the US government. Any incremental income generated from repurchase agreement transactions will be accrued to the relevant Fund.

Russian and Eastern European Markets risk

Securities of issuers in Russia, countries of Eastern Europe as well as the New Independent States such as Ukraine and the countries under the influence of the former Soviet Union in the past involve significant risks and special considerations, which are not typically associated with investing in securities of issuers in the EU Member States and the United States of America. They are additional to the normal risks inherent in any such investments and include political, economic, legal, currency, inflation and taxation risks. For example there is a risk of loss due to lack of adequate systems for transferring, pricing, accounting for and safekeeping or record keeping of securities.

In particular, the Russian market presents a variety of risks in relation to the settlement and safekeeping of securities. These risks result from the fact that physical securities do not exist; as a consequence, the ownership of securities is evidenced only on the issuer's register of shareholders. Each issuer is responsible for the appointment of its own registrar. The result is a broad geographic distribution of several hundred registrars across Russia. Russia's Federal Commission for Securities and Capital Markets (the "Commission") has defined the responsibilities for registrar activities,

including what constitutes evidence of ownership and transfer procedures. However, difficulties enforcing the Commission's regulations mean that the potential for loss or error still remains and there is no guarantee that the registrars will act according to the applicable laws and regulations. Widely accepted industry practices are actually still in the process of being established.

When registration occurs, the registrar produces an extract of the register of shareholders as at that particular point in time. Ownership of Shares is vested in the records of the registrar but is not evidenced by the possession of an extract of the register of shareholders. The extract is only evidence that registration has taken place. However, the extract is not negotiable and has no intrinsic value. In addition, a registrar will typically not accept an extract as evidence of ownership of Shares and is not obliged to notify the Depositary or its local agents in Russia, if or when it amends the register of shareholders. Russian securities are not on physical deposit with the Depositary or its local agents in Russia. Similar risks apply in respect of the Ukrainian market.

Therefore, neither the Depositary nor its local agents in Russia or in Ukraine can be considered as performing a physical safekeeping or custody function in the traditional sense. The registrars are neither agents of, nor responsible to, the Depositary or its local agents in Russia or in Ukraine. The Depositary's liability only extends to its own negligence and wilful default and to that caused by negligence or wilful misconduct of its local agents in Russia or in Ukraine, and does not extend to losses due to the liquidation, bankruptcy, negligence or wilful default of any registrar. In the event of such losses the Company will have to pursue its rights directly against the issuer and/or its appointed registrar.

However, securities traded on the Moscow Exchange MICEX-RTS can be treated as investment in securities dealt on a regulated market.

In April 2013, Russia implemented the new National Settlement Depository ("NSD") as Russia's central securities depository ("CSD") in an effort to overhaul its share registration system. The NSD is regulated by Russia's securities regulator, the Federal Service for Financial Markets ("FSFM"). The Depositary has now confirmed that all Funds' positions of eligible securities were moved to the NSD.

The recent implementation of the NSD as Russia's CSD has alleviated the major concerns which prompted the Russia Custody Letters. All Russian securities transfers and settlements are now required to take place on the CSD system which has specific rules on the finality of these transactions. As a result, all securities transactions are recorded in one central system and not merely in the books of various private registrars.

Securities Lending risk

The entering by the Company into securities lending transactions involves certain risks and there can be no assurance that the objective sought to be obtained from such use will be achieved.

Investors must notably be aware that in case of default, bankruptcy or insolvency of the borrower of securities lent by a Fund, there is a risk of delay in recovery (that may restrict the ability of a Fund to meet delivery obligations under security sales or payment obligations arising from sale requests) or even loss of rights in collateral received, which risks are mitigated by a careful creditworthiness analysis of borrowers to determine their degree of risk for said borrowers to become involved in insolvency/bankruptcy proceedings within the timeframe contemplated by the loan.

A Fund may reinvest the cash collateral received from borrowers. There is a risk that the value or return of the reinvested cash collateral may decline below the amount owed to those borrowers, and those losses may exceed the amount earned by the Fund on lending the securities.

Sovereign Debt risk

Sovereign debt securities are subject to various risks in addition to those relating to debt securities and foreign securities generally, including, but not limited to, the risk that a governmental entity may be unwilling or unable to pay interest and repay principal on its sovereign debt, or otherwise meet its obligations when due because of cash flow problems, insufficient foreign reserves, the relative size of the debt service burden to the economy as a whole, the government's policy towards principal international lenders such as the International Monetary Fund, or the political considerations to which the government may be subject. Sovereign debtors also may be dependent on expected disbursements from other foreign governments or multinational agencies and the country's access to, or balance of, trade. If a sovereign debtor defaults (or threatens to default) on its sovereign debt obligations, the indebtedness may be restructured. Restructuring may include obtaining additional credit to finance outstanding obligations, reduction and rescheduling of payments of interest and principal, or negotiation of new or amended credit and security agreements. Unlike most corporate debt restructurings, the fees and expenses of financial and legal advisers to the creditors in connection with a restructuring may be borne by the holders of the sovereign debt securities instead of the sovereign entity itself. Some sovereign debtors have in the past been able to restructure their debt payments without the approval of some or all debt holders or to declare moratoria on payments, and similar occurrences may happen in the future.

In the event of a default on sovereign debt, a Fund may have limited legal recourse against the defaulting government entity. As a sovereign entity, the issuing government may be immune from lawsuits in the event of its failure or refusal to pay the obligations when due, and any rights a Fund may have may be restricted pursuant to the terms of applicable treaties with such sovereign entity. If a sovereign entity defaults, it may request additional time in which to pay or for further loans. There may be no legal process for collecting sovereign debt that a government does not pay or such legal process may be relatively more expensive, nor are there bankruptcy proceedings by which a Fund may collect in whole or in part on debt issued by a sovereign entity. In certain cases, remedies must be pursued in the courts located in the country of the defaulting sovereign entity itself, which may further limit a Fund's ability to obtain recourse.

Funds may invest in Sovereign Debt issued by governments or government-related entities from countries referred to as Emerging Markets or Frontier Markets, which bear additional risks compared to more developed markets due to such factors as greater political and economic uncertainties, currency fluctuations, repatriation restrictions or capital controls.

Structured Notes risk

Structured notes such as credit-linked notes, equity-linked notes and similar notes involve a counterparty structuring a note whose value is intended to move in line with the underlying security specified in the note. Unlike financial derivative instruments, cash is transferred from the buyer to the seller of the note. Investment in these instruments may cause a loss if the value of the underlying security decreases. There is also a risk that the note issuer will default. Additional risks result from the fact that the documentation of such notes programmes tends to be highly customised. The liquidity of a structured note can be less than that for the underlying security, a regular bond or debt instrument and this may adversely affect either the ability to sell the position or the price at which such a sale is transacted.

Swap Agreements risk

The Company may enter into interest rate, index and currency exchange rate swap agreements for the purposes of attempting to obtain a particular desired return at a lower cost to the Company than if the Company had invested directly in an instrument that yielded that desired return. Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a few days to more than one year. In a standard "swap" transaction, two parties agree to exchange the returns (or differential in rates of return) earned or realised on particular predetermined investments or instruments. The gross returns to be exchanged or "swapped" between the parties are calculated with respect to a "notional amount", i.e. the return on or increase in value of a particular US dollar amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. The "notional amount" of the swap agreement is only a fictive basis on which to calculate the obligations which the parties to a swap agreement have agreed to exchange. The Company's obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount").

Whether the Company's use of swap agreements will be successful in furthering its investment objective will depend on the ability of the Investment Manager to correctly predict whether certain types of investments are likely to produce greater returns than other investments. Because they are two-party contracts and because they may have terms of greater than seven (7) calendar days, swap agreements may be considered to be illiquid. Moreover, the Company bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. The Investment Manager will cause the Company to enter into swap agreements in accordance with the investment restrictions in Appendix B.

Warrants risk

Investments in and holding of warrants may result in increased volatility of the Net Asset Value of certain Funds, which may make use of warrants, and accordingly are accompanied by a higher degree of risk.

Investors should understand that all investments involve risk and there can be no guarantee against loss resulting from an investment in any Fund(s), nor can there be any assurance that the Fund(s) investment objective(s) will be attained. Neither the Company, the Management Company, the Investment Manager, nor any of their worldwide affiliated entities, guarantee the performance or any future return of the Company or any of its Funds.

MANAGEMENT COMPANY

The Board of Directors is responsible for the overall investment policy, objectives and management of the Company and its Funds.

Franklin Templeton International Services S.à r.l. has been authorised by the CSSF to act as an alternative investment fund manager pursuant to the Law of 12 July 2013 and has been designated by the Board of Directors as Management Company to perform investment management, administration and marketing functions as well as activities related to the assets of the Company and to act as domiciliary agent to the Company. The Management Company has delegated the portfolio management services to the Investment Manager. The Management Company and the Investment Manager are members of Franklin Templeton Investments.

The Management Company was incorporated on 17 May 1991 under the laws of the Grand Duchy of Luxembourg and its articles of incorporation are deposited with the *Luxembourg Registre de Commerce et des Sociétés*.

The share capital of the Management Company is EUR 4,042,178.82 and will comply at all times with article 8 of the Law of 12 July 2013.

The Management Company may provide temporary financing or guarantees to/for the AIFs to which it provides services including, in connection with their subscription and redemption activities, maintaining collection accounts, financing contingent deferral sales charges or performing similar activities.

Franklin Templeton International Services S.à r.l. was authorised on 21 November 2013 as a management company managing UCITS and other UCIs and therefore complies with the conditions set out in Chapter 15 of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment, as amended. The corporate object of Franklin Templeton International Services S.à r.l. is to provide investment management, administration and marketing services to undertakings for collective investment.

The Management Company, as the alternative investment fund manager of the Company, is responsible for:

- (i) The investment management function in respect of the Company which includes portfolio management and risk management;
- (ii) The general administration of the Company, including:
 - a. Legal and fund management accounting services;
 - b. Response to customer inquiries;
 - c. Valuation and pricing of the assets of the Company, including tax returns;
 - d. Regulatory compliance monitoring;
 - e. Maintenance of the Shareholder register;
 - f. Distribution of income;
 - g. Issue and redemption of Shares;
 - h. Settlement of contracts, including certificates dispatch;
 - i. Record keeping;
- (iii) Marketing functions;
- (iv) Activities related to the assets of the Company.

As of the date of the Issuing Document, the Management Company has also been appointed to act as management company and/or alternative investment fund manager for other investments funds the list of which is available, upon request, at the registered office of the Company and of the Management Company.

The Management Company shall ensure compliance of the Company with the investment restrictions and oversee the implementation of the Company's strategies and investment policy.

The Management Company will receive periodic reports from the Investment Manager detailing the Funds' performance and analysing their investments. The Management Company will receive similar reports from the other services providers in relation to the services which they provide.

Franklin Templeton International Services S.à r.l. will also act as registrar and transfer, corporate, domiciliary and administrative agent of the Company and will therefore be responsible for processing the purchase, selling and switching of Shares, the maintenance of accounting records and all other administrative functions as required by the laws of the Grand Duchy of Luxembourg.

Professional Liability Risks

The Management Company covers its potential liability risks arising from professional liability by holding the appropriate additional "own funds" (within the meaning of the Law of 12 July 2013).

Risk Management Process and Liquidity Management

The Management Company employs a risk management process which enables it to monitor and measure at any time the risk of the positions of the Company. Furthermore, the Management Company employs a process for accurate and independent assessment of the value of OTC derivative instruments which is communicated to the CSSF on a regular basis in accordance with Luxembourg law.

The Leverage calculation in accordance with the Gross and Commitment Methods are explained in more detail in Appendix B – "Investment Restrictions".

The Management Company maintains a liquidity management process to monitor the liquidity risk of the Funds, which includes, among other tools and methods of measurement, the use of stress tests under both normal and exceptional liquidity conditions.

The liquidity management systems and procedures allow the Management Company to apply various tools and arrangements necessary to ensure that the portfolio of each Fund is sufficiently liquid to normally respond appropriately to redemption requests. In normal circumstances, redemption requests will be processed as set out in this Issuing Document.

Other arrangements may also be used in response to redemption requests, including the temporary suspension or deferral of such redemption requests in certain circumstances or use of similar arrangements which, if activated, will restrict the redemption rights investors benefit from in normal circumstances as set out below under the section "Suspension of Calculation of Net Asset Value" in Appendix D.

Upon request of investors, the Management Company will provide further details regarding the risk management process and liquidity management.

INVESTMENT MANAGER

Franklin Advisers, Inc. has been appointed by the Management Company to act as investment manager to the Funds of the Company as may other affiliated investment advisory companies within Franklin Templeton Investments and to provide portfolio day-to-day management in respect of the investment and re-investment of the net assets of the Funds.

The Investment Manager shall render to the Management Company written reports of the composition of the assets of the Funds under its management as often as the Management Company shall reasonably require.

The Investment Manager and its affiliates serve as advisers for a wide variety of public investment mutual funds and private clients in many nations. Franklin Templeton Investments has been investing globally for over 60 years and provides investment management and advisory services to a worldwide client base, including over 24 million shareholder accounts. The Investment Manager is indirect wholly owned subsidiary of FRI. Through its subsidiaries, FRI is engaged in various aspects of the financial services industry. Details of the value of assets currently managed by Franklin Templeton Investments can be accessed on <http://www.franklintempleton.lu>.

DEPOSITARY

J.P. Morgan Bank Luxembourg S.A. has been appointed as the Company's depositary within the meaning of the Law of 12 July 2013. The Depositary was appointed by an agreement dated 29 June 2016, which may be terminated on 90 days' notice.

J.P. Morgan Bank Luxembourg S.A. was incorporated as a *société anonyme* for an unlimited duration from 16 May 1973 and has its registered office at European Bank & Business Centre, 6, route de Trèves, L-2633 Senningerberg, Grand Duchy of Luxembourg.

J.P. Morgan Bank Luxembourg S.A. performs the custodial and depositary functions in accordance with the Law of 12 July 2013 and the Law of 13 February 2007. The principal duties of the Depositary are as follows:

- a) Safe-keeping of the assets of the Company that can be held in custody (including book entry securities) and record-keeping of assets that cannot be held in custody in which case the Depositary must verify their ownership;
- b) Ensure that the Company's cash flows are properly monitored, and in particular ensure that all payments made by or on behalf of investors upon the subscription of Shares in the Company have been received and that all cash of the Company has been booked in cash accounts that the Depositary can monitor and reconcile;
- c) Ensure that the issue, redemption and cancellation of Shares of the Company are carried out in accordance with applicable laws and the Articles;
- d) Ensure that the value of the Shares of the Company is calculated in accordance with applicable laws, the Articles and the valuation procedures;
- e) Carry out the instructions of the Management Company, unless they conflict with applicable laws or the Articles;
- f) Ensure that in transactions involving the Company's assets any consideration is remitted to the Company within the usual time limits;
- g) Ensure that the Company's income is applied in accordance with applicable laws and the Articles.

In relation to the Depositary's duties regarding custody as referred to in paragraph a), in respect of financial instruments which can be held in custody, the Depositary is liable to the Company or the Shareholders for any loss of such financial instruments held by the Depositary or any delegate, in accordance with the provisions of the Law of 12 July 2013.

The Depositary has not entered into arrangements to contractually discharge itself of liability in accordance with article 19 (13) or 19 (14) of the Law of 12 July 2013.

In relation to all the other Depositary's duties including those referred to in paragraphs a) to g), the Depositary is liable to the Company or the Shareholders for all other losses suffered by it or them as a result of the Depositary's negligent or intentional failure to properly fulfil such obligations.

AUDITOR

The auditor of the Company is PricewaterhouseCoopers, Société Coopérative, 2, Rue Gerhard Mercator, L-2182 Luxembourg, Grand Duchy of Luxembourg.

The auditor shall, with respect to the assets of the Company, carry out the duties provided by the Law of 12 July 2013, including the audit of the accounting information contained in the annual report of the Company.

CONFLICT OF INTEREST

The Management Company maintains and operates organizational, procedural and administrative arrangements and implements policies and procedures designed to manage actual and potential conflicts of interest. It will take all reasonable steps to identify, record and manage conflicts of interest fairly and in accordance with its conflicts of interest policy. It will monitor compliance with its conflict of interest policy on an ongoing basis. It may implement additional controls in respect of the management of conflicts of interest where necessary. Where a conflict of interest cannot be managed and where permissible, the Company may obtain the client's consent to continue with the conflict of interest in place or determine to decline to act for the client.

The Management Company's conflict of interest policy, including any potential material conflicts of interest, can be accessed on the Franklin Templeton Investments Internet site <http://www.franklintempleton.lu>.

SHAREHOLDER'S RIGHTS AGAINST SERVICE PROVIDERS

Shareholders will not have any direct contractual rights against the service providers of the Company appointed from time to time.

APPLICABLE LAW AND JURISDICTION

The Company is incorporated under the laws of the Grand Duchy of Luxembourg.

By applying for Shares when submitting the Company's Application Form, the relevant investor agrees to be bound by the terms and conditions of the Application Form, the Issuing Document and the Articles. This contractual relationship is governed by Luxembourg laws. The Company, the Management Company and Shareholders will be subject to the exclusive jurisdiction of the courts of Luxembourg to settle any dispute or claim arising out of or in connection with a Shareholder's investment in the Company or any related matter.

According to EU Regulation 1215/2012 of 12 December 2012 on jurisdiction and the recognition and enforcement of judgments in civil and commercial matters, a judgement given and enforceable in an EU Member State shall in principle be recognised in the other EU Member States without any special procedure being required and shall generally be enforceable in the other EU Member States on the application of any interested party, save in certain circumstances.

PUBLICATION OF SHARE PRICES

The Net Asset Value per Share of each Fund and Share Class is made public at the registered office of the Company and the Management Company. The Company will arrange for the publication of the Net Asset Value per Share of relevant Funds as required under applicable laws and in such newspapers as the Board of Directors may decide from time to time. This information is also available on the Internet site: <http://www.franklintempleton.lu>. The Company and the Management Company cannot accept any responsibility for any error or delay in publication or for the non-publication of prices.

INVESTOR GENERAL INFORMATION

Prior Considerations

The exclusive objective of the Company is the collective investment of the assets of the Funds in permitted assets with the purpose of spreading investment risks and affording its Shareholders the results of the management of their assets. Investors should give careful consideration to their own personal investment objectives and any local regulatory or tax implications applicable to their circumstances. Investors are recommended to obtain advice from local financial and tax advisors. Further information regarding tax is provided in the sections "Taxation of the Company" and "Taxation of Investors".

Investors should note that the price of Shares in the Company and the income from them may go down as well as up and an Investor may not get back the amount invested. Attention of Investors is more specifically drawn to the fact that investment by the Company may trigger specific risks, as more fully described under section "Risk Considerations".

The Funds are authorised in Luxembourg. The distribution of this Issuing Document and the offering of the Shares may be restricted in certain other jurisdictions. It is the responsibility of any persons wishing to make an application for Shares pursuant to this Issuing Document to inform themselves of, and to observe, all applicable laws and regulations of any relevant jurisdictions.

Issue of Shares

Shares are exclusively reserved to Shareholders qualifying as Eligible Investors.

Shares are made available through the Principal Distributor. The Principal Distributor will, from time to time, enter into contractual agreements with several other sub-distributors, intermediaries, Broker/Dealers and/or professional investors for the distribution of those Shares.

If circumstances so require, the Board of Directors reserves the right at any time, without notice, to discontinue the issue or sale of Shares pursuant to this Issuing Document.

The Company may restrict or prevent the ownership of Shares by any US Person and/or any person, firm or corporate body, if in the opinion of the Company such holding may be detrimental to the Company or its Shareholders, may result in a breach of any applicable law or regulation (whether Luxembourg or foreign) or may expose the Company or its Shareholders to liabilities (to include, *inter alia*, regulatory or tax liabilities and any other tax liabilities that might derive, *inter alia*, from any breach of FATCA requirements) or any other disadvantages that it or they would not have otherwise incurred or been exposed to. Such persons, firms or corporate bodies (including US persons and/or persons in breach of FATCA requirements) are herein referred to as "Prohibited Persons".

For such purposes, the Company may:

- 1) decline to issue any Share and decline to register any transfer of a Share, where it appears to it that such registration or transfer would or might result in beneficial ownership of such Share by a Prohibited Person;
- 2) at any time require any person whose name is entered in, or any person seeking to register the transfer of Shares on, the register of Shareholders to furnish it with any representations and warranties or any information, supported by affidavit, which it may consider necessary for the purpose of determining whether or not, to what extent and under which circumstances, beneficial ownership of such Shareholder's Shares rests or will rest in a Prohibited Person, or whether such registration will result in beneficial ownership of such Shares by a Prohibited Person;
- 3) where it appears to the Company that any Prohibited Person, either alone or in conjunction with any other person, is a beneficial owner of Shares or is in breach of its representations and warranties or fails to make such representations and warranties in a timely manner as the Company may require, may compulsorily redeem from any such Shareholder all or part of the Shares held by such Shareholder in the manner more fully described in the Articles; and
- 4) decline to accept the vote of any Prohibited Person at any meeting of Shareholders.

Form and Currency of Shares

All Shares are issued in registered form. Fractional registered shares will be rounded to three (3) decimal places. Any deal order with a stated Share amount with more than three (3) decimal places will be rounded to three (3) decimal places, using conventional rounding to the nearest thousandths place.

The Company may offer within a Fund several Alternative Currency Share Classes as described in Section "Share Classes".

Some Classes of each Fund may also be held and transferred through accounts maintained with some clearing systems. More detailed information may be obtained from the Management Company upon request.

Dealing Cut-Off Times

Dealing Cut-Off Times are detailed in Appendix A. The Company and/or the Management Company may permit, if it deems it appropriate, different Dealing Cut-Off Times to be agreed with local distributors or for distribution in jurisdictions where the different time zone so justifies. In such circumstances, the applicable Dealing Cut-Off Time applied must always precede the time when the applicable Net Asset Value is calculated and published. Such different Dealing Cut-Off Times shall be disclosed in the agreements in place with the local distributors, or other marketing material used in the jurisdictions concerned.

Calculation of Share Prices/Net Asset Value

The prices at which Shares of the relevant Share Classes can be purchased, sold or switched in each Share Class are calculated on each Valuation Day by reference to the Net Asset Value per Share of the Share Class concerned and are available on the following Business Day.

Details of the calculation of the Net Asset Value are provided in Appendix D. Instructions received in writing by the Management Company in Luxembourg or by a duly authorised distributor, prior to the applicable Dealing Cut-Off Time on any Dealing Day, will be dealt with at the relevant Net Asset Value per Share determined for that Valuation Day.

All deal instructions shall be dealt with on an unknown Net Asset Value basis before the determination of the Net Asset Value per Share for that Valuation Day.

Suspension of dealing and Share Prices/Net Asset Value

The calculation of the Net Asset Value (and consequently purchases, sales and switches) of any Share of any Fund may be suspended by the Company pursuant to the power reserved to it by its Articles and as described in Appendix D. Instructions made or pending during such suspension may be withdrawn by notice in writing received by the Management Company prior to the end of such suspension. Unless withdrawn, instructions will be considered as if received on the first Valuation Day following the end of the suspension.

Fund Liquidations and Fund Mergers

If the net assets of any Fund are at any time below USD 50 million, or the equivalent thereof in the currency of the relevant Fund, the Board of Directors may decide to liquidate such Fund and redeem all outstanding Shares or close down such Fund by contribution of its assets in another undertaking for collective investment. Notice of such liquidation or merger will be sent to the registered Investors. The price at which Shares will be redeemed will be the Net Asset Value per Share of such Fund determined upon realisation of all assets attributable to such Fund. Further details are provided in Appendix C.

Minimum Investment

The minimum initial investment in the Shares of each Fund is USD 20,000,000 for Class I Shares or the equivalent in any other freely exchangeable currency, except for investment made by professional Nominees. Such minimum investment amount may be waived in whole or in part by the Board of Directors or by the Management Company. Existing holders of Shares in any Fund may add to their Holdings in that Fund provided the minimum increase for any purchase is USD 1,000 or the equivalent in any other freely exchangeable currency.

Nominee

Investors may invest through a Nominee type of intermediaries, dealers and/or local paying agents. The Nominee name will appear on the register of Shareholders of the Company and the Nominee may effect purchases, switches and sales of Shares on behalf of the Investors.

The Nominee maintains its own records and provides the Investors with individualised information as to their Holdings. Unless otherwise provided by local law, any Investor investing through a Nominee type of intermediary has the right to claim direct title to the Shares purchased on his/her/its behalf by the Nominee.

For the avoidance of doubt, Investors subscribing through such other parties (or through sub-distributors, intermediaries, broker/dealers and/or professional investors appointed by such other parties) will not be charged additional fees and expenses by the Company.

Third Party Payments

Investors are informed that it is the Company's policy not to make payment to or accept payment from a party other than the registered Shareholder.

Investors should note that if their redemption instruction is accompanied by a request to pay the sale proceeds into a bank account, located in a country other than the Investor's country of residence, the Company and/or the Management Company reserves the right to delay the execution of the transaction or the release of the payment proceeds, until additional information or documentation is received that provides additional investor protection to the satisfaction of the Company and/or the Management Company.

Telephone Recording

The Management Company may use telephone recording procedures to record any conversation. Investors are deemed to consent to the tape-recording of conversations with the Management Company and to the use of such tape recordings by the Management Company and/or the Company in legal proceedings or otherwise at their discretion. In addition, some local Franklin Templeton Investments offices may need to record telephone calls and electronic communications for training, monitoring purposes and/or to confirm Investors' instructions. Recordings will be provided on request (in which case a fee may be charged) for a period of five years from the date of such recording or seven years when specifically required by regulatory authorities.

Investor Portfolio

Investors will be given at least one personal Investor Portfolio Number. Such personal Investor Portfolio Number should be used in all correspondence with the Company or the Management Company. In the event that more than one personal Investor Portfolio Number is attributed to the same Investor, all such personal Investor Portfolio Numbers should be indicated for any request concerning all the Portfolios held by the Investor.

Contract Notes

Following the execution of a transaction, a Contract Note will be dispatched to the Investor normally within fourteen (14) Business Days. Investors should promptly check this Contract Note to ensure that each transaction has been accurately recorded in the relevant Investor Portfolio. In the event of identifying a discrepancy Investors should immediately report such discrepancy in writing to the Management Company or their local Franklin Templeton Investments servicing office. If not so reported within fifteen (15) Business Days from the Contract Note date, the transaction will be deemed correct and the Investor will be bound by the terms of the Contract Note.

Personal Theft

Any correspondence issued by the Company and/or the Management Company is private and confidential. To safeguard Investors' Holdings, in the case of loss or theft of any correspondence with the Company (or of identity documents/passport), Investors should immediately inform their local Franklin Templeton Investments servicing office.

Data Protection

All personal data of Investors ("Data") contained in the application form and all and any further personal data collected in the course of the business relationship with the Company and/or the Management Company may be, subject to applicable local laws and regulations, collected, recorded, stored, adapted, transferred or otherwise processed and used ("processed") by the Company, the

Management Company and other companies of Franklin Templeton Investments, including Franklin Resources, Inc., and/or its subsidiaries and associates, which may be established outside Luxembourg and/or the European Union, including the US and India, the Depositary, the financial intermediary of investors and any other third parties which provide services to them. Such data shall be processed for the purposes of account administration, development of business relationships (including sales and marketing of Franklin Templeton Investments products and services), anti-money laundering and counter-terrorist financing identification, tax identification, where appropriate, under the Automatic Exchange of Financial Account Information or for the purpose of compliance with FATCA, Common Reporting Standard (CRS) or similar laws and regulations (e.g. on OECD level) as well as, to the extent permissible by, and under the conditions set forth in Luxembourg laws and regulations and any other local applicable laws and regulations.

To this end, data may be transferred (i) to companies appointed by the Company or the Management Company (e.g. client communication agents or paying agents) to support the Company related activities and (ii) to third parties such as governmental or regulatory bodies including tax authorities, auditors and accountants in Luxembourg as well as in other jurisdictions.

By subscribing and/or holding Shares of the Company, investors are deemed to be providing their consent to the processing of their Data and in particular, the disclosure of such Data to, and the processing thereof by the parties referred to above including parties situated in countries outside of the European Union (such as but not limited to the US and India) which may not offer a similar level of protection as the one deriving from Luxembourg data protection law.

The Investors have a right of access and of rectification of the personal data in cases where such data is incorrect or incomplete.

The Company and/or the Management Company, for the purpose of FATCA compliance, may be required to disclose personal data relating to US Persons and/or non-participant FFIs to the Luxembourg tax authorities which may transfer them to the Internal Revenue Service in the US.

Data shall not be held for longer than necessary with regard to the purpose of the data processing, subject always to applicable legal minimum retention periods.

Anti-Money Laundering and Counter-Terrorist Financing Legislation

Pursuant to the Luxembourg law of April 5, 1993 relating to the financial sector (as amended), the Luxembourg law of 12 November 2004 relating to money laundering and counter terrorist financing (as amended), the law of 27 October 2010 enhancing the anti-money laundering and counter-terrorist financing legal framework, and the CSSF Regulation No. 12-02 of 14 December 2012 implementing a legally binding reinforcement of the regulatory framework, as well as to the circulars of the Luxembourg supervisory authority (notably the CSSF circulars 13/556, 11/529, 11/528, 10/486 and 10/484), obligations have been imposed on the Company to take measures to prevent the use of investment funds for money laundering and terrorist financing purposes.

Accordingly, the Management Company has established a procedure to identify all the Company's Investors. To meet the Management Company's requirements Investors should submit necessary identification documents together with the application form. For private individuals this will be a passport or identity card copy duly certified to be a true copy by an authorized body in their resident country. Legal entities will be required to produce documents such as proof of regulation, membership to a recognized stock exchange, or company articles of incorporation/by-laws or other constitutive documents as applicable. The Management Company is also obliged to identify any beneficial owners of the investment. The requirements apply to both direct purchases to the Company and indirect purchases received from an intermediary.

The Company and the Management Company reserve the right to ask at any time for additional information and documentation, such as source of funds and origin of wealth, as may be required in higher risk scenarios or to comply with any applicable laws and regulations. In case of delay or failure to provide such information and/or documentation, the Management Company may delay or reject the processing of purchase or sale instructions, or any other transaction. The Management Company may also delay or suspend the payment of dividends until relevant and satisfactory information and/or documentation is received. Neither the Company nor the Management Company have any liability for delays or failure to process deals as a result of the Investor providing no or only incomplete information and/or documentation.

Such information provided to the Management Company is collected and processed for anti-money laundering and counter-terrorist financing compliance purposes.

Trading Policy

Market timing/short term trading generally. The Company discourages short-term or excessive trading, often referred to as "market timing", and intends to seek to restrict or reject such trading or take other action, as described below, if in the judgment of the Company or Management Company such trading may interfere with the efficient management of the portfolio of any Fund, may materially increase the Fund's transaction costs, administrative costs or taxes, or may otherwise be detrimental to the interests of the Company and its Shareholders.

Market timing consequences. If information regarding an Investor's activity in the Company or in any other Franklin Templeton investment funds or non-Franklin Templeton investment funds is brought to the attention of the Company or the Management Company and based on that information the Company or Management Company or their agents in their sole discretion conclude that such trading may be detrimental to the Company as described in this Market Timing Trading policy, the Company may temporarily or permanently bar an Investor's future purchases into the Company or, alternatively, may limit the amount, number or frequency of any future purchases and/or the method by which a Shareholder may request future purchases and sales (including purchases and/or sales by a switch or transfer between the Company and any other Franklin Templeton investment funds).

In considering an Investor's trading activity, the Management Company may consider, among other factors, the Investor's trading history both directly and, if known, through financial intermediaries, in the Company, in other Franklin Templeton investment funds, in non-Franklin Templeton investment funds, or in accounts under common control or ownership.

Market timing through financial intermediaries. Investors are subject to this policy whether they are a direct Shareholder of the Fund or are investing indirectly in the Company through a financial intermediary such as a bank, an insurance company, an investment advisor, or any other Distributor that acts as Nominee for Investors subscribing the Shares in their own name but on behalf of its customers (the Shares being held in an "omnibus holding").

While the Management Company will encourage financial intermediaries to apply the Company's Market Timing Trading policy to their customers who invest indirectly in the Company, the Management Company is limited in its ability to monitor the trading activity or enforce its Market Timing Trading policy with respect to customers of financial intermediaries. For example, should it occur, the Management Company may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, switches and sales on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Company's Market Timing Trading policy to their customers through such methods as implementing short-term trading limitations or restrictions, monitoring trading activity for what might be market timing, the Management Company may not be able to determine whether trading by customers of financial intermediaries is contrary to the Company's Market Timing Trading policy.

Risks from market timers. Depending on various factors, including the size of the Fund, the amount of assets the Investment Manager(s) typically maintains in cash or cash equivalents and the US Dollar amount and number and frequency of trades, short-term or excessive trading may interfere with the efficient management of the Fund's portfolio, increase the Fund's transaction costs, administrative costs and taxes and/or impact Fund performance.

In addition, if the nature of the Fund's portfolio holdings expose the Fund to Investors who engage in the type of Market Timing Trading that seeks to take advantage of possible delays between the change in the value of a Fund's portfolio holdings and the reflection of the change in the Net Asset Value of the Fund's Shares, sometimes referred to as "arbitrage market timing", there is the possibility that such trading, under certain circumstances, may dilute the value of Fund Shares if selling Investors receive proceeds (and buying Investors receive Shares) based upon Net Asset Value which do not reflect appropriate fair value prices. Arbitrage market timers may seek to exploit possible delays between the change in the value of a Fund's portfolio holdings and the Net Asset Value of the Fund's Shares in Funds that hold significant investments in foreign securities because certain foreign markets close several hours ahead of the US markets, and in Funds that hold significant investments in small-cap securities, high-yield ("junk") bonds and other types of investments which may not be frequently traded.

The Company and the Management Company are currently using several methods to reduce the risk of market timing. These methods include:

- reviewing Investor activity for excessive trading, and
- committing staff to selectively review on a continuing basis recent trading activity in order to identify trading activity that may be contrary to this Market Timing Trading policy.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Management Company seeks to make judgments and applications that are consistent with the interests of the Company's Investors. There is no assurance that the Management Company or its agents will gain access to any or all information necessary to detect market timing in

omnibus holdings. While the Management Company will seek to take actions (directly and with the assistance of financial intermediaries) that will detect market timing, the Management Company cannot represent that such trading activity can be completely eliminated.

Revocation of market timing trades. Transactions placed in violation of the Company's Market Timing Trading policy are not necessarily deemed accepted by the Company and may be cancelled or revoked by the Company or the Management Company on the Valuation Days following receipt by the Management Company.

Contact Details

Contact details for the Management Company can be found in the section "administrative information", on the application form, a Contract Note or the Franklin Templeton Investments Internet site <http://www.franklintempleton.lu>.

SHARE CLASSES

Share Classes Available

The following Share Classes are or will be issued upon a decision of the Board of Directors:

Class I	Class X	Class Y
Class I acc	Class X acc	Class Y acc
Class I Mdis	Class X Mdis	Class Y Mdis
Class I Qdis	Class X Qdis	Class Y Qdis
Class I Bdis	Class X Bdis	Class Y Bdis
Class I Ydis	Class X Ydis	Class Y Ydis

Unless otherwise stated in the Issuing Document, the same terms and conditions apply to the different types of Shares i.e. accumulation (acc), monthly distribution (Mdis), quarterly distribution (Qdis), bi-annually distribution (Bdis) and yearly distribution (Ydis), of the same Share Class.

The difference in the various Share Classes relates to the fee structure and/or the dividend policy applicable to each of them. Shares can be either Distribution or Accumulation Shares. The Board of Directors intends to distribute all of the income attributable to the Distribution Shares. No distribution of dividends shall be made for the Accumulation Shares, however the income attributable will be reflected in the increased Net Asset Value of the Shares. Dividends may be paid monthly, quarterly, bi-annually or annually. Further details are provided in the following sections, as well as in the "Dividend Policy" section.

The purchase proceeds of the various Share Classes of a Fund are invested in one common underlying portfolio of investments but the Net Asset Value of each Share Class will be different as a result of differences in the issue price, fee structure and dividend policy.

Class I Shares are only offered to Institutional Investors as defined from time to time by the guidelines or recommendations of the competent Luxembourg financial supervisory authority (please refer below for the list of qualifying Institutional Investors).

Class X Shares may only be offered to Institutional Investors as defined from time to time by the guidelines or recommendations of the competent Luxembourg financial supervisory authority (please

refer below for the list of qualifying Institutional Investors), in certain limited circumstances, at the discretion of the Management Company or the Investment Manager and its affiliates.

Class X Shares are, inter alia, designed to accommodate an alternative charging structure whereby a fee covering the investment management fees, as contemplated into section "Investment Management Fees", is levied and collected by the Management Company directly from the Investors who are clients of Franklin Templeton Investments and who enter into a specific agreement with the Management Company. These fees will therefore not be payable out of the net assets of the relevant Fund attributable to Class X Shares.

Class X Shares will however bear their pro-rata share of any other applicable expenses such as registrar, transfer, corporate, domiciliary, administration, custodian, audit and regulatory fees and charges as well as any applicable taxes and other charges and expenses as further described in sections "Management Company Remuneration" and "Other Company Charges and Expenses".

Class Y Shares may only be offered to Institutional Investors as defined from time to time by the guidelines or recommendations of the competent Luxembourg financial supervisory authority (please refer below for the list of qualifying Institutional Investors), in certain limited circumstances, at the discretion of the Management Company and/or its affiliates.

Class Y Shares are, inter alia, designed to accommodate an alternative charging structure whereby a fee covering the investment management and the registrar, transfer, corporate, domiciliary and administration fees, as contemplated into sections "Management Company Remuneration" and "Investment Management Fees", is levied and collected by the Management Company directly from the Investors who are clients of Franklin Templeton Investments and who enter into a specific agreement with the Management Company. These fees will therefore not be payable out of the net assets of the relevant Fund attributable to Class Y Shares.

Class Y Shares will however bear their pro-rata share of any other applicable expenses such as custodian, audit and regulatory fees and charges as well as any applicable taxes and other charges and expenses as further described in section "Other Company Charges and Expenses".

Additional Share Classes could be offered at a later stage by decision of the Board of Directors, in which case this Issuing Document will be updated accordingly.

The Company and the Management Company will not issue, execute a switch of or transfer Shares to any Investor who is not an Eligible Investor or deemed not to meet the above eligibility requirements. If it is identified at any time that a holder of one or several of the above Share Classes does not qualify, or no longer qualifies, the Management Company or the Company will instruct the Investor to switch such Shares into an eligible Share Class. If a switch is not executed, the Company or the Management Company will redeem and/or switch said Shares in accordance with the conditions and procedures set forth in the Articles.

A complete list of available Shares Classes may be obtained at the registered office of the Company and of the Management Company.

List of Eligible Investors

Institutional Investors

- Institutional investors *stricto sensu*, such as banks and other regulated professionals of the financial sector, insurance and reinsurance companies, social security institutions and pension funds, charitable institutions, industrial, commercial and financial group companies, all subscribing on their own behalf, and the structures which such Institutional Investors put into place for the management of their own assets.
- Credit institutions and other regulated professionals of the financial sector investing in their own name but on behalf of Institutional Investors as defined above.
- Credit institutions and other regulated professionals of the financial sector investing in their own name but on behalf of Professional Investors as defined below.
- Credit institutions and other regulated professionals of the financial sector established in Luxembourg or abroad which invest in their own name but on behalf of their non institutional clients on the basis of a discretionary management mandate.
- Collective investment undertakings established in Luxembourg or abroad.
- Holding companies or similar entities, whether Luxembourg-based or not, whose shareholders are Institutional Investors as described in the foregoing paragraphs.
- Holding companies or similar entities, whether Luxembourg-based or not, whose shareholder(s)/ beneficial owner(s) is/are individual person(s) which is/are extremely wealthy and may reasonably be regarded as sophisticated investor(s) and where the purpose of the holding company is to hold important financial interests/investments for an individual or a family.
- A holding company or similar entity, whether Luxembourg based or not, which as a result of its structure and activity has a true substance and holds important financial interests / investments.

Professional Investors

- Management companies of collective investment undertakings.
- Management companies of pension funds.
- Entities which are required to be authorised or regulated to operate in the financial markets.
- Large undertakings meeting two of the following size requirements on a company basis:
 - balance sheet total: 20 million euros;
 - net turnover: 40 million euros;
 - equity: 2 million euros.
- National and regional governments, public bodies that manage public debt, central banks, international and supranational institutions.
- Other institutional investors whose main activity is to invest in financial instruments, including entities dedicated to the securitisation of assets or other financing transactions.

Experienced Investors

An investor that qualify neither as Institutional Investors nor as Professional Investors and that:

- hereby adheres to the status of well-informed investor within the meaning of article 2 of the SIF Law and confirm that he/she/it has the relevant expertise, experience and knowledge to adequately appraise an investment in the Company; and
- (i) invests a minimum of the USD equivalent of EUR 125,000 in the Company, or

(ii) he/she/it has been the subject of an assessment made by a credit institution within the meaning of Directive 2006/48/EC, by an investment firm within the meaning of Directive 2004/39/EC or by a management company within the meaning of Directive 2009/65/EC certifying his/her/its expertise, his/her/its experience and his/her/its knowledge in adequately appraising an investment in the specialised investment fund.

Alternative Currency Classes

Share Classes may be offered in the following currencies:

- Australian Dollar (AUD)
- Canadian Dollar (CAD)
- Czech Koruna (CZK)
- Euro (EUR)
- Hong Kong Dollar (HKD)
- Hungarian Forint (HUF)
- Japanese Yen (JPY)
- Norwegian Krone (NOK)
- Polish Zloty (PLN)
- Renminbi (RMB)
- Singapore Dollar (SGD)
- Swedish Krona (SEK)
- Swiss Franc (CHF)
- US Dollar (USD)
- UK Sterling (GBP)

or any other freely convertible currency.

The Net Asset Value of Alternative Currency Share Classes will be calculated and published in the alternative currency and purchase payments for such Share Classes are to be paid by the Investors, and sale proceeds are paid to selling Investors, in such alternative currency. The Company does not currently intend to hedge the currency risks to which these Share Classes are exposed, except for Hedged Share Classes.

The terms and conditions applicable to the Share Classes available in alternative currency are the same as those which apply for the same Share Classes offered in the base currency.

The Board of Directors may decide to offer an Alternative Currency Share Class in another currency than those mentioned above in which case the Issuing Document will be updated.

Hedged Share Classes

The Board of Directors may, in respect of each Fund, decide to issue Hedged Share Classes where the base currency exposure of the Hedged Share Class may be hedged into the Fund Hedged Share Class' alternative currency to reduce exchange rate fluctuations and to reduce return fluctuations.

The terms and conditions applicable to the Hedged Share Classes are the same as those which apply for the same Share Classes offered in the base currency, the only difference being the hedging of the Hedged Share Class into the base currency of the Fund.

Entry Charge

Class I, X and Y Shares

The price at which Class I, X and Y Shares will be offered is the Net Asset Value per Share. Purchases of Class I, X and Y Shares are not subject to an entry charge.

HOW TO PURCHASE SHARES

How to Apply

Prospective Investors should complete an application form and send it together with applicable identification documents (as detailed in the application form) to the Management Company in order to purchase Shares for the first time. Applications may also be accepted by telephone, facsimile, or electronic request if expressly allowed by the Management Company. The Management Company may request the original signed application form and identification documentation to be mailed, in which case it may delay the processing of the application form until their receipt. Applications will be accepted at the discretion of the Board of Directors or the Management Company.

Processing of all application forms received by a relevant Distributor will only commence once they have been forwarded to the Management Company or to a Distributor duly authorised in writing.

In addition, Investors should provide the documentation required for anti-money laundering and terrorist financing purposes and as more fully described in the section "Anti-Money Laundering and Counter-Terrorist Financing Legislation".

By applying for Class I, X and/or Y Shares, Investors represent to the Company and the Management Company that they qualify as one or more of the types of Institutional Investor(s) as listed in section "Share Classes" and undertake to indemnify the Company, the Management Company and/or any other entity of Franklin Templeton Investments against any and all damages, losses, costs or other expenses they may incur as a result of acting in good faith of such a representation.

Each Investor will be given a personal Investor Portfolio Number which should be quoted, along with any relevant transaction references where applicable, whenever contacting the Company and/or the Management Company.

Instructions to Purchase

Initial purchase instruction for Shares should be made on the standard application form. For subsequent purchase in an existing Investor Portfolio, no further application form is required. However, private individual Investors instructing Franklin Templeton Investments directly without using Brokers/Dealers are required to complete and sign a standard purchase form (available from our website or upon request). Any subsequent instruction to purchase Shares may be made by telephone, facsimile or electronic request, if expressly allowed by the Management Company. The Management Company may request a written and duly signed confirmation of the subsequent purchase instructions which may result in delay in the processing of the investment until receipt of the requested written confirmation. Subsequent purchase instructions will be accepted at the discretion of the Board of Directors or the Management Company.

Subsequent purchase instructions should be duly signed and:

- (a) state the name of the Fund(s), the Share Class, the Share Class ISIN code (available on the

Franklin Templeton Investments Internet site <http://www.franklintempleton.lu>) and number of Shares applied for in the Fund(s) (the number of Shares should be stated both in numbers and in words) or the amount (in numbers and in words) to be invested (which should include provision for any applicable entry charge); and

(b) state how payment has been or will be made.

If there is any discrepancy between the name of the Fund(s), the Share Class, the Share Class ISIN code or the currency of the Fund(s) Share Class quoted in the instruction, the order will be executed on the basis of the ISIN code quoted.

If any purchase instruction is not accepted in whole or in part, the purchase monies will be returned to the Investor at the risk and cost of the Investor.

An Investor may not withdraw his request for purchase except in the event of a suspension of the valuation of the assets of the Company (see Appendix D) and, in such event, a withdrawal of a purchase instruction will be effective only if written notification is received by the Management Company before termination of the period of suspension. Purchase monies will be returned to the Investor in such circumstances.

Neither the Company nor the Management Company shall be responsible or liable to any applicant or Investor for any loss resulting from the non-receipt of any application form or purchase instruction by whichever method it is sent (including non-receipt of facsimile application forms).

Purchase Price

At launch date, Shares of the Fund will be offered at USD10, or currency equivalent (plus any applicable initial charge) of the total amount invested. From launch date onwards and for purchase instructions received and accepted by the Management Company for any Dealing Day before the applicable Dealing Cut-Off Time (as described in Appendix A), Shares will be issued at the relevant Net Asset Value per Share determined on this Dealing Day (plus any applicable entry charges). Purchase monies may be required to be received by the Management Company or the relevant Distributor in cleared funds prior to processing of the instruction. In such case, the instruction will be processed on the basis of the Net Asset Value per Share determined on the Valuation Day when such funds are received by the Management Company (plus any applicable entry charge).

A complete instruction for the purchase of Shares received and accepted by the Management Company or by a duly authorised Distributor on a Dealing Day after the applicable Dealing Cut-Off Time will be dealt with on the basis of the Net Asset Value per Share of the relevant Share Class determined on the next Valuation Day (plus any applicable entry charge).

The Net Asset Value per Share will be calculated as detailed in the section "Calculation of the Net Asset Value" in Appendix D.

The Company and/or the Management Company will inform the registered Shareholder of the price at which the Shares have been issued on their Contract Note (refer to "Contract Note" section).

How to Pay

The Company and the Management Company do not accept payments in cash, traveller's cheques or non-bank money orders. Payments should normally be made by electronic bank transfer to the bank

account set forth by the Principal Distributor (as detailed in the application form). Payments can be made in the currency of the Share Class. However, an Investor may, in certain instances as permitted by the Management Company, provide for payment in any other freely exchangeable currency, in which case, the necessary foreign exchange transaction will be arranged on behalf of, and at the expense of, the Investor. Investors are advised that payments made in any other freely exchangeable currency may be delayed until the next Valuation Day to allow for currency conversion.

The Board of Directors is authorised to accept purchase of Shares in whole or in part in specie, having due regard to the requirements prescribed by the laws of the Grand Duchy of Luxembourg. In the event the Investor is unable to provide clear title on the assets the Company has the right to bring an action against the defaulting Investor.

The allotment of Shares is conditional upon receipt of purchase monies, including any applicable entry charge, which must be paid within three (3) Business Days of the Valuation Day unless the Board of Directors requires cleared funds on or prior to an application being accepted. Shares which remain unsettled for a period of thirty (30) days may be cancelled. In such circumstances, the Company and the Management Company have the right to bring an action against the defaulting Investor to obtain compensation for any loss directly or indirectly resulting from the failure by the Investor to make good settlement by the settlement date.

Where payments are made by electronic transfer or bank wire, the Management Company shall not be responsible for reconciling remittances of purchase monies where problems occur in the transmission, or as a result of inadequate or incorrect details on the transfer instructions. Bank charges in connection with an electronic transfer may be deducted from the proceeds of the transfer by the remitting bank, correspondents, agents or sub-agents, and the receiving bank may also deduct bank charges from such remittance.

HOW TO SELL SHARES

Instructions to Sell

Shares of any Class in any Fund can be sold on any Dealing Day. Instructions to sell Shares should be submitted to the Management Company in writing or, if expressly permitted, by telephone, facsimile or electronic means. In the event of joint Investor Portfolios all instructions must be signed by all Investors except where sole signatory authority has been granted or where a power of attorney has been communicated to the Management Company. If an instruction has not been submitted in writing, the Management Company may request a written and duly signed confirmation of such instruction, in which case it may delay the processing of the instruction until receipt of the written and duly signed confirmation.

Where a certificate has been issued in the name(s) of the Shareholder(s), the Board of Directors may require that such Share certificate, duly endorsed, be returned to the Management Company prior to the transaction being effectuated at any applicable Net Asset Value and therefore prior to payment being made.

The instruction must contain details of the personal Investor Portfolio Number, the Fund name, the Share Class(es) including ISIN code (available on the Franklin Templeton Investments Internet site <http://www.franklintempleton.lu>), the number/value of Shares to be sold, the settlement currency and the bank details. If there is any discrepancy between the name of the Fund(s), the Share Class, the Share Class ISIN code or the currency of the Share Class quoted in the instruction, the instruction will

be executed on the basis of the ISIN code quoted.

Any instruction to sell Shares may not be executed until any previous transaction involving the Shares to be sold has been completed and settled.

If the instruction would result in a Holding balance being less than USD2,500 (or currency equivalent), the Company may redeem such Holding balance and pay the proceeds to the Investor.

The Company and the Management Company reserve the right not to be bound to accept the sale or switch on any Valuation Day more than 10% of the value of the Shares of any Fund. In these circumstances the sale of the Shares may be deferred for a period not exceeding ten (10) Business Days after the next Valuation Day and will be valued at the Net Asset Value per Share prevailing on that Dealing Day being deferred to. On such Dealing Day, deferred requests will be dealt with in priority to later requests and in the order that requests were initially received by the Management Company.

Neither the Company nor the Management Company shall be responsible or liable to any Investor for any loss resulting from the non-receipt of any instruction to sell, by whichever method it is sent.

An Investor may not withdraw an instruction to sell Shares except in the event of a suspension of the valuation of the assets of the Company (see Appendix D) and, in such event, a withdrawal of the instruction to sell will be effective only if written notification is received by the Management Company before termination of the period of suspension. If the instruction is not so withdrawn, the sale of the Shares will be made on the next Valuation Day following the end of the suspension.

Sale Price

A complete instruction to sell received and accepted by the Management Company or by a duly authorised Distributor on any Dealing Day before the applicable Dealing Cut-Off Time (as described in Appendix A) will be dealt with on the basis of the Net Asset Value per Share of the relevant Share Class determined on this Dealing Day.

A complete instruction to sell received and accepted by the Management Company or by a duly authorised Distributor on a Dealing Day after the applicable Dealing Cut-Off Time (as described in Appendix A) will be dealt with on the basis of the Net Asset Value per Share of the relevant Share Class determined on the next Valuation Day.

The Net Asset Value per Share will be calculated on the basis detailed in the section "Calculation of the Net Asset Value" in Appendix D.

Payment of Sale Proceeds

Payment for Shares sold will be made within three (3) Business Days after the instruction to sell has been received in good order and accepted by the Management Company and will normally be made in the Share Class currency by electronic bank transfer of funds unless otherwise instructed. Payment may also be made in any freely exchangeable currency if requested within the instruction, at the cost and risk of the Investor.

If, in exceptional circumstances as described in Appendix D, the liquidity of the Fund does not permit payment of sale proceeds within three (3) Business Days from the relevant Valuation Day, the sale proceeds will be paid as soon as reasonably practicable but without interest.

The Board of Directors are also authorised to extend the period for payment of sale proceeds to such period, not exceeding thirty (30) Business Days (shorter periods may however apply in some jurisdictions), as may be required by settlement and other constraints prevailing in the financial markets of countries in which a substantial part of the assets attributable to any Fund shall be invested, and this exclusively with respect to those Funds of the Company of which the investment objectives and policies provide for investments in equity securities of issuers in developing countries.

All payments are made at the Investor's risk with no responsibility on the part of the Distributors, the Investment Manager, the Management Company and/or the Company.

Investors are informed that it is the Company's policy not (i) to make payment to or accept payment from a party other than the registered Shareholder and (ii) to release payments to a bank account in a country other than the investor's residency.

Sale in Specie

With the prior consent of the Investor(s) concerned, and having due regard to the principle of equal treatment of Shareholders, the Board of Directors and/or the Management Company may satisfy the payment of sale proceeds in whole or in part in specie by allocating to the selling Investor(s) portfolio securities of the relevant Fund equal in value to the Net Asset Value of the Shares being sold. In this case, a valuation report will be obtained from the Company's auditor and any cost incurred in connection with a sale in specie shall be borne by the relevant Shareholder or a third party.

HOW TO SWITCH SHARES

A switch is a transaction to convert an Investor's Holding in a Share Class into another Share Class within the same Fund or the same Share Class or another Share Class in different Funds. The transaction is executed by selling Shares in the original Share Class followed by purchasing Shares in the new Share Class provided that the Investor's Holding meets the minimum investment requirements for both the existing and the new Fund or Share Class.

Investors may, under certain circumstances, switch Shares of the Company into shares or units of certain other investment funds of Franklin Templeton Investments having a similar sales charge structure. Information on the investment funds into which Shares may be switched, and details of the procedure, terms and conditions for switch may be obtained from the Management Company upon request.

Class I Shares

Without prejudice to specific Share Class restrictions provided for in this section, Class I Shares can be switched with Shares in any other Fund or Share Class. Only Institutional Investors can switch their Shares into Class I Shares.

Class X Shares

Without prejudice to specific Share Class restrictions provided for in this section, Class X Shares can be switched with Shares in any other Fund or Share Classes subject to meeting Investor qualification criteria for that Share Class. Only Institutional Investors can switch their Shares into Class X Shares, subject to the conditions laid down in section "Share Classes".

Class Y Shares

Without prejudice to specific Share Class restrictions provided for in this section, Class Y Shares can be switched with Shares in any other Fund or Share Classes subject to meeting Investor qualification criteria for that Share Class. Only Institutional Investors can switch their Shares into Class Y Shares, subject to the conditions laid down in section "Share Classes".

Instructions to Switch

An instruction to switch Shares should be submitted to the Management Company in writing or, if expressly permitted, by telephone, facsimile or electronic means. In the event of joint Investor Portfolios all instructions must be signed by all Investors, except where sole signatory authority has been granted or where a power of attorney has been communicated to the Management Company. If an instruction is not submitted in writing, the Management Company may request a written and duly signed confirmation of such instruction in which case it may delay the processing of the instruction until receipt of the written and duly signed confirmation.

No application form is required for Switching Shares. However, private individual Investors instructing Franklin Templeton Investments directly without using Brokers/Dealers will need to complete and sign a standard switch form (available from our website or upon request).

The instruction must contain details of the personal Investor Portfolio Number and the number/value of Shares to be switched between named Funds and Share Classes including the ISIN codes (available on the Franklin Templeton Investments Internet site <http://www.franklintempleton.lu>). If there is any discrepancy between the name of the Fund(s), the Share Class, the Share Class ISIN code or the currency of the Share Class quoted in the instruction, the instruction will be executed on the basis of the ISIN code quoted. Investors may switch Shares on any Dealing Day.

The minimum initial investment in any Fund is disclosed in section "Minimum Investment". Any instruction which would result in a Holding balance being less than the minimum initial investment (or currency equivalent) may not be executed.

Any instruction to switch Shares may not be executed until any previous transaction involving the Shares to be switched has been completed and settled. Where the sale is settled prior to the purchase, the sale proceeds will remain in the Company's collection bank account pending settlement of the purchase. No interest will accrue to the benefit of the Investor.

Any instruction to switch Shares between Funds denominated in differing currencies will be executed on the same Valuation Day. However, in exceptional circumstances, the Company or the Management Company may, at their own discretion, require one (1) additional Business Day in order to process the switch transactions. The Company reserves the right not to be bound to switch on any Valuation Day more than 10% of the value of the Shares of any Fund. In these circumstances the switch may be deferred for a period not exceeding ten (10) Business Days after the next Valuation Day. These instructions to switch will be executed in priority to later instructions.

In certain limited circumstances as well as for distributions in certain countries and/or through certain sub-distributors and/or professional investors, the Company or the Management Company may require one (1) additional Business Day in order to process switch transactions. The additional day may be required for operational reasons and requires to be calculated and factored into the calculation of the number of Shares that the Investor will become entitled to in the new Fund or where currency conversion is required.

An Investor may not withdraw an instruction to switch Shares except in the event of a suspension of the valuation of the assets of the Company (see Appendix D) and, in such event, a withdrawal of the instruction to switch will be effective only if written notification is received by the Management Company before termination of the period of suspension. If the instruction is not so withdrawn, the switch of the Shares will be made on the next Valuation Day following the end of the suspension.

Switch Price

A complete switch instruction received and accepted by the Management Company or by a duly authorised Distributor on any Dealing Day before the applicable Dealing Cut-Off Time (as described in Appendix A), will be dealt with on the basis of the Net Asset Value per Share of the relevant Share Class determined on this Dealing Day.

A complete switch instruction received and accepted by the Management Company or by a duly authorised Distributor on a Dealing Day after the applicable Dealing Cut-Off Time, will be dealt with on the basis of the Net Asset Value per Share of the relevant Share Class determined on the next Valuation Day.

The number of Shares issued will be based upon the respective Net Asset Value of the Shares of the two relevant Funds or Share Classes on the relevant Valuation Day(s).

Switch Fees and Charges

A switch charge of up to 1.00% of the value of the Shares to be switched may be applied for distribution in certain countries and/or through certain Distributors and/or professional investors. Such charge shall be automatically deducted when the number of Shares is calculated and paid by the Company.

In certain circumstances a switch from any one Fund or Share Class will necessitate a fee equivalent to the difference between the two levels of entry charges unless the Investor, as a result of prior switches, has already paid the entry charge rate differential.

It is currently anticipated that any switch charge or entry charge rate differential will be paid to the Principal Distributor, who may, in turn, pay a portion of each differential to Distributors, intermediaries, Broker/Dealers and/or professional investor. However, the entry charge rate differential may be waived at the discretion of the Company and/or the Management Company.

HOW TO TRANSFER SHARES

A transfer is a transaction for the purpose of transferring an Investor Holdings to another Investor.

The transfer of Shares shall be effected by delivery to the Management Company of an instruction of transfer or a duly signed Share transfer form together with, if issued, the relevant Share certificate to be cancelled. The instruction must be dated and signed by the transferor(s), and if requested by the Company and/or the Management Company also signed by the transferee(s), or by persons holding suitable powers of attorney to act therefore.

Acceptance of the transfer by the Management Company will be subject to the transferee(s) having an accepted application by the Company, and meeting all Fund and Share Class eligibility requirements.

Any request to transfer Shares will only be executed once any previous transaction involving the Shares to be transferred has been completed and full settlement on those Shares received.

If the transfer instruction would result in a Holding balance being less than USD2,500 (or currency equivalent) the Company and/or the Management Company may redeem such Holding balance and pay the proceeds to the Investor.

The Shares of the Company are only transferable between Eligible Investors, with the exception that Shares may not be transferred to a Prohibited Person. The Articles provide that the Board of Directors is entitled to impose restrictions as they may think necessary for the purposes of ensuring that no Shares are acquired or held by (a) any person in violation of or subject to the applicable laws or regulations of any country or government authority or (b) any person in circumstances which, in the opinion of the Board of Directors, might result in the Company incurring any liability of taxation or suffering any other disadvantage which the Company might not otherwise have incurred.

The Shares transferred may be subject to specific conditions. Investors should ensure that they are aware of all specific conditions applicable to such Shares.

DIVIDEND POLICY

In respect of all Funds which issue Distribution Shares, it is the intention of the Board of Directors to distribute substantially all of the income attributable to the Distribution Shares. Subject to any legal or regulatory requirements, dividends may also be paid out of the capital of such Funds. Subject to any legal or regulatory requirements, the Board of Directors reserves the right to introduce new Share Classes, which may retain and re-invest their net income.

Annual dividends may be declared separately in respect of each Fund at the Annual General Meeting of Shareholders.

Interim Share dividends may be paid upon a decision of the Board of Directors and of the Management Company in relation to any of the Funds.

It is anticipated that distributions will be made under normal circumstances as set out in the table below:

Share type	Share name	Payments
Accumulation Shares	I (acc) X (acc) Y (acc)	No distribution of dividends shall be made but the net income attributable will be reflected in the increased value of the Shares
Distribution Shares	I (Mdis) X (Mdis) Y (Mdis)	Under normal circumstances it is anticipated that distribution will be made monthly (following the end of each month)
	I (Qdis) X (Qdis) Y (Qdis)	Under normal circumstances it is anticipated that distribution will be made quarterly (following the end of each fund financial quarter)
	I (Bdis) X (Bdis) Y (Bdis)	Under normal circumstances it is anticipated that distribution will be made bi-annually (normally in April and October each year)

	I (Ydis) X (Ydis) Y (Ydis)	Under normal circumstances it is anticipated that distribution will be made yearly (normally in April each year)
--	----------------------------------	--

In order to receive dividends on Distribution Shares, Investors must be registered as holders of such Distribution Shares on the register of Shareholders on the Valuation Day determined by the Company as being the distribution accounting date.

Dividends of registered Distribution Shares will normally be reinvested in the purchase of further Distribution Shares of the Fund and Share Class to which such dividends relate, unless otherwise stated in the application form. Such further Distribution Shares will be issued on the ex-dividend date. The price will be calculated in the same way as for other issues of Shares of that Fund on the Valuation Day on which the price of the Distribution Shares of that Fund goes ex-dividend. Fractional Shares will be rounded to three decimal places. No entry charge will be payable. Investors not wishing to use this reinvestment facility should complete the appropriate section of the application form. In the event that cash dividends are payable they will be paid to holders of registered Distribution Shares who have elected to receive dividends in cash, payment normally being made by transfer of funds. However, the Board of Directors may decide that any dividend below USD 50 (or currency equivalent) will be reinvested in further Shares of the same Share Class instead of being paid directly to the Investors. Dividends to be paid in any other freely exchangeable currency will be converted at the Investor's expense.

When dividends of USD 250 (or currency equivalent) or less cannot be paid to a registered Investor due to missing data or payment unable to be effected, the Company or the Management Company reserves the right to automatically re-invest such dividends and any subsequent dividends to be paid in the purchase of further Distribution Shares of the Fund and Share Class to which such dividends relate until receipt of instructions in good order from the Investor.

If a dividend has been declared but not paid within a period of five (5) years, the Company will, as it is entitled to do under the laws of the Grand Duchy of Luxembourg, declare the dividend forfeited and such unpaid dividend will accrue for the benefit of the relevant Fund.

In respect of each dividend declared, the Board of Directors and the Management Company may determine if, and to what extent, such dividend is to be paid out of realised and unrealised capital gains regardless of capital losses, increased or decreased, as the case may be, by the portion of investment income and capital gains attributable to Shares issued and to Shares redeemed.

It should be remembered that dividend distributions are not guaranteed, that the Funds do not pay interest and that the price of Shares in the Funds and any income earned on the Shares may go down as well as up. It should also be remembered that any dividend distribution lowers the value of the Shares in the Funds by the amount of the distribution. Future earnings and investment performance can be affected by many factors, including changes in exchange rates, not necessarily within the control of the Company, its Board of Directors, officers, the Management Company or any other person. No guarantees as to future performance of, or future return from, the Company can be given by the Company itself, or by any Director or officer of the Company, by the Management Company by Franklin Templeton Investments, or any of its worldwide affiliates, or by any of their directors, officers or employees.

Equalisation of Income

The Funds use an accounting practice known as equalisation, by which a portion of the proceeds from issues and the costs of sale of Shares, equivalent on a per Share basis to the amount of undistributed investment income on the date of the transaction, is credited or charged to undistributed income. As a result, undistributed investment income per Share is unaffected by issues or redemptions of Shares. However, in respect of any Fund offering only Accumulation Shares, the Board of Directors reserves the right not to apply equalisation.

MANAGEMENT COMPANY REMUNERATION

Franklin Templeton International Services S.à r.l., for performing as Management Company, registrar and transfer, corporate, domiciliary and administrative functions for the Company will receive as remuneration from the Company an annual fee of up to 0.20% of the Net Asset Value of the relevant Share Class and a fixed amount per year to cover part of its organisational expenses. Such remuneration will be calculated and accrued daily and will be paid monthly in arrears.

INVESTMENT MANAGEMENT FEES

The Management Company receives from the Company a monthly investment management fee equivalent to a certain percentage per annum of each Fund's adjusted daily net assets during the year. Details of investment management fees are provided in Appendix E. The Investment Manager will be remunerated by the Management Company out of the investment management fee received from the Company.

The Management Company and/or the Investment Manager may, from time to time, pay a part of the investment management fee to various sub-advisers, sub-distributors, intermediaries, brokers, professional investors and/or similar entities, which may or may not be part of Franklin Templeton Investments. Such payments are intended to compensate such sub-distributors, brokers or other intermediaries for providing distribution or other services to the Investors, including but not limited to the enhancement of the communication of ongoing information to Investors, the transaction processing or other shareholder and/or administrative services. Any request for additional information regarding any such payments should be addressed by the Investors to their relevant intermediaries.

Consistent with obtaining best execution, brokerage commissions on portfolio transactions for the Company may be directed by the Investment Manager to Broker/Dealers in recognition of research services furnished by them as well as for services rendered in the execution of orders by such Broker/Dealers. The receipt of investment research and information and related services permits the Investment Manager to supplement its own research and analysis and makes available to them the views and information of individuals and research staffs of other firms. Such services do not include travel, accommodation, entertainment, general administrative goods or services, general office equipment or premises, membership fees, employee salaries or direct money payment, which are paid by the Investment Manager.

The Investment Manager may enter, with Broker/Dealers that are entities and not individuals, into soft commission arrangements only where there is a direct and identifiable benefit to the clients of the Investment Manager, including the Company and the Management Company, and where the Investment Manager are satisfied that the transactions generating the soft commissions are made in good faith, in strict compliance with applicable regulatory requirements and in the best interest of the

Company. Any such arrangement must be made by the Investment Manager on terms commensurate with best market practice. The use of soft commissions shall be disclosed in the periodic reports.

OTHER COMPANY CHARGES AND EXPENSES

When and if applicable, the Principal Distributor may be entitled to receive an entry charge calculated as a percentage of the total amount invested, as further described in the section "Share Classes". The entry charge shall in no case exceed the maximum permitted by the laws, regulations and practice of any country where the Shares are sold.

The Principal Distributor may enter into contractual arrangements with various sub-distributors, intermediaries, Broker/Dealers and/or professional investors for the distribution of Shares outside the United States of America. Payments of fees or commissions to various sub-distributors, Broker/Dealers or other intermediaries may be made out of the fees normally paid to the Principal Distributor, when such payments are expected to enhance the quality of the distribution or other services provided to the Investors, including but not limited to the improvement of the communication of ongoing information to Investors, the transaction processing or other shareholder and/or administrative services.

As remuneration for the services rendered to the Company as Depositary, J.P. Morgan Bank Luxembourg S.A. will receive an annual fee depending on the nature of the investments of the different Funds in a range from 0.01% to 0.14% of the Net Asset Value of the assets of the different Funds, with possible higher depositary annual fees for (i) those Funds of the Company the investment objectives and policies of which provide for investments in equity securities of issuers in developing countries and (ii) newly created Funds whose assets have not reached the expected level of assets for the application of the above range yet, as reflected in more detail in the Funds' relevant total expense ratio (TER) and in the Company financial reports and made available at the registered office of the Management Company. Such fee will be calculated and accrued daily and will be paid monthly in arrears to the Depositary by the Company.

The Company bears its other operational costs including, but not limited to, the costs of buying and selling underlying securities, governmental and regulatory charges, legal and auditing fees, insurance premiums, interest charges, reporting and publication expenses, postage, telephone and facsimile expenses. All expenses are estimated and accrued daily in the calculation of the Net Asset Value of each Fund. The Company may, from time to time, pay certain fees to the Management Company for onward allocation to various sub-distributors, intermediaries, Broker/Dealers and/or professional investors relating to placing certain Funds on sales platforms designed to bring about a wider distribution of Fund Shares. Such costs would only be allocated among the Funds placed on such platforms.

All charges and expenses pursuant to the above are exclusive of value added taxes or other taxes chargeable thereon, which should be paid by the Fund as required.

Such Other Company Charges and Expenses do not include normal banking and brokerage fees and commissions on transactions relating to the assets and liabilities of the Company as well as any reasonable out-of-pocket expenses incurred in connection with the Company, and chargeable to the Company and fees for other services as agreed from time to time. The amounts effectively paid will be shown in the Company's financial statements.

TAXATION OF THE COMPANY

The following information is based on the laws, regulations, decisions and practice currently in force in the Grand Duchy of Luxembourg and is subject to changes therein, possibly with retrospective effect. This summary does not purport to be a comprehensive description of all Luxembourg tax laws and Luxembourg tax considerations that may be relevant to a decision to invest in, own, hold, or dispose of Shares and is not intended as tax advice to any particular Investor or potential Investor. This summary does not describe any tax consequences arising under the laws of any state, locality or other taxing jurisdiction other than the Grand Duchy of Luxembourg.

The Company is not liable in the Grand Duchy of Luxembourg to any tax on its profits or income and is not subject to the Grand Duchy of Luxembourg's net wealth tax.

The Company, however, is liable in the Grand Duchy of Luxembourg to an annual subscription tax of 0.01% per annum of its Net Asset Value, such tax being payable quarterly on the basis of the value of the net assets of the Company at the end of the relevant calendar quarter. This tax is not applicable for the portion of the assets of a Fund invested in other undertakings for collective investment which have been already subject to such tax.

No stamp duty or other tax is payable in the Grand Duchy of Luxembourg on the issue of the Shares in the Company. A EUR 75 registration duty is to be paid upon incorporation and each time the Articles of the Company are amended.

Under current laws and practice, no capital gains tax is payable in the Grand Duchy of Luxembourg on the realised or unrealised capital appreciation of the assets of the Company.

The Company is registered for Value Added Tax in the Grand Duchy of Luxembourg and subject to account for Value Added Tax in accordance with applicable laws.

Investment income received or capital gains realised by the Company may be subject to tax in the countries of origin at varying rates. The Company may benefit in certain circumstances from double taxation treaties, which the Grand Duchy of Luxembourg has concluded with other countries.

Withholding Tax

Distributions made by the Company are not subject to withholding tax in the Grand Duchy of Luxembourg.

TAXATION OF INVESTORS

Investors are currently not subject to any capital gains, income, withholding, gift, estate, inheritance or other taxes in the Grand Duchy of Luxembourg (except for Investors domiciled, resident or having a permanent establishment in the Grand Duchy of Luxembourg).

Investors should inform themselves of and, when appropriate, consult their professional advisors on the possible tax consequences of purchasing, buying, holding or disposing of Shares under the laws of their country of citizenship, residence, domicile or incorporation.

Automatic Exchange of Financial Account Information

On 29 October 2014, the Grand Duchy of Luxembourg signed the multilateral competent authority agreement (the "MCAA") on the implementation of a common reporting standard for the automatic exchange of financial account information. By signing the MCAA, Luxembourg has agreed to implement regulations to enable the adoption of automatic exchange of information with other MCAA signatory countries. The first exchange of information will take place in 2017, in relation to accounts held in the 2016 calendar year.

On 9 December 2014, the European Council adopted Directive 2014/107/EU in relation to the administrative cooperation in the field of direct taxation. Directive 2014/107/EU provides for the automatic exchange of account information between Member States of the European Union ("EU Member States"), with reporting commencing in 2017 in relation to accounts held in the 2016 calendar year. Directive 2014/107/EU has been implemented in the Grand Duchy of Luxembourg by the law of 18 December 2015 relating to the automatic exchange of financial account information in tax matters (the "2015 Law"), which is effective from 1 January 2016.

Investors are hereby notified that the Company may be required by Luxembourg law to report details of specified accounts of account holders resident in EU Member States or MCAA signatory jurisdictions. The Luxembourg Tax Authorities may share such account data in accordance with Directive 2014/107/EU and the MCAA with the Tax Authorities of other EU Member States and MCAA signatory jurisdictions, where the account holder is tax resident. The information which may be reported includes, in the case of an individual, the reportable person's name, address, tax identification number, date and place of birth, balance of the account and the total gross amount paid or credited to the account in respect of the relevant reporting period.

The foregoing is only a summary of the implications of the Directive 2014/107/EU, the MCAA and the 2015 Law. The summary is based on the current interpretation thereof and does not purport to be complete in all respects. It does not constitute investment or tax advice and Investors should therefore seek advice from their financial or tax adviser on the full implications for themselves of the Directive 2014/107/EU, the MCAA and the 2015 Law.

FATCA

The Foreign Account Tax Compliance Act ("FATCA"), which is an amendment to the U.S. Internal Revenue Code, was enacted in the United States in 2010 and many of the operative provisions became effective on 1 July 2014. Generally, FATCA requires financial institutions outside the US ("foreign financial institutions" or "FFIs") to provide the U.S. Internal Revenue Service ("IRS") with information about financial accounts held directly or indirectly by certain specified US persons. A 30% withholding tax is imposed on certain types of US source income paid to an FFI that fails to comply with FATCA. On 28 March 2014, the Grand Duchy of Luxembourg entered into a Model 1 Intergovernmental Agreement ("IGA") with the United States of America and a memorandum of understanding in respect thereof. The Company hence has to comply with such Luxembourg IGA, as implemented into Luxembourg law by the law of 24 July 2015 relating to FATCA (the "FATCA Law") in order to comply with the provisions of FATCA rather than directly complying with the US Treasury Regulations implementing FATCA. Under the FATCA Law and the Luxembourg IGA, the Company will be required to collect information aiming to identify its direct and indirect Shareholders that are US Persons for FATCA purposes ("reportable accounts"). Any such information on reportable accounts provided to the Company will be shared with the Luxembourg tax authorities which will exchange that information on an automatic basis with the Government of the United States of America pursuant to Article 28 of the convention between the Government of the United States of America and the Government of the Grand Duchy of Luxembourg for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes in Income and Capital, entered into in Luxembourg on 3 April 1996. The Company intends to comply with the provisions of the FATCA Law and the Luxembourg IGA to be deemed compliant with FATCA and will thus not be subject to the 30% withholding tax with respect to its share of any such payments attributable to actual and deemed U.S. investments of the Company. The Company will continually assess the extent of the requirements that FATCA and notably the FATCA Law place upon it.

To ensure the Company's compliance with FATCA, the FATCA Law and the Luxembourg IGA in accordance with the foregoing, Franklin Templeton International Services S.à r.l., in its capacity as the Company's Management Company, may:

- a) request information or documentation, including W-8 tax forms, a Global Intermediary Identification Number, if applicable, or any other valid evidence of a Shareholder's FATCA registration with the IRS or a corresponding exemption, in order to ascertain such Shareholder's FATCA status;
- b) report information concerning a Shareholder and his account holding in the Company to the Luxembourg tax authorities if such account is deemed a US reportable account under the FATCA Law and the Luxembourg IGA;
- c) report information to the Luxembourg tax authorities concerning payments to account holders with the FATCA status of non-participating foreign financial institution;
- d) deduct applicable US withholding taxes from certain payments made to a Shareholder by or on behalf of the Company in accordance with FATCA, the FATCA Law and the Luxembourg IGA, if applicable, from 2017 or later;
- e) divulge any such personal information to any immediate payer of certain U.S. source income as may be required for withholding and reporting to occur with respect to the payment of such income.

MEETINGS AND REPORTS

The Annual General Meeting is held at the registered office of the Company on the last Business Day of September in each year at 2.30 p.m. CET. For all general meetings of Shareholders notices will be sent to the registered Shareholders by post at least 8 days prior to the meeting at their address in the register of Shareholders. Such notices may also be made available on the Internet site as the Board of Directors shall from time to time determine. Notices will be published in the *Recueil Electronique des Sociétés et Associations* ("RESA") and in a Luxembourg newspaper (if legally required) and in such other newspapers as the Directors may decide. Such notices will include the agenda and specify the time and place of the meeting, the conditions of admission and will refer to the requirements of the laws of the Grand Duchy of Luxembourg with regard to the necessary quorum and majorities required for the meeting. The requirements as to attendance, quorum and majorities at all general meetings will be those laid down in articles 67 and 67-1 of the law of August 10, 1915 (as amended) relating to commercial companies and in the Articles of the Company.

The audited annual reports will be available on the following Franklin Templeton Investments Internet site, <http://www.franklintempleton.lu>, or may be obtained upon request at the registered office of the Company and the Management Company; they are only distributed to registered Shareholders in those countries where local regulation so requires. The complete audited annual reports are available at the registered office of the Company and the Management Company. The accounting year of the Company ends on 31 March of each year.

INVESTOR VOTING RIGHTS

At any general meetings of the Shareholders of the Company, each Shareholder will be entitled to one vote for each whole Share held, whatever Share Class and regardless of the Net Asset Value per Share within the Share Class(es).

A Shareholder of any particular Fund or Share Class will be entitled at any separate meeting of the Shareholders of that Fund or Share Class to one vote for each whole Share of that Fund or Share Class held, whatever Class and regardless of the Net Asset Value per Share within the Share Class(es).

In the case of joint Shareholders, only the first named Shareholder may vote, whom the Company may consider to be the representative of all joint Shareholders, except where a Shareholder has been expressly nominated by all joint Shareholders or where a written authority has been given.

FAIR TREATMENT OF INVESTORS

The Management Company has established procedures, arrangements and policies to ensure compliance with the principles of fair treatment of investors. The principles of treating investors fairly include, but are not limited to:

- Acting in the best interests of the Company and of the investors;
- Executing the investment decisions taken for the account of the Company in accordance with the objectives, the investment strategy and the risk profile of the Company;
- Taking all reasonable measures to ensure that orders are executed to obtain the best possible result;
- Preventing from placing the interests of any group of investors above the interests of any other group of investors;

- Ensuring that fair, correct and transparent pricing models and valuation systems are used for the Company managed;
- Preventing undue costs being charged to the Company and investors.

The Management Company maintains and operates organizational, procedural and administrative arrangements and implements policies and procedures designed to manage actual and potential conflicts of interest.

INFORMATION AND DOCUMENTS MADE AVAILABLE TO SHAREHOLDERS

Copies of the Articles, the current Issuing Document and the latest annual report may be obtained by Shareholders free of charge during normal office hours at the registered office of the Company and of the Management Company. The Articles shall be deemed to form part of this Issuing Document.

Pursuant to the AIFMD, the following information will be made available to Shareholders in the annual report:

- the percentage of each Fund's assets which will be subject to special arrangements arising from their illiquid nature, including an overview of any special arrangements in place, the valuation methodology applied to assets which are subject to such arrangements and how management fees will apply to these assets;
- the current risk profile of each Fund, including:
 - the measures used to assess the sensitivity of a Fund's portfolio to the most relevant risks to which that Fund is or could be exposed;
 - if risk limits set by the Management Company have been or are likely to be exceeded and, where these risk limits have been exceeded, a description of the circumstances and the remedial measures taken; and
- the total amount of Leverage employed by each Fund calculated in accordance with the Gross and Commitment Methods;
- any material changes to the information above.

Further information regarding the risk management process and liquidity management systems and procedures, including the measures used to assess the sensitivity of a Fund's portfolio to the most relevant risks to which that Fund is or could be exposed, can be found upon request at the registered office of the Management Company.

The information to be made available to Shareholders pursuant to Regulation EU 2015/2365 of 25 November 2015 on transparency of securities financing transactions and reuse and amending Regulation (EU) No 648/2012 will be available upon request at the registered office of the Management Company.

Shareholders will be informed of any change to the information above without undue delay by way of update to this Issuing Document. Where required, such change will be preceded by notification to Shareholders.

It is intended that Shareholders will be notified immediately of any material changes to the liquidity management process and procedures, of the suspension of redemptions or activation of similar special liquidity arrangements, as well as any change to the maximum level of Leverage which a Fund may employ.

Side letters may be negotiated with specific Investors when (i) the investment size reaches a certain threshold, whereupon particular financial terms deviating from those currently disclosed in the Prospectus may be agreed; and/or (ii) the Investor is required to perform portfolio analytics, including, but not limited to, risk analysis/asset allocation purposes or is required to disclose non-public information in advance in order to comply with either a regulatory or audit request. The nature and scope of the side letters may vary between Investors but essentially these arrangements mainly consist of (i) particular fee treatments in relation to specific significant investments; or (ii) early disclosure of non-public portfolio information through non-disclosure agreements. As of the date of this Prospectus, side letter arrangements have been entered into with certain Investors in relation to the Fund. Information about any preferential treatment granted to certain investors is available at the registered office of the Company to the extent and as required by the AIFMD.

All information to be provided to investors under Regulation 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse ("Regulation 2015/2365") including a general description of the securities financing transactions and total return swaps used by the Funds (if any) or that the Funds may use and the rationale for their use as well as any other data provided for in Section B of the Annex to Regulation 2015/2365 will be made available at the registered office of the Company and will be sent to investors upon request.

PUBLICATION OF PRICES AND PAST PERFORMANCE INFORMATION

The latest NAV as well as past performance information for the Company will be available from the website: <http://www.franklintempleton.lu> or during normal office hours at the registered office of the Company or the Management Company.

QUERIES AND COMPLAINTS

Any person who would like to receive further information regarding the Company or who wishes to make a complaint about the operation of the Company should contact Franklin Templeton International Services S.à r.l., 8A, Rue Albert Borschette, L-1246 Luxembourg, Grand Duchy of Luxembourg.

APPENDIX A

STANDARD DEALING CUT-OFF TIMES

Unless otherwise disclosed in a local supplement to the Issuing Document, any agreement or marketing material, requests for purchase, sale or switch of Shares (the "Transactions") received by one of the Franklin Templeton Investments offices listed below on a Dealing Day before the appropriate Dealing Cut-Off Time will be dealt on that day on the basis of the Net Asset Value per Share of the relevant Class calculated on that day.

Luxembourg office

Main Countries covered	Dealing Cut-Off Time for transactions in the currencies of the relevant Share Class	Dealing Cut-Off Time for transactions in other acceptable currencies than the currency of the relevant Share Class	Dealing Cut-Off Time for transactions in Hedged Share Classes
Any country where the Company is registered for distribution, unless mentioned below under another local Franklin Templeton Investments office.	18:00 CET	18:00 CET	18:00 CET

Frankfurt office

Main Countries covered	Dealing Cut-Off Time for transactions in the currencies of the relevant Share Class	Dealing Cut-Off Time for transactions in other acceptable currencies than the currency of the relevant Share Class	Dealing Cut-Off Time for transactions in relating to the Hedged Classes
Austria, Germany	16:00 CET	16:00 CET	16:00 CET

Electronic Dealing

(Swift and Direct Electronic link with Franklin Templeton Investments)

Main Countries covered	Dealing Cut-Off Time for transactions in the currencies of the relevant Share Class	Dealing Cut-Off Time for transactions in other acceptable currencies than the currency of the relevant Share Class	Dealing Cut-Off Time for transactions in Hedged Classes
Any Country where the Shares of the Company can be distributed	22:00 CET	18:00 CET	18:00 CET

APPENDIX B

INVESTMENT RESTRICTIONS

Each Fund may invest its assets with the purpose of spreading investment risks and affording its Shareholders the results of the management of their assets in accordance with the Law of 13 February 2007.

The Board of Directors has adopted the following restrictions relating to the investment of the Company's assets and its activities. These restrictions and policies may be amended from time to time by the Board of Directors if and as they shall deem it to be in the best interests of the Company in which case this Issuing Document will be updated.

A. The Board of Directors has resolved that:

1. A Fund shall in principle not invest more than 30% of its assets in securities of the same kind issued by the same issuer.

This rule shall however not apply:

- to investments in securities issued or guaranteed by a member State of the OECD, or by its regional or local authorities or by public international institutions or bodies with a European, regional or worldwide nature;
- to investments in underlying UCIs offering comparable safeguards in terms of risk spreading to those applicable to specialised investment funds subject to the SIF Law.

For the application of this restriction, each compartment of an underlying UCI with multiple compartments shall be considered as a separate issuer, provided that the principle of segregation towards third parties at the level of the various compartments is ensured.

2. A Fund may hold physical short positions provided it is explicitly stated in its investment policy and under the condition that the Fund does not hold such positions equivalent to more than 30% of its assets on securities of the same kind issued by the same issuer.
3. Unless otherwise provided in the investment policy of a specific Fund, each Fund will not invest more than 10% of its net assets in shares or units issued by other Investment Funds.
4. When using financial derivative instruments, a comparable level of risk spreading must be observed by a Fund through an appropriate diversification of the underlying assets. To the same extent, the counterparty risk in an over-the-counter operation must, if necessary, be limited by taking into consideration the quality and the qualification of such counterparty.
5. A Fund shall in principle not hold cash or cash equivalent instruments with one single bank corresponding to more than 30% of its assets.

The Company need not comply with the investment limit percentages laid down above when exercising subscription rights attached to securities which form part of the assets of a Fund.

While ensuring observance of the principle of risk spreading across issuers, asset classes, and sector, the Funds may derogate from the diversification restrictions above for a period of six months following the date of the first Net Asset Value per Share calculation.

If the percentage limitations set out above are exceeded for reasons beyond the control of the Funds, or for any reasons whatsoever, the investments must be brought back within the designated percentage limits within a reasonable period, taking due account of the Shareholders' interests.

6. A Fund may not make investments for the purpose of exercising control or management.
7. The Company may not borrow, on behalf of a Fund, other than borrowings which in the aggregate do not exceed 10% of the total net assets of such Fund which borrowings may, however, only be made on a temporary basis and in line with usual market conditions.
8. Any Fund (the "Investing Fund") may subscribe, acquire and/or hold securities to be issued or issued by one or more Fund (each a "Target Fund") without the Company being, subject to the requirements of the law of August 10, 1915 (as amended) relating to commercial companies with respect to the subscription, acquisition and/or the holding by a company of its own shares; under the condition however that:
 - the Investing Fund may not invest more than 10% (or 20% for Funds which are allowed to invest more than 10% in aggregate in Investment Funds) of its net asset value in a single Target Fund; and
 - the Target Fund(s) do(es) not, in turn, invest in the Investing Fund invested in this (these) Target Fund (s); and
 - the investment policy(ies) of the Target Fund(s) whose acquisition is contemplated does not allow such Target Fund(s) to invest more than 10% of its(their) net asset value in other Target Fund(s); and
 - voting rights, if any, attaching to the shares of the Target Fund(s) held by the Investing Fund are suspended for as long as they are held by the Investing Fund concerned and without prejudice to the appropriate processing in the accounts and the periodic reports; and
 - the Target Fund(s) will neither levy a sales nor a redemption charge on the Investing Fund; and
 - in any event, for as long as these securities are held by the Investing Fund, their value will not be taken into consideration for the calculation of the net assets of the Company for the purposes of verifying the minimum threshold of the net assets imposed by the Law of 13 February 2007.

The Board of Directors has further resolved that the Company may, for the purpose of efficient portfolio management of its assets or for providing protection against exchange rate risks under the conditions and within the limits laid down by law, regulation and administrative practice and as described below, employ techniques and instruments relating to transferable securities.

B. Securities Lending Transactions

The Company may participate in securities lending transactions only within the framework of a standardised lending programme organised by a recognised securities clearing body or by a highly

rated financial institution specialised in this type of transactions.

In relation to such lending transactions, the Company must in principle receive for the Fund concerned security of a value which at the time of the conclusion of the lending agreement must be at least equal to the value of the global value of the securities lent.

The Company may not enter into securities lending transactions unless such lending is fully and continuously secured by the pledge of cash and/or securities issued or guaranteed by an OECD member state or by local authorities of an OECD member state or by supranational institutions or organisations, with EU, regional or world-wide scope, or by a guarantee of a highly rated financial institution and blocked in favour of the Company until the termination of the lending contract.

Lending transactions may not be entered into in respect of more than 50% of the total value of the portfolio of each Fund. Such limitation shall not apply where the Company has the right at any time to terminate the lending contract and obtain restitution of the securities lent.

Lending transactions may not extend beyond a period of 30 days, except for lending transactions where the securities may be reclaimed at any time by the Company.

C. Repurchase Agreements

The Company may enter into repurchase agreements for the purchase or sale of securities where the counterparty is a highly rated financial institution specialised in such transactions. Where the Company is the purchaser, the securities purchased shall be held by or on behalf of the Company for the duration of the repurchase agreement. The Company will limit the total value of securities subject to repurchase agreements in order to ensure it can fulfil its redemption obligations at any time.

If the limits referred to in the preceding paragraphs are exceeded for reasons beyond the control of the Company, or as a result of the exercise of subscription rights, the Board of Directors must, as a priority, take all steps as necessary within a reasonable period of time to rectify that situation, taking due account of the interests of its Shareholders.

D. Leverage

Leverage, when used in this Issuing Document, means any method by which the Management Company may increase the Exposure of a Fund over and above the Exposure triggered by its investments held directly, whether by borrowing cash or securities, or from Leverage embedded in derivative positions, or by other means. The following sources of Leverage can be used when managing a Fund:

- a) cash borrowing;
- b) financial derivative instruments; and
- c) reinvestment of cash collateral in the context of securities lending.

The Management Company is required to calculate and monitor the level of Leverage, generated using the means described above, where Leverage is expressed as a ratio between the Exposure of the Fund and its Net Asset Value (Exposure/NAV), calculated using both the Gross Method and the Commitment Method.

Under the Gross Method, the Exposure of a Fund is calculated as follows:

- a) include the sum of the absolute values of all positions held;
- b) exclude cash and cash equivalents which are highly liquid investments held in the base currency of the Fund, that are readily convertible to a known amount of cash, are subject to an insignificant risk of change in value and provide a return no greater than the rate of a three month high quality bond;
- c) convert each derivative instrument into an equivalent position in the underlying asset;
- d) exclude cash borrowings that remain in cash or cash equivalents and where the amounts payable are known;
- e) include Exposures resulting from the reinvestment of cash borrowings, expressed as the higher of the market value of the investment realised or the total amount of cash borrowed;
- f) include positions within repurchase or reverse repurchase agreements and securities lending or borrowing or other similar arrangements.

Under the Commitment Method, the Exposure of a Fund is calculated as follows:

- a) include the sum of absolute values of all the positions held;
- b) convert each derivative instrument position into an equivalent position in the underlying asset;
- c) apply netting and hedging arrangements (further explanation provided below);
- d) calculate the Exposure created through the reinvestment of borrowings where such reinvestment increases the Exposure of the AIF or UCI;
- e) include other arrangements related to convertible bonds, repurchase / reverse repurchase agreements, and securities lending or borrowing arrangements.

Netting arrangements shall include combinations of trades on derivative instruments or security positions which refer to the same underlying asset, irrespective – in the case of derivative instruments – of the maturity date of the derivative instruments and where those trades on derivative instruments or security positions are concluded with the sole aim of eliminating the risks linked to positions taken through the other derivative instruments or security positions.

Hedging arrangements shall include combinations of trades on derivative instruments or security positions which do not necessarily refer to the same underlying asset and where those trades on derivative instruments or security positions are concluded with the sole aim of offsetting risks linked to positions taken through the other derivative instruments or security positions.

Further information on calculating Exposure and the resulting Leverage ratios that result from using the Commitment and Gross Methods can be found at the registered office of the Management Company.

The maximum level of Leverage, expressed as a ratio of market Exposure related to underlying investments as well as any incremental Exposure which a Fund may employ, calculated in accordance with the Gross and Commitment Methods, is stated for each Fund in "Fund Information, Objectives and Investment Policies" of this Issuing Document. In addition, the Leverage ratio calculated using both the Gross and Commitment Methods will be disclosed in the Company's annual report.

As calculations obtained by using the Gross Method do not take into account whether a particular financial derivative instrument increases or decreases investment risk (since hedging and netting arrangements are not included), they may not be representative of the actual level of investment risk within a Fund.

E. Additional local restrictions

1. If and for so long as the following Funds accept investment by insurance undertakings subject to the provisions of the German law on the supervision of insurance undertakings (Versicherungsaufsichtsgesetz - VAG), the Funds will follow the following additional restrictions (subject to any more stringent restrictions as set out in the investment policy of the relevant Funds):

- (i) no debt securities that are rated B minus and below by Standard & Poor's and/or equivalent if rated by other ratings agencies. In this respect, if two different ratings are used, only the lesser will be considered and if three different ratings are used, then the lesser of the two better ratings will be considered. If at any time the Fund's assets are no longer compliant with this rating requirements due to downgrade, they shall be sold, at the best interest of the investors, within 6 months' time (unless upgraded during this period). However, should the downgraded securities represent less than 3% of the value of the total assets, they may be tolerated by the Investment Manager provided that the interests of investors are not impaired (if unrated, securities must be declared to be of comparable quality by the Investment Manager),
- (ii) no asset-backed securities rated below investment grade,
- (iii) no more than 30% of its net assets in instruments falling within the scope of Sec. 198 of the German Capital Investment Code (KAGB), which means:
 - 1. securities which are not admitted to trading on an exchange or admitted to another organised market or included in such market, but otherwise meet the criteria of Article 2 paragraph 1 lits. a) to c) number ii, lit. d) number ii and lits. e) to g) of Directive 2007/16/EC,
 - 2. money market instruments of issuers which do not satisfy the requirements of § 194 KAGB, provided that the money market instruments meet the requirements of Article 4 paras. 1 and 2 of Directive 2007/16/EC,
 - 3. shares which meet the requirements of § 193 paragraph 1 nos. 3 and 4 KAGB,
 - 4. receivables from money loans not subject to § 194 KAGB, which are portions of an overall loan granted by a third party and for which a note has been issued (borrowers' note loan), provided that these receivables may be assigned at least twice following their acquisition for the fund and the loan was granted.
- (iv) no more than 30% of its net assets in uncertificated loan receivables.
- (v) no more than 20% of its net assets in securities that (i) are not admitted to the official market on an exchange in a member state of the European Union or of the EEA and (ii) are not admitted to or included in another organised market in these states and (iii) are not admitted to or included in one of the markets listed in Appendix F (collectively the "Eligible Markets"):

1) Templeton Global Multisector Plus II SIF

2. The following Fund will not invest in repurchase agreements:

1) Templeton Global Multisector Plus II SIF

3. From January 1, 2018 onwards, the following Fund(s) (i) will only invest into UCITS investment funds, (ii) will, at any time, hold more than 3 assets with different investment risk and (iii) will not invest via a subsidiary:

1) Templeton Global Multisector Plus II SIF

From January 1, 2018 onwards, for the following Fund(s), (i) their participation in a corporation will be less than 10% of the capital of such a corporation and (ii) they will not invest more than 20% of their net asset value in equity and equity-related securities of corporations which are not admitted for trade on a stock exchange nor admitted to any other regulated market:

- 1) Templeton Global Multisector Plus II SIF

APPENDIX C

ADDITIONAL INFORMATION

1. The Company is an investment company with limited liability organised as a *société anonyme* under the laws of the Grand Duchy of Luxembourg and is qualified as a *société d'investissement à capital variable*. - *fonds d'investissement spécialisé*. The Company was incorporated in Luxembourg on 16 June 2016, for an undetermined period. The Articles were published in the RESA on 24 June 2016. The Company is registered with the *Registre de Commerce et des Sociétés de et à Luxembourg*, under number B-206970. Copies of the Articles are available for inspection at the *Registre de Commerce et des Sociétés de et à Luxembourg* and the registered office of the Company and the Management Company.
2. The minimum capital of the Company is 1,250,000 euro or the equivalent in US Dollars, which must be reached within twelve months of the authorization of the Company.
3. The Company may be dissolved upon decision of an extraordinary general meeting of its Shareholders taken in the same conditions that are required by law to amend the Articles. If the capital of the Company falls below two-thirds of the minimum capital, the Board of Directors must submit the question of the dissolution of the Company to a general meeting for which no quorum shall be prescribed and which shall be decided by a simple majority of the holders of Shares represented at the meeting. If the capital of the Company falls below one fourth of the minimum capital, the Board of Directors must submit the question of the dissolution of the Company to a general meeting for which no quorum shall be prescribed; dissolution may be resolved by Shareholders holding one-fourth of the Shares at the meeting. If the Company should be liquidated, its liquidation will be carried out in accordance with the provisions of the laws of the Grand Duchy of Luxembourg which specify the steps to be taken to enable Shareholders to participate in the liquidation distribution(s) and in that connection provides for deposit in escrow at the *Caisse de Consignation* of any such amounts which have not been promptly claimed by any Shareholders. Amounts not claimed from escrow within the prescribed period would be liable to be forfeited in accordance with the provisions of the laws of the Grand Duchy of Luxembourg. Any amount transferred to the *Caisse de Consignation* is subject to a "*taxe de consignation*" and as a consequence, the initial amount might not be refunded.
4. The Board of Directors may decide to liquidate a Fund if the net assets of such Fund fall below USD 50 million or if a change in the economic or political situation relating to the Fund concerned would justify such liquidation, or if required by the interests of the Shareholders of the Fund concerned. The decision of the liquidation will be published or notified, if appropriate, to the Shareholders by the Company prior to the effective date of the liquidation and the publication/notification will indicate the reasons for, and the procedures of, the liquidation operations. Unless the Board of Directors otherwise decides in the interests of, or to keep equal treatment between, the Shareholders, the Shareholders of the Fund concerned may continue to instruct the sale or switch of their Shares. Assets which could not be distributed to their beneficiaries upon the close of the liquidation period of the Fund will be deposited with the *Caisse de Consignation* on behalf of their beneficiaries. Any amount transferred to the *Caisse de Consignation* is subject to a "*taxe de consignation*" and as a consequence, the initial amount might not be refunded. If not claimed, they shall be forfeited in accordance with Luxembourg law.

Under the same circumstances as described in the preceding paragraph, the Board of Directors may decide to close one Fund by contribution into another Fund or into another undertaking for collective

investment governed by the laws of the Grand Duchy of Luxembourg. Such decision will be published or notified, if appropriate, in the same manner as described in the preceding paragraph and, in addition, the publication/notification will contain information in relation to the other Fund or other undertaking for collective investment. Such publication/notification will be made within one month before the date on which the merger becomes effective in order to enable Shareholders to request sale or switch of their Shares, free of charge, before the operation involving contributions into another Fund or other undertaking for collective investment becomes effective.

If the circumstances so require, the provisions described above apply *mutatis mutandis* to closure of a Share Class and to contributions of Share Class existing within a Fund into another Fund or into another undertaking for collective investment governed by the Law of 13 February 2007.

In the event that the Board of Directors determines that it is required by the interests of the Shareholders of the relevant Fund or that a change in the economic or political situation relating to the Fund concerned has occurred which would justify it, the reorganization of one Fund by means of a division into two or more Funds, may be decided by the Board of Directors. Such decision will be published or notified, if appropriate, in the same manner as described above and, in addition, the publication/notification will contain information in relation to the two or more new Funds. Such publication/notification will be made effective one month before the date on which the reorganization becomes effective in order to enable the shareholders to request redemption of their shares, free of charge before the operation involving division into two or more Funds becomes effective.

Where the Board of Directors does not have the authority to do so or where the Board of Directors determines that the decision should be put for shareholders' approval, the decision to liquidate, to merge or to reorganise a Fund may be taken at a meeting of shareholders of the Fund to be liquidated, merged or reorganised instead of being taken by the Board of Directors. At such Fund meeting, no quorum shall be required and the decision to liquidate, merge or reorganise must be approved by a simple majority of the votes cast. The decision of the meeting will be notified and/or published by the Company. The decision relating to the merger or the reorganisation of the Fund will be published/notified no later than one month before the effective date of liquidation, merger or reorganization of the Fund in order to enable shareholders to request redemption or switching of their shares, free of charge, before the merger or reorganization of the Fund becomes effective.

The preceding paragraph also applies to a division of Shares of any Share Class.

In the circumstances provided in the first paragraph of point 4, the Board of Directors may also, subject to regulatory approval (if required), to consolidate or split any Share Classes within a Fund. To the extent required by Luxembourg law, such decision will be published or notified, if appropriate, in the same manner as described above and the publication and/or notification will contain information in relation to the proposed split or consolidation. The Board of Directors may also decide to submit the question of the consolidation or split of Share Class to a meeting of holders of such Share Class. No quorum is required for this meeting and decisions are taken by the simple majority of the votes cast.

APPENDIX D

DETERMINATION OF THE NET ASSET VALUE OF SHARES

CALCULATION OF THE NET ASSET VALUE

The Net Asset Value per Share ("NAV") of each Share Class of each Fund shall be expressed in the currency of the relevant Fund or of the relevant Class as a per Share figure, and shall be determined in respect of any Valuation Day by dividing the net assets of the Company corresponding to each Share Class of each Fund, being the value of the assets of the Company corresponding to such Fund less liabilities attributable to such Fund, by the number of Shares then outstanding and shall be rounded up or down to two decimal places as the Board of Directors may decide.

VALUATION

The assets of the Company shall be deemed to include:

- (a) all cash on hand or on deposit, including any interest accrued thereon;
- (b) all bills and demand notes and accounts receivable (including proceeds of securities sold but not delivered);
- (c) all bonds, time notes, shares, stock, debenture stocks, subscription rights, warrants, options, other derivative instruments, units or shares of undertakings for collective investment and other investments and securities owned or contracted for by the Company;
- (d) all stock dividends, cash dividends and cash distributions receivable by the Company and to the extent known by the Company (provided that the Company may make adjustments with regard to fluctuations in the market value of securities caused by trading ex-dividends, ex-rights, or by similar practices);
- (e) all interest accrued on any interest-bearing securities owned by the Company, except to the extent that the same is included or reflected in the principal amount of such security;
- (f) the formation expenses of the Company in so far as the same have not been written off; and
- (g) all other assets of every kind and nature, including prepaid expenses.

Total liabilities include:

- (a) all loans, bills and accounts payable;
- (b) all accrued or payable administrative expenses (including fees payable to the Investment Manager(s), Depositary and corporate agents);
- (c) all known liabilities, present and future, including all matured contractual obligations for payments of money or property, including the amount of any unpaid dividends declared by the Company where the Valuation Day falls on the record date for determination of the person entitled thereto or is subsequent thereto;

- (d) an appropriate provision for future taxes based on capital and income to the Valuation Day, as determined from time to time by the Company, and other provisions, if any, authorised and approved by the Board of Directors covering among others liquidation expenses; and
- (e) all other liabilities of the Company of whatsoever kind and nature except liabilities represented by Shares in the Company. In determining the amount of such liabilities the Company shall take into account all expenses payable by the Company comprising formation expenses, fees payable to the Management Company for the performance of its various services and for those rendered by the Investment Manager, the Depositary, paying agents and permanent representatives in places of registration, any other agent/entity employed by the Company, fees for legal and/or auditing services, printing, reporting and publishing expenses, including the cost of advertising and/or preparing and printing of the prospectuses, explanatory memoranda or registration statements, taxes or governmental charges and all other operating expenses, including the cost of buying and selling assets, interest, bank charges and brokerage commissions, insurance premiums, postage, telephone, telegram, telex, telefax message and facsimile (or other similar means of communication). The Company may calculate administrative and other expenses of a regular or recurring nature on an estimated figure for yearly or other periods in advance, and may accrue the same in equal proportions over any such period.

Foreign exchange hedging may be utilised for the benefit of Hedged Share Classes. As such, cost and related liabilities and/or benefits of such hedging activities shall be for the account of that class only. Accordingly, such costs and related liabilities and/or benefits will be reflected in the Net Asset Value per Share for shares of any such Hedged Share Class. The currency exposures of the assets of the relevant Fund will not be allocated to separate classes. Foreign exchange hedging shall not be used for speculative purposes. The periodic reports of the Company will indicate how hedging transactions have been utilised.

In accordance with the Law of 12 July 2013, the valuation function is performed by the Management Company independently from the portfolio management function.

In determining the NAV of the Company, the Management Company values cash and receivables at their realisable amounts and records interests as accrued and dividends on the ex-dividend date. The Management Company generally utilises two independent pricing services to assist in determining a current market value for each security. If market quotations are readily available for portfolio securities quoted or dealt on a stock exchange, the Management Company will value those securities at their latest available price on said stock exchange (last quoted sale price or official closing price of the day, respectively), or if there is no reported sale, within the range of the most recent bid and ask prices. Securities dealt on an organised market will be valued in a manner as near as possible to that for quoted securities.

The Management Company values over-the-counter portfolio securities acquired by a specific fund in accordance with the investment restrictions set forth in Appendix B above, within the range of the most recent bid and ask prices. If portfolio securities trade both in the over-the-counter market and on a stock exchange, the Fund values them according to the broadest and most representative market as determined by the Board of Directors.

Generally, trading in corporate bonds, government securities or money market instruments is substantially completed each day at various times before the close of the New York Stock Exchange. The value of these securities used in computing the NAV is determined as of such times. Occasionally,

events affecting the values of these securities may occur between the times at which they are determined and the close of the New York Stock Exchange that will not be reflected in the computation of the NAV. The Management Company relies on third party pricing vendors to monitor for events materially affecting the value of these securities during this period. If an event occurs the third party vendors will provide revised values to the Management Company.

The value of securities not quoted or dealt on a stock exchange or an organised market and of securities which are so quoted or dealt in, but in respect of which no price quotation is available or the price quoted is not representative of the securities' fair market value shall be determined by or under the direction of the Management Company. Short-dated debt transferable securities and money market instruments not traded on a regulated exchange are usually valued on an amortised cost basis.

Since the Company may, in accordance with the investment restrictions set forth in Appendix B above, invest in securities that are restricted, unlisted, traded infrequently, thinly traded, or relatively illiquid, there is the possibility of a differential between the last available market prices for one or more of those securities and the latest indications of market values for those securities. The Management Company has procedures to determine the fair value of individual securities and other assets for which market prices are not readily available (such as certain restricted or unlisted securities and private placements) or which may not be reliably priced (such as in the case of trade suspensions or halts, price movement limits set by certain foreign markets, and thinly traded or illiquid securities). Some methods for valuing these securities may include: fundamental analysis (earnings multiple, etc.), matrix pricing, discounts from market prices of similar securities, or discounts applied due to the nature and duration of restrictions on the disposition of the securities.

Units or shares of undertakings for collective investment, including Fund(s) of the Company, shall be valued on the basis of their last available net asset value as reported by such undertakings or in accordance with the principles mentioned above where such securities are listed.

The application of fair value pricing procedures represents a good faith determination based upon specifically applied procedures. There can be no assurance that the Management Company could obtain the fair value assigned to a security if it were able to sell the security at approximately the time at which the Management Company determines the Company's NAV per share.

Trading in securities on foreign securities stock exchanges and over-the-counter markets, such as those in Europe and Asia, may be normally completed well before the New York Stock Exchange closing time on each day that the New York Stock Exchange is open. Trading in European or Far Eastern securities generally, or in a particular country or countries, may not take place on every Valuation Day. Furthermore, trading may take place in various foreign markets on days that are not Valuation Days and on which the Fund's Net Asset Value is not calculated. Thus, the calculation of the Shares' Net Asset Value does not take place contemporaneously with the determination of the prices of many of the portfolio securities used in the calculation and, if events materially affecting the values of these foreign securities occur, the securities will be valued at fair value as determined and approved in good faith by or under the direction of the Management Company.

SWING PRICING ADJUSTMENT

A Fund may suffer reduction of the Net Asset Value per Share due to Investors purchasing, selling and/or switching in and out of the Fund at a price that does not reflect the dealing costs associated with

this Fund's portfolio trades undertaken by the Investment Manager to accommodate cash inflows or outflows.

In order to counter this dilution impact and to protect Shareholders' interests, a swing pricing mechanism may be adopted by the Company as part of its valuation policy.

If on any Valuation Day, the aggregate net investor(s) transactions in Shares of a Fund exceed a pre-determined threshold (which may be close to, or at zero), as determined as a percentage of the net assets of that Fund from time to time by the Board of Directors based on objective criteria, the Net Asset Value per Share may be adjusted upwards or downwards to reflect the costs attributable to net inflows and net outflows respectively. The net inflows and net outflows will be determined by the Company based on the latest available information at the time of calculation of the Net Asset Value.

Investors are advised that the volatility of the Fund's Net Asset Value might not reflect the true portfolio performance as a consequence of the application of swing pricing. Typically, such adjustment will increase the Net Asset Value per Share when there are net inflows into the Fund and decrease the Net Asset Value per Share when there are net outflows. The Net Asset Value per Share of each Share Class in a Fund will be calculated separately but any adjustment will, in percentage terms, affect the Net Asset Value per Share of each Share Class in a Fund identically.

As this adjustment is related to the inflows and outflows of money from the Fund it is not possible to accurately predict whether dilution will occur at any future point in time. Consequently it is also not possible to accurately predict how frequently the Company will need to make such adjustments.

The swing pricing mechanism may be applied across all Funds of the Company. The extent of the price adjustment will be reset by the Company on a periodic basis to reflect an approximation of current dealing and other costs. Such adjustment may vary from Fund to Fund and will not exceed 2% of the original Net Asset Value per Share.

The price adjustment is available on request from the Management Company at its registered office.

SUSPENSION OF CALCULATION OF NET ASSET VALUE

1. The Company may suspend the determination of the Net Asset Value of the Shares of any particular Fund and the purchase and sale of the Shares and the switch of Shares from and to such Fund:
 - (a) during any period when any of the principal stock exchanges or markets on which any substantial portion of the investments of the Company attributable to such Fund from time to time are quoted is closed, or during which dealings therein are restricted or suspended;
 - (b) during the existence of any state of affairs which constitutes an emergency as a result of which disposal or valuation of assets owned by the Company attributable to such Fund would be impracticable;
 - (c) during any breakdown or restriction in the means of communication normally employed in determining the price or value of any of the investments of any particular Fund or the current price or value on any stock exchange or market;

- (d) during any period when the Company is unable to repatriate funds for the purpose of making payments due on sale of Shares of such Fund or any period when the transfer of funds involved in the realisation or acquisition of investments or payments due on sale of Shares cannot, in the opinion of the Board of Directors, be effected at normal rates of exchange; or
 - (e) during any period when the Net Asset Value of Shares of any Fund may not be determined accurately; or
 - (f) during any period when in the opinion of the Directors there exists unusual circumstances where it would be impractical or unfair towards the Shareholders to continue dealing in the Shares of the Company or of any Fund or any other circumstances, or circumstances where a failure to do so might result in the Shareholders or a Fund incurring any liability to taxation or suffering other pecuniary disadvantage or other detriment which the Shareholders or a Fund might not otherwise have suffered; or
 - (g) if the Company or a Fund is being or may be wound-up, on or following the date on which such decision is taken by the Board of Directors or notice is given to Shareholders of a general meeting of Shareholders at which a resolution to wind-up the Company or a Fund is to be proposed; or
 - (h) in the case of a merger, if the Board of Directors deems this to be justified for the protection of the Shareholders; or
 - (i) in the case of a suspension of the calculation of the net asset value of one or several underlying investment funds in which a Fund has invested a substantial portion of assets.
2. Any such suspension shall be publicised, if appropriate, by the Company and/or the Management Company and shall be notified to Shareholders instructing sale or switching of their Shares by the Company at the time of the filing of the written request for such sale or switch.

ALLOCATION OF ASSETS AND LIABILITIES

The Board of Directors shall establish a pool of assets for the Shares of each Fund in the following manner:

1. (a) the proceeds from the issue of Shares of each Class of each Fund shall be applied in the books of the Company to the pool of assets established for that Fund, and the assets and liabilities and income and expenditure attributable thereto shall be applied to such pool;
- (b) where any asset is derived from another asset, such derivative asset shall be applied in the books of the Company to the same pool as the assets from which it was derived and on each revaluation of an asset, the increase or diminution in value shall be applied to the relevant pool;
- (c) where the Company incurs a liability which relates to any asset of a particular pool or to any action taken in connection with an asset of a particular pool, such liability shall be allocated to the relevant pool;
- (d) in the case where any asset or liability of the Company cannot be considered as being

attributable to a particular pool, such asset or liability shall be equally divided between all the pools or, as in so far as justified by the amounts, shall be allocated to the pools pro rata to the net asset value of the relevant pool;

- (e) upon the record date for determination of the person entitled to any dividend declared on the Shares of each Class of any Fund, the Net Asset Value of the Shares of such Fund shall be reduced by the amount of such dividend declared.
2. If there have been created within any Fund two or several Share Classes, the allocation rules set out above shall apply, *mutatis mutandis*, to such Classes.
 3. For the purpose of the calculation of the Net Asset Value, the valuation and the allocation as aforesaid, Shares of the Company to be redeemed shall be treated as existing and taken into account until immediately after the close of business on the Valuation Day, and from time to time, until paid the price therefore, shall be deemed to be a liability of the Company; all investments, cash balances and other assets of the Company expressed in currencies other than the currency of the relevant Fund shall be valued after taking into account the market rate or rates of exchange in force at the date and time for determination of the Net Asset Value of Shares; and effect shall be given on any Valuation Day to any purchases or sales of securities contracted for by the Company on such Valuation Day, to the extent practicable.

APPENDIX E

CHARGES, FEES AND EXPENSES

1. ENTRY CHARGE

Entry Charge

Share Class Overview	Class I	Class X	Class Y
Investor Category	Institutional Investors	Institutional Investors	Institutional Investors
Entry Charge	Nil	Nil	Nil

2. INVESTMENT MANAGEMENT FEES (PER ANNUM)

As Class X Shares and Class Y Shares are, inter alia, designed to accommodate an alternative charging structure whereby the Investor is a client of Franklin Templeton Investments and is charged investment management fees directly by Franklin Templeton Investments, no investment management fees will be payable in respect of Class X Shares and Class Y Shares out of the net assets of the relevant Fund.

The following investment management fees payable to the Management Company apply in respect of the Share Classes as indicated below:

Name of the Fund	Class I	Class X	Class Y
Franklin Templeton Specialised Investment Funds – Templeton Global Bond Plus SIF	0.40%	N/A	N/A
Franklin Templeton Specialised Investment Funds – Templeton Global Multisector Plus SIF	0.40%	N/A	N/A
Franklin Templeton Specialised Investment Funds – Templeton Global Multisector Plus II SIF	0.40%	N/A	N/A
